Wednesday Daily Flash news (Unedited report)

Great time to buy silver around lower side and stay away from other commodities...

Dear Members,

Tuesday volatility was witnessed in grains, softs and metals. Currencies traded both sides and Thirty Year traded negative. Globally markets gained small value but USA market lost value on opening.

Metals gained value as predicted in Asia and European sessions but then profit booking came in when USA open. It was sharp corrections which erased all gain in gold and silver. Base metals acted mix or on both sides. Mining stocks lost some value.

Grains opened sharply higher and some profit booking came in but still they closed in green. Among softs cotton outperformed, coffee witnessed profit booking.

Oil and other energy products traded higher on Tuesday.

Currencies traded mix or on both sides.

We are entering in to Cancer Mars cycle from Today which could be very volatile, expect market, commodities and currencies remain volatile but Mars mainly impact or target few commodities and few markets.

“2021 Financial Prophecies” We entered the most important astro cycle, and it looks like our book is revealing the future amazingly. I am sure most of the buyers must be incredibly happy. I stated that every penny invested in our book will save or earn you millions. *Nature was so kind to narrate 2021, I was merely playing the role of the typist. It is a must have*

book for anyone who has even a small investment in the market.

Watch the important Support & Resistance levels for this week (31st – 4th June 2021):

- Gold, Silver, and Base Metals are moving as predicted. Now gold, silver, copper have achieved a top last week, and the next level for Gold will be \$1883 to \$1948, and Silver \$27.29 to \$29.39. Platinum astro resistance will be \$1233 and support at \$1141.
- Base metals are on fire, Copper’s Astro resistance will be at \$487 and support at \$444. Palladium astro resistance will be \$3043 and support at \$2735. Other base metals like ZINC, NIKCEL, will trade mixed and Palladium should be in your selling list on high side.
- As predicted S&P’s Astro resistance will be \$4278 and on the lower side the important Astro support level will be at 4115. Nasdaq support will be 13403 and astro resistance will be at 13955.
- Oil’s Astro support will be \$63.78 and Astro resistance will be at \$68.88.
- The new level for Natural Gas will be from \$3.15 to \$2.78.
- Bond resistance will be 159-30, and on the lower side 155-00 is the support level.

- Dollar Index has an important Astro resistance at 91.27; and we don't see it closing below \$89.39.
- Euro will have an important astro resistance at 1.2398, Pound 1.4288, Franc 1.1397, Australian dollar 0.7988, and Yen 0.9708.
- In the short-term if Dollar index starts trading below 89.38 then we may see USD/Rand 13.71, USD/Peso 19.52, USD/REAL 5.00. Indian Rupee may not move that much but it can still test 72.28.
- Sugar has an astro support at \$16.50 and resistance at \$18.28. Cotton has an Astro support at \$77.48 and resistance at \$86.91. Cocoa's Astro support level is \$2275 and Astro resistance \$2575.

- The next important Astro resistance for Wheat is at \$705 and support at \$615, Corns Astro resistance is at \$683 and support at \$603, and Soy astro resistance at \$1579 and support \$1455.

Here are the trading strategies and ranges for Wednesday:

GOLD/SILVER/BASE METALS

On Tuesday precious metals went higher and came down also from the higher side levels. In USA trading session it \$28.69 and then came also toward \$28.00. Most of other base metals remained in the mix directions. Mining stocks remained in the mix to negative directions along with mining stocks. It was very volatile and mix day for metals as predicted and many volatile day will come like this in the next two month due to Cancer Mars.

On Wednesday also mi trend is expected in precious and base metals as mentioned in the weekly newsletter but late Wednesday we are recommending buying some more long positions around lower sides. You must have seen that daily trading ranges are working very well. On mix astro day prices will act both sides, closing on higher side will be bullish sign. Positive astro one must and hold, negative day, one must sell around higher sides. Wednesday is mix day but Thursday positive astro cycle could push prices sharply higher so keep this in mind.

Base metals will trade mix to negative or profit booking will come on Wednesday.

