Friday's Flashnews

Dear Members,

I am sure you are well placed with your investment well in USA stocks. Very powerful wave is on the way in short term for USA equity market, so get into NASDAQ, S&P and tech stocks. Tech stocks are getting very close to most powerful astro combinations so get ready to buy tech stocks.

Thursday USA market traded sideways, European markets traded negative and emerging market traded mix. Indian stocks remain in demand.

Commodities like grains, energy and metals gained small value from lower sides but higher side will remain limited. Thirty year bond made high of 2014.

Currency market remained in thin trading pattern and we also witnessed some profit booking in USD. Our advice for Friday is to buy on any weakness, or around lower sides in USA market but don't take any aggressive bet in European market. Surely take small buying in quality indexes base stocks in European and emerging markets.

S&P is ready to 2037 to 2052 and NASDAQ 4230 in short term rally in the next two weeks.

Thursday European markets went sharply lower as predicted yesterday: ***Thursday will be right days to acquire positions in stocks and Indexes around lower sides, as astro indicators are showing very positive indications from late Thursday for stocks. We are not recommending any new buying positions in European and emerging market as we may see some volatility coming back in stocks market during early next week due to Scorpio Moon.***

This is what we mentioned yesterday: *On Tuesday market traded positive, S&P closed above 2000 first time in history. 15 days back astro indications able to guided us very well buying around 1905, we also mentioned S&P and most market gaining value from 14 August to 15 September. Now our next target for S&P is 2037, so watch this level closely. We strongly recommend holding positions, don't short market, but surely one can book some part of profit on rise. Tech and Biotech stocks are traded very positive.*

We are announcing a 33% discount on each service which means that for whatever period you subscribe you will get 33% extra time on that subscription.

For example if you subscribe 3 months service then you will get 1 month and if you subscribe one year then you will get four months subscription for free so total you will get 16 months services.

Subscribe One month	You will get extra 10 days	Total you will get 40 days
---------------------	----------------------------	----------------------------

Subscription Three month	You will get extra 1 Month	Total you will get 4 months
Subscription Six month	You will get extra 2 Months	Total you will get 8 months
Subscription One Year	You will get extra 4 Months	Total you will get 16 months

Here are the trading ranges and strategies for Friday:

METALS

On Wednesday and Thursday precious metals traded in the narrow range to positive which is bit positive indications for metals as these both days were supposed to be bit negative days but on other hand copper traded negative which give mix astro signal for metals. Gold is still holding \$1283 level which is positive sign for gold so watch this level closely.

Palladium is ready to trade above \$900 mark, hold positions in Palladium. Read next week newsletter closely as we still believe that Palladium moving toward \$1000.

Metal stocks will trade mix. We are still not giving buying signal in metals but surely you can trade in and out in precious metals at this stage and higher side will remain limited so no need to buy metals for positioning trading.

This is what we recommended three weeks ago: ***\$1282 is most crucial level, because gold can fall sharply if it break this level. Next astro support is at \$1243. On hiver side gold will struggle to move above \$1312 and \$1327 level. Base metals will trade directions, we are not recommending any positions in base metals.***

Here is Friday's range: (September 2014 contract):

GOLD: \$1297.90 to \$1283.00 Oct contract

SILVER: \$19.75 TO \$19.33

COPPER: \$315.90 TO \$310.50

PALLADIUM: \$903.90 TO \$893.90 Add more

PLATINUM: \$1436.90 TO \$1414.10

INDEXES

On Thursday emerging, Asian and European market traded negative, European market fell sharply after week economic data but on other hand USA GDP data was very encouraging as expected. We predicted most important prediction in our book that by 2014 end we see unemployment rate falling below six percent and I am waiting for this.

Our astro indicators are showing surely great sing for USA market on Friday so don't miss to take buying opportunity in stocks and Indexes. Don't short any market as all major global markets may not rise as USA but surely they will hold value due to positive trend in USA market.

