Friday's Flash news (unedited copy)

Add more positions in market around lower sides

Dear Members,

On Thursday market remained in positive, biotech stocks struggled but energy and tech remained stronger. After market AMZN announced earning and they missed which sent stock sharply lower but on other hand Microsoft which was our favorite during this earning went higher. We are strongly recommending to keep adding AMZN around \$540 level because positive astro cycle is starting for Amazon from 14 February so start accumulating positions in it. In the next 18 months AMZN will hit \$1000. **We won't surprise at all if AMZN bounce back on Friday after making low in morning hours on Friday.**

Metals traded negative, energy moved higher and rest of commodities struggled as forecasted yesterday.

USD went sharply lower as predicted, keep adding emerging market currencies. Add some aggressive positions in **China and India**. Buy Rupee and other emerging market currencies or sell USD against these currencies, Rupee is ready to gain from 68.23 level.

Today will be last day of first month of 2016, many trades will be unwinding and currencies open positions will be closing.

This is what we mentioned on Thursday and we are still holding same predictions: **Today we would like to give simple note and you should act immediately: Buy some aggressive positions in market as we see big move in Microsoft coming after earning. We also see at least 350 points rally on Friday and there is possibility that S&P may move 50 point from 1874 today's closing. NASDAQ can easily move 150 point from 4125.**

On other hand oil traded positive on Wednesday and positivity will continue in oil, heating oil, RB Gas and natural gas. Energy stocks will rally hard.

Dollar lost value on Wednesday and will keep losing value on Thursday and Friday.

Gold moved higher on Wednesday as predicted, we also predicted that gold will top out on Thursday and may start losing value on Thursday so great time to sell gold and gold will not able to hold above \$1123.90 levels. On higher side it can retest \$1128.90.

Add more sell positions in Thirty Year Bond.

Through away any email you receive that stating that market is going lower or crashing because these emails will keep away from greatest buying opportunity in market at this stage. We don't see S&P going below 1862. We expected both side move in market on Wednesday, and now get ready for big rally on Friday, Thursday also market may close green. We predicted market either made second low on Wednesday after making bottom on 20 January at 1803. March Future 1862 level will be history for S&P.

This is what we mentioned on this Monday, 25 Jan: **Energy prices moved sharply higher on Friday which also supported the sentiments as huge buying came in. Oil \$27.71 and S&P 1821 should be the lows of 2016.** We may not see these prices again this year, and though our view is not that bullish for oil it may hold this level and may move in a sideways direction once this rally is over. Russian Rubble went from 85.60 to 78.50 within twenty hours and many other emerging market currencies also acted very aggressively so it looks like emerging market currencies have also made a bottom and that this could be very negative news for commodities. It looks like S&P may not trade below 1862 level again for a long time.

Here are the trading ranges and strategies for Friday:

GOLD/SILVER/BASE METALS

Gold and silver traded negative as predicted from USA market trading hours. On Friday we are recommending selling on higher side is recommended. Stay away from any metal stocks and stay away from base metals as they can fall on Friday.

Higher sides will remain very limited, gold won't able to go above \$1123.80 and silver \$14.55 levels so any rise around these prices should be taken as selling opportunity in gold and silver. One can sell Palladium and copper on Friday.

It is getting clear that Indian Rupee is about to make U turn which won't help gold, silver and copper in Rupee term. Sell these commodities in term of Rupee. Next week Rupee may move toward sharply higher which may put huge pressure on metals in Rupee term. Sell gold around 26811 with target of 26190 in first wave fall, and then second wave it will move toward 25575 and this all can happen within the next ten days.

This is what we mentioned yesterday: *Positive cycles in precious metal will end on Thursday. We are strongly recommending selling gold on Thursday as mentioned in this week newsletter. Great time to buy DUST, gold will fall sharply also on Friday. In Asia and European market gold may hold value but in USA market gold will start moving sharply lower. Gold will fail to close above \$1123.90 level for more than three days and it won't able to move above \$1132.*

Book profit in metal stocks, and buy bear etf DUST. Buy also GLL, and sell GDV.

Silver failed to close above \$14.55 level as mentioned yesterday. Other base metals will hold value but may not able to hold in term of emerging market currencies. Great time to sell dollar in Rupee term as we see 3000 Rupee fall in folds prices in the next three weeks from current level 26800.

Watch emerging market currencies as they are ready to gain value so Gold may lose in Rupee, Real, Peso, Rand and Rubble terms.

