Friday's Flashnews (unedited copy)

Dear Members,

Thursday Dow, S&P and Nasdaq fell sharply, this kind of fell was witnessed in March/April 2014. S&P broke all most short term support level of 1955, 1943 and 1932 which created more panic. Geopolitics situations spoiled market trend. In this week newsletter we mentioned about current trend remaining uncertain with huge volatile until 14 August, **From our book:** *From here to 15 August markets will trade mix, but surely many stocks will move higher. We will be releasing more five stocks in retirement account in today's stock report. In our this year book "2014 Financial predictions" we predicted "final bear cycle in market from 27 July to 15 August 2014", yes Sun can bring some uncertainty but take this uncertainty as buying opportunity.*

Also two weeks back we predicted that S&P won't fall below 1905 and we are still holding this predictions. Investors should get ready to take this great buying opportunity on current weakness. Down side from yesterday low can be only 1% so from today one should start accumulating beaten stocks but remember that volatile may continue until 14 August. Short term traders should trade in and out on daily basis in the predicted range. One can start buying aggressively around 1905 or around 14 August 2014.

Metals and energy fell as predicted, testing time metals as it touched \$1282 and oil looks also terrible but grains and soft will do well. Coffee prices zoomed yesterday toward multi months high.

Thirty year bond lost value, and dollar held value.

Add more positions in Chinese, Nikkei and Hong Kong market today. Buy USA market today but avoid emerging market and European market.

This is what we mentioned Monday: *Chinese markets are showing an encouraging sign since the North Node has changed houses, so watch the Chinese and Hong Kong markets.*

We are recommending buying Chinese markets aggressively; also buy Hong Kong.

This is what we mentioned on the 18th of May (two days before the market started rebounding, as we predicted a huge rally starting from the 21st of May in all major indexes): In short, time is running out for most analysts who have been predicting a fall or crash. Investors will miss the opportunity of buying; in fact, they will go in the red if they short stocks and indexes, so we warn these analysts to advise investors carefully. We see a huge move coming from the 21st of May and S&P will achieve 1955 from the current levels of 1870.

In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

Here are the trading ranges and strategies for Friday:

METALS

On Thursday precious metals fell sharply as predicted, gold reached \$1282 most important predicted level, if it start trading below day from this level then gold may see our predicted level of \$1243 once again. Avoid any buying in precious metals as this stage, also avoid base metals at this stage except Palladium.

This is what we mentioned in this week newsletter: *Wednesday, Thursday and Friday we see gold and silver trading lower so avoid any buying. We may see gold breaking \$1300 once again and testing \$1283. If gold breaks \$1283 then expect \$1243 as the next level and metal stocks will correct sharply. If astro indicators are right then sudden fall in metals can create panic in the gold and silver market. We highly recommend stay away from metals after mid Tuesday or Wednesday. Don't hold any positions in metals.*

This is what we predicted yesterday: *Wednesday metals traded directionless as predicted. At this stage we are still recommend trading in and out as mentioned ranges. We are not expecting any major upside move so higher side should be taken selling opportunity. Base metals will perform surely better than precious metals but still higher side will remain limited. Palladium and Nickel will remain in positive directions.*

Metals fell as predicted, we are still recommending selling metals on higher side predicted ranges. Also base metals will trade mix, but watch silver trend closely as after 15 August Silver will start outperforming.

This is what we recommended last week Friday: *\$1282 is most crucial level, because gold can fall sharply if it break this level. Next astro support is at \$1243. On hiver side gold will struggle to move above \$1312 and \$1327 level. Base metals will trade directions, we are not recommending any positions in base metals.*

Here is Friday's range: **September 2014 contract**:

GOLD: \$1290.80 to \$1275.30 Oct contract

SILVER: \$20.48 TO \$20.20

COPPER: \$324.70 TO \$319.80

PALLADIUM: \$877.90 TO \$868.00

PLATINUM: \$1465.90 TO \$1451.10

INDEXES

On Thursday European market fell almost over 6% from last month high, our call of selling European market as hedging trade done very well. Advise of avoid emerging market also saved money and buying Chinese, Hong Kong and Nikkei also did well.

USA market unable to break 1988 level, which created this yesterday's panic selling, S&P broke most of support levels of 1955, 1942 and 1932. Now crucial levels will be at 1923 and 1905, these are great level to buy S&P or to put new money in market but still until 15 August volatile will continue as predicted, so avoid any aggressive trading at this stage for the next two weeks.