Buy more JNUG and NUGT on Wednesday, also buy GLD and AGQ gold and silver etfs or options of these etfs.

As per astro combinations we strongly recommend buying September expiry options in silver, minimum target is \$33.39 and higher side lot could move higher.

On the lower side Gold will hold \$1886 and silver \$27.65, and on the higher side \$30.11 in silver and \$1959 in gold during this week. Avoid buying in platinum.

Platinum's Astro resistance level will be at \$1227 and support at \$1141.

Copper's astro resistance will be at \$488 and support at \$443. Palladium's astro resistance will be \$3043 and support at \$2735 and \$2555.

Wednesday's Astro combination recommendation – On Wednesday mix to both side trend is expected in precious metals, lower side buying is recommended in gold and silver as Thursday could be very positive astro day

for precious metals. Base metals will act mix to negative so higher side selling is recommended.

Wednesday's trading range: **(July 2021 future contract):**

GOLD: \$1911.00 to \$1896.00 (Spot: 1909 to 1895)

SILVER: \$28.35 TO \$27.86 (Spot:28.23 to 27.78)

COPPER: \$468.05 TO \$461.70

PALLADIUM: \$2875.00 TO \$2832.00

PLATINUM: \$1212.00 TO \$1187.00

INDEXES

On Tuesday globally markets acted mix, USA Market witnessed profit booking on higher sides. On Wednesday mix kind of trend is expected in most of global markets so trade in and out as mentioned below trading ranges.

very well.

We are recommending ignoring emerging market from here onward as I would like to watch emerging market trend very closely because they may start struggling to move further higher from here onward so watch closely.

Trade in and out, have feel of Cancer Mars, it may represent volatile time. Taking some hedging bet may be safe strategy from here onward.

USA and other global market shouldn't be in your selling list as we are not expecting any major bear market, surely Mars entering in cancer may bring any nine days volatility between 2 June to 20 July but we will come to know about those days.

Surely European markets are getting tired, in Scorpio Moon I have witnessed European and EMEGRING MARKETS acted very uncertain to keep this point in mind.

Mars can play supportive role for few commodities, tech and biotech stocks. Financial stocks will get tired in coming time during Cancer Mars.

Nasdaq will have an Astro resistance at 14198 and S&P at 4278 so keep a close watch on these levels. Closing above these levels for five days can bring a mega bullish trend in the market which can push S&P towards 4800 to 5200.

Our view for the longer term: *We are still holding our longer-term target of S&P moving towards 5200 and NASDAQ 25000. The downside risk is 10%, so keep this in mind.*

From 2011, we have been recommending adding all these stocks: **TSLA, NFLX, DXCM, AMZN, Google, MSFT, Apple, VEEV, AMD, NVDA, HZNP, MA, V, BAC, COST, and REGN.** We are adding new stocks into our buying list from here on: **PYPL, PODD, IRTC, TNDM, SWAV, UPS, FDX, ZM, OKTA** and they all performed well.

Wednesday's astro combination recommendation: On Wednesday Mars changing in Cancer so I would like to watch emerging markets trend closely and take some hedging bet. We are expecting Volatility will be back in emerging market. Trade in and out in develop markets.

ENERGY

On Tuesday oil prices traded positive along with natural gas. Energy market acted positive.

On Wednesday mix trend is expected in energy markets. On Tuesday oil tested \$68.88 level which most important astro resistance level so watch this level closely. Closing above this level could be bullish sign and oil can move toward \$72.78 level which could be top of 2021.

Trade in and out will be best strategy in oil, heating oil, and RB Gas. Stay long in gas.

On the higher side \$68.88 is a crucial Astro resistance level and now support is \$64.48. Trade in and out in Gas on Monday. Gas' higher side Astro resistance level will be \$3.12 on the higher side and on the lower side \$2.78 will be the key support level.

Wednesday's astro combination recommendations for Oil – On Wednesday mix trend is expected in energy market so trade in and out as mentioned below levels. Oil tested crucial astro level of \$68.88 which is selling level but closing above for the three days could be great sign.