This is what we mentioned on Wednesday: *Base metals will keep moving higher on Wednesday and Thursday so no shorts are recommended. Hold long positions in platinum. One can buy base metals like Lead, Nickel, Aluminum and Zinc.*

Gold won't be able to trade above \$1123.80 for more than three days. Sell Silver as well around \$14.55 level. If there is any sharp rise after the FED decision, one can take short positions as metals will start falling from mid-Thursday.

Important point to remember: After five years, gold's time cycle is changing against most of the emerging market currencies so it will start losing value against Rupee, Real, Peso, Rand, Rubble and many other currencies. Gold may lose 20 to 30% value against these currencies. If you are invested in gold in these currency terms, you should get out. This phenomenon will happen for the first time in many investors lives so traders in these countries have to be very careful. Sell gold and buy these emerging market currencies. Gold will keep losing value in dollar terms too.

A few important past predictions and levels for Metals from the Daily Flashnews are at end of this letter.

Here is Friday's range: **(March 2016 contract):**

GOLD: \$1123.90 to \$1107.15

SILVER: \$14.36 TO \$14.00

COPPER: \$207.90 TO \$203.90

PALLADIUM: \$498.00 TO \$487.00

PLATINUM: \$877.00 TO \$855.00

SOFT COMMODITIES

Coffee and orange juice traded positive but rest of softs traded lower as expected. Stay away from any buying in softs except coffee. Sugar prices have been falling constantly and more weakness is on the way, one can start covering all shorts below \$13.00 levels. Hold sell in Cocoa and one can cover shorts in cotton.

Stay away from cocoa, sugar and lumber. Stay away from sugar if it remains below \$14.00 then chances that it may retest 12.88 level. Buy more coffee and trade in and out other softs.

Remember - Coffee will struggle to close above \$128 and the maximum down side is \$112 or \$109. One can start accumulating coffee if it starts trading above \$118.00. Cotton will struggle to close above \$64.88, and sugar \$15.45. On the down side cotton will hold \$61.28 and sugar \$13.45. At this stage we not recommending any buying in cocoa, orange juice, lumber.

Friday's trading range: **(March 2016 Contract)**

COFFEE: \$122.18 TO \$117.25 Buy

COTTON: \$61.95 TO \$61.05 Avoid

SUGAR: \$13.48 TO \$13.08 avoid

GRAINS

Most of grains traded negative, and great levels have come to take some aggressive positions in grains. One can wait for few more days or one can buy soy, and meal around today's lows. You can also add some corn as well. For the next few trading sessions one can just trade in and out.

After 6 of February we see strong rally starting in grains.

The lower side in Soy, soy oil, corn and wheat is limited from current levels, not more than 2%; but on the higher side we see that 5-7% positive moves. We don't see corn going below \$354, wheat \$455, soy \$845, Soy oil \$29.70 and soy meal \$260.

Friday's trading range (March 2016 contracts):

CORN: \$367.00 TO \$360.00

WHEAT: \$475.00 TO \$465.00

SOY: \$875.00 TO \$861.00 BUY

SOY MEAL: \$269.30 TO \$264.15

SOY OIL: \$31.17 TO \$30.38

ENERGY

On Thursday oil traded positive as predicted. Energy stocks trade positive, ERX gained nicely. Oil will trade stable on Friday, it may also gain value but must book profit around higher levels. We don't see oil moving above \$35.18 levels so one should book profit those who have been buying from \$28.00 levels, there are chances that Crude oil may retest one more time \$28.78 level on more time.

Our longer term view is not very good for oil, and same for energy stocks. Remain short term traders and take advantage of price fluctuations and our weekly newsletter/Daily Flashnews will guide on that.

This is what we mentioned on Wednesday: *Tuesday oil prices moved sharply higher as predicted. We are recommending adding more buying positions around the lower sides without any fear as oil is in the process of bottoming out. Add some positions in heating oil and RB Gas around the lower sides. Natural gas will trade on both sides. Don't buy any major positions in energy stocks.*

The best strategy will be trading and out in oil which will make you good money. However, you should remember that when you buy 10 contracts around the lower ranges then book profit in 8, and hold 2 for the medium term as we don't see oil going below 28.38 and on the higher side we may see \$35.00 levels.

Few past important predictions and levels for energy of daily Flashnews are at end of this letter.