Friday we recommended trading in and out in the predicted ranges here below, don't short Chinese, Nikkei, and Hong Kong markets. Also don't short USA market as most unique bull era is about to begin. We like tech and Biotech stocks so keep adding positions in these stocks.

Next week is Scorpio Moon so trade carefully, but surely you should finish 100% buying by 15 August 2014 for to enjoy next rising ride.

Thursday traders are can trade in and out without any major speculative positions, hold positions in stocks. Keep adding our favorite market.

This is small part from Indexes sections of this week newsletter: ***USA astro chart is positive but Sun at this stage moving to house of water (Cancer Zodiac sign) which is negative as Sun is fire moving through water and this brings some uncertainty.***

As per astro chart we see both sides move continuing in all major markets for the next two weeks until Sun remains in Cancer with Jupiter. On 15 August Sun will be transiting into Leo, which is its own house and this will be a great time to add money in market. We have experienced in the last 25 years that whoever invested in between 15 August to 15 September's Sun cycle always made a fortune. Please take advantage of this period to accumulate positions in quality stocks.

Our advice is to buy Nikkei, Hong Kong and USA markets, as next week astro indicators are looking interesting. Amazon may put some selling pressure on NASDAQ on opening of tomorrow but take burying opportunity on weaker opening.

Here are Fridays' ranges: (September **contracts**)

AUSTRALIAN (SEP) – 5596 to 5565

NIKKEI (June) – 15677 TO 15395

NIFTY S&P (Spot) – 7740 to 7627

HONG KONG (cash) – 24639 to 24350

CAC – 4261 TO 4201

DAX – 9470 TO 9307

DEX EURO STOXX – 3133 – 3062

FTSE – 6681 TO 6600

FTSE/JSE – 46395 to 45777

S&P – 1941.00 TO 1917.50

NASDAQ – 3921.50 TO 3968.25

RUSSELL – 1130.90 TO 1110.00

DOW – 16619 TO 16439

TREASURY BOND

On Thursday Thirty year bond lost value, and weakness to continue so avoid any buying as now time have come to take solid longer term sell positions today. Thirty year failed to cross 139 level which clearly indicates fall journey will start any time. December Put options trade will be great but target it to reach 118. At this stage we are not changing any predictions in bonds for the longer term at this stage, so you should trade in and out as mentioned below.

This is what we mentioned Monday: *If Thirty year bond trade higher above 138 for more days, it will confirm that bond prices may move toward 141. Longer term traders should hold put options in bonds as current rising trends will remain for a shorter period.*

Friday trading range (September contract):

TREASURY BOND – 137-29 TO 136-24

SOFT COMMODITIES

Coffee buying call around \$159 did very well, on Thursday coffee prices zoomed higher side by \$12.00 once it crossed \$184.50, hold positions in coffee as we may see huge upside move coming in coffee markets. Next resistance level will be \$212. Cotton prices went below \$64.00, so now we don't see it closing below \$61.38, buy around this level.

Sugar is falling as predicted, Avoid sugar as recommended, wait for \$15.87 level to take some positions. Avoid rest of softs.

This is what we mentioned last week: *Hold positions in coffee with a stop-loss of \$174, and watch \$185 on higher as once it starts trading above \$185, we may see the \$257 level quickly.*

This is what we mentioned last month: *Last month we recommended to buy if coffee prices come down to \$159 and we came very close to this levels. Also, cotton is a great buy around 68. Sugar also came down, taking aggressive buying positions around \$15.80. Avoid the rest of the soft commodities. Call options will be great trades in these soft commodities rather than futures positions.*

Friday trading range: (September/OCT 2014 Contract)

COFFEE: \$197.90 TO \$188.50

COTTON: \$62.90 TO \$61.30

SUGAR: \$16.59 TO \$16.30

COCOA: 3247 TO 3198

GRAINS

Add more positions in wheat and corn today, we see grain prices recovering from today. We are not changing any predictions, hold buying in corn and wheat. We are sure you must have covered all shorts as recommended last week in soy products.

Keep adding wheat on lower sides as a positive momentum in wheat will continue. We see at least 5% move in wheat. Soy and meal will trade mixed but we are not recommending any buying; trading in and out will be the right strategy.

