## Weekly Newsletter from 21 - 25 November 2016

**Please allows me to go wrong for shorter term on few occasions**

Dear Members,

Today I would like to write about whether S&P will hit 3200 or not, but before I write about the future of the market trend I would like you to read parts from the past few newsletters which will prepare to ignore as well as will allow you to accept even if I am wrong some time for the shorter period. As I have said before, you can read all the past articles dating back to the last 15 years on my website but let me remind you what we stated in 2014. **I would like to put parts from a few of my precious weekly newsletters of 2014 in which we called the bottom in Dollar and top for Oil; in fact, we predicted oil to hit \$32.00 in 2014 and dollar to go towards 100 and 118.** I know it was difficult to believe but after reading that it will start making you believe that astro cycles can give us a vague picture of the future coming time so don't disregard any prediction because there is always a strong reason behind any prediction we make for the medium and longer term. Gold is another trade which provided great returns in the last sixteen year and now our next prediction of fall is on the way. It will be always difficult to find a fundamental reason behind our future coming trend prediction's because they always look impossible but every longer-term prediction has been fulfilled so far in the last 30 years. The first nine pages are from the previous letters and you must read all these pages.

### Weekly Newsletter from 4 - 8 August 2014

**USD Index is getting ready for 87.80 and Oil longer term bear cycle to start, our target is \$32.00**

Dear Members,

I don't know what name I should give to the correlation of my visit to my birth country (India) and the volatile behaviour pattern of the markets. In the last 20 years I have been watching this correlation; in 2000 I told a few of my friends that the markets may collapse as soon as I reach India, this was my first call, and the world is a witness of the great crash of the tech bubble. I always try to match every event happening around with planetary movements and hidden waves of nature and I have always found an answer. Every single thing happening has a reason behind it, every event has unfold future in it. In a movie called Butterfly Effect it shows that a small move of butterfly in China

creates a hidden impact in the other parts of the world. Understanding the hidden part of the behavior pattern of nature is amazing and I've always involved myself every second to understand this hidden part. I watch people in restaurants, airports, on the streets and try to capture each and every small thing and always ask why it is like this.

During every visit I've made to India there always has been panic which is created in the market. I still remember that in 2008 on 28 June I moved to India for one year and I knew that most tough time would come in the market but I never told anyone because I was scared. In July and August of 2008 markets started collapsing and created the most unpleasant financial situation on this planet.

We always try to tell you about the importance of the hidden part of nature which can be revealed by the astro cycle. Technical, fundamental, geopolitical and economical aspects can give you the overall picture, but to understand the oncoming wave in the market or in geopolitics or social life, the astro cycle can help us a lot. I know for you to understand my feeling and insight of what I want to say is very difficult because in this current world, actual facts and numbers are more important than the unseen wave of nature, and I don't blame our human race because the world is flowing with completely different waves in the current time. I wish that I had learnt English from birth so would be able to use proper words in my letters and would be able to make you understand my feelings in the proper way.

Anyway, I don't want to regret, I feel that it is important to pass on the message of what I feel and I am sure most of you will understand my messages.

Let's talk about markets now because everyone would like to know market trend from here onwards. This bull market is in control of Saturn since the last two years, North Node gave solid foundation to this bull market. In June this year major planetary movement took place and the north node moved into Virgo and Jupiter in Cancer and currently two weeks back Sun also joined Cancer. According to the current combination fundamentals haven't changed for markets, and in astro terms I can say some readjustment is taking place due to Sun, which common investors are not able to see because of Sunlight. Investors always get confused during these kinds of combinations because real picture remains hidden. When we were writing our book **"2014 financial predictions"** we knew that the uncertain market trend would take place due to the **12 Degree Sun with combinations of Jupiter and that is the reason we clearly mentioned in the book that "final bearish trend in market from "27 August to 15 September". We also mentioned that the most amazing bull market cycle will start in markets after 15 August and financial/housing would take lead.**

What's currently happening is already predicted, and it is a coincidence that we happened to be traveling in India at the same time.

Our advice is for you to remain calm, get ready to add stocks and Indexes in your portfolio within the next 20 days. Ignore those who are talking about bearish trends or crash in the markets, your job should be to get ready to plan well for the next three years.

