## Thursday's Flash news (unedited copy)

Dear Members,

On Wednesday market lost value after opening higher. S&P closed below 2005 which not encouraging news but we shouldn't be worried at this stage until S&P doesn't close below 2005 for three days in row. Thursday we see positive trend in market and negative trend in commodities so keep adding positions in market and sell commodities.

On Wednesday commodities traded negative and USD gained value. Same kind of trend we see for Thursday.

Thirty year Bond gained value sharply but not able to close above 152, our recommendations is selling around 152.

Apple and Boeing came out with positive earning, both these stocks went sharply higher. Microsoft closed sharply lower. Great buying opportunity in beaten stocks on Thursday.

Yesterday we recommended buying on weakness after FED decisions and we are sure you must have taken positions. Our bullish view is intact but surely we are watching oil prices closely because it is closed just below \$44.55. Let's watch closely for the next two days, if oil close below \$44.55 on Thursday and Friday then surely get ready for oil to move toward \$33.80.

Last week clearly indicated that bull market is in 100% grip of astro cycle. This is what we mentioned on Friday: *Thursday market USA market gained sharply higher as predicted. It looks like market is in very power wave because indications we were waiting for Wednesday and Thursday for market and indications clearly showing that market (DOW) is ready to move at least 1500 to 1800 points.*

*Don't short market at any level at this stage until any astro doesn't turn negative. It is getting clear that S&P will roar and will close above 2088 which so far have been most strong astro resistance points.*

*Euro collapse today, Dollar index moved toward Decade high and commodities traded mix to negative.*

*Friday most of market will trade positive, hold positions in market. Hold sell positions in bond.*

This is what we mentioned yesterday: *If short term aggressive astro combinations don't impact market then celebrations time for traders because markets can move 5% to 10% higher in the next six weeks.*

*I would like to watch next 24 hours very closely for stocks. Metals looks terrible so any rise after ECB should be taking as selling opportunity. Stay away from any aggressive trades in metals.*

*Energy prices will still trade directionless before they start adopting clear path. Dollar still has power to come back but at this stage we would like to go flat.*

This is what we mentioned on last week Tuesday and was important predictions so read it again: *At this stage 2005 for S&P and \$44.55 for Oil remained most important astro support and we believe that these support will play key role for traders so buy both these market around these levels. Gold struggled and copper prices crashed as predicted. Overall behavior pattern on Tuesday of commodities and markets remained as predicted.*

*On Wednesday we see positivity in stock prices so don't miss opportunity of buying stocks, keep selling commodities but we are sure you must have covered oil around our predicted lower sides of \$44.55. When we recommended shorting oil around \$92.78, we never thought that oil could achieve our lower side predicted target of \$44.55 so quickly. Anyway's our lower side target got fulfilled in oil, so cover all short positions in oil, heating oil, RB Gas and natural gas if you haven't covered yesterday.*

*Grains, softs and metals traded as predicted, copper selling recommendations also did very well, we still recommend holding short in copper. Avoid any buying gold prices. Buy stocks without fear as USA market is ready for big run if S&P hold 2005 and 1982 which we see holding. NASDAQ is ready to create a history here.*

*Don't miss to recommend your close people to buy our book, please put word out if you like our work.*

#### **Here are the trading ranges and strategies for Thursday:**

#### **METALS**

On Wednesday metals traded negative which is clear sign that only few days are left below gold start falling below. Our advice remain same so selling on any rise. This is what mentioned yesterday: *On Wednesday Metals will trade mix but after FED announcement we will see both side move. We strongly recommend selling gold and silver around higher sides. Gold started trading below \$1283 and close below two days will confirm this time gold going toward \$1000.*

*Base metals will trade mix, don't buy any positions.*

This is what we mentioned on Monday: *On Friday precious metals traded negatively but base metals lost big value. Copper prices crashed as predicted and we are not recommending*

*touching copper at any levels. We still recommend selling precious and base metals on the higher side on Monday. On Thursday precious metals traded mixed and the same kind of trend will continue on Friday. If gold starts trading below \$1283 then expect 1183 within a short period.*

*One can start taking positions in DUST, GLL and DSLV.*

This is what we mentioned on the 1<sup>st</sup> of September: **Gold breached \$1283 level which clearly indicating that is moving toward \$1248 to \$1153 and silver \$17.57 to 14.87 level soon. Metal stocks will also suffer setback.**

Here is Thursday's range: **(March 2015 contract):**

**GOLD: \$1295.80 to \$1270 Feb 2015**

**SILVER: \$18.18 TO 17.51**

**COPPER: \$250.00 TO \$241.00**

**PALLADIUM: \$798.00 TO \$784.00**

**PLATINUM: \$1260.30 TO \$1241.50 April 2015**

## **GRAINS**

On Wednesday grains traded weaker as predicted and we are recommending following same advice as predicted of trading in and out on daily basis. In this week's newsletter we mentioned that from second week of February one can start buying grains.

