## Wednesday's Flashnews for all major markets

### Brief update

Dear Members,

On Tuesday once again global equity market traded positive as expected. Once again S&P may try to come nearer to 1988 which is most important astro resistance level. It is testing time coming ahead for S&P as it has to close above 1988 within the next one week or it shouldn't close below 1943. As mentioned as indicators are too positive so we keeping hope that soon it should start trading above 2000 levels.

Tech and biotech stocks are leading, IBM and APPLE stocks are marching ahead as predicted. NASDAQ, S&P and RUSSELL gained over 5% value in the last seven trading sessions from lows. London market almost reached toward high, Indian market closed at all-time high and South African market is struggling as predicted.

Commodities fell on Tuesday, Bond prices also struggle to move higher which indicates that bonds are ready to fall and USD closed sharply higher. Euro traded at multi months lows.

We strongly recommend holding positions in markets, don't go short but some profit booking may come on Thursday. Dollar is in most unique era against leading currencies so hold value, USD buying recommendations have done very well.

Soft and grains remained mix, but metals and energy lost value. **Era of 1995 to 2000 is back now** because equity and USD is showing positivity and commodities are struggling.

We are not changing any predictions of what we mentioned yesterday, I am traveling back to USA tomorrow so there won't any Flashnews for Thursday.

Hold positions in stocks, avoid commodities, sell bond and one can start buying USD on weakness. Indexes should be in your buying list. Watch our predicted ranges closely, once again 1988 will be crucial level for S&P, 1282 for gold and USD 81.00.

This is what we mentioned Monday: *This week I will be back in USA, so far this was very hectic trip. Sun changed house on Saturday which will bring few new changes in commodities, bond and currency market. Friday precious metals fell sharply, Palladium in base metals held value. Rest of commodities are also traded directionless as predicted. Dollar remained in weaker trend and Thirty year bond prices reached 141.*

*USA market recovered nicely during last week from 1905 to 1960, NASDAQ and other markets also recovered as predicted. Last month higher side resistance level 1988 and buying level 1905 guided us well. Lower side in market looks very limited, so any weakness should be taken buying opportunity. Metals weakness on Friday conformed weakness to continue.*

*Your investment strategy should be clear at this stage, trade in and out in commodities. Keep adding quality stocks and call options. Last week went very well, those who bought S&P around 1905 must have done well. Commodities are trading negative and same kind of trend will continue. Oil broke most important level of \$96.38 which indicates that it is ready to move toward \$88.78 if its break \$92.43. Silver and copper trading negative, weaker trends will continue, avoid any buying in both of these*

***Sun changed house on Saturday: this will be very lucky period for many investors. Building positions for medium and longer term will earn you great amount of returns in market.***

***From our book:*** *From here to 15 August markets will trade mix, but surely many stocks will move higher. We will be releasing more five stocks in retirement account in today's stock report. In this year book "2014 financial predictions" we predicted "final bear cycle in market from 27 July to 15 August 2014", yes Sun can bring some uncertainty but take this uncertainty as buying opportunity.*

This is what we mentioned on the 18th of May (two days before the market started rebounding, as we predicted a huge rally starting from the 21st of May in all major indexes): In short, time is running out for most analysts who have been predicting a fall or crash. Investors will miss the opportunity of buying; in fact, they will go in the red if they short stocks and indexes, so we warn these analysts to advise investors carefully. We see a huge move coming from the 21st of May and S&P will achieve 1955 from the current levels of 1870.

In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

### **Here are the trading ranges and strategies for Wednesday:**

#### **METALS**

On Tuesday precious and base metals traded negative, and same kind of trend will continue in metals. Palladium won't fall below \$865 so don't miss buying opportunity. At this stage avoid metals and metal stocks, also don't buy any positions as time of metals to remain bit uncertain for the next one week. Trading in and out will be right strategy. Silver prices have been trading negative as predicted, sharp fall can occur in silver on in coming time.