USD is getting ready for the most amazing ride, Bond prices are ready to collapse and the overall trend of commodities will remain in a confusing zone so we need to take a longer term bet. Dollar and S&P should be in your longer positions.

**Oil is starting longer term bear cycle, higher side will remain limited.** Watch 1905 level for S&P, 1282 for gold and 96.38 for oil as these are important astro support levels.

**Here is this week's newsletter from 4-8 August 2014,**

### **GOLD/SILVER/BASE METALS**

Last week metals traded directionless, metal stocks also traded mixed. Gold stuck to the range of \$1312/\$1327 to \$1282 as predicted. Many big metal investors follow our work very closely, many are getting excited about our positive outlook of metals from mid-2015. In the past in excitement I always get into early trade and the same happens with many. We strongly recommend not to add any aggressive trades in market at this stage, stay away or

for those who like to take longer term call options should take a small bet in silver and gold for September 2015 and December 2015.

The current astro cycle is showing negative combinations for precious and base metals except palladium. We are not recommending any buying in futures in either in silver, gold or base metals.

This week gold and silver will trade mixed or on both sides so trading in and out is recommended but from next week gold and silver prices will collapse or we see sharp fall so don't hold or carry forward any positions in metal markets. **DUST, GLL and HUI index will also move huge from next week.**

This week is Scorpio Moon so metals will trade mixed to negative or precious metals will keep rebounding from lower levels. I don't have much to say for this week, but surely metals are ready to **fall big from next week because overall astro cycle is not positive at all for gold. In longer term silver looks far better trade compare to gold as we mentioned last week.**

**Here is Monday's range: (September 2014 contract):**

**GOLD: \$1300.80 to \$1283.30 Oct contract**

**SILVER: \$20.51 TO \$20.20**

**COPPER: \$324.20 TO \$319.20**

**PALLADIUM: \$870.90 TO \$856.00**

**PLATINUM: \$1469.90 TO \$1453.10**

## INDEXES

This week is Scorpio Moon, so there will be big volatility in all major markets or markets will move in both directions. Most of you are aware that we always recommend finishing other work during Scorpio Moon, and you should be spending time with family or friends rather than trading markets. Also on Scorpio Moon one shouldn't be trading aggressive otherwise there are 90% chances of losing money.

Last week markets fell sharply as expected, European markets performed very negative. Emerging markets also went down but compare to all markets, our recommendations of selling European market did well. DAX fell most and the concern is rising about European growth.

At this stage DAX looks most negative for the short term period but the down side is maximum three percent from here, we don't see DAX going below 8874. S&P will hold 1904 level and in the worst case scenario it can move towards 1883. Don't buy any aggressive positions until 15 August 2014 until Sun is in Cancer.

As per astro cycle **banking, housing, biotech and tech stocks will rock, stocks from these sector will move up crazily higher in the second half of 2014 and 2015**. According to our astro cycle S&P should **gain 10 to 15 percent in the second half of 2014**. We are also scared that media will hate the oncoming rally due to the North-Node in Virgo and they will keep publishing negative comments on markets.

This week Scorpio Moon will bring an unstable trend in market, on Monday markets will stabilize, some selling pressure will come during intra-day sessions but still we see market closing stable. Tuesday most of the markets will trade very aggressively on both sides, it clearly looks as if the market may move higher. Late Wednesday and Thursday once again some selling will come and Friday market will close stable.

Scorpio Moon will start from Tuesday morning and will end on Thursday, so avoid any positions.

Emerging markets will remain under pressure, watch 1905 level for S&P, in the worst case scenario it can touch 1883 but chances of happening this is 5%. Get ready with cash as once again great buying opportunity in market is coming. **According to our medium term theory USA market will enter in 4<sup>th</sup> bullish cycle which can last for the 15 months before it start final euphoria cycle.**

**Here are Mondays' ranges: (September contracts)**

**AUSTRALIAN (SEP) – 5596 to 5565**

**NIKKEI (June) – 15537 TO 15255**

**NIFTY S&P (Spot) – 7650 to 7555**

**HONG KONG (cash) – 24689 to 24410**

**CAC – 4237 TO 4155**

**DAX – 9297 TO 9127**

**DEX EURO STOXX – 3099 – 3032**

**FTSE – 6651 TO 6560**

**FTSE/JSE – 45975 to 45477**

**S&P – 1934.00 TO 1910.50**

**NASDAQ – 3900.50 TO 3842.25**

**RUSSELL – 1119.90 TO 1103.00**

**DOW – 16539 TO 16330**

#### ENERGY

Oil failed to move higher above \$105.55, which gave a clear signal of weaker trend. Oil selling was good trade and now buy oil on Monday around lower side of day with stop-loss of \$95.80 should provide some profit. Tuesday and Wednesday looks positive according to astro chart.