This is what we mentioned four months back: *Don't buy any position at this stage but wait for the next week's newsletter for the right advice. Selling calls in soy around \$1550, wheat at \$730 have done very well and we targeted Soy to fall below \$1000 and wheat \$550. Both these lower side targets are closer to being fulfilled. Selling grains remained the best advice in 2014, yes gold and silver selling has also done well.*

This is what we mentioned two month back: *Avoid Soy products. We don't see soy going below \$930, wheat \$477 and corn \$330 so go aggressive if prices come to these levels.*

Thursday's trading range **(March 2015 contracts):**

**CORN: \$376.00 TO \$368.00**

**WHEAT: \$512.00 TO \$504.00**

**SOY: \$980.00 TO \$959.50**

**SOY MEAL: \$341.00 TO \$333.50**

**SOY OIL: \$30.50 TO \$29.80**

## ENERGY

On Wednesday oil prices traded mix as predicted and same kind of trend will continue on Thursday but if oil close below \$44.55 on Thursday and Friday then expect major fall in oil. Don't buy or hold energy stocks as oil will stay lower for longer period. It is also opening door for oil to move below \$40 if oil close below \$44.55 for two days.

Trading in and out will remain best strategy. We are also recommending buying Natural gas but avoid heating oil and RB gas.

This is what we mentioned yesterday: *Buy Gas and buy some positions in oil around \$44.55 on Tuesday with stop loss of oil close below \$44.55 then don't hold any positions.*

This is what we mentioned Monday: *It was the biggest bonanza for many emerging markets central banks from falling oil. Developing country consumers saved big bucks on falling gas. On Monday we recommend buying Natural gas as since the last one year we have been predicting that gas will hold value of \$2.70.*

*Oil, heating oil and RB gas will not be able to hold value on the higher side so trading in and out will be the best strategy. We still believe that oil will hold \$44.55 level on the lower side and \$51.38 will be the resistance on the higher side. Energy stocks will trade on both sides on Monday so do not take any aggressive positions either in energy or energy stocks.*

*Energy investors should pray that oil shouldn't close below \$44.55 for two days otherwise it will be a disastrous news for oil and energy traders. We are a little concerned about the outlook for commodities in the near term and I hope that CCI index won't break on the lower side.*

*Monday will remain a mixed trading day for energy so as predicted trade in and out as per the below mentioned ranges.*

This is what we mentioned on last week Tuesday: ***Monday energy prices traded sharply lower, energy stocks also lost big value. There is no doubt that people have lost fortune those who remain in buying positions and it looks very difficult to me that these traders will every able to make that kind of money back trading oil.***

***Many bankruptcy will come soon if oil remains below \$50 for the next six months.***

***On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating oil and natural gas lost value as well on Monday. Don't buy RB Gas and heating oil but surely natural gas can be bought around \$2.71.***

This is what we mentioned on the 23<sup>rd</sup> of December: ***Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.***

This is what we mentioned on the 11<sup>th</sup> of December: *Wednesday our fear proven very true, we strongly recommend to stay away from oil. When oil broke \$92.88 we recommended sell oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.*

This is what we mentioned last Monday (5<sup>th</sup> of December): ***Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, oil, RB gas and heating oil. Natural gas gained value from the lower levels on Friday as predicted.***

***On Monday the higher side will remain limited, and if oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like oil is getting ready to break \$60.00 so stay short or add selling on any fall.***

**Thursday's trading range (March 2015 contracts):**

**OIL: \$45.11 to \$43.05**

**NATURAL GAS: \$2.93 to \$2.74**

**HEATING OIL: \$1.6260 TO \$1.5810**

**RB GAS: \$1.4050 TO \$1.3470**

## **INDIAN RUPEE**

Thursday will be great day to add more positions in Rupee around lower sides. This week mix trend will continue for the first three days. Rupee will lose some value on Tuesday and Wednesday, Monday Indian market will remain close. Thursday and Friday Tuesday one can book some profit and buy back on Thursday. Our predicted first target of \$61.35 in Rupee got fulfilled.

This is what we mentioned on Monday: *At this stage Rupee will trade in the range of 62.65 to 61.35. If Rupee close below 61.35 for three days will confirm it moving toward 60.00 against USD.*

This is what we mentioned on three back week Thursday: *Wednesday Indian Rupee gained against most of currencies as predicted. We are not changing any prediction in Rupee because we still believe that Rupee will going to perform very well in coming time. Dollar is not moving above 63.75 our astro level which is proven like a **Wall of China**. Sell more USD positions.*

This is what we mentioned two weeks Thursday: In the first quarter of 2015 we see Rupee going toward 59.00 level. In the month of December higher side Rupee may fall toward 63.75.

Last we predicted that in the month of December some surprise move will come from RBI - It looks like that major policy changes and surprise from RBI is on the way which may help and guide stock market as well as Rupee in uptrend directions.

**Early last year we mentioned Rupee may touch 70.00 when it was trading around 52.00 levels, this target got fulfilled now next trading range will remain from 58.00 to 63.75 for some time.**

**Thursday trading range: (Spot price)**

**RUPEE/DOLLAR – 61.50 to 61.23**

### **INDIAN MARKETS**

On Wednesday Indian market closed all time high, many of our recommended stocks traded positive. Thursday market may open bit negative due to weaker close of USA equity market but eventually market will close sideways to mix. **We are strongly recommend holding positions without fear still S&P holds 1982 Levels. We still believe that Nifty and Bank Nifty will move 10% higher from here but wait for one more day.**

Today later on we will send stock buying recommendations as I have to go out but will send you email with list of stocks to buying for short period.