*Monday gold traded negative, on Tuesday same kind of trend will continue. Don't buy precious and base metals, trading in and out will remain best strategy. \$1282 level will be crucial for gold, if it break then we see \$1243, silver can still fall sharply so avoid any positions in silver at any level.*

This is what we mentioned Monday: *Weaker trend will continue in precious metals on Monday. Most of base metals will trade positive except palladium. Metal stocks will remain in negative trend as well.*

*In Simple term stay away from metals, don't catch falling knife. It will be most negative news if gold start trading below \$1282.*

Metal stocks are ready to move down, one should watch GLL and DUST.

This is what we recommended three weeks ago: ***\$1282 is most crucial level, because gold can fall sharply if it break this level. Next astro support is at \$1243. On hiver side gold will struggle to move above \$1312 and \$1327 level. Base metals will trade directions, we are not recommending any positions in base metals.***

Here is Wednesday's range: **(September 2014 contract):**

**GOLD: \$1302.90 to \$1292.00 Oct contract**

**SILVER: \$19.55 TO \$19.18**

**COPPER: \$311.90 TO \$305.00**

**PALLADIUM: \$888.90 TO \$870.00**

**PLATINUM: \$1446.90 TO \$1428.10**

## **ENERGY**

Oil traded lower on Tuesday which clearly indicating that energy market will remain directionless to weaker. Most important level for oil is \$92.38, if its break this level then we may see \$85.88 as predicted last week. Heating oil and RB gas will follow oil but Natural gas is ready to move higher. Energy traders should buy GAS around lower side as predicted because we see gas moving toward \$4.32.

Higher is selling is recommended in oil, but watch \$92.38 level closely as this is important astro resistance levels. **DON'T SHORT ENERGY STOCKS.**

This is what we mentioned on Monday: *On Friday oil, heating oil and RB gas traded mix, at this stage oil will trade both sides because there is no clear astro indications. Surely some weakness we may see and down side it may hold \$92.43 level, if it fail to hold then we see huge corrections.*

*Natural gas traded negative on Friday which surprised us, we are still recommending buying positions in gas around \$3.80 level with stop loss of \$3.70.*

*Energy stocks won't fall much so watch oil stocks closely. Monday we see weakness may continue in oil and other energy products but one can buy around lower sides mentioned here below ranges.*

Wednesday's trading range **(All October 2014 contracts):**

**OIL: \$93.87 to \$92.03 Oct**

**NATURAL GAS: \$3.98 to \$3.84 Oct**

**HEATING OIL: \$2.8420 TO \$2.8020**

**RB GAS: \$2.7330 TO \$2.6810**

## INDIAN RUPEE

On Tuesday Rupee traded but positive, like Tuesday we see Wednesday also Rupee gaining value so don't miss opportunity buying. In the last few weeks Rupee have performed very well against Pound, Euro and Franc, and we are still recommending holding positions in Rupee against these currencies.

Dollar and Rupee will still remain in the tight range, we don't see Dollar move above 61.90 and lower side it will hold 59.90 in medium term. Breaking either side can bring any sharp move but that we don't see in short term so stay with our strategy.

Business community should borrow in Euro or Yen as these both currency's weakness and lower interest rate may benefit handsomely compare to taking loan in USD or Rupee.

We recommend buying Rupee only around now at 61.70 and now Dollar will have support at 60.90, once this level is taken out then we may see Rupee moving toward 59.83.

*Early last year we mentioned Rupee may touch 70.00 when it was trading around 52.00 levels, this target got fulfilled now next trading range will remain from 58.00 to 63.00 for some time.*

**Wednesday trading range: (Spot price)**

**RUPEE/DOLLAR – 60.73 to 60.45**

## INDIAN MARKETS

Tata Motor buying recommendations did very well in the last ten day. Mercury changing house played most positive role for few recommended stocks like **Tata motor, Cipla, Britannia, Bharat Petro, Hind Petro, IOC, CCL, Reliance, Dr. Reddy and Cadila** performed amazing well in the last five trading sessions.

Nifty also performed very well as predicted, this current rally may take Nifty toward 8137. We are still recommending following US market closely as USA market is one which is creating wave and rest of world markets are following wave of USA.

This is what we mentioned in today's international flashnews: On Tuesday stocks and Indexes went higher again, after reading few members email it looks like that this time many of our members entered in market at right time when S&P was trading around 1905. Also European investors were able to cover shorts and buy new positions.