Monday and Tuesday Scorpio Moon but we are not much concern, any weakness should be taken buying opportunity.

Friday US markets may move toward all-time high.

This is what we mentioned yesterday: *Thursday we see mix trend for most markets but don't miss buying around lower ranges as we see Friday we see market moving higher. USA market will open stable but move higher in second half of the day.*

I was talking with few of our members and it looks like that investors are selling and getting away from positions. There is no doubt that booking profit is always good but store without goods won't earn money, In simple word keep adding quality stocks in your portfolio will making money for you in the two years.

Look at stocks like PCRX, DXCM, ACHC, MSFT, INTC, AAPL, GILD, CELG, QCOR, ITMN, JPC, CNC, THC, HUM, HZNP, PLUG, MDVN, PBVI and many other stocks have done amazingly well. Please check these stocks list and see who these companies performed in the last 12 months. These stocks created great value and growth in investor's portfolio. Many investors start ignoring stocks once you start trading high leverage and volatile futures markets. We strongly recommend investing in quality stocks, watch our stock report recommendations very closely.

Hold investment in indexes, S&P and NASDAQ ready to move higher. Here is what we mentioned yesterday: ***Investors are getting Finally S&P closed above 2000 market first time in history. It has been most interesting time for our work as we our astro cycle theory were able to predict each move from 1100 to 2000. Tech and Biotech stocks remained in demand.***

Important message of Monday: ***If it closes above this level on Monday and Tuesday then we may see a sharp upside move but Monday is a New Moon and that rarely supports any market bullish pattern but then the market can move higher for two to three years. It will be testing for Indexes.***

Let's keep our fingers crossed and hope that S&P closes above 1988 on Monday, because this will be the most powerful indication. IBM should be added to your portfolio every day without fail.

Don't short the market or stocks as the market is ready to enter the most powerful bullish pattern once Mars enter in Scorpio within the next ten days.

This is what we mentioned on two week back on Tuesday: ***S&P 1905 and NASDAQ 3842/3789 level should be watched closely as we don't see USA market falling much from here. We still hold our prediction of S&P moving towards 2150 by end of this year and NASDAQ 4500. Few other markets will follow but many other international markets will struggle to move higher.***

Important note: ***As per astro chart we see both sides move continuing in all major markets for the next two weeks until Sun remains in Cancer with Jupiter. On 15 August Sun will be transiting into Leo, which is its own house and this will be a great time to add money in market. We have experienced in the last 25 years that whoever invested in between 15 August to 15 September's Sun cycle always made a fortune. Please take advantage of this period to accumulate positions in quality stocks.***

Here are Fridays' ranges: (September **contracts**)

AUSTRALIAN (SEP) – 5428 to 5490

NIKKEI (June) – 15500 TO 15339

NIFTY S&P (Spot) – 7982 to 7920

HONG KONG (cash) – 25000 to 24700

CAC – 4401 TO 4355

DAX – 9555 TO 9410

DEX EURO STOXX – 3191 – 3145

FTSE – 6843 TO 6790

FTSE/JSE – 45970 to 45627

S&P – 2003.50 TO 1990.00

NASDAQ – 4085.50 TO 4055.25

RUSSELL – 1175.90 TO 1161.00

DOW – 17180 TO 17040

TREASURY BOND

We are not changing any predictions in bond: *Thirty year bond traded around 141 last week, and we are still holding our prediction of a sharp fall in bond prices in the medium term. TMV ETF's of Bond are trading around \$40.66 level, and one should buy next year's call options which can make you great returns. For the next few weeks trading in and out will be the right strategy.*

This is what we mentioned two weeks back: ***Only trade put options, and after 15 September we may see a free fall. Trading in and out as mentioned below ranges will be the best strategy.***

Friday trading range (**September contract**):

TREASURY BOND – 142-03 TO 141-07

SOFT COMMODITIES

On Wednesday coffee and cotton traded positive, hold positions in both these softs and add more sugar on Thursday. In this week newsletter we mentioned that positive trend in softs starting from late Thursday so don't miss opportunity of buying today.