Friday's trading range (All March 2016 contracts):

OIL: \$34.68 to \$32.15

NATURAL GAS: \$2.22 to \$2.12

HEATING OIL: \$1.1009 TO 1.0425

RB GAS: \$1.1328 TO \$1.0905

INDIAN RUPEE

On Thursday Rupee traded both sides, in Asian trading hours it went toward 68.23 and this level is great selling level in USD on Friday. Watch our prediction of fall of USD against Rupee because this fall will be very unexpected and sharp so remain watchful. Fall in Dollar will bring huge pressure in commodities in Rupee term.

We won't surprise if Rupee dollar falls back to 66.23 level which could be huge move so watch Rupee/dollar move closely. Sell some aggressive positions in Dollar.

This is what we mentioned Tuesday: *At this stage we would like to talk about the emerging market currencies because historic fall or devaluations in these currencies will stop from here onwards. Those who bought these currencies during last week and those who will accumulate will see these emerging market currencies gain 5% to 20% value in currency convert terms by the end of this year.*

We are strongly recommending to accumulate emerging market currencies, this is not prediction just for Monday, this prediction applies to this whole week. The FED meeting is this week and many must be nervous but there is no need to remain nervous because dollar has a limited upside in emerging market currencies terms. Read our weekly newsletter carefully.

Though Rupee has acted very well in 2015 and every big currency trader is aware of that, many big institutions also watched Rupee's move closely because it acted very strongly against the all odds. This move in Rupee will give great amount of confidence to international investors.

This week Rupee will keep making gains, and any rise in USD should be taken as a selling opportunity. Last week we mentioned that the maximum higher side in Rupee could be 68.18 and we still believe that dollar won't be able to close above this. On the lower side Rupee will soon start trading below 67.01 and will remain in this range for this week. On Monday Rupee will keep gaining value. On Tuesday Rupee will trade on both sides, and Wednesday we see some weakness. On Thursday and Friday Rupee will gain value against most of the currencies.

Friday trading range: (Spot price)

RUPEE/DOLLAR – 68.23 to 67.83

INDIAN MARKETS

Thursday was expiry day, so traders remain very busy to rollover. Indian market Nifty came down sharply lower from last year high of 8998 to this year low 7241, which is around 19% fall in index. Many industrial, banking and tech stocks traded either negative or sideways. Pharma and specialist tech stocks and FMCG stocks held value during this uncertain environment.

Exporters are doing well because of weaker Rupee but investors are not putting enough attentions on these companies due to too much uncertainty in local and international markets.

Today late night North Node will be changing house so major negativity or negative sentiment will get disappear from investors behavior pattern which has been key problem for market. Our view is turning very bullish for market so watch market moves closely. **Astro forecasting system is not showing us Nifty breaking below this year lows 7241, in fact Nifty won't remain below 7401 for three days.**

After this week after that market is ready for one side non-stop rally so get ready and plan your strategy well from today. We are sure you must have taken **yesterday some buying in call options in Indexes** (Nifty and Bank Nifty) and if not then must buy some today and keep room to add more during next week.

Uncertainty will be over, on Wednesday most of B group stocks traded sharply higher. **Guffic Bio, Moldtek, MoldtekPac** went limit high, and other favorite like **Tanla, PTL and Axiscade** remain remained in green.

Other Favorite, **Divi, Sun Pharma and Sun Pharma Adace** went higher too and many pharma stocks started acting positive with PSU banking stocks.

Today should be final day to acquire positions in market because in the month of February before expiry we see Nifty and Bank Nifty moving at least 5% higher from current level or our target is 7875 level in Nifty and Bank Nifty can also gain 1200 points so great time to make money have arrived for Indian investors. Buy Indexes, rather than stocks. Hold positions **BOB, PNB, BOI and Laxshmi Vilas, and in private banks HDFC, ICICI and Axis looks great for medium term.** We strongly recommended buying in Bank Nifty at 15000 and Nifty at 7323 level, one can these both indexes at even current level of 7400 and 15500.

We removed from our short term buying company like **Revathi, Capline** (longer term investors can hold).

This week these most of stocks we recommended buying and we are still recommending to hold positions in these stocks: **Sun Pharma, Sun Pharma Res, add more Tanla, Moldtek, PTL, Mindtree, Guffic Bio, Dishman, Divi Lab and Britannia.** Energy (**HPCL and IOC, sell Chennai Petro**) stocks will also rebound.

Last month we mentioned that shorting textile related stocks can provide return short term gain, look at most of textile stocks lost 20 to 30% in the last three weeks and we are not recommending any buying in these stocks. (**Grasim, Century, Aditya Birla Nuvo, and Welspun**).