These are yesterday's recommendations: one can buy **Wockhardt, SUVEN LIFE, Monsanto, IndusInd Bank, LIC housing.**

This is what we mentioned yesterday: *On Tuesday Positive trend will continue in market. Hold positions in all major recommended stocks. It looks like Nifty is ready to big move so wait for our report on Thursday. Our next target of 8880 shall fulfill soon and next target will be 9723 for Nifty.*

*Banking and Biotech stocks will do well on Tuesday.*

*Wait for another buying list in the five stocks for the short term trade and we will publish that tomorrow. **Buying time have come in Reliance because it has been holding 881.***

*Finally after five days MAX India performed very well on last week Thursday and Friday.*

This is what we mentioned on Friday: *It looks like that Nifty is ready to touch 8880 and if nifty close above 8880 for two days can push it toward 9553. Bank Nifty can easily move toward 21833. Wait for Mondays report and hold positions in recommended stocks and index as it is. It looks like that from next week Reliance Ind. may participate in rally.*

*Our view on USA market have turn very bullish and looks like that we may see historic move in market.*

Tuesday Indian market moved toward all-time high. Frontline stocks started getting so hold positions in most of our recommended stocks and sectors. Yesterday **3M, United Spirit, SBI, MAX Indian, and AXIS Bank** performed well as predicted.

**Bank of Baroda** is our new buying recommendations for today and this week.

We are raising our target for USA, European and most favorite market like India from 2015 by 10% more as predicted in this year book.

This is what we mentioned Tuesday: *Many of old economy stocks moved higher, Infra and auto stocks also moved higher. Housing financial stocks performed well but banks traded mix. Sun Pharma and Sun Advance Pharma acted very well.*

From our recommend Siyaram, Raymond and MAX Ind traded mix but rest of them went higher. On Tuesday we are still recommending add more same stocks in portfolio. **MAX India, Raymond, Cipla, Sun pharma and 3M** will keep moving higher. Auto and cement stocks will continually move higher but we strongly recommend booking some profit in these stocks on higher. We are not recommending any sell or shorts.

**Today we recommending to add Lupin in your portfolio.**

Reliance closed below 881, it has to trade above 881 as recommended yesterday for giving new life to reliance otherwise it will start moving down.

This is what we mentioned Monday: *At this stage we recommend holding positions or if you don't have any positions then you must buy following stocks as we see big move is on the way in these stocks: Cipla, Raymond Well, Siyaram Silk mill, SBI, 3M, SUN Pharma, and Max India LTD.*

**Banking stocks went sharply higher, yesterday we mentioned that most unique time cycle is starting for banking stocks for medium and longer term and yesterday's trailer was perfect to give us confident that Indian BANKING INDUSTRY started unique journey.**

This is what we stated on last Monday: *Yesterday our most of recommended stocks moved up nicely, United Spirit, DR. Reddy, Lupin, Max India, Wockhardt did well and will keep outperforming. Keep adding Max India aggressively as 10% move is coming. At this stage one should hold positions in Pharma, banking and recommended stocks. MAX India, IPCA, Pfizer, United Spirit, Wockhardt, and CADILA look like great buys so don't miss the opportunity of buying on Monday around lower side. All these stocks should move higher during this week.*

**Good news of Rate cut from RBI is on the way in the next two weeks.**

Last Thursday we recommend buying in a few stocks and we are still recommend holding positions in these stocks: **Cadila, Indoco Remmi, Sanofi, Torrent Pharma, Pfizer, Glaxosmith, IPCA, and Maruti look like great buys for the short term**

This is what we mentioned on 29 December: *Last week most of Banking stocks performed well, this week still we are recommending holding positions in recommended banking stocks and don't miss opportunity to add more banking stocks. Bank Nifty will move higher so stay invested in **banking and housing finance** sector. At this stage rest of sectors will remain directionless. Hold positions in recommended banks like: **Bank of Baroda, Punjab National Bank, Bank of India, UNION BANK, Corporate bank, Oriental bank, Karur Vysya, Indian Bank, both HDFC, GIC housing, LIC housing, Can Fin Home, Canara Bank, and Citi Union.** One can buy these stocks without fail.*

This is what we recommended on 18 December: *On Wednesday we recommend buying auto stocks, and housing stocks like **CAN FINANCE, HDFC, GIC HOUSING, INDIAN BANK, KARUR VYSYA.** Avoid rest of sectors, as market will move in confuse zone. **Buy Karur Vysya Bank and Bank of India are top pick for today for short period.***

This is what we mentioned last 17 December: ***Nifty will hold 8017 level on closing, only Indian market can turn bearish trend if Nifty close below 8017 for the three days.***

Thursday's trading range: (Spot price):