Wednesday's trading range (June 2021 contracts):

OIL: 68.89 to \$66.98

NATURAL GAS: \$3.16 to \$3.04

HEATING OIL: \$2.1101 TO 2.0523

RB GAS: \$2.1959 TO \$2.1421

CURRENCIES

On Tuesday most currencies traded both sides, as per our theory dollar is bottoming out though I would like to watch few trading sessions of Mars in Cancer. We have been predicting that nothing major up or down trend is expected in currencies in 2021, they will keep trading both side so buy USD when it closer to 89.38 and start booking profit at 91.88, 92.63 and 93.45 level.

On Wednesday mix trend is expected in currencies so trade in and out without but surely take sell positions in the most of currencies around higher sides.

On Tuesday most of emerging market currencies lost value as predicted, stay away from any buying in emerging market currencies. Brazilian Real gained value and it will outperform so keep this in mind, don't short Real, but you can sell Rand and Peso.

These have been the selling levels in most of the currencies for the last one month, and they are still our selling levels:

British Pound trading levels for the medium term will be 1.4287 to 1.3511.

Euro trading ranges for the medium term will be 1.2377 to 1.1783.

Australian dollar trading ranges for the medium term will be 0.7988 to 0.7178.

Wednesday's astro combination recommendation – On Wednesday higher side selling is recommended in the most of frontline currencies like euro, Australian dollar, Pound and Franc. Sell Rand, Rupee and Peso. Stay long in Real.

US Dollar will hold 89.39 level.

USD/RAND – 13.80 to 13.66 (Spot)

USD/PESO – 20.05 to 19.89 (Spot)

USD/REAL – 5.18 to 5.10 (Spot)

GRAINS

On Tuesday grains surprised as they moved sharply higher. On Wednesday we are recommending selling positions in grains around higher side levels, still soy has some power to hold value compare to corn and

wheat.

As yesterday we mentioned that grains will top out either on Wednesday or Friday short the short term. Two have been achieved last month Top have been achieved in grains so we are not expecting grains breaching recent high in 2021. Surely some volatility will continue so remain alert.

November 2021 will be best time to re-enter in grains.

These are great selling levels in Corn at \$748, Wheat \$778, and soy \$1637.

Wednesday astro combination recommendations – On Wednesday grains will top out, corn will have difficult time to close above \$705, wheat \$708 and Soy \$1595. Now support level will be for corn at \$615, wheat \$644 and soy \$1459.

Wednesday trading range (July Future 2020 contracts):

CORN: \$700.00 TO \$677.00

WHEAT: \$705.00 TO \$680.00

SOY: \$1565.00 TO \$1533.00

SOY MEAL: \$404.70 TO \$395.00

SOY OIL: \$68.37 TO \$66.75

SOFT COMMODITIES/

On Wednesday cotton performed very well, coffee witnessed profit booking. Rest of sifts like sugar and cocoa acted mix. Lumber remained limit down.

On Wednesday watch coffee closely, it should not trade below \$160.75 level for the more than three days otherwise it can come down to \$152 before it makes another high.

Cotton will act positive along with cocoa and sugar. Lumber will remain limit down.

It needs to close above \$161.75 level for the three days for the bullish trend which may push coffee toward \$173 .88 to 183.98 levels.

Stay away from lumber.

Wednesday astro combination recommendations – Trade in and out in softs, buy more coffee.

Wednesday's trading range: (July 2021 Contract):

COFFEE: \$163.35 TO \$159.63

COTTON: 85.15 - TO 83.35

COCOA: 2462 TO 2415

SUGAR: \$17.95 TO \$17.62

TREASURY BOND

Thirty Year Bond traded lost value on Tuesday. On Wednesday further weakness will come, but surely we shall watch trend closely or watch 153-00 level which is short term buying level. We don't see Thirty Year going above 159-00.

On the lower side we may see Bond holding value at 153-00 in the medium term so keep this in mind.

Wednesday's astro combination recommendation – Trade in and out.

