Wednesday Flash news (unedited copy)

Gold is 100% influenced by wave of nature cycle so beware, Stocks also struggle for short period.

33% Discount offer will end soon, so take advantage

Dear Members,

We are sure you must have taken advantage of ongoing annual discount offer; it works almost 40% discount if you subscribe for a one year. After discount offer end, we won't be able to provide any discount until September 2017 because next offer will come out in 2017 September. I leave subscribing our service and current members service extensions decisions on you and this offer will end in the next two days.

On Tuesday globally markets traded positive but USA market remained under pressure as predicted yesterday as well as in this week newsletter. Stay sideline to trading in and out is our advice on Wednesday. In this week newsletter we mentioned that bear can enter in trading floor very silently for the short period so stay sideline with any big buying in market. Hedging strategy shall be adopted by buying UVXY (3x Volatility etfs). One can take small put in market for the short period.

Trading in and out or selling around higher side mentioned level and cover back on same day will remain best strategy for this week. Wait for our alert before Job report as market may turn wild on Friday.

Gold and other metals remained negative, DUST went sharply higher by \$5.00, our buying recommendations in DUST have done very well in the last two weeks as it gained almost 80% value. Gold is in most dangerous astro zone, prices can crash without any fundamental and technical reason because astro cycle is negative and no one can stop power of nature, so respect wave of nature's trend otherwise metal investors can suffer huge setback.

Oil start trading negative on Tuesday, which clearly give indications that oil may test \$44.55 our first target from selling recommendations of \$48.88. Gas will trade mix. Grains and softs will struggle but grains shall form bottom on Wednesday.

Thirty Year bond will remain in mix zone on Wednesday, and most of currencies traded negative on Tuesday as predicted and more weakness in currencies will be there on Wednesday so selling is recommended on higher side. Emerging market currencies will trade negative except Rupee will hold value which can support Indian market.

How our discount offer will work:

We value you as our members and we are happily offering you a 33% discount start from today:

Every year we announce discount offer in the last week of August, and this year also **decided to giveaway 33% discount** on the occasion of my 49th birthday on all major subscriptions. This offer is not valid on services like personal client, corporate client and personal consultations services. **You can extend your services** and tell your friends and colleagues to take advantage of this offer. **Next discount offer will come out in September 2017 so subscribe accordingly.**

Offer will give you 33% extra time in your subscriptions, so here is how the deal will work:

- **Three months' subscriptions will give you 1 months' (\$550 worth) extra in your services.**
- **Six months' subscriptions will give you 2 months' (\$1110 worth) extra in your services.**
- **One year will give you 4 months' (\$2220 worth) extra in your services.**

Please subscribe asap as we will close this offer by week end.

This is what we mentioned in our book "2016 Financial Predictions" during eight cycle of market:

Eighth Cycle:

From the 17th of July to 27th of August 2016 - This will be a positive or bullish cycle for the markets. We strongly recommend buying and holding positions in the equity market during this cycle. I won't be surprised at all if the market trades towards all-time highs during this cycle. During this period material and mining stocks will also rise which means that energy and metals prices will also move higher. This is a good time to make money in commodities, commodity stocks as well as the emerging markets. This will be an extremely bullish cycle for all the major markets.

This is what we mentioned on last Monday, 8, August: *11th August is our date for metals to enter into bear cycle.*

One prediction so far has started following our astro indicators and that is Thirty Year Bond; we predicted that from 12th July 2016 Thirty Year bond trading sharply lower and Bond started trading lower from that day so expect a longer term bear cycle in Bond.

Oil is holding \$39.88 level which indicates short term rise and higher side \$44.55/46.87/48.88, S&P is holding 2151 and higher we may see 2195, and gold struggles to move above \$1348/1363 level and lower side \$1312, so these are levels to watched closely.