NIFTY: 8964 to 8862 (Spot) (recommended strong buy at 6065)

BANK NIFTY: 20715 to 20370 (recommended strong buy at 10350)

AXIS BANK: 604 TO 580 (recommended strong buy at 205)

ICICI Bank: 395 to 375 (recommended strong buy at 965)

SBI: 355 TO 325 (recommended strong buy at 212), **buy**

BOB: 228 TO 219

PNB: 211 TO 198.10

RELIANCE: 920 to 890

L&T: 1711 to 1680 (recommended strong buy at 1009)

Pfizer 2122 to 2000 **Avoid**

Wockhardt: 1159 to 1132 **(time to buy at 560)**

CIPLA: 711 to 694

Dr. Reddy Lab: 3270 to 3190

Ajanta Pharma: 2675 to 2475 **Avoid**

Cadila: 1680 to 1650 **buy**

Thanks & God Bless, Mahendra Sharma,

28 January 2015, Wednesday 5.00 PM, Santa Barbara

Here what we mentioned in the past two years.

This is what we mentioned on 28 November 2014: *Thursday Indian market traded very silently on monthly expiry. This week particularly Vadilal, PSU banks and Pfizer performed very well. Due to Jupiter transiting from Cancer we clearly see PSU stocks performing well and past history is witness for this. Our favorite trades in India are same "PSU banks and Pharmaceutical" stocks as we want to recommend and we would like to remain where astro cycles are showing most powerful signs. You can pick any name in PSU banks and they will perform very well but at we like name like **BOI, BOB, PNB, IFCI, IDBI, SYNDICATE BANK, both HDFC and Reliance Capital**, there were our recommendations (Most of PSU banks may take another three to five days before they start moving aggressively so build positions on weakness). **ING Vysya** went up more than 30% in the last two and half weeks since we recommended. Last week **Kotak Mahindra** announcing taking over **ING**.*

For today's short term day trading **Reliance Cap, Reliance Ind, HDFC bank and PNB** looks very positive.

In short term three to five trading days **Torrent, Sun Pharma, Glaxo, Lupin and Cadila** looks very positive.

From today more bullish pattern will start taking shape as astro cycle is moving in rising cycle, may three two trading days for start giving clear support for PSU banks so add more positions IN PSU banking stocks on weakness and expect gain from next week. Pharma are our most favorite for medium and longer term, they are also our favorite for short term so hold positions in recommended pharma stocks.

Watch oil prices as it is directly benefiting to Indian economy. RBI must be pleased to see weaker oil and government can come out with two bonanza for investors: **1. Rate cut, 2. Cut in oil prices.**

We have announced yesterday special 40% discount (extra time, one year will give you 4 months and 24 days extra) for only Indian subscriptions so take advantage of extending you services only if your subscriptions is expiring before June 2015. Please let other people also know if they like to subscribe because forwarding is not permitted at all. This discount we announced after many request from Indian visitors. This offer will end on next week.

This is what we recommended Tuesday: **Buy Pfizer, Cadila, and both HDFC today on weakness as ready for move up aggressively.**

Tuesday Indian market traded negative which indicates that Wednesday also mix to weaker trend will continue. We strongly recommend buying some positions around lower ranges in Indexes and stocks Reliance. Yesterday also Reliance bounced back from our predicted low 977 which clearly indicating that **Reliance is ready to move higher. Also both HDFC Also traded positive and will trade positive so hold positions.** We have been waiting since last one week for Reliance to move higher, also add PFIZER, and both HDFC more today on any weakness.

Other stocks will trade mix to weaker like **Cement, consumer good, steel and other sector will remain directionless.** Cement and Infra sector looks negative, take some short positions in

cement stocks. **Don't hold any positions apart from Pharma and Banking stocks.** Today are recommending traders to carry banking trading for next day and next week as banks will outperform most of sector except Pharma.

**Lupin and Cadila** should below up side so traders should have positions in both these stocks at this stage without fail. Torrent and Pfizer also performing well and both these stocks should do well.

**On Wednesday we recommend holding positions in stocks and Indexes, don't short market until we don't see any negative astro cycle.**

This is what we mentioned 27 Nov: *Friday was one the best day for PSU banks in a long time, and our call came at the right time. Last Monday we recommended members to start accumulating buying positions in PSU banks and on Thursday our call was aggressive buying in PSU banks. BOB, SBI and PNB went sharply higher which created buzz on Dalal Street. There is no doubt that the rising trend of last week in PSU banks gave new birth and hopeful directions to PSU banks. It is time for analysts to start writing about PSU banks because investments in PSU banks will not only bring short term profit but it will provide a windfall in the medium and longer term.*

*Our astro indicators are showing a five year rising cycle in PSU banks which is clearly indicating that these banks will move in multi folds. Each and every our members should have positions in these banks. Last week many recommended stocks have done very well and this is the reason our letter is getting great respect among key financial houses.*

*Pharma is our favorite and this sector has performed very well and our favorite pharma stocks will keep outperforming the market. The banking sector will also walk along with the Pharma sector. We strongly recommend reducing exposure form tech, cement, infra, energy, metals and mining companies and divert this money in banks and pharma stocks.*