Wednesday's trading range (June 2021 contract):

TREASURY BOND – 156-21 TO 155-16

1st June 2021, 03:00 PM, PST

One of note from September 2020 letter:

On the other hand, most semiconductor stocks like **AMD, LSCC, UI, QCOM, XLNX, MXWL, AMZN, PYPL, APPLE, TSLA, GOOGLE, PODD, IRTC, TDOC, ZM, OKTA, HUM, UHS, MELI, TTD, SHOP, VEEV, PLUG, BLDP, JKS, SEDG**, are doing well, and the list goes on. Most of our recommended stocks have moved much higher in the last ten years, and even during the last one year of the Pandemic. I don't think I can ask for any more from nature because it's nature that has provided us with the indications, and it's our job to follow these indications. Many of those who have been investing in the market for the past three to four decades are saying they haven't seen anyone recommend and write about the future trends of the stock market so confidently. I humbly thank you for your kind words and thank nature for guiding me so that I can help people create wealth in order for you to take care of the neediest people.

Since 2005, I have been enjoying my retirement-style life, and nature has been very kind to me. However, I am coming back to trading and investing world in 2023. I will be back on Wall Street and I am sure we all will have a lot of fun. After achieving a 13,218% accuracy record in just five months in 2005, I took a break from trading, and that decision was because of the astro cycle in my chart. I am announcing my return very soon. You can see I have lot of patience because I have been waiting since 2007 to restart trading, I respected natures message so I stayed away.

This is what we stated yesterday:

We are still recommending staying long in the markets. NASDAQ or tech stocks will come forward to push the market higher. S&P is heading towards 3800 and NASDAQ towards 12775.

This morning when I was bowing to nature and the mystic power of astro combinations, I got emotional because nature has guided us through 2020, the most uncertain time of our lives. None of the Wall Street experts are still able to believe how we were able to predict the monthly cycles of 2020 so accurately one year in advance (“2020 Financial Prophecies” book was written in 2019 and published on the 5th of January 2020). Every word was narrated by nature, I was just playing the role of a typist:

Eighth Cycle: From the 5th of October to the 20th of November

There will be sharp corrections initially when this cycle starts, but as this cycle progresses, the market will test an all-time high during this period. This will be a fantastic cycle for buyers. One must buy Financials, Tech, and Biotech stocks.

During this period, stocks like Google, Apple, Amazon, Netflix, etc. will hit all-time highs. Tesla will also hit an all-time high. This cycle will look like a mini bubble due to aggressive moves in stock prices. Stay long in the market as the next cycle is also positive.

Now we are in the ninth and final cycle of 2020, must rad book.

We are recommending staying long in **INDL, YINN, and BRZU.**

Our theory is on the right track and we have been able to guide members accurately since the 22nd of March and that is what matters the most. You don't need to take trades every day, just focus on what the Astro cycles are indicating and you can plan your trades in that direction for the medium term, and I am sure no one can stop you from making money.

Seventh Cycle: From the 17th of August to the 4th of October

This will once again be a very volatile cycle, and I strongly recommend selling stocks during this period. Do not hold any long positions in tech and financial stocks as prices will fluctuate very fast, so have some sort of hedging strategy without holding any naked buying positions.

Hold some put options and buy some UVXY during this period. I still see biotech stocks performing very well during this cycle, so it will be very interesting when Tech and all the other sectors are trading negatively, and biotech outperforms all the sectors. If you see biotech performing well then you should start building positions in it as it will continue to perform well throughout the year.

Sixth Cycle: From the 1st of July to the 16th of August

Once again, this will be a very bullish cycle for the market, so stock and equity prices will gradually start moving higher. I strongly recommend start buying tech, financial, and biotech stocks. Some aggressive movements will come in these sectors, and if I am not mistaken in my readings of the Astro cycles, all the major global market will hit an all-time high. This is especially true for the US and India. Europe and Japan will also move higher, and China will also trade positively.