Watch **L&T, Bharta Heavy and Siemens**, as these stocks have lost at least 50% value in the last one year, watch closely as soon these both stocks may come in our buying list but at this avoid any aggressive buying next week in both these stocks or any other stocks due to Scorpio Moon.

Today one can buy **HCL Tech and PCU banks like PNB, BOB, BOI**, next whole week these banking stocks will trade very tight so our focus will be on these banking stocks rather than whole market or better to get some indexes rather than stocks other than our recommended.

Tanla Sol is our favorite pick so add more with fear. **Bharat Immu and Guffic bio** could be added as well. Today market will trade mix to stay sideline and watch our ranges closely, take some positions in Indexes around lower sides.

This is what we mentioned yesterday and holding same recommendations: *Our favorite stocks in "B" group moved up nicely on Monday and we are still strongly recommending to add positions in **Tanla, Mindtree, Mindtek, PTL, Axiscade and Moldteck**. Tanla should be keep accumulated as this stock should move at least 5 fold in the year 2016. First time we recommended at 32.00, we are still recommending at 37.00 with target of Rs. 155.*

This is what we mentioned on Monday: *Who don't recommend many stocks at this stage but surely some stocks we like for the short term and are: **Sanofi, DIVI, Dishman and Indoco**. On the other hand, **energy stocks** still look great and **Indraprastha Gas**. From the Tech sector we like **Infosys, Wipro, Mind Tree, Tata Elxsi and Tanla Sol**.*

*We are not changing any of our outlook, **keep adding Tanla Sol**, this stock shall provide returns in multifold. I have positions in this stock and we highly recommend to get into this one.*

Final note: It is clear now that the market has formed a bottom of 2016. We don't see Nifty going below last week's low of 7241 and Bank Nifty 14755. Nifty has to close above 7442 level for at least five days, and on higher side will may see astro resistance at 7538 and 7669. This rally can take this market to these levels but at this stage watch 7442 is a level to watch closely and we will keep guiding you very carefully and will try to make sure that no error takes place from our side in the future.

Friday's trading range: (Spot price):

NIFTY: 7461 to 7371 (Spot) (recommended strong buy at 6065) Buy

BANK NIFTY: 15509 to 15328 (recommended strong buy at 10350) Buy

AXIS BANK: 411 TO 400 (recommended strong buy at 205)

ICICI Bank: 237 to 230

SBI: 190 TO 182

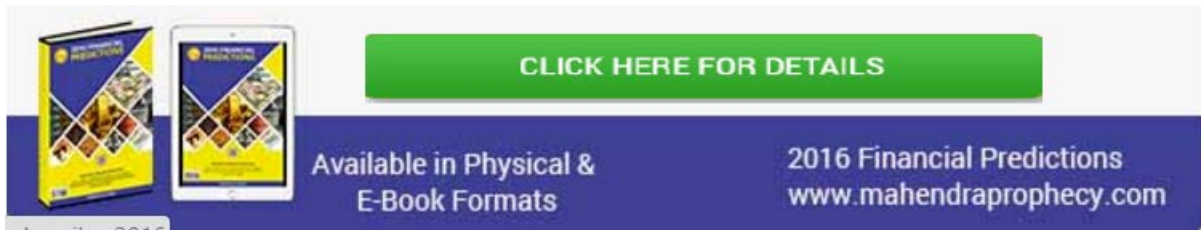

HPCL: 833 TO 806

BPCL: 874 TO 861

IOC: 403 TO 393

Hind Unilever: 803 to 781

Recommended on 12 Oct 2015

This is what we mentioned on 2 January: *Airline stocks remained very hot, in the Second week of November we recommended buying most of the Airline stocks and so far they performed very well. We are still recommending holding positions in Jet Airways, SpiceJet and Indigo. Also last week one of our favorite stocks of 2015 "GM Brew" did amazingly. In May 2015 it was trading at Rs. 118 and last week it closed at Rs. 932. Britannia, Vadilal, GM Brew, 3M India, Sequent Scientific and Guffic Bio performed very well in the 2015.*

Last week **Reliance** and other **frontline oil stocks (BPCL, HPCL, IOC, ESSAR OIL)** held value very well, **ACC** moved higher and other stocks like **Mastek, Mphasis Ltd, Tata Elxsi, Mindtek, Moldtech, Khoday India, Heritage** performed well, and we are still recommend holding positions in these stocks during this week.