*One can take some hedging positions selling in **technology, cement, Infra, energy and steel** stocks only (aluminum and zinc will do well so **Hindalco and Hind Zinc** will perform well). Bank nifty will perform well due to banking stocks, but Nifty will also get support so buying Reliance will be a good idea.*

*This week Nifty can achieve the target of 8723, and this will be the level where one should take some hedging or put option trades against your holding.*

*On Monday you can buy **Wockhardt, Dr. Reddy, Tata Power, Reliance Ind, power Finance Corp and hold positions in PSU BANKS.***

*We still recommend holding positions in Vadilal, Britannia, Nestle, JBF IND (performed very well) and PSU banks.*

*On Monday we see the Indian stock market positivity outperforming most of the other emerging markets. The Indian market has been going through a positive astro cycle for the last one year which is getting a lot of attention from international investors. Our buying call*

on Nifty at 5750 and Bank Nifty 8700 did amazingly well for investors. We still see that money will keep flowing out from gold and silver as these both will perform very negatively. We are not recommending anyone to buy gold and silver at any level as a lost is still pending on the down side. Don't trade or speculate in metals, energy, and in the commodity market with limited funds as chances are that you will lose everything. **If anyone holding gold etfs should get out from positions, and take some buying Banking and Pharma stocks.**

We are not changing our recommendations of what we mentioned on last week Wednesday: Three weeks back we recommended buying **Honeywell** at Rs. 5100, and last week it closed around Rs. 7000; **ING Vysya** Rs. 610 to Rs. 850. **Vadilal Ind** went also higher and we still recommend holding these three stocks.

On Monday we recommend buying in **Pfizer, GSK health, Cadila, IFCI, Reliance, and L&T,**

This year many of our recommended stocks provided more than 100% returns (**Britannia, Monsanto, Bharat Immu, Suven Pharma, Excel crop, Sequent scientific, CCL, Gillette, Honeywell**) and only four stocks struggled to move higher and they are **TATA Sponge, Tata coffee, Tata Global and Paneacia Biotech.**

Last week **Ajanta Pharma, Honeywell and Vadilal** remained hot, and we strongly recommended buying **Vadilal**. Last year we recommended buying it around R.s 124 and we are still recommend buying it at Rs. 270 with the target of 650 in the next 18 months.

Our two most favorite sectors (Pharma and PSU banking) will keep out performing in the coming time, and any weakness in the Pharma and Banking sector should be taken as an investment opportunity. Risk reward ratios are very big in both these sectors for the medium and longer term so stay focused. **In the last two weeks PSU banks buying recommendations have done very well.**

Cement stocks will struggle; Auto and other sectors will also struggle for the short period but RATE CUTs from the RBI can put Auto, Infra and the housing sector on fire. We see some good news coming soon from the RBI about RATE cuts.

Hold positions in our last Monday's recommendation of buying in **PSU BANKS**, also hold positions in Pharma stocks as they are our favorite. PSU banks have started a rising journey and have a long way to go so don't get scared because of a few days weakness. Hold positions and add more positions in PSU banks. Pharma stocks were our top pick in 2014 and our recommended stocks will remain on the top list in 2015.

From mid-trading session banking stocks witnessed big selling pressure which surprised us but we are still recommending holding positions in banking stocks. One can buying this week's recommended PSU banks and take some hedging trade by selling frontline banks like AXIS and Bank Nifty for a few days. The overall trend in PSU banking stocks looks very positive so don't miss the opportunity of buying on any further weakness on Friday.

Pharma stocks will keep moving higher as the astro cycle showing very supportive signs.

This is what we mentioned last Monday on 17 November: *Monday banking stocks went sharply higher. Our recommended Bank of Baroda, Reliance Cap and SBI moved sharply higher and you should hold these stocks or even you can add more. On other hand Honeywell, Tata Motor and LIC, Power Finance corp and GIC housing are performing well since last week and we recommend holding positions.*

*Reliance Industry is our buying recommendation on*

*Tuesday so buy position in Reliance, buy short term call and futures positions.*

*Also one can buy today Andhra BANK, IDBI and IFCI, Indian Bank, Punjab National Bank, Syndicate bank, Citi Union and UCO bank. Go aggressive in Bank of Baroda and Reliance Cap.*

*Today we recommend buying indexes around lower side as our predicted target 8578 will soon get achieve. Don't short market at any level at this stage as bullish trend will continue in USA market. From today European will start moving higher which may give huge support for all major market.*

This is what we mentioned on Tuesday 18 November: *We are still recommending holding positions or adding more position in Adani Ent, Reliance Cap, City Union, Uco Bank, Indian Bank and Bank of Baroda. One can take some aggressive buying trades in Bank of Baroda, Reliance Cap and Adani Ent.*

*Honeywell, LIC, GIC and ING Vysya performed very well during last week so we recommend booking 50% profit. Bank Nifty will outperform Nifty so buy this month's call options, strike 18000 of Bank Nifty.*