This is a fantastic cycle to make a great amount of money in tech and biotech stocks. Mining stocks will also gain handsome value during this period, so buy mining ETF's like NUGT or JNUG. You can also buy tech and biotech ETF's like SOXY and LABU.

From stock market sections:

INDEXES:

Remember this Feb 2018 statement – Now I will be watching 2550 level; if S&P closes below this level for the three days, then disaster will take place for stocks and S&P may test 2451. I may recommend closing long in stocks but lets see whether S&P will not close below 2550 or it bounce back from this level. I am not worried after April but let's focus on April at this stage. If everything goes smooth, then we may see S&P testing 2900 every soon in 2018.

This is what we mentioned on Tuesday, the 25th of January 2016: *Tuesday will be a great time to acquire positions in the emerging markets as well as in the European markets. If what we are seeing happens then S&P should move towards 1936 or even higher and down side, it won't go below 1844 or it won't close below 1862 level.*

On last week Thursday and Friday S&P closed higher and finally settled at 1901 levels. Those who have been following our works for decades must know how important our astro support and resistance levels are. Last year also the lower side astro resistance was 1827, and the higher side 2088. Both these levels played a very important role for the market. So far the support level of 1821 played an important role on Wednesday and we are hopeful that S&P won't go below this level in the year 2016 and that the astro support and resistance levels continue playing an important role.

This is what we mentioned the 18th of Jan 2016: *On Friday investors experienced a nightmare. It was day that no investor likes to see because on this kind of day the trading accounts of longer term investors are always deep in the red. In 2000 when the tech stocks crashed we never recommended any buying to investors because the astro cycle was negative for two years and it was clear that the market may remain down for the next two years. In 2008 crash which we predicted, we were also aware that the market would rebound from the 26th of February 2009. We recommended that the market would bottom out on the 6th of March 2009 and that investors should start accumulating stocks keeping in mind that they have to hold them for five years and that they would make a fortune. We strongly recommended, not to focus on the daily volatility and keep busy accumulating quality stocks. This proved to be very accurate advice.*

This is what we mentioned on Monday, the 8th of August: Billions of dollars follow our predictions closely so some support always comes around our predicted levels. 12th February 2016, S&P moved more than 360 points rally which no one expected.

This is what we mentioned on the 29th of February: At this stage we are expecting that the Indian market will perform, so this is a great time for international investors to put money in the US market as Rupee is at a historic low and the market has already corrected 26% from higher levels. Brazil and China have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies because any turn around in **Brazilian Real can push BRZU toward \$39.00 from 9.30**. S&P closed above 1938 and if it closes above 1938 for more than two days then expect it to move towards 1988 during this week or next week.

Two weeks ago we predicted that 1864 is a great buying level with the first target of 1938 and 1988. The first target got achieved very quickly and the second target will get achieved soon and after that our most important astro resistance level will be 2088, which has played a crucial role in keeping the bull away to move above 2088 for the last 16 months.

Thirty Year Bond

This is what we mentioned on the 10th of September: *Tuesday Thirty Year Bond gained value, and same indicating on Wednesday. Fed may leave rate decision sideline which can push bond toward 168/169. Rate hike may bring prices 162 level. Overall trend is negative so get ready to sell on any rise if FED refuse to hike.*

In the last ten weeks' bond prices came down from 176 to 165 as predicted and our longer-term view is very negative so keep building sell positions on any rise.

By the end of this year we may see 162-25 and 157. Stay long in TTT, TBT and TMV.

Energy:

This is what we stated on Monday, the 17th of April: *ERX lost more 5% value and if ERX trade below \$30.00 then there are chances that it will test \$25.50 level which means Oil prices will trade negative in coming time.*

Once again Oil will try to test \$54.78 but if this week it fails then we may see \$47.00 level once again. Major astro support point is \$49.88 level. RB Gas and HEATING OIL will follow Oil.

On Monday Oil prices will trade mix to negative but in USA trading one can take small buying, if Oil fail to rise on Tuesday then expect major corrections in once again in coming time.

On Monday Natural Gas will trade mix and prices will move both sides, trading in and out will remain best strategy in Gas on Monday. Sell or short around \$3.38 level.