Hold sell in metals and keep adding softs from this week. Coffee buying recommendations at \$107 done amazingly well, it gained 80% which is huge in commodity market and we are still recommending buying coffee. Those who bought can hold positions as our next target is \$237. Cotton buying recommendation at \$62 so far did well, hold positions in coffee. Today we recommended sugar, keep adding sugar without fear.

This is what we mentioned last week: *Buying recommendations did very well in coffee at \$159 level. Hold positions in coffee with a stop-loss of \$174, and watch \$185 on higher as once it starts trading above \$185, we may see the \$257 level quickly. Buy sugar around \$15.80 and cotton around \$61.38 level.*

Friday trading range: (September/OCT 2014 Contract)

COFFEE: \$197.90 TO \$192.90

COTTON: \$67.80 TO \$66.70

SUGAR: \$15.85 TO \$15.43

GRAINS

On Wednesday grains close mix, Soy meal recovered on short covering from lows. Wheat and corn traded negative but get ready to buy positions in corn and wheat on Friday and next Monday, until that you should trade in and out.

Soy prices traded negative as predicted, Soy will struggle. In the last three months our selling recommendations in grains did very well. Trading in and out in soy is recommended.

This is what we mentioned yesterday: *Last week September future contract of Soy meal prices moved sharply higher and December remained unchanged which is very suspicious so watch meal prices closely. Corn and wheat will trade mixed, but surely on the lower side one can keep acquiring positions in both these grains.*

We are sure you must have covered all shorts in soy, and now trading in and out will be the right strategy in Soy. Any rise in soy should be taken as a selling opportunity during this week and the same we predict for soy oil.

Avoid Soy products. We don't see soy going below \$955, wheat \$497 and corn \$330 so go aggressive if prices come to these levels.

Friday's trading range (September 2014 contracts):

CORN: \$364.00 TO \$359.00

WHEAT: \$564.00 TO \$549.50

SOY: \$1033.00 TO \$1025.50 (November)

SOY MEAL: \$432.00 TO \$417.00

SOY OIL: \$33.05 TO \$32.31

ENERGY

Oil traded mix on Wednesday as predicted, same kind of trend is indicating on Thursday. We strongly recommend buying energy stocks on Thursday as energy stocks will move sharply higher during next seven days.

Oil have been holding value of \$92.38 which is great sign for energy investors. Also natural gas is trading positive as predicted, so add positions in oil and gas on Thursday. You can also buy some positions in RB gas and heating oil. On higher side oil will struggle to move above \$95.55. Our astro system is not recommending any aggressive trade in commodities so we will recommend trading in and out in energy but surely energy stocks can surprise investors during the next two weeks.

This is what we mentioned yesterday: *Natural has traded positive as predicted on Monday, hold positions in gas. Since the last one month Gas prices have been holding \$3.72 level on the down side which is clearly indicating that gas prices may move higher from here but it will still struggle to close above \$4.32 level. Add more natural gas on Tuesday.*

Watch \$92.38 level closely as this is an important astro support level. **DON'T SHORT ENERGY STOCKS.**

Friday's trading range (All October 2014 contracts):

OIL: \$95.17 to \$93.90 Oct

NATURAL GAS: \$4.14 to \$3.99 Oct

HEATING OIL: \$2.8720 TO \$2.8310

RB GAS: \$2.6130 TO \$2.5720

CURRENCIES

On Thursday currencies traded both sides, we are seeing same kind of trend for Friday but down for USD will be very limited so keep adding USD on any weakness. Emerging market currencies looks great buy, so keep adding these currencies.

Dollar buying recommendations have done well, add more USD on weakness, or aggressive buying around 82.25, and 81.88. We don't see USD index going below 81.77 in near term.