**Negative days are passing without showing any negative which is most bullish shine for market, we strongly recommending holding positions in Indexes and stocks. NASDAQ is at 14 years high, S&P is also approaching toward all-time high and many stocks are at all-time high but important that markets and stocks are trading very calmly which is most important sign to give confirmations that S&P is ready to move toward 3200.**

Anyway I will try my best to send you Thursdays Flashnews.

Hold positions in market, add quality stocks, avoid South African and South American markets. Also most of markets will follow S&P trend but still US will outperform.

**Soon we will be announcing special discount offer like every year, so please don't miss to subscribe, renew or extend your services.**

This is what we mentioned yesterday: *Hold positions as we are in most unique bull market, I don't want to say anything more today but will write in detail once I reach Santa Barbara. On Friday US market traded in positivity but rest of other market struggled to remain in green. S&P, NASDAQ and Russell will keep outperforming most of global equity market so must have positions in US equity market. Next level for S&P is 1988, S&P have to close above this level for two days to give clear up side move.*

*Friday USA and European and few of Asian market moved higher. We are still not recommending any aggressive buying few emerging and European markets. No short positions or heading position is recommended. Tech era is coming, after two weeks NASDAQ will start creating history so NASDAQ move should be watched closely.*

*Monday we see positive day for all major markets. Hold you buying positions and add more on lower sides. Avoid South American and South African market for the next 38 days due to negative astro cycle. Hold positions in USA and European market.*

This is what we mentioned on last week Tuesday: *S&P 1905 and NASDAQ 3842/3789 level should be watched closely as we don't see USA market falling much from here. We still hold our prediction of S&P moving towards 2150 by end of this year and NASDAQ 4500. Few other markets will follow but many other international markets will struggle to move higher.*

Important note: ***As per astro chart we see both sides move continuing in all major markets for the next two weeks until Sun remains in Cancer with Jupiter. On 15 August Sun will be transiting into Leo, which is its own house and this will be a great time to add money in market. We have***

***experienced in the last 25 years that whoever invested in between 15 August to 15 September's Sun cycle always made a fortune. Please take advantage of this period to accumulate positions in quality stocks.***

In Indian market our wave cycle is showing most powerful indications in Pharmaceutical stocks and they are our favorite at this stage, tech will keep performing mix so we are not recommending any aggressive buying there for the few weeks. Index based stocks will keep performing well so get ready to trade aggressively once you get our indications.

On Tuesday Indian and USA market rallied strongly, we are recommending adding positions in quality stocks. Yesterday Tata, motor, Cipla, Reliance, and Cadila went sharply higher and positivity will continue in our recommended stocks. This trip so far have been very hectic and I know that I am not able to give 100% clear answer in letters so I apology for that.

In short, you should hold positions in stocks, and indexes. Our new list will come out once we reach Santa Barbara. 8028 and 8155 level should be watch closely. Now Nifty have cleared 7775 level so market has very limited on downside. Remain focus and we are sure you will make earn great results in the next two years. Keep adding our recommended stocks on Wednesday.

This is what we mentioned on this Monday (18 August): *Negative or uncertain cycle for equity market ended last week as predicted. Sun changing house will give new directions to stocks but commodity will struggle badly. Last week ACC, Reliance, Cipla, CCL, Britannia and TATA motor performed extremely well. One of our stock 3M India achieved predicted target and now our next target for is 6000. On Monday Indian market will remain in positive directions, we strongly recommend holding positions in recommended stocks. Most of our recommended stocks have done well in the last two years and we are still recommending holding position in most of stocks.*

*Nifty have closed above 7775, which is most important level for Indian market. If Nifty close above 7775 level on Monday and Tuesday will confirm new rising cycle for market. 8028 and 8155 should be next level before it start correcting.*

*Oil may trade negative, but keep close watch on HPCL, BPCL and IOC. Keep adding ACC, and Reliance. For short term one should buy Honeywell and Cadila.*