This is what we recommended on Monday 26 December: *We are strongly recommend buying indexes and keep adding recommended stocks. Reliance have been moving higher and we are still recommending add more Reliance as our target is 1047 for this week. Our buying recommendation in Reliance around Rs. 826.*

Indian market is our most favorite at this stage among most of global markets. We are sure you must have been adding positions in Nifty, bank Nifty and stocks. Moldtech moved higher and keep adding mindtek, Tanla and food stocks will perform far better stocks like, Hind Unilever, Khoday India, Heritage, VST, Britannia, Vadilal, and Kwaliti. Hold positions in last week recommended stocks like Hind Unilever, Indoco, ITC, and Reliance, HPCL, BPCL, and IOC. Last week Steel stocks performed well, and the SBI also held 224 level which is a great sign; but let's see whether the SBI holds 224 this week or not. If it does, then the SBI will move in one direction and that is UP.

his is what we mentioned on last week 11 December: *We still recommend holding positions in last week recommended stock, if you don't have any positions in these stocks then start buying today: Hold*

positions in **Hind Unilever, IOC, VOLTAS, Essar Oil, and Auto stocks**, also one can add some positions in **SBI around 224**. Add **Tanla Sol, Mindtek, Moldtech, and Axiscade** on any weakness.

Last week the Indian market traded mixed but the undertone of the market still remained very stable. **Indian Rupee has been performing very well which is giving clear indications that something will unfold very soon. The Indian economic data will be very robust in 2016, and why not, when oil has provided a bonanza to the Indian economy. I don't know how many traders in India are giving importance to Rupee and Oil's trend, but surely Rupee and Oil will bring a huge positive impact on the Indian equity market and banking stocks so get ready for the most interesting time.**

Take some more call options on January 2016, buy 8000 call options. The next big trend will be in energy stocks and banking stocks as the **SBI** is holding 224 level and the rest of the energy stocks are trading in a tight range which is clearly giving us a great sign. **Banking stocks are trading negatively. Watch the SBI level of 224 as we don't see the SBI going below this level. If the SBI falls below this level, then it may take the whole banking sector lower. A positive time will start in banking stocks from 16 January 2016.**

This is what we recommended 25 November: **On Tuesday buy recommended Mastek went 12% higher, Tanla, Guffic Bio and energy stocks** also moved higher. We are still recommend holding positions in most recommended energy stocks like **IOC, Reliance, HPCL, BPCL, ABAN** as well as **mastek, Tanla and Guffic**. In the last six months Guffic Bio moved from our recommended price 23.00 to 56.00 and we are still recommending holding positions.

Buy hospital stocks for the longer term like Apollo Hospital, Forties Hospital, PTL, Wockhardt, and Kovai med for longer term.

In our longer term buying list we are still holding our old recommendations since last two years: **Tata Elsi, Lupin, Cadila, Gufic, Kaveri Seeds, Excel Crop, Heritage Food, Britannia, Jubilant Food, Tata Coffee, IPCA, Torrent Pharma, Nacto, Indoco Remm, Suven Bio, United Spirits, Bharat Immu, PNB, BOB, SBI, AXIS, HDFC, ICICI, IFCI, Dishman, Divi, Aurbindo, Vadilal, Sequent Sci, Welspum, Jet Airway and GM Brew.**

This is what we mentioned last 6 June 2015: **On other hand we see fall in gold which may affect adversely a large number of India gold lover as well as investors. Many may lose lifesaving in gold so stay away, hold some cash and if you own gold and silver then get out today and cash in money which can be issue later in buy back or you can invest somewhere else. There are chances that Gold may go toward Rs. 18000 or even lower in 2016.**

This is what we mentioned 27 May 2015: **Today we are adding three hospital stocks in our buying list for first time. These are all three stocks only bought for medium and longer term: Apollo Hospital, Regency Hospital and Kovai med. Cadila, Indoco, Lupin, Aurbindo, DIVI Lab, Sequent, Suven and Ajanta** should be in your buying list on Monday, most of these stocks performed very well during last week. In banking you can add **BOB, AXIS, SBI and UNION Bank**. Hold investment in recommended food stocks.

Last Monday's (25th of May) recommendations: **Reliance Ind, ONGC, McLeod Russell, M&M, Max India, HCL, Cipla, INDOCO Remm, Kopran, Torrent Pharma, Pfizer, Aurbindo Pharma and in banking sector one can buy SBI, Axis, Union Bank, Vijya Bank, and Citi Union**

Add more **Britannia, Vadilal, GSK and other food stocks. Last year we recommended LT Food, KRBL and Lakshmi Energy in food sector. Add these stocks in your portfolio. On Tuesday we strongly recommend buying in: Britannia, ONGC, Maharashtra Seamless, Monsanto, JBF IND, AXIS and SBI.**

Fall in Gold prices and rise in Rupee will add positivity in Indian market. Investors should hold positions in market and recommended stocks. Our target of 8578 should fulfill soon.