**This is what we mentioned on 4 November: Friday Indian equity market gain value due to positive trend in Japan and USA market. Finally Nifty able to cross 8137 level easily and closed above which is clearly indicating positive trend on the way. Now Nifty can easily**

Our best pick in Indian pharma are: **Lupin Lab, Sun Pharma, Cadila, Torrent Pharma, Aurobindo**, are our best pick and second best companies are **GSK, Indoco, Dr. Reddy, Ranbaxy, Phiramal, Ajanta Pharma and Cipla.**

In mid-size companies: **Strides Arcolab, Sun Pharma Advance, Suven, IPCA, JB Chemical, Sequent, Panacea Bio, Venus Remm, Natco Pharma, Elder Pharma Wockhardt, and Glenmak.** Also other stocks like **Britannia, GSK, Vadilal Ind, Monsanto, United Phos, Gillette and Nestle** are our favorite too.

**touch 8488/8580 and Indian investors are in safe zone until Nifty holds 8137. Hold buying position in stocks and Indexes until Nifty holds 8137 level.**

Saturn have changed today and we are sure house of Scorpio is very aggressive so get ready to see or experience most aggressive move in Nifty and Bank Nifty.

Monday Market will open mix and both side move will continue. Index based stocks will support market trend as predicted on last week Thursday.

**Today one can buy Indoco Remm, and Bharat Electronic, these both stocks are our short term as well as medium term call, within 48 hours these both stocks should move sharply higher.**

Hold positions reliance group companies - **Reliance Industry, Reliance Infra, and Reliance CAP. Tata Steel and Tata Motor** also went higher and may move higher. Steel companies are doing well with weaker iron ore prices. We are keeping same last week's recommendations.

Don't add any new positions but surely hold positions in recommended stocks and Indexes.

This is what we mentioned for Thursday: Heavy weight stocks started showing positive sign, Reliance Industry moved higher and most of Reliance group stocks should perform well in coming time. Those who haven't bought any positions in Reliance group should start buying. **Reliance Infra, Reliance Ind, Reliance Cap** are our most favorite from here onward for the next two months. Last month we mentioned that Reliance may move toward 1300 level by end of this year and still possibility that it can move at least 20% from here onward.

**Today one should buy Reliance INFRA and Reliance Capital.**

Today market may move higher, watch our trading ranges closely, some profit booking may witness in Pharma stocks, but bull trend is intact so nothing to worry. **It looks like that heavy weight stocks will take lead from here to year end so buy Reliance, L&T, Tata Motor, ICICI, HDFC, SBI, Britannia, Infosys, Dr. Reddy and Ranbaxy.**

**Our recommended stocks Bharat Immu, Suven and Ybrant is going well, hold position in these stocks.**

This is what we mentioned Tuesday: As our astro cycle not showing great sign for emerging, Asian and European markets and this may put some pressure on Indian equity market as well though our view is very bullish for India. **Thursday Indian market should turn positive as we recommended buying in stocks and Indexes in our international daily flashnews from late Wednesday so get ready to build some more positions in banking and pharma.**

United Spirit performed well, also our favorite small pharma stocks like **Suven, Bharat Immu.**

One of our Indian Member recommended to read astro chart of **Ybrant Digital**, we like astro of this company very much start from mid-November. If you are comfortable then one can take position. I have taken a small position in it.

We still recommend holding position in **Lupin, Cadila, Suven Bharta Immu, Sequent Scien and Aurobindo Pharma.**

*In Banking we like **SBI, Axis and HDFC.***

**This is what we mentioned on last week Monday:** This is what we mentioned Monday: *Mars changing house during last week may support Cement stocks so buy Cement stocks for two week period with fail. **ACC, India Cement, JK Cement and Guj Ambuja.** In heavy weight **ITC, L&T, Hindalco, Sesa Sterlite and Britannia.** These all trades are valid for two weeks. Book profit on five percent move.*

*Also banking stocks looks very strong like **SBI, ICICI, and AXIS.***

Time also to add some banking stocks as mentioned on last 5 August: ***We don't see Nifty going below 7775 or 7621, so down side risk is very limited and higher we believe it moving toward 8137.***

Must remember: ***In International weekly report we recommended all our global members to get into Indian Pharma stocks as soon as possible before it get too late. At this stage Indian Pharma stocks are best bet among all major financial instruments.***

This is what we mentioned last week Monday (8 September): *On Monday our favorite stocks like **Cipla, Lupin, Cadila, Pfizer, Great Eastern Shipping, SBI, HPCL, BPCL, JBF Ind, Raymond, Zensar tech, Mastek and Testiy Bits.** Among all these **Mastek, Cipla, Zensar and Testy Bits** performed amazing well under pressure. We are sure many of you must have taken positions in these stocks. Here are few recommended stocks charts of last five days.*

This is what recommended on last week Thursday: *On Wednesday few small cap Pharma stocks performed very well, stocks like **Suven** (we recommended around Rs.47 and yesterday it closed at Rs. 158) and **Venus Remm** (we recommended around Rs.180 and yesterday it closed at Rs. 295) and **Bharat Immu** (we recommended around Rs.09 and yesterday it closed at Rs.40 performed well. Hold positions in all these three stocks for medium and longer term. Yesterday we recommended **Indoco Remm**, keep adding position on any weakness.*