Thursday oil prices will fall sharply and Friday the same kind of trend will continue.

In the last 15 months oil has been trading in 10 to 15% range without any side major move. If oil breaks our astro support point of \$95.80 then we may see it is moving towards the \$86.00 level. Watch closely as still our astro combinations are not that encouraging for commodities. Also watch USD trend very closely as strong USD will put some pressure on commodities.

Heating oil and RB gas will follow oil, so sell these both energy products if oil breaks \$95.80.

Natural gas positive trend will start and it may gains ten percent from current levels, so buy gas with stop-loss of 3.70. On Monday gas prices will trade mixed but from Tuesday we see a positive trend

starting and the whole week it will keep bouncing from lower levels. Our strategy is very clear, on daily basis you should add gas on lower sides and we are sure you shall make good money by end of this week.

Energy stocks traded negative during last week, we recommend holding positions in energy stocks until oil remains above \$95.80 level.

Most of you are aware that our longer-term view is very negative for oil, we see oil be going back to \$32.00 in the next five years, oil companies will lose a fortune so longer term traders must implement a proper strategy. Many oil drilling companies will close down in the next eight years and that is the reason we are not recommending investing in new oil exploration companies. I don't want to write more at this stage on oil because still for a few years' oil may remain in the same trading pattern if last two years.

**Monday's trading range (All August 2014 contracts):**

**OIL: \$98.50 to \$96.70 Sep**

**NATURAL GAS: \$3.89 to \$3.75 Sep**

**HEATING OIL: \$2.8810 TO \$2.8400**

**RB GAS: \$2.7660 TO \$2.7210**

## CURRENCIES

S&P and USD bull market will walk together in the coming time.

Dollar formed a strong bottom around 79.50, this was great buying level. Many of our members are holding USD positions, keep adding USD around 81.00 level during this week because USD is ready to explode.

Since Jupiter moved in Cancer USD started moving higher, which confirms that Jupiter is ready to play its most powerful role in the support of USD after 15 years of bear trend. Day by day astro cycles are turning very negative for Euro and Franc. At this stage I don't know what the impact of crash of Euro on financial system and global equity market will be so I have to watch market trends closely when euro starts collapsing. At this stage we have good news that major astro cycles are supporting stock market trends so we shouldn't be too concerned even if euro started falling. Also other currencies like Australian dollar and Canadian dollar will face a tough time. We already predicted the fall of Yen in 2012, our first predicted target got achieved once it reached 0.9700 in

early 2013 and after that it has been trading in the narrow range. Higher side is very limited for Yen and the lower side lot to come yet but on other hand sharp fall in euro fall may support Yen as many central banks will start diversify back to Yen from euro. There is no doubt that an interesting time is coming in currency markets, surely we see US dollar coming back and ruling currency market.

This week indicates mixed trend with volatility, USD those who missed the opportunity of buying around 80.00 should get ready to load up USD around 81.00. We don't see USD Index going below 81.00 in the current time. On Monday Euro will gain but the higher side will remain limited, we recommend selling positions in Euro and Franc, add more selling Euro on Tuesday as well, from mid Tuesday weakness in Euro will start. Wednesday dollar will gain against most of the other currencies, some weakness in USD will come back on Tuesday but on Friday huge upside move will come.

Emerging market currencies will trade negative during this week for the first four days but from late Thursday small recovery will come and Friday recovery will continue.

Japanese Yen will gain value during this week on Monday and Tuesday. Wednesday and Thursday it will trade negative but Friday we see recovery.

In pound the down side is limited, buy British Pound if it reaches toward 1.6655 for the short period, and on the higher side it will struggle to move above 1.7300. This range will continue for the next 45 days. We see recovery in Pound from mid Monday.