This is what we mentioned on the 27th of March 2015: **Hold positions in Pharma stocks Thursday Indian Equity market gained value. Once again Pharma stocks performed extremely well. In the last two years Pharma stocks made many new millionaires in India. We were fortunate to find out move in this sector well in advance and we are still being bullish on this sector.**

One can add more **Indoco Remm, JB Chemical, Natco, Ranbaxy, and Torrent Pharma. On other hand Britannia and Vadilal should be added. Those who are holding positions in Lupin, Cadila, Torrent, Indoco, Suven, Dr Reddy, SUN Pharma, Stride, Sequent science, Ajanta and Ranbaxy.**

This is what we mentioned on the 5th of March 2015 (Thursday): **We confirm here that banking stocks are bottoming out here so don't miss to buy opportunity. Pharma and tech stocks bull trend is intact so hold positions in add more positions in our favorite stocks. Indoco Remm, Suven and IPCA is great buy now. Britannia, Vadilal, Jubilant food, Tata global, Tata coffee and hind lever should be added more today without fear in longer term portfolio. Cipla, Cadila and Lupin are our most favorite.**

This is what we mentioned on the 20th of January: **Yesterday 3M, United Spirit, SBI, MAX Indian, and AXIS Bank performed well as predicted.**

This is what we mentioned 17th of January: **From our recommend Siyaram, Raymond and MAX Ind traded mix but rest of them went higher. On Tuesday we are still recommending add more same stocks in portfolio. MAX India, Raymond, Cipla, Sun pharma and 3M will keep moving higher. Today we recommending to add Lupin in your portfolio.**

Reliance closed below 881, it has to trade above 881 as recommended yesterday for giving new life to reliance otherwise it will start moving down.

This is what we stated on the 15th of December 2014: **Yesterday our most of recommended stocks moved up nicely, United Spirit, DR. Reddy, Lupin, Max India, Wockhardt did well and will keep outperforming. Keep adding Max India aggressively as 10% move is coming. At this stage one should hold positions in Pharma, banking and recommended stocks. MAX India, IPCA, Pfizer, United Spirit, Wockhardt, and CADILA look like great buys so don't miss the**

opportunity of buying on Monday around lower side. All these stocks should move higher during this week.

Good news of Rate cut from RBI is on the way in the next two weeks.

*Last Thursday we recommend buying in a few stocks and we are still recommend holding positions in these stocks: **Cadila, Indoco Remmi, Sanofi, Torrent Pharma, Pfizer, Glaxosmith, IPCA, and Maruti** look like great buys for the short term*

This is what we mentioned on the 27th of Nov: *We still recommend holding positions in **Vadilal, Britannia, Nestle, JBF IND (performed very well)**.*

*On Monday we see the Indian stock market positivity outperforming most of the other emerging markets. The Indian market has been going through a positive astro cycle for the last one year which is getting a lot of attention from international investors. Our buying call on Nifty at 5750 and Bank Nifty 8700 did amazingly well for investors. We still see that money will keep flowing out from gold and silver as these both will perform very negatively. We are not recommending anyone to buy gold and silver at any level as a lost is still pending on the down side. Don't trade or speculate in metals, energy, and in the commodity market with limited funds as chances are that you will lose everything. **If anyone holding gold etfs should get out from positions, and take some buying Banking and Pharma stocks.***

We are not changing our recommendations of what we mentioned 21 November: *Three weeks back we recommended buying **Honeywell** at Rs. 5100, and last week it closed around Rs. 7000; **ING Vysya** Rs. 610 to Rs. 850. **Vadilal Ind** went also higher from Rs. 180 to Rs. 223 and we still recommend holding these three stocks as we are expecting huge move on the way.*

*Last week **Ajanta Pharma, Honeywell and Vadilal** remained hot, and we strongly recommended buying **Vadilal**. Last year we recommended buying it around R.s 124 and we are still recommend buying it at Rs. 270 with the target of 650 in the next 18 months.*