*If Indian Investors invested last year in any quality stocks in pharma, banking or any other Index base stocks should have made fortune. Now time is to keep quality and add quality stocks from here onward. Now today we add one more Pharma stocks is our favorite list and that is **Indoco Remm. Stock is trading around Rs. 260, and our target is 420 by end of this year.***

*Yesterday **Cadila, Lupin, Suven** and other pharma performed very well, and we still see these stocks moving higher.*

This is what we mentioned on last week Tuesday: *S&P 1905 and NASDAQ 3842/3789 level should be watched closely as we don't see USA market falling much from here. We still hold our prediction of S&P moving towards 2150 by end of this year and NASDAQ 4500. Few other markets will follow but many other international markets will struggle to move higher.*

Important note: *As per astro chart we see both sides move continuing in all major markets for the next two weeks until Sun remains in Cancer with Jupiter. On 15 August Sun will be transiting into Leo, which is its own house and this will be a great time to add money in market. We have experienced in the last 25 years that whoever invested in between 15 August to 15 September's Sun cycle always made a fortune. Please take advantage of this period to accumulate positions in quality stocks.*

This is what we mentioned on this Monday (18 August): *Negative or uncertain cycle for equity market ended last week as predicted. Sun changing house will give new directions to stocks but commodity will struggle badly. Last week ACC, Reliance, Cipla, CCL, Britannia and TATA motor performed extremely well. **One of our stock 3M India achieved predicted target and now our next target for is 6000.** Nifty have closed above 7775, which is most important level for Indian market. If Nifty close above 7775 level on Monday and Tuesday will confirm new rising cycle for market. 8028 and 8155 should be next level before it start correcting.*

Important note: *At this stage we strongly recommend buying cash rich companies (we will put out this list soon), also our most favorite stocks **(Nestle, Britannia, Vadilal, SUVEN life, Sequent, Bharat Immu, Venus, coal India, Jubilant, Tata coffee, Lupin, Dr. Reddy, TCS and Tata Global).***

*If Nifty breaks 7578 level and trade below for two days can bring volatility in Indian market. Nifty is safe zone until it holds 7578 level. Next astro support level at this stage is at 7421 and in the worst case scenario 7288. On higher side still Nifty will struggle to cross 7775 level.*

**Medium and longer positions:** *Our target for Reliance is 1350 within the next three months, which may have huge impact on index.*

This is small part from Indexes sections from last week newsletter: *As per astro chart we see both sides move continuing in all major markets for the next two weeks until Sun remains in Cancer with Jupiter. On 15 August Sun will be transiting into Leo, which is its own house and this will be a great time to add money in market. We have experienced in the last 25 years that whoever invested in between 15 August to 15 September's Sun cycle always made a fortune. Please take advantage of this period to accumulate positions in quality stocks.*

*In Indexes trading in and out will remain best strategy. In big name TCS, Reliance, Britannia, LUPIN, Wyeth, SUN Pharma, GlaxoSmith, Hindustan Lever and Dr. Reddy still are our favorite.*

This is what we mentioned last month: *We recommend to reduce buying positions expect hold some stocks like CCL, TATA GLOBLA, LUPIN, Bharat Immu, Tata Steel, Suven Pharma, Dr. Reddy, Wockhard, Testi Bite, Sequent, Vadilal, Nestle, Britannia, Tata Motor, and Cadila.*

This is what we mentioned during last month: *Current astro chart for Nifty and Indian market showing mix sign so keep generating cash positions. Banking and Industrial stocks will struggle during this week. **Wockhard, Wyeth, Dr. Reddy and Lupin** are our favorite companies so keep investing money in these three stocks without fear. In the two years' time you will make multifold returns.*

*At this stage Indian market is in correcting mode so profit booking will keep coming on higher side. So far our higher side target proven right and we see Nifty struggling to move above 7775, but lower side*

Nifty won't fall below 7425 so watch these level closely and take trading opportunity around these levels. **(Nifty shouldn't close below 7421 other will market may fall more three percent from current level).**

This is what I mentioned in June 2014: *Just focus on Pharma and Tata Group at this stage. It looks like that Pharma stocks are ready to create history in Indian market. What Indian software companies done from 1997 to 1999, same era can be repeated in Pharma stocks. I was invested in software Indian stocks, in fact I invested in February 1996 \$17200 and that portfolio went more than 1.5 Million dollar. Only reason portfolio went so much higher because I was held my positions. We strongly recommend holding positions in our recommended stocks rather than doing speculations. We always recommend taking minimum risk in day trading and speculations, put 90% money in quality investment and 10% in short term trading in whenever opportunity knocking door.*

This is what we mentioned 18 June 2014: *So far Nifty held value of 7425 and levels so now Nifty will have another astro support at 7475 and 7532, watch these levels closely. Astro resistance will be at 7775, so this level should be taken as profit booking.*