Australian and Canadian dollar will keep gaining value, so add more these both currencies for the short period, maximum higher side in these both currencies are just 100 pip, longer term traders should hold sell in Australian dollar.

Pound and Yen will trade weaker on Friday. Euro and Franc will trade both sides, we recommend selling around higher mentioned below ranges. On Thursday we see mix trend continuing, we see merging market currencies keep gaining Canadian and Australian dollar will remain bit weaker.

Euro is trading around multiyear low and our next target of 1.2935 may fulfill soon and higher side maximum 1.3333.

Emerging market currencies traded positive, same kind of trend will continue in Rupee, Peso, Rand and Real. Hold positions in emerging market currencies against Euro, Franc, Yen and Pond.

Add USD with stop-loss at 82.23 with target of 83.55.

We are not changing any predictions of what we mentioned on Thursday: *Euro is trading at most crucial level of 1.3355, if Euro break this level and trade below for 48 hours will confirm that Euro going toward 1.2932.*

Remember this: *We are not changing any predictions in currencies of what we mentioned yesterday: At this stage USD is trading in a positive direction without any break since the last three weeks. Finally it is reaching a most crucial level because once it breaks 81.78 then the nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections.*

I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.

This is what we mentioned in the month of May 2014: Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.

Friday's trading range: (September contract)

DOLLAR INDEX – 82.73 to 82.31

AUSTRALIAN DOLLAR – 0.9379 to 0.9314

CANADIAN DOLLAR – 0.9249 to 0.9179

BRITISH POUND – 1.6625 to 1.6567

EURO – 1.3229 to 1.3160

JAPANESE YEN – 0.9675 to 0.9625

SWISS FRANC – 1.0975 to 1.0910

RUPPEE – 60.65 to 60.35 (Spot)

RAND – 10.65 to 10.52 (Spot)

Below few important notes from last two months Flashnews:

This is what we mentioned on 20 August: *Soft and grains remained mix, but metals and energy lost value. Era of 1995 to 2000 is back now* because equity and USD is showing positivity and commodities are struggling.

Hold positions in stocks, avoid commodities, sell bond and one can start buying USD on weakness. Indexes should be in your buying list. Watch our predicted ranges closely, once again 1988 will be crucial level for S&P, 1282 for gold and USD 81.00.

This is what we mentioned 18 August: *USA market recovered nicely during last week from 1905 to 1960, NASDAQ and other markets also recovered as predicted. Last month higher side resistance level 1988 and buying level 1905 guided us well. Lower side in market looks very limited, so any weakness should be taken buying opportunity. Metals weakness on Friday conformed weakness to continue.*

Your investment strategy should be clear at this stage, trade in and out in commodities. Keep adding quality stocks and call options. Last week went very well, those who bought S&P around 1905 must have done well. Commodities are trading negative and same kind of trend will continue. Oil broke most important level of \$96.38 which indicates that it is ready to move toward \$88.78 if its break \$92.43. Silver and copper trading negative, weaker trends will continue, avoid any buying in both of these

From our book: *From here to 15 August markets will trade mix, but surely many stocks will move higher. We will be releasing more five stocks in retirement account in today's stock report. In this year book "2014 financial predictions" we predicted "final bear cycle in market from 27 July to 15 August 2014", yes Sun can bring some uncertainty but take this uncertainty as buying opportunity.*

This is what we mentioned on the 18th of May (two days before the market started rebounding, as we predicted a huge rally starting from the 21st of May in all major indexes): In short, time is running out for most analysts who have been predicting a fall or crash. Investors will miss the opportunity of buying; in fact, they will go in the red if they short stocks and indexes, so we warn these analysts to advise investors carefully. We see a huge move coming from the 21st of May and S&P will achieve 1955 from the current levels of 1870.

In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

Thanks & God Bless, Mahendra Sharma,

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