This is what we mentioned last Monday (8th of September): *On Monday our favorite stocks like **Cipla, Lupin, Cadila, Pfizer, Great Eastern Shipping, SBI, HPCL, BPCL, JBF Ind, Raymond, Zensar tech, Mastek and Testiy Bits**. Among all these **Mastek, Cipla, Zensar and Testy Bits** performed amazing well under pressure. We are sure many of you must have taken positions in these stocks. Here are few recommended stocks charts of last five days.*

This is what recommended on last Thursday: *On Wednesday few small cap Pharma stocks performed very well, stocks like **Suven** (we recommended around Rs.47 and yesterday it closed at Rs. 158) and **Venus Remm** (we recommended around Rs.180 and yesterday it closed at Rs. 295) and **Bharat Immu** (we recommended around Rs.09 and yesterday it closed at Rs.40 performed well. Hold positions in all these three stocks for medium and longer term. Yesterday we recommended **Indoco Remm**, keep adding position on any weakness.*

Yesterday **Cadila, Lupin, Suven** and other pharma performed very well, and we still see these stocks moving higher.

This is what we mentioned last 19 August, 2015 Tuesday: **S&P 1905 and NASDAQ 3842/3789 level should be watched closely as we don't see USA market falling much from here. We still hold our prediction of S&P moving towards 2150 by end of this year and NASDAQ 4500. Few other markets will follow but many other international markets will struggle to move higher.**

This is what we mentioned on Monday (the 18th of August): **Negative or uncertain cycle for equity market ended last week as predicted. Sun changing house will give new directions to stocks but commodity will struggle badly. Last week ACC, Reliance, Cipla, CCL, Britannia and TATA motor performed extremely well. One of our stock 3M India achieved predicted target and now our next target for is 6000.** Important note: At this stage we strongly recommend buying cash rich companies (we will put out this list soon), also our most favorite stocks (**Nestle, Britannia, Vadilal, SUVEN life, Sequent, Bharat Immu, Venus, coal India, Jubilant, Tata coffee, Lupin, Dr. Reddy, TCS and Tata Global**).

If Nifty breaks 7578 level and trade below for two days can bring volatility in Indian market. Nifty is safe zone until it holds 7578 level. Next astro support level at this stage is at 7421 and in the worst case scenario 7288. On higher side still Nifty will struggle to cross 7775 level.

Medium and longer positions: Our target for **Reliance** is 1350 from Rs. 838, which may have huge impact on index.

This is small part from Indexes sections from second week newsletter of August: **As per astro chart we see both sides move continuing in all major markets for the next two weeks until Sun remains in Cancer with Jupiter. On 15 August Sun will be transiting into Leo, which is its own house and this will be a great time to add money in market on weakens. We have experienced in the last 25 years that whoever invested in between 15 August to 15 September's Sun cycle always made a fortune. Please take advantage of this period to accumulate positions in quality stocks.**

In Indexes trading in and out will remain best strategy. In big name TCS, Reliance, Britannia, LUPIN, Wyeth, SUN Pharma, GlaxoSmith, Hindustan Lever and Dr. Reddy still are our favorite. (Nifty shouldn't close below 7421 other will market may fall more three percent from current level).

This is what I mentioned in June 2014: **Just focus on Pharma and Tata Group at this stage. It looks like that Pharma stocks are ready to create history in Indian market. What Indian software companies done from 1997 to 1999, same era can be repeated in Pharma stocks. I was invested in software Indian stocks, in fact I invested in February 1996 \$17200 and that portfolio went more than 1.5 Million dollar. Only reason portfolio went so much higher because I was held my positions. We strongly recommend holding positions in our recommended stocks rather than doing speculations. We always recommend taking minimum risk in day trading and speculations, put 90% money in quality investment and 10% in short term trading in whenever opportunity knocking door.**

This is what we mentioned 18 June 2014: **So far Nifty held value of 7425 and levels so now Nifty will have another astro support at 7475 and 7532, watch these levels closely. Astro resistance will be at 7775, so this level should be taken as profit booking.**

This is what we mentioned in the first week of June: *Mercury changing directions will surely bring some uncertainty, so book 80% profit in our recommended stocks, still hold positions in our favorite stocks (Pfizer, Torrent Pharma, Gellette, and CCL Product, add these four stocks in your portfolio. Rest or recommended stocks have been doing great and still you can hold positions in stocks like: Agrotech, Excel Crop, Kaveeri seeds, Tata Global, Tata Coffee, Tasty bits, Mount Eve, KGNENT, Hatsun, Rasoy PR, GM Brew, Radico Kh, Jagatjit Ind, EDL, Tilaknagar Ind, Mount Shiv, Nestle, Vadilal Ind and Britania and Aurbindo.*