***Reliance and ACC should be watched closely. Tech and banking stocks will remain in some pressure on Thursday.***

*Important note: At this stage we strongly recommend buying cash rich companies (we will put out this list soon), also our most favorite stocks (Nestle, Britannia, Vadilal, SUVEN life, Sequent, Bharat Immu, Venus, coal India, Jubilant, Tata coffee, Lupin, Dr. Reddy, TCS and Tata Global).*

***If Nifty breaks 7578 level and trade below for two days can bring volatility in Indian market. Nifty is safe zone until it holds 7578 level. Next astro support level at this stage is at 7421 and in the worst case scenario 7288. On higher side still Nifty will struggle to cross 7775 level.***

***Medium and longer positions:*** *Our target for Reliance is 1350 within the next three months, which may have huge impact on index.*

This is small part from Indexes sections from last week newsletter: *As per astro chart we see both sides move continuing in all major markets for the next two weeks until Sun remains in Cancer with Jupiter. On 15 August Sun will be transiting into Leo, which is its own house and this will be a great time to add money in market. We have experienced in the last 25 years that whoever invested in between 15 August to 15 September's Sun cycle always made a fortune. Please take advantage of this period to accumulate positions in quality stocks.*

*In Indexes trading in and out will remain best strategy. In big name TCS, Reliance, Britannia, LUPIN, Wyeth, SUN Pharma, GlaxoSmith, Hindustan Lever and Dr. Reddy still are our favorite.*

This is what we mentioned last month: *We recommend to reduce buying positions expect hold some stocks like CCL, TATA GLOBLA, LUPIN, Bharat Immu, Tata Steel, Suven Pharma, Dr. Reddy, Wockhard, Testi Bite, Sequent, Vadilal, Nestle, Britannia, Tata Motor, and Cadila.*

**Wednesday's trading range: (Spot price):**

**NIFTY: 7938 to 7865 (Spot) (recommended strong buy at 6065)**

**BANK NIFTY: 15669 to 15457 (recommended strong buy at 10350)**

**AXIS BANK: 405 TO 392 (recommended strong buy at 205)**

**ICICI Bank: 1563 to 1532 (recommended strong buy at 965)**

**SBI: 2473 TO 2425 (recommended strong buy at 1532), should reach above 2000**

**RELIANCE: 1027 to 1008**

**L&T: 1548 to 1519 (recommended strong buy at 1009)**

**Tata Consult: 2470 to 2420**

**Wipro: 552 to 543**

**HCL Tech: 1551 to 1529**

**TECH MAHINDRA: 2224 TO 2180**

**Wockhardt: 719 to \$690 (time to buy at 560)**

**CIPLA: 479 to 465**

**Dr. Reddy Lab: 2859 to 2800**

**IPCA: 737 to 723**

**Ajanta Pharma: 1610 to 1563**

**Cadila: 1212 to 1163**

**Here is small part from this week letter:**

An honest truth: This trip has been more social than spiritual, and I have been meeting too many people so that calmness is not there when writing our weekly newsletter. Most of you are aware that I enjoy writing the weekly newsletter every week, and I always get excited to put my feelings and astro indicator to work and on paper but today I won't able to do it even though right now it is 4.30 AM and still most of my family members, priest, and friends are sleeping. My focus is diverted so I will keep

this letter small. I will be back in Santa Barbara during the middle of this week so I will be back to my normal routine life very soon.

Last weeks recommendations of buying S&P around 1905 and covering short positions in the European market did very well. Selling in precious metals and avoiding rest of commodities also did well. Only Thirty year bond is coming up higher than what we saw but it will be interesting to watch if it crosses the 141 level or not.

Finally the US market is getting ready to move higher aggressively because the short term negative time cycle which we predicted got over yesterday and as predicted the lower side target of 1905 level was not breached in the astro negative time cycle. This is clearly indicating that USA market is ready to create history from here onwards by moving up aggressively. Hold your investment in USD, USA stocks and some of our other favorite markets. It seems very clear that S&P is getting ready to move above the 2000 level so 1950 will become a history for S&P. At this stage I am not very confident to write clearly about how the other markets will perform but in next weeks letter we will be able to give clear indications.