Add more positions in wheat; we are not changing any predictions of what we mentioned yesterday: *On Tuesday grain traded weaker, **now time to cover 100% short positions in soy and meal on Wednesday.** We are sure you must have started buying wheat and corn so add more today. Wheat is great buy so don't miss opportunity of buying. Corn also looks great and meal may recover as well.*

Stay away from soy; on Friday, one can sell soy and soy meal on higher sides. Among commodities our recommendations of selling soy around 1515 and wheat around \$720 remained the best call in the last two months.

Friday's trading range **(September 2014 contracts):**

CORN: \$359.50 TO \$353.00

WHEAT: \$539.00 TO \$522.50

SOY: \$1093.00 TO \$1075.50 **(November)**

SOY MEAL: \$365.80 TO \$358.00

SOY OIL: \$36.50 TO \$35.80

ENERGY

This is what we mentioned in this week newsletter: ***Last week oil prices traded mixed. As mentioned last and this year, oil may be able to cross above \$112.20 and we still believe that. So far oil is struggling to close above \$105.55 which is the most important astro resistance level and the down side is very open— up to \$86.57. We are all aware that right now we are going through middle-east and Ukraine geopolitical tension but don't buy oil because of these issues. Oil is constantly failing to***

move above \$105.55, \$104.78 and \$103.73 which clearly indicates that weakness is on the way.

Avoid any buying in oil, oil is heading toward \$95.78 and \$92.38. Natural gas went higher as predicted on Thursday, add more positions in gas on Friday around lower sides. We are still not very negative on oil stocks.

Oil traded weaker, it started trading below \$100.68 which clearly indicating that weaker trend in oil will continue but oil stocks will hold value so watch this predictions closely. Keep adding energy stocks etf as mentioned in this week letter as well as daily report.

Natural gas have been trading in the range predicted range, at this stage hold positions in gas are bought around \$3.75 levels. **Keep adding natural gas** with stop loss of \$3.70.

Friday's trading range (All August 2014 contracts):

OIL: \$99.00 to \$96.90 Sep

NATURAL GAS: \$3.92 to \$3.79 Sep

HEATING OIL: \$2.9000 TO \$2.8600

RB GAS: \$2.8210 TO \$2.7810

CURRENCIES

We are not changing any predictions in currencies of what we mentioned yesterday: At this stage USD is trading in the positive directions without any break since last three weeks. Finally it is reaching at most crucial level because once it break 81.78 then nonstop upside journey will start in USD. Also euro falling below 1.3355 level also bring huge corrections.

Trade in and out in emerging market currencies as these currencies won't fall much but avoid any other frontline currencies at this stage as these currencies are entering into longer term bear cycle.

On Thursday one should trade in and out in all major currencies as mentioned below ranges.

I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.

Must remember this what we mentioned Monday: *Last week, USD gained value against most of the currencies except emerging market currencies. We strongly recommend traders to watch euro trends closely as this trade can be a money-spinning trade if what we say comes true. Watch the 1.3355 level closely because if Euro breaks this level, then we may see 1.2918 to 1.2320. Euro is heading for disaster, so watch it closely because our astro indicators are giving indications of something big.*

Here what we mentioned last Tuesday: ***The down is limited and the upper side USD will rock once it crosses 81.78, because after this level, the next astro resistance is at 87.89. This clearly indicates that euro is ready to fall at least 900 pips from current levels in one year's time.***

This is what we mentioned three weeks ago: A major support for USD will remain at 79.78 and 79.50 as mentioned two months ago, so at these levels one should aggressively buy USD. In the Kitco interview, we mentioned that the 14 year bear cycle of USD has ended. It is always great to enter the trade which is either at the bottom or at the top, and options trades are a great bet at this stage. Buy puts in euro and Franc, for details please read this week's newsletter.

This is what we have been mentioning since many months: Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.

Friday's trading range: (September contract)

DOLLAR INDEX – 81.70 to 81.32

AUSTRALIAN DOLLAR – 0.9299 to 0.9219

CANADIAN DOLLAR – 0.9187 to 0.9130

BRITISH POUND – 1.6918 to 1.6830

EURO – 1.3412 to 1.3377

JAPANESE YEN – 0.9759 to 0.9697

SWISS FRANC – 1.1047 to 1.0988

RUPPEE – 60.69 to 60.32 (Spot)

RAND – 10.83 to 10.63 (Spot)

Thanks & God Bless, Mahendra Sharma,

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