**Monday's trading range: (September contract)**

**DOLLAR INDEX – 81.57 to 81.25**

**AUSTRALIAN DOLLAR – 0.9319 to 0.9245**

**CANADIAN DOLLAR – 0.9180 to 0.9120**

**BRITISH POUND – 1.6870 to 1.6770**

**EURO – 1.3462 to 1.3407**

**JAPANESE YEN – 0.9789 to 0.9730**

**SWISS FRANC – 1.1087 to 1.1018**

**RUPPEE – 61.45 to 60.78 (Spot)**

**RAND – 10.74 to 10.60 (Spot)**

Thanks & God Bless

Mahendra Sharma, 4 August 2014, 4.00 AM Mumbai

This below currency part is taken out from 14-18 July Weekly newsletter

## CURRENCIES

For many decades USD played a key role in commodity move but 2013/14 weaker USD is not helping commodities trend, in fact metals traded weaker in the last two years during a weaker USD trend. Factor of USD is going away, and people are not talking much about USD. USD made a low of 72.00 in 2008 and after that it moved sharply higher towards 88. It went towards 88 three times but failed to break and came back to 78.00 levels. Now USD has been trading around 80.00 level without clear directions. In December 2013 we are recommending buying USD around 79.50 or selling Euro around 1.3980. Yes after that Euro never went to 1.3980 but dollar Index struggled to move higher because of gaining value of Yen and Pound.

Most key basket currencies have to move lower which can support one side directions in USD but if Yen and Pound gaining can eat up gains of USD even if Euro is moves lower. **Jupiter changed its house last month but was not able to bring new life in USD. Now we are waiting for the North Node to transit because it can play a huge negative role in the movement of currencies.**

At this stage investors are focusing on stocks and indexes, that is why we are not seeing huge volatility in currencies and bond markets, also commodities are moving on both sides.

So far most stock markets have been following the US equity market and trading around the historic high but if the European and emerging markets start moving sideways and US equity market keeps moving higher, then it will surely bring huge moves in the currency market. From 1997 to 2000 USD moved up from 83.00 to 120.00 without any break, and this happened due to the tech bubble. Money kept flowing into internet and tech stocks from each corner of the world and so there was a lot of demand of USD. During the same era most of the worlds market underperformed except for India and Taiwan because both these countries were also playing a key role in software and semiconductor companies.

Money follow forces sharp rises or falls of any currency and at this stage USD should move higher as money is flowing back in USA stocks and assets. At this stage Jupiter failed to bring positive move in USD, and it looks like USD may take a few more months before it starts aggressive upside moves. Let's see the role of the North Node for USD after changing this week.

On Monday USD will trade positively. On Tuesday and Wednesday USD will trade sideways but on Thursday and Friday USD will break the higher side and may touch 80.75. **USD has to break Astro resistance level of 81.82 to get new directions.**

Pound will remain sideways but Yen will gain value at this stage during this week against most currencies.

Australian dollar and Canadian dollar will remain in a sideways direction without a clear trend. Emerging market currencies will trade weaker during this week.

**Euro and Swiss Francs trend looks terrible. We are holding put options in both of these currencies and you should hold some positions as in the medium and longer term this trade will make you a fortune.**

**Monday's trading range: (September contract)**

**DOLLAR INDEX – 80.45 to 80.09**

**AUSTRALIAN DOLLAR – 0.9391 to 0.9300**

**CANADIAN DOLLAR – 0.9336 to 0.9270**

**BRITISH POUND – 1.7148 to 1.7050**

**EURO – 1.3666 to 1.3586**

**JAPANESE YEN – 0.9908 to 0.9850**

**SWISS FRANC – 1.1253 to 1.1190**

**RUPPEE – 60.12 to 59.80 (Spot)**

**RAND – 10.71 to 10.60 (Spot)**

Thanks & God Bless

Mahendra Sharma

13 July 2014, 3.00 PM Santa Barbara

This below article on gold was written in 2003 must read, you can click link or read below text of link:

<http://www.mahendraprophecy.com/predictions.php?id=40>

I still remember on the 9<sup>th</sup> September 2001, in an interview I made at 1.30pm at SABC TV in Johannesburg. There were five most important predictions that I made on that day:

Last but not lest, and the most important prediction was: **gold will rule this century and the prices of gold will rise for the next 51 years.**

Many other predictions I made on that day in the interview I have them videotaped. Whenever bear cartel of gold they confuse me, same day I play repeatedly that videotape, I mostly watch that part about the gold and I try to read again in that tape; my body language, eyes movements and my voice the way they were responding it was in a unique way. That was the message and calculation is astrology.