This is what we mentioned on the 8th of January - *Natural Gas went down sharply as predicted and tested \$3.16 from \$3.83, and the volatile trend will continue in GAS so trade carefully. Oil will only be able to move higher if it closes above \$54.78 for three days which we don't see happening.*

Energy stocks traded mixed. ERX is unable to move above \$43.00 and Oil above \$54.78 which is not a good sign for the energy market.

We are not changing any of the predictions we mentioned on the 3rd of June: Same kind of positive, RB GAS and heating Oil also moved higher. Natural Gas traded mix. ERX have been hanging around \$29.00 level and it must close above \$33.00 level to give bullish signal in energy stocks which we don't see at this stage moment.

Oil has been failing to close above \$48.88 level but same time it is not closing below 48.88 level as well. If Oil closes above \$48.88 for three days, then the next price level of \$52.55 may get achieved. At this stage some selling is recommended around \$48.88 level and on the down side the important level to buy is at \$44,55. Oil prices have gained almost 70% from \$27.71 which we called the perfect bottom for Oil.

This is what we mentioned on the 2nd of February: Many are predicting Oil remaining in the teen's, but we do not see Oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will

struggle to move above \$35.18 levels, and if it does than \$44.55 is next target with \$48.88 selling level.

Natural Gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural Gas around \$1.72 and below.

This is what we mentioned in our book "2016 Financial Predictions" in Oil's section:

IMPORTANT NOTE: *As most of you are aware our view for energy has been very negative since June 2014. The overall trend in energy prices will remain negative so we do not recommend adopting long term positions. This means that do not take any trades earlier in the year and continue holding them for the rest of the year, because the higher side in Oil will remain limited. There will be better opportunities to make money by trading in and out. Heating Oil and RB Gas will follow Oils trend, so during this year we may see Oil moving towards \$48.50 or \$52.95, and on the down side it may hold \$34.55. If it closes below \$35.55 for three days then there are chances that Oil prices could fall towards \$29.65. Traders should take advantage of buying short term call options before any of the above-mentioned cycles start, and also book profit quickly before the positive cycles end.*

Energy stocks will trade mixed without any major movement, so longer term investors should not be putting any money in energy stocks. Any sharp rise should be taken as a profit booking opportunity if you are holding any energy stocks.

Natural Gas' trend will remain positive during 2016, so one can stay long in Natural Gas in the year 2016. However, it is very important to remember to keep booking profit before any of the above mentioned negative cycles start. Overall, Natural Gas will outperform Oil in the year 2016.

For short term strategies and price targets please follow our weekly and daily newsletters.

Ninth Cycle:

From the **26th of November to 31st of December 2016** - During this cycle, we see positive momentum coming back in the energy markets; Oil prices will form a bottom, and Oil stocks will also act positively. Even though this is a positive cycle, the higher side will remain limited. Natural Gas and RB Gas will move sharply higher during this period.

Energy trading ranges for 2016:

Crude Oil: \$52.95 to \$29.78 (As predicted last year, Oil may hold the \$30.00 level, and if it trades below that for five days, then there's a possibility that it could test 2002's low of the \$27.78 level)

Natural Gas: \$2.88 to \$1.82 (higher side \$3.57 if it cross \$2.88)

Look at accuracy levels about Oil that we predicted in the book.

This is what we stated Monday, the 31st of Oct 2016: *Friday Oil, heating Oil and RB Gas traded negative as predicted. Energy stocks also went down but Gas traded mixed. On Monday, Oil will trade negative; stay sidelined or those who are holding shorts can continue holding and cover some around \$47.50. If Oil starts trading below this, then expect \$46.75 to \$44.88 level, cover all shorts at \$44.55 level. Heating Oil and RB Gas will trade negative or will follow Oil. On the higher side, Oil will struggle to remain above \$49.88 level which is the most important astro resistance level.*

Natural Gas will trade on both sides without any clear directions so avoid trading but on the lower side one can buy GAS for Tuesday. Don't touch energy stocks as they will keep struggling.