Food stocks are doing great so watch our recommended food stocks list mentioned below at end of newsletter. Here we are putting list of stocks which we recommended in the early 2013: **Tasty bits, Mount Eve, KGNENT, Hatsun, Rasoy PR, GM Brew, Radico Kh, Jagatjit Ind, EDL, Tilaknagar Ind, Mount Shiv, Nestle, Vadilal Ind, Britania, Suven, Sequent Scien.**

We don't want to say much today, we will talk more on Monday, here is what we mentioned yesterday: *Everyone who invests in India will be watching the elections results very closely; if NDA fails to get 282, then surely the market can correct five to ten percent. As predicted three weeks ago, the NDA getting closer to the majority, and BJP will get 245. It is always interesting to watch astro indicators, reading the astro cycle is an amazing study, but unfortunately, most of the financial astrologers don't have any past track records, but they start websites and try to fool people by copying other work and make investors fools (as few financial astrologer caught red handed by copying work). We hate to criticize them, but this is the truth.*

*In short we are not recommending shorting positions in India market, except small hedging positions. Also watch 7275 level closely on higher sides. Book profit in Pharma and tech stocks. **Add more Bharat Immu as this stock can fly sharply higher. After election result we will release new stock list.***

*Our predictions on Indian market have done amazingly well and at this stage don't focus do much on elections as money is always made in market with medium and longer term view. **Like six months our view was Nifty reaching 6775 when it was around 5950 and last same we predicted when it was at 5550. I still remember when Bank Nifty broke 8800, we stated that it won't go below 8200 and 2014 target 13500 to 15900.***

This is what we mentioned two months back: *Indian market traded sideways, we still recommend staying away from any aggressive positions in emerging market as well as in India. **Ajanta Pharma, Torrent Pharma, Bharat Immu, Suven, Sequent, Cadila** done very well on Tuesday in weaker market and will perform well on Wednesday as well. Our recommended food stocks like **Hatsun, Radico, Jagatjit, Jubilant food, Vadilal** and many other stocks have also done well.*

By end of May Nifty may reach 7225 and then we will decide what to do next.

*Watch **Bharat Immu** it trading around **Rs. 9.00**, I have been recommending this one since last two years, but stock never moved, please do research before you buy this one. We own this stock and we still see this can be takeover target.*

Buy aggressively Lupin, and one can hold positions in Torrent, Aurbindo Pharma, Ajanata Pharma, IPCA, Cadilla and Dr. Reddy. After our recommendations these stocks have done well and still we see at least 300% more gain so don't miss opportunity of buying. Any weakness in Pharma stocks should be taken selling opportunity.

Bharat immu is doing well, also food stocks are doing well, add more Vadilal and our most favorite Excel Crop (already move 300% and our target of 1000% shall achieve). Kaveeri seed done well by achieving over 2000% return and now we recommend 90% booking profit in Kaveeri seeds.

Also Yesterday Venus Remm moved up sharply, hold positions in it and those who don't have any positions should take some buying positions in Venus. **Buying recommendations in Nifty proven one of the best call after S&P as in the last two six weeks nifty move from 6030 to 6750. Nifty has to cross above 6775 for the two day to give clear bullish indications and Nifty may touch 7250 in the next eight weeks. We would like to add SIX stocks during this week this we recommended on 10 March: NTPC, IDBI, Wockhardts, TATA COFFEE and TATA GLOBAL and Aurionpro Sol.** Hold our recommended stocks, add more Tata Global and TATA Coffee, Emami, Dabur, Federal Bank, Honeywell Auto, and Reliance Comm.

These stocks also done well and we still recommend holding these list which we recommended on 20 Feb: 3M India Ltd around 3700, our target is 4400 in the next one months. Buy BHEL around 173, and target 250 in the next three months.

These recommendations made last quarter of 2013: **Buy Sequent Scientific, Suven Life and Fresenius Kabi for medium and longer terms. Keep adding our favorite Tasty bit, Venus Rem, Jubilant Food. Excel crop and Kaveeri Seeds done very well, hold these both stocks as they are also our favorite.**

Hold our favorite recommended these of stocks of 2013. **Tata Global, Venus Remm, Hatsun Food, Tastybit and Jubilant Food, Vadilal ind 110, Excel Crop 180, Kaveri Seed, Agrotech 460, Britannia 710.**

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