One more thing that I want to openly share with you is a very personal experience that I had on my 23<sup>rd</sup> birthday in September 1991, I was seated with a good friend of mine in his home having a cup of tea at around 7.00pm and I

suddenly told him that I think I have a unique relationship with gold and that a time will soon come when I will be predicting on gold and Gold would move with my thoughts accordingly.

On the day of the interview I wanted to speak much more on gold but time was not on my side since there was a time limit of 30minutes only, so I had to give maximum information in brief words (I wanted to explain in full details why I said gold would rule this century and what the future holds for gold and why it would remain strong.)

My sentence was **"gold will rule the century"**, it will be rising soon and bottom-out on 27<sup>th</sup> November 2001, gold companies and investors will make fortune in long terms. Prices of gold will reach \$1600 in a few years time. This was what I said in the interview but let me explain more on what I wanted to say and why I recommended my closest people and public to remain invested in gold. This century started with Jupiter. Jupiter has a unique relationship with gold but there are negative planets which give negative impact for short term, like in our life time is not always the same, even the brilliant people, technical analyses or knowledgeable speculators also make losses in the market. Whenever the time is negative, gold prices come down for short period.

I have been watching and reading closely the movement of gold for the last 18months, gold is trading very strongly above \$300, that shows a very strong strength in prices and future trend, also the gold stock are performing well and the mostly gold investors have made money and mighty few have lost because of bad luck in chart. I still hold my prediction for gold to cross \$400 and Silver to cross \$6.00 soon. Next week major price movement will come in gold and silver, at the time I am writing this article gold is trading around \$353 and silver \$5.03, I am expecting major rise next week.

Changes of Jupiter from the 3<sup>rd</sup> week of July 2003 are giving signals for gold/silver prices towards the up-ward movements. Time changes peoples' minds i.e. after 1996 many started investing in technology because of Saturn pulling power (but stayed for short period) and now Jupiter is doing for gold and good news is that it will do for long period. Like 18months before people were very optimistic on gold and gold stocks but slowly the gold prices moved up and people were slowly joining the crowd, more people will join in the crowd to come and put their money in a safe place, and that's in gold.

Big and small investors will join in the crowd this will make gold reach \$1600 an ounce, then there will be a drastic fall because the energy has to divert, after sunshine the sun has to set, prices will come down to around \$1000 ounce and the future range of gold will be \$1000 to \$1600 from the year 2010 to 2018.

I don't want to write a lengthy clarification; I know some people from gold community are still optimistic about my gold and silver predications.

Some thing off track, I am writing here because I felt it. I think each human should respect each other because in each human being there is a God. I think everyone has a unique ability we better develop a good path we all know ourselves better and I am sure the day we all know ourselves fully we will do something good to the community and the world, I want to continue my life towards astrology, the great signs of astrology and whenever I get a message I pass it on to you. If one has lost money through my advice, I sincerely ask for their forgiveness because I want to remain your friend for the remaining days of my life.

God bless. Yours,

MAHENDRA SHARMA.

\*\*\*\*\*

My predictions on the financial market have been on public domain since 2001, and before that you can find most of my predictions in the newspaper and TV/Radio interviews. Most of you have been following my work through my website since the last 15 years and we have all articles on our website which allow people or new visitors to check our track records. No one keeps over a decade of articles on the website but we did, and we were not afraid of our wrong predictions because our overall guidance helped investors and money managers. I am not trying to sell my services to you and neither am I trying to convince anyone. Yes, I put all these words here to bring attention to the main street

that the astro theory is a most powerful tool available which can guide us for the medium and longer term and it can bring great returns and you can outperform every expert in investment field.

Let me start this week's newsletter, because it is important that we always keep a vague picture mind for the longer term. Let me also tell you I am writing the "2017 Financial Predictions" book; it will only be released in the e-book format and shall come out in the middle of January like the last book as I will be on holiday in December and I want meditate a lot during the three weeks on the ship.

Before I start the weekly newsletter, **I want to answer the one question which has been coming from everyone about S&P, and whether S&P will achieve 3200 or not? and gold will test \$750 or not in 2017? And my answer is, yes it can but...**

**Here is this week's newsletter from 21-25 November 2016:**