This is what we mentioned on Friday, the 2nd of Sept 2016: *On Thursday Oil, heating Oil and RB Gas prices went down sharply lower and weakness will continue Friday. One can cover 50 to 70% shorts around \$42.61 level in Oil and*

100% around \$41.78, so one can cover positions in heating Oil and RB Gas on Friday.

This is what we mentioned Monday, the 21st of December 2015: *Last week energy traders remained very nervous as they felt like abandoned by the bigger financial institutions and other large energy investors, but the truth is that every energy trader or investor is badly stuck energy trades.*

In 2008 we predicted a crash in Oil from \$145 and in 2009 we predicted that it had bottomed out at \$33.00 level. That prediction provided great returns those who invested in Oil and energy stocks. Now once again after the prediction of Oil falling in 2014, since the last two weeks we have been predicting that Oil would form a bottom around \$34.55 level so watch this prediction closely. I am not saying that Oil won't fall below \$34.55 level but surely those who will buy around this level may be rewarded handsomely.

Maximum fearful days: According to the current astro cycle we see another 12 volatile or fearful trading days are pending but the down side is limited.

This is what we mentioned on the 27th of August 2015: *If Oil trades below \$47.00 for two days then there are chances it could retest our magic support figure of \$44.55. If it starts trading below \$44.55 then next level \$38.50 so avoid buying positions.*

We are not recommending any buying in heating Oil and RB Gas, also one should avoid buying any energy stocks.

This is what we mentioned on the 27th of April 2015: *Adopt trading in and out strategy in energy, **but don't take any shorts in Oil, heating Oil or RB Gas. Sell some energy stocks.** Energy stocks will trade mixed without any major move so one can get ready to sell energy stocks. Higher side it is possibility that Oil may see \$63.80 level, if its hold \$57.00 level. Keep adding positions in Natural Gas around \$2.55.*

This is what we mentioned on the 5th of March 2015: *Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors. On Down side Oil will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.*

Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for Oil is \$47.00. ERX won't be

able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.

This is what we mentioned on the 3rd of January 2015: ***On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating Oil and natural Gas lost value as well on Monday. Don't buy RB Gas and heating Oil but surely natural Gas can be bought around \$2.71.***

This is what we mentioned on the 23rd of December 2014: ***Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.***

This is what we mentioned on the 11th of December 2014: ***Wednesday our fear proven very true, we strongly recommend to stay away from Oil. When Oil broke \$92.88 we recommended sell Oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if Oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.***

This is what we mentioned on the 5th of December 2014: ***Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, Oil, RB Gas and heating Oil. Natural gas gained value from the lower levels on Friday as predicted.***

On Monday the higher side will remain limited, and if Oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like Oil is getting ready to break \$60.00 so stay short or add selling on any fall.

Currencies:

This is what we stated on the 4th of January, 2017: *We don't see dollar index going above 103.78 level so watch closely and closing below 102.55 will push dollar toward 101.55 level. Most of currencies gained nice value on Wednesday, emerging market currencies had best day.*

On Thursday, most of currencies will trade both sides, buying is recommended on lower sides in most of currencies so don't miss opportunity.

Buy Pound, Yen, Australian dollar and Canadian dollar. Also buy Franc and Euro without fear.

Astro cycle changed late today on 3rd January so safe buying in all major currencies against USD.

Dollar closing below 102.75 will confirm that it would test the 101.55 level this week.

We are not changing any predictions in currencies of what we mentioned on Monday, the 31st of October 2016: *Once again tested 99.00 level but then sharply came down from the middle of the trading sessions. We are still recommending to keep building positions in USD around 99.00 level. On Monday, we still recommend buying Euro and other currencies around the lower side, or selling USD around the higher side level. On the down side USD may hold 96.71 level so watch this level closely. Euro can move up to 1.1111 level in this week, so book profit if it goes there.*

On late Monday, the Scorpio Moon will bring both sides volatility. On Wednesday, the FED will announce decisions and due to the Scorpio Moon traders will get confused. Trade light or just trade in and out in currencies but medium term traders can hold selling positions in USD.

