## Friday's Flashnews (unedited copy)

**This is what stated yesterday and holding same: Buy grains and soft, hold USD positions**

Dear Members,

On Thursday market US and European markets lost big value after unpleasant plane crash news came. In this week newsletter we predicted that some kind of accident we see, this is what we mentioned in this week newsletter newsletter: *Our members should focus on the markets move after major planetary transit taking place on Sunday. There is no doubt that the market get new directions whenever these kinds of planetary shifts take place. Also, within 48 hours of the planet changing it brings some kind of an accident or weather related disaster, so watch the markets trend closely for the next three trading sessions. If I am reading the oncoming astro cycle correctly then the market will rock and keep moving aggressively without any corrections. We don't want to make any predictions in excitement so let me watch the next three trading days closely and then we will come out with 100% clear predictions about the short and medium term market trend. If the North node and Mars supports this market then in the next ninety days we may see S&P towards 2135 and NASDAQ 5075 (let me confirm this on Thursday or in next weeks newsletter).*

*At this stage we are recommending holding positions in USA indexes and stocks. You should also hold hedging trades in the European market by selling.*

In this week newsletter we predicted precious and base metals to remain weaker from Monday to Mid Wednesday, and from late Wednesday we predicted rising trend in metals and energy and it happened.

Anyway Thirty year bond, metals, energy and grains close positive as predicted on Thursday, but upper side will remain limited after this week.

Stock market lost big value, traders started dumping stocks on fall, but still many tech companies traded positive.

Friday we recommend buying stocks and Indexes on lower side predicted ranges and sell metals around higher side. Hold positions in USD, and grains.

Avoid emerging and European market at this stage but surely Nikkei, Hong Kong and USA should be in your buying list. Biotech, Airline and some industrial stocks are suffering but our favorite tech and financial are holding value.

Get ready to read our next week's weekly newsletter because we will reveal effect of new astro cycle on markets, commodities and currencies.

This is what we mentioned yesterday: *Wednesday one should cover some of oil short positions around \$99.00 levels as we see some rebound in energy on late Wednesday. Trading in and out in other commodities will remain best strategy for today.*

*Hold positions in USD as bull market journey have just started and on other hand selling bond will earn great amount of returns in coming time.*

*We still believe that S&P is ready to move above 2000 and NASDAQ 4000 so hold positions in US stocks as well as USD.*

This is what we mentioned on the 18<sup>th</sup> of May (two days before the market started rebounding, as we predicted a huge rally starting from the 21<sup>st</sup> of May in all major indexes): ***In short, time is running out for most analysts who have been predicting a fall or crash. Investors will miss the opportunity of buying; in fact, they will go in the red if they short stocks and indexes, so we warn these analysts to advise investors carefully. We see a huge move coming from the 21<sup>st</sup> of May and S&P will achieve 1955 from the current levels of 1870.***

In April when markets were falling, we predicted S&P won't go below 1825, and by the 15<sup>th</sup> of June, S&P would achieve 1932 to 1955 and 1988.

#### **Here are the trading ranges and strategies for Friday:**

#### **METALS**

This week gold traded as mentioned in this week newsletter, this is what we predicted in weekly newsletter: *This week is crucial, and will give us 100% clear indications about the future trend of gold. According to the astro cycle we see gold moving down during this week but if it refuses to move down then it will be exciting news for metal investors. If gold overcomes the negativity of this week then it will be the most positive indication for the coming time. If gold doesn't move down then we will recommend buying precious metals and metal stocks aggressively.*

*According to the astro cycle this week precious metals will trade negatively, and this weaker trend will start from Monday and will end on Wednesday, and both gold and silver will trade negatively. If both these precious metals trade positively on these three days then it will give a clear sign that precious metals are ready for a new rising trend. Anyway's we are not recommending any buying in precious metals for three days because the astro cycle is negative but surely watch precious metal trend closely. On Thursday and Friday precious metals should trade positively.*

*Base metals will remain sideways, and this week we are not recommending any buying in base metals on Monday and Tuesday but on Wednesday you can buy positions in base metals like copper, Platinum and Palladium.*

*On the higher side you can watch \$1343 level for gold and \$21.75 for silver but if both these metals trade above these levels for two days then it will confirm that gold is moving towards \$1388 and silver \$23.27.*

Thursday positive closing in metals confirm positive trend to continue in precious metals, Palladium and platinum. Palladium predictions done very well during last one year. Avoid trading copper at this stage.

**We also recommend booking profit on Friday around higher side predicted ranges in metals here below as it will be very difficult for gold to close above \$1327 at this stage.**

One can hold positions in DUST or add more **DUST** in your portfolio.