Here are the trading strategy and ranges for Wednesday:

GOLD/SILVER/BASE METALS

Gold, silver, platinum, palladium, copper and metals stocks started trading negative from 12 of August as predicted. So far metals and metal stocks are trading negative and it give clear indications and expected trend is about to start so be aware.

Our first target of \$1314 have achieved today, now next one \$1300 to \$1295 which shall achieve on Wednesday or Friday. We are not recommending any buying even to a day-traders so day-traders as well as longer term traders must avoid any buying in gold at any price at this stage. Rest of metals will follow silver, our selling recommendation in NUGT and JNUG have

done amazingly well in the last two weeks and buying in **DUST** also made almost gained 90% in the last two weeks. Over all over advise to sell metals on Wednesday may provide you returns. Gold traders must read this week's weekly newsletter if they care for their investment.

This is what we mentioned yesterday: *On Monday metals traded mix and same kind of trend is indicating for Tuesday, trading in and out is recommended but surely **one must sell gold, silver, platinum and copper on higher sides on Tuesday.***

*Stay away from metal stocks as they will trade weaker, **stay long in DUST** and keep adding NUGT, JNUG.*

Today higher side sell gold, platinum and silver.

Maximum higher side is achieved and low for Tuesday will be \$1312, and another important astro support \$1295 level will shall achieve either on Wednesday or Friday.

Silver may hold \$18.32 level; silver closing below \$18.32 will take silver up to \$17.11 level, higher side will have failed to move above \$19.12

Don't touch gold as the negative time cycle has started for metals from 12th August as predicted. Take astro cycles seriously, plan your medium and longer term trades carefully and we are sure you will make a fortune because gold will hit \$775 level.

This is what we mentioned on 11 August: Higher side in gold can rise maximum \$15 from current level of \$1348 and lower side more than \$300 by end of February 2017. Sell more NUGT around \$178 and JNUG around \$320; these levels were the previous highs last month. Add more buying in DUST.

*This is what we mentioned on 11 July: Metals positive trend started from early this year and now gold is about to enter into negative cycle next few stages: **11 August, and 29 October.** We still believe that Gold is in a longer term bear cycle and will fall towards **\$775 or lower in 2017** so wait on the side and we are sure you will get a great opportunity to make money.*

Take longer term PUT options if you believe in our predictions and we are sure you will mint money by February 2017.

Here is Wednesday's range: (September 2016 contract):

GOLD: \$1319.30 to \$1300.50

SILVER: \$18.71 TO \$18.21

COPPER: \$208.70 TO \$204.30

PALLADIUM: \$682.90 TO \$659.10

PLATINUM: \$1065.00 TO \$1038.00

INDEXES

On Tuesday most of global markets traded in green but USA market traded negative as predicted in this week newsletter and in the yesterday Daily Flashnews. On Wednesday we see mix to negative kind of trend in markets will continue, there will be some selling pressure in market from the middle of trading sessions so remain sideline for the short term.

We are strongly recommending to take hedging trade against holding position or your investment. Astro cycle have turned negative from Tuesday for markets so remain alert, trading in and out will be best strategy by selling around higher side ranges mentioned here below or in daily ranges. Medium and longer term trend still will remain bullish for all major markets but any sharp corrections shall be taken as buying opportunity.

Still S&P will struggle to cross 2195 level as predicted, and down side first support will be at 2151 level. Wait for Thursday's daily report which can guide you about how aggressive you take trade in market, metals and currencies.

At this stage China and India will trade far better compare to rest of world. European markets will hold value but adopt in and out strategy in all major markets until astro cycle turns positive.

This is what we mentioned yesterday: *Monday most of market traded sharply higher, astro cycle is changing from middle of Tuesday so higher side on Tuesday shall be taken opportunity of selling so remain alert. If market trade positive for whole this week, then who out look of market will change from this week for the short period.*

We are expecting some kind of uncertain or weakness in market from 30 August to 25 September, and that is the reason that we are recommending to stay sideline in market which we never did in past but this time I decided to respect short term negative trend.