Stay short in Yen but one can cover Japanese Yen as it may move towards 0.9525 to 0.9250 level at this stage.

This is what we mentioned on Monday, the 29th of August 2016: *We see Euro holding 1.1055 level and Pound 1.2925 level. We don't see it falling below*

0.9410 level and on the higher side it will have a difficult time to move above 1.0198 level. For USD index 97.00 to 97.50 level will play the role of a Wall for dollar which dollar may not be able to breach at this stage, or maybe even for the next six weeks, and on the down side USD may test 92.50 level.

This is what we mentioned last Monday, the 25th of July 2016: This is what we mentioned on Wednesday, the 13th of July: Any rise shall be taken as selling opportunity in Yen, in the next two months we can 900 pips in Yen or it will easily come down to 0.9200 level very soon. We don't see Yen moving above 0.9878 level and in the worst case scenario 1.0000 will be maximum side.

Friday USD tested 97.50 level and this is an important level. Dollar may keep testing this level during this week. **We don't see Euro going below 1.0923 and Pound 1.2988 level.** Pound should be in you aggressive buying list until it holds this level.

On Monday, the 11th of April 2016 we stated: Last week USD traded negative, and lost value against most of currencies. There are still chances that USD may test 92.50 level so watch USD trend closely, and start taking positions at 92.50 level.

Emerging market currencies have done very well and it's time to close positions if you are short or medium term traders. Rupee won't fall much so don't short Rupee but surely Rand, Real, Peso and Rubble will lose some value from middle of Monday.

Australian won't hold above \$0.7725, Canadian dollar 0.7900, Euro 1.1475, Franc 1.0555, and Yen 0.9288 level.

This is what we mentioned last Thursday: Pound is ready for 1.4123 mark. Sell Pound and add more Swiss Franc sell.

We are not recommending any new short in Euro, surely one can acquire some positions in Euro for the short period of time.

Emerging market currencies are getting ready to for bottoms expect few won't be trust like Rand and Rubble. Wednesday we see many currencies gaining some value but stay away from Pound, Canadian and Franc as they can keep making new lows so hold positions with 3% more corrections.

This is what we mentioned on the 22nd of December: *Euro will struggle to move above 1.1075 and may hold value 1.0725 so watch these both levels closely.*

This is what we mentioned on the 23rd of April 2015: *The Medium and longer term trend is still very positive for USD but for the short term a mix to bit weaker trend indicated. USD Index have achieved our target of 100 and now down side 95.00 or at worst case 90.00 level will be great buying.*

Dollar is our longer-term buying trade so we won't recommend shorting dollar, we recommend buying USD on any weakness. Euro higher side 300 pips and lower side more than 3000 pips. We don't see USD index going below 95.00 levels.

Remember this what we mentioned on the 5th of March 2015: *Currency war has nothing to do with USD Friday USD gained value as predicted. Medium- and longer-term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.*

Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.

This is what we mentioned on Monday, the 15th of Jan 2015: *Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just finished one interview from Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell as it will going to go back to par levels.*

This is we mentioned on the 2nd of October: *On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.*

Remember, this is what we mentioned in the month of July: *At this stage USD is trading in a positive direction without any break since the last three weeks. Finally, it is reaching a most crucial level because once it breaks 81.78 then the*

nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.

This is what we mentioned in the month of May (2014): Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.

In this year's book "2015 financial predictions" we predicted the "final bear cycle in the market from the 27th of July to the 15th of August 2015". Yes, the Sun can bring some uncertainty, but take this uncertainty as a buying opportunity at the same time in 2015 in the month of August.

Watch the 2088 level for S&P, as it is most tough astro resistance of 2015. In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

In our 2015 book we mentioned that commodities will have worst year of 2015, and so far precious metals, base metals, grains and softs have been struggling and they will keep moving down in the second half. Dollar will perform amazingly well in 2015 so hold positions and money in USD.

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