*Still gold struggling to close above \$1343, which is not good news, gold will struggle on Monday to move higher so trade accordingly.*

Here is Friday's range: **(September 2014 contract):**

**GOLD: \$1329.80 to \$1311.80**

**SILVER: \$21.40 TO \$21.02**

**COPPER: \$325.10 TO \$319.10**

**PALLADIUM: \$890.90 TO \$879.00**

**PLATINUM: \$1515.90 TO \$1500.10**

## INDEXES

We are still recommending holding hedging position of selling European and emerging markets against new buying in US equity. Avoid any buying in European market but buy small positions in US equity market on Friday around lower sides. Wait for our next week newsletter for clear directions. **One can start buying Russell.**

One can trade in and out in mentioned below ranges, day traders can buy small positions on lower side on opening as markets may recover during the closing hours (especially USA).

This is what we mentioned yesterday: *At this stage we still don't recommend buying any new positions in emerging market and European market. Higher side one should book profit in USA market also but don't short USA market. Hedging trade will be selling European market against buying of US market.*

***Financial, Intel, Microsoft and many tech stocks done well on Wednesday but we are doubtful Google performing well after earning. Thursday is best day to book profit in Indexes on higher sides but don't short indexes. Hold positions in our recommended stocks.***

*At this S&P has to close above 1988 for two days to confirm to reaching 2039 level. On Wednesday markets will trade both sides, we are recommending holding positions in financial and tech stocks. Front large biotech companies may not move down so don't short big pharma name. Our buying recommendations in FAS done very well in the last four trading sessions and we are strongly recommending holding positions in FAS.*

**Here are Fridays' ranges: (September contracts)**

**AUSTRALIAN (SEP) – 5501 to 5465**

**NIKKEI (June) – 15381 TO 15155**

**NIFTY S&P (Spot) – 7665 to 7550**

**HONG KONG (cash) – 23439 to 23210**

**CAC – 4320 TO 4260**

**DAX – 9770 TO 9618**

**DEX EURO STOXX – 3162 - 3110**

**FTSE – 6705 TO 6618**

**FTSE/JSE – 46795 to 46055**

**S&P – 1965.00 TO 1945.00**

**NASDAQ – 3899.50 TO 3853.25**

**RUSSELL – 1138.90 TO 1122.20**

**DOW – 17001 TO 16841**

#### **TREASURY BOND**

Thirty year bond closed around 138 and if close above this level for more days will confirm that Bond prices may move toward 141. Longer term traders should hold put options in bond as current rising trend will remain for short period.

We still don't see Thirty year Bond closing above 138, so take selling positions on higher side. 131 put options of September came down on Monday around 0-03 level so buy it.

**This is what we mentioned six months back: The thirty year bonds traded mixed. 128 is a very strong astro support point which we predicted six months ago when we recommended**

selling at 150. In 2006 we predicted the rise of the thirty year bond from 107 to 150, which was achieved in 2012, and then we predicted prices to fall from 150 to 128, which was also achieved within 10 months. Two months ago, we were expecting bond prices to rise back to 138, and they went a bit higher during the last week, but the overall astro indicators are guiding us well. In the coming time, Bond prices will go below last year's low and may stabilize around 118, so this clearly indicates that selling will bring us profits in the medium and longer term bases.

Friday trading range **(September contract):**

**TREASURY BOND – 138-25 TO 137-21**

### **SOFT COMMODITIES**

On Wednesday soft commodities traded as predicted. Friday we recommend adding more positions in coffee and cotton. Sugar prices will remain mix and some more weakness will come in sugar so avoid any buying at this stage. Add call options in coffee and cotton, we will write which call to buying in the next week newsletter.

This is what we mentioned yesterday: *Thursday softs traded mix, don't miss opportunity of buying on Thursday in coffee and cotton, buy December call options. Trading in and out in sugar is recommended. Avoid cocoa, orange juice and lumber.*

We don't see coffee falling below \$159. This is what we mentioned Monday: *Watch coffee prices closely as it is very close to our buying level. Last month we recommended to buy if coffee prices comes down to \$159 and we are very close to that levels. Also cotton is great buy around 68. Sugar also came down, take aggressive buying positions around \$15.80. Avoid rest of soft commodities. Call options will be great trades in these soft commodities rather than futures positions.*

Friday trading range: **(September/OCT 2014 Contract)**

**COFFEE: \$165.90 TO \$162.50**

**COTTON: \$69.20 TO \$67.90**

**SUGAR: \$17.09 TO \$16.80**

**COCOA: 3090 TO 3040**

### **GRAINS**

Grains gained value Thursday after plane crash news in Ukraine as any problem in that region can push wheat prices moving higher. Keep adding wheat and corn, but don't buy any aggressive positions.