On the other side, commodities are struggling to hold current levels, avoid any buying in commodities, but surely soft commodities should be watched closely as cotton, coffee and sugar will start moving higher. Also corn and wheat will rebound from current levels. Silver and gold look terrible, I don't know where silver will stop on the lower side but surely any buying in precious metals can bring losses. Last week we clearly mentioned that silver is ready to fall big and gold may follow silver. Wait for our buying indications in metals, and watch our weekly newsletter and daily Flashnews closely.

The Thirty year bond reached 141 level, our higher side maximum target almost got fulfilled so get ready to go aggressive here.

Dollar has been holding well, and at this stage USD will trade sideways but the down side will remain limited. Keep adding USD around 81.00 level.

In short, I am feeling very excited about the coming time in the US equity market, we still feel that our target of S&P reaching 3200 will get fulfilled really soon. We are about to enter into most exciting time in the history of Wall Street, and at this stage any correction should be taken as a buying opportunity. Two final cycles are pending so take complete advantage of them without delaying further, get the right positions for longer term, get into quality stocks, call options will be the right bet so you are not worried about short term uncertainty. And of course ignore any negative noise or people who are talking negatively about markets because listening to them will not help you as you will miss a historic move in the equity market.

From next week we will announce our special discount as we do every year, so get ready to take advantage of this. Those who trade in the market seriously don't need any special discount for our letter as we are aware that they value and respect our letter the most. Anyway, a discount offer is coming from next week, so take advantage of it and tell your friends and colleagues to take advantage of the special rates.

**Thanks & God Bless, Mahendra Sharma,**

**20 August 2014, Wednesday 9.00 AM, Mumbai**

### Here what we mentioned in the past two years.

This is what we mentioned during last month: *Current astro chart for Nifty and Indian market showing mix sign so keep generating cash positions. Banking and Industrial stocks will struggle during this week. **Wockhard, Wyeth, Dr. Reddy and Lupin** are our favorite companies so keep investing money in these three stocks without fear. In the two years' time you will make multifold returns.*

*At this stage Indian market is in correcting mode so profit booking will keep coming on higher side. So far our higher side target proven right and we see Nifty struggling to move above 7775, but lower side Nifty won't fall below 7425 so watch these level closely and take trading opportunity around these levels. **(Nifty shouldn't close below 7421 other will market may fall more three percent from current level).***

*This is what I mentioned in June 2014: **Just focus on Pharma and Tata Group at this stage. It looks like that Pharma stocks are ready to create history in Indian market. What Indian software companies done from 1997 to 1999, same era can be repeated in Pharma stocks. I was invested in software Indian stocks, in fact I invested in February 1996 \$17200 and that portfolio went more than 1.5 Million dollar. Only reason portfolio went so much higher because I was held my positions. We strongly recommend holding positions in our recommended stocks rather than doing speculations. We always recommend taking minimum risk in day trading and speculations, put 90% money in quality investment and 10% in short term trading in whenever opportunity knocking door.***

*This is what we mentioned 18 June 2014: **So far Nifty held value of 7425 and levels so now Nifty will have another astro support at 7475 and 7532, watch these levels closely. Astro resistance will be at 7775, so this level should be taken as profit booking.***

*This is what we mentioned in the first week of June: **Mercury changing directions will surely bring some uncertainty, so book 80% profit in our recommended stocks, still hold positions in our favorite stocks (Pfizer, Torrent Pharma, Gellette, and CCL Product, add these four stocks in your portfolio. Rest or recommended stocks have been doing great and still you can hold positions in stocks like: Agrotech, Excel Crop, Kaveeri seeds, Tata Global, Tata Coffee, Tasty bits, Mount Eve, KGNENT, Hatsun, Rasoy PR, GM Brew, Radico Kh, Jagatjit Ind, EDL, Tilaknagar Ind, Mount Shiv, Nestle, Vadilal Ind and Britania and Aurbindo.***

*Food stocks are doing great so watch our recommended food stocks list mentioned below at end of newsletter. Here we are putting list of stocks which we recommended in the early 2013: **Tasty bits, Mount Eve, KGNENT, Hatsun, Rasoy PR, GM Brew, Radico Kh, Jagatjit Ind, EDL, Tilaknagar Ind, Mount Shiv, Nestle, Vadilal Ind, Britania, Suven, Sequent Scien.***