This is what we mentioned in the first week of June: *Mercury changing directions will surely bring some uncertainty, so book 80% profit in our recommended stocks, still hold positions in our favorite stocks (Pfizer, Torrent Pharma, Gellette, and CCL Product, add these four stocks in your portfolio. Rest or recommended stocks have been doing great and still you can hold positions in stocks like: Agrotech, Excel Crop, Kaveeri seeds, Tata Global, Tata Coffee, Tasty bits, Mount Eve, KGNENT, Hatsun, Rasoy PR, GM Brew, Radico Kh, Jagatjit Ind, EDL, Tilaknagar Ind, Mount Shiv, Nestle, Vadilal Ind and Britania and Aurbindo.*

Food stocks are doing great so watch our recommended food stocks list mentioned below at end of newsletter. Here we are putting list of stocks which we recommended in the early 2013: **Tasty bits, Mount Eve, KGNENT, Hatsun, Rasoy PR, GM Brew, Radico Kh, Jagatjit Ind, EDL, Tilaknagar Ind, Mount Shiv, Nestle, Vadilal Ind, Britania, Suven, Sequent Scien.**

We don't want to say much today, we will talk more on Monday, here is what we mentioned yesterday: *Everyone who invests in India will be watching the elections results very closely; if NDA fails to get 282, then surely the market can correct five to ten percent. As predicted three weeks ago, the NDA getting closer to the majority, and BJP will get 245. It is always interesting to watch astro indicators, reading the astro cycle is an amazing study, but unfortunately, most of the financial astrologers don't have any past track records, but they start websites and try to fool people by copying other work and make investors fools (as few financial astrologer caught red handed by copying work). We hate to criticize them, but this is the truth.*

*In short we are not recommending shorting positions in India market, except small hedging positions. Also watch 7275 level closely on higher sides. Book profit in Pharma and tech stocks. **Add more Bharat Immu as this stock can fly sharply higher. After election result we will release new stock list.***

*Our predictions on Indian market have done amazingly well and at this stage don't focus do much on elections as money is always made in market with medium and longer term view. **Like six months our view was Nifty reaching 6775 when it was around 5950 and last same we predicted when it was at 5550. I still remember when Bank Nifty broke 8800, we stated that it won't go below 8200 and 2014 target 13500 to 15900.***

This is what we mentioned two months back: *Indian market traded sideways, we still recommend staying away from any aggressive positions in emerging market as well as in India. Ajanta Pharma, Torrent Pharma, Bharat Immu, Suven, Sequent, Cadila* done very well on Tuesday in weaker market and will perform well on Wednesday as well. Our recommended food stocks like *Hatsun, Radico, Jagatjit, Jubliant food, Vadilal* and many other stocks have also done well.

**By end of May Nifty may reach 7225 and then we will decide what to do next.**

**Watch Bharat Immu it trading around Rs. 9.00, I have been recommending this one since last two years, but stock never moved, please do research before you buy this one. We own this stock and we still see this can be takeover target.**

This is what we mentioned last week Wednesday: **Buy aggressively Lupin, and one can hold positions in Torrent, Aurbindo Pharma, Ajanata Pharma, IPCA, Cadilla and Dr. Reddy.** After our recommendations these stocks have done well and still we see at least 300% more gain so don't miss opportunity of buying. Any weakness in Pharma stocks should be taken selling opportunity.

**Bharat immu** is doing well, also food stocks are doing well, add more Vadilal and our most favorite **Excel Crop (already move 300% and our target of 1000% shall achieve).** Kaveeri seed done well by achieving over 2000% return and now we recommend 90% booking profit in Kaveeri seeds.

Also Yesterday **Venus Remm** moved up sharply, hold positions in it and those who don't have any positions should take some buying positions in Venus. **Buying recommendations in Nifty proven one of the best call after S&P as in the last two six weeks nifty move from 6030 to 6750. Nifty has to cross above 6775 for the two day to give clear bullish indications and Nifty may touch 7250 in the next eight weeks. We would like to add SIX stocks during this week this we recommended on 10 March: NTPC, IDBI, Wockhardts, TATA COFFEE and TATA GLOBAL and Aurionpro Sol.** Hold our recommended stocks, add more Tata Global and TATA Coffee, Emami, Dabur, Federal Bank, Honeywell Auto, and Reliance Comm.

These stocks also done well and we still recommend holding these list which we recommended on 20 Feb: **3M India Ltd around 3700, our target is 4400 in the next one months. Buy BHEL around 173, and target 250 in the next three months.**

These recommendations made last quarter of 2013: **Buy Sequent Scientific, Suven Life and Fresenius Kabi for medium and longer terms. Keep adding our favorite Tasty bit, Venus Rem, Jubilant Food. Excel crop and Kaveeri Seeds** done very well, hold these both stocks as they are also our favorite.

Hold our favorite recommended these of stocks of 2013. **Tata Global, Tilakind, MountShivalik, Venus Remm, Hatsun Food, Kgnent, Testybit and Jubilant Food, Vadilal ind 110, Radico Khaitan 100, Excel Crop 180, Kaveri Seed, Agrotech 460, Britannia 710.**

**Make wave of nature/astronomical cycle an integral part of your trading/Investment strategies!**

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