Stay away from soy, on Friday one can sell Soy and Soy meal on higher sides. **Among commodities our recommendations of selling Soy around 1515 and Wheat around \$720 remained best call in the last two months.**

This is what we mentioned Tuesday: In this week newsletter we mentioned grains recovering from lower levels on Wednesday so great time to add some more positions in corn and wheat. Cover 90% shorts in grains on Wednesday. Don't expect any sharp U turn in short term in grains but surely longer term call options will make you good sum of money in corn and wheat.

Wheat and soy product will trade in ranges, but the higher side will remain limited. This is what we mentioned early last month: ***We strongly recommend trading with put options in soy and call options in corn. We see corn prices moving toward \$600 in the next two months. Any rise in soy and meal should be taken as a selling opportunity. As mentioned, we don't see soy prices going higher than 1515 and wheat \$720, so sell around these prices. Meal will follow soy. Holding put options in soy can bring a windfall in the next three months.***

Friday's trading range **September 2014 contracts**:

**CORN: \$388.00 TO \$375.00**

**WHEAT: \$560.00 TO \$543.00**

**SOY: \$1102.00 TO \$1087.00 (November)**

**SOY MEAL: \$367.00 TO \$361.00**

**SOY OIL: \$36.80 TO \$36.25**

**ENERGY**

On Thursday oil traded positive as predicted. Oil gained value on Thursday but won't be able to cross above \$104.60 and \$105.55 so higher side one should book profit. Natural gas has been trading weaker as predicted, buy only if it comes down \$3.83 level as mentioned last month.

Avoid any trading in heating oil and RB Gas.

Energy stocks will trade mixed to positive so trade accordingly. This is what we mentioned yesterday: *As per astro cycle we recommend taking some buying positions in oil, heating and natural gas today around lower side predicted ranges as some recovery is coming in energy. Watch energy stocks closely as we see positive momentum starting in these stocks so great time to buy ULTRA LONG ENERGY STOCK ETF.*

This is what we mentioned on last Monday: *Natural gas traded as predicted, weaker trend in gas to continue but one can start buying around \$3.93.*

**Friday's trading range (All August 2014 contracts):**

**OIL: \$103.80 to \$101.98**

**NATURAL GAS: \$3.99 to \$3.90**

**HEATING OIL: \$2.8790 TO \$2.8410**

**RB GAS: \$2.9030 TO \$2.8600**

## CURRENCIES

So far this week USD buying recommendations have done well as it has been gaining value, same time Yen will gain as well so stay long both these currencies. We are not changing any predictions in currencies of what we mentioned yesterday: *During this USD has been gaining value against Euro and Franc but trading mixed against rest of other currencies. This week's buying call in USD has done well, and we are still recommending holding positions in USD as Dollar will keep gaining value against Euro and Franc.*

*Down is limited and upper side USD will rock once it crosses 81.78, because after this level next astro resistance is at 87.89.*

*This clearly indicates that euro is ready to fall at least 900 pips from current level in the one year time.*

*Rest of other currencies will trade mix on Thursday so don't miss opportunity of trading in and out.*

*Pound and Yen will hold value so avoid any trading in both these currencies. Emerging market currencies will trade directionless. Focus on Euro, Franc and commodity currencies.*

*This is what we mentioned on Monday: Hold positions in USD, buy USD around 80.00 levels or sell Euro and Franc around higher side predicted range here below. We clearly mentioned that USD already ended 14 years bear cycle and it is ready to move into new horizon so keep adding longer term positions.*

*This is what we mentioned on three weeks back: **A major support for USD will remain at 79.78 and 79.50 as mentioned two months ago, so at these levels one should aggressively buy USD. In the Kitco interview, we mentioned that the 14 year bear cycle of USD has ended. It is always great to enter the trade which is either at the bottom or at the top, and options trades are a great bet at this stage. Buy puts in euro and Franc, for details please read this week's newsletter.***

*This is what we have been mentioning since many months: **Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.***

Friday's trading range: **(September contract)**

**DOLLAR INDEX – 80.84 to 80.45**

**AUSTRALIAN DOLLAR – 0.9347 to 0.9275**

**CANADIAN DOLLAR – 0.9313 to 0.9248**

**BRITISH POUND – 1.7138 to 1.7060**

**EURO – 1.3550 to 1.3495**

**JAPANESE YEN – 0.9925 to 0.9865**

**SWISS FRANC – 1.1170 to 1.1125**

**RUPPEE – 60.39 to 60.05 (Spot)**

**RAND – 10.79 to 10.68 (Spot)**

**We are not recommending any aggressive trade another 19 hours.**

Thanks & God Bless, Mahendra Sharma,

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