*We don't want to say much today, we will talk more on Monday, here is what we mentioned yesterday: **Everyone who invests in India will be watching the elections results very closely; if NDA fails to get 282, then surely the market can correct five to ten percent. As predicted three weeks ago, the NDA getting closer to the majority, and BJP will get 245. It is always interesting to watch astro indicators, reading the astro cycle is an amazing study, but unfortunately, most of the financial astrologers don't have any past track records, but they start websites and try to fool people by copying other work and make investors fools (as few financial astrologer caught red handed by copying work). We hate to criticize them, but this is the truth.***

*In short we are not recommending shorting positions in India market, except small hedging positions. Also watch 7275 level closely on higher sides. Book profit in Pharma and tech stocks. **Add more Bharat Immu as this stock can fly sharply higher. After election result we will release new stock list.***

*Our predictions on Indian market have done amazingly well and at this stage don't focus do much on elections as money is always made in market with medium and longer term view. **Like six months our view was Nifty reaching 6775 when it was around 5950 and last same we predicted when it was at 5550.** I still remember when Bank Nifty broke 8800, we stated that it won't go below 8200 and 2014 target 13500 to 15900.*

*This is what we mentioned two months back: **Indian market traded sideways, we still recommend staying away from any aggressive positions in emerging market as well as in India. Ajanta Pharma, Torrent Pharma, Bharat Immu, Suven, Sequent, Cadila done very well on Tuesday in weaker market and will perform well on Wednesday as well. Our recommended food stocks like Hatsun, Radico, Jagatjit, Jubliant food, Vadilal and many other stocks have also done well.***

**By end of May Nifty may reach 7225 and then we will decide what to do next.**

*Watch **Bharat Immu** it trading around Rs. 9.00, I have been recommending this one since last two years, but stock never moved, please do research before you buy this one. We own this stock and we still see this can be takeover target.*

*This is what we mentioned last week Wednesday: **Buy aggressively Lupin, and one can hold positions in Torrent, Aurbindo Pharma, Ajanata Pharma, IPCA, Cadilla and Dr. Reddy.** After our recommendations these stocks have done well and still we see at least 300% more gain so don't miss opportunity of buying. Any weakness in Pharma stocks should be taken selling opportunity.*

**Bharat immu** is doing well, also food stocks are doing well, add more Vadilal and our most favorite **Excel Crop (already move 300% and our target of 1000% shall achieve).** Kaveeri seed done well by achieving over 2000% return and now we recommend 90% booking profit in Kaveeri seeds.

*Also Yesterday **Venus Remm** moved up sharply, hold positions in it and those who don't have any positions should take some buying positions in Venus. **Buying recommendations in Nifty proven one of the best call after S&P as in the last two six weeks nifty move from 6030 to 6750. Nifty has to cross above 6775 for the two day to give clear bullish indications and Nifty may touch 7250 in the next eight weeks. We would like to add SIX stocks during this week this we recommended on 10 March: NTPC, IDBI, Wockhardts, TATA COFFEE and TATA GLOBAL and Aurionpro Sol.** Hold our recommended stocks, add more Tata Global and TATA Coffee, Emami, Dabur, Federal Bank, Honeywell Auto, and Reliance Comm.*

*These stocks also done well and we still recommend holding these list which we recommended on 20 Feb: **3M India Ltd around 3700, our target is 4400 in the next one months. Buy BHEL around 173, and target 250 in the next three months. These two stocks achieve our predicted target and we are sure you must have book profit.***

*These recommendations made last quarter of 2013: **Buy Sequent Scientific, Suven Life and Fresenius Kabi for medium and longer terms. Keep adding our favorite Tasty bit, Venus Rem, Jubliant Food. Excel crop and Kaveeri Seeds done very well, hold these both stocks as they are also our favorite.***

Hold our favorite recommended these of stocks of 2013. **Tata Global, Tilakind, MountShivalik, Venus Remm, Hatsun Food, Kgnent, Testybit and Jubilant Food, Vadilal ind 110, Radico Khaitan 100, Excel Crop 180, Kaveri Seed, Agrotech 460, Britannia 710.**

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