Medium and Longer term out of market is very bullish. We still believer that S&P will hit 2500 by the end of this year.

Higher side S&P will struggle to remain above 2195, and down side we see support at 2151 level.

At this stage one must add some hedging positions against your investment in the market, buy some VIX or 3x leverage etfs UVXY which we had recommended on Thursday and Friday of last week.

Note – No aggressive shorts are recommended for the short period because the medium and longer term view is very positive for markets. Stay away from European and emerging markets.

This is what we mentioned on last week of Thursday: *Stay long in market, one can book profit at higher level but no shorts recommended in any market. **Next week will be most important week for all major markets, either they will give birth to most powerful bull or they will correct 3 to 4%.***

This is what we mentioned Monday 8 August: Last week S&P held 2151 level, which clearly gave confidence to investors that a bull market is on the way. Billions of dollars follow our predictions closely so some support always comes around our predicted levels. 12th February 2016, S&P moved more than 360 points rally which no one expected. Still no one is expecting S&P to hit 2500 by the end of this year and early next year strong rally.

This is what we mentioned on the 29th of February: At this stage we are expecting that the Indian market will perform, so this is a great time for international investors to put money in the US market as Rupee is at a historic low and the market has already corrected 26% from higher levels. Brazil and China have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies because any turn around in **Brazilian Real can push BRZU toward \$39.00 from 9.30**. S&P closed above 1938 and if it closes above

1938 for more than two days then expect it to move towards 1988 during this week or next week.

Two weeks ago we predicted that 1864 is a great buying level with the first target of 1938 and 1988. The first target got achieved very quickly and the second target will get achieved soon and after that our most important astro resistance level will be 2088, which has played a crucial role in keeping the bull away to move above 2088 for the last 16 months.

Here are Wednesday's ranges: **September 2016**

HONG KONG (cash) – 22951 to 22703

NIKKEI – 16928 TO 16695

NIFTY S&P (Spot) – 8781 TO 8681

CAC – 4469 TO 4425

DAX – 10691 TO 10595

DEX EURO STOXX – 3041 – 3012

FTSE – 6838 TO 6788

FTSE/JSE (Cash) – 46721 to 46211

S&P e-mini – 2183.00 TO 2165.25

NASDAQ 100 e-mini – 4791.00 TO 4855.00

RUSSELL e-mini – 1253.00 TO 1238.00

DOW e-mini – 18525 TO 18361

TREASURY BOND

On Tuesday Thirty Year bond traded mix, on Wednesday one shall cover all shorts in Thirty and buy some positions on lower sides. We are sure you must have bought positions in bond yesterday on lower sides. Short term traders can remain in buy.

Below 170 we may see a non-stop fall so get ready. At this stage watch 170 on the lower side and 174 on the higher sides. It is a great time to build sell positions very aggressively for the medium and longer term.

Medium and longer term traders must hold positions in TTT, TBT and TMV, and add some aggressive trades in these etfs from 21st September 2016.

Wednesday's trading range **September 2016 contract**:

TREASURY BOND – 172-12 TO 170-29

SOFT COMMODITIES

On Tuesday softs remain negative, cotton close below 67.00 level on Tuesday which indicates that it may test \$65.50 level to \$64.75 level. On stay away from sugar, cocoa, coffee and orange juice.

Buy coffee around \$138.80 with stop-loss at \$137.50 as we don't see coffee going below \$138.

This is what we mentioned on last week Monday: *Coffee will hold \$135, and cotton \$67.10; these are the most important levels to buy as coffee and cotton won't go below these levels. This week the target for coffee is \$143 and cotton 71.88.*

This is what we mentioned last week Monday, 8 August: *Our recommendations of booking profit in coffee around \$143, sugar \$20.00 and cotton at \$75.00 did well. Orange juice and Cocoa will keep falling sharply lower so stay away.*

Watch \$143 support level for coffee, coffee must hold this level and on the higher side coffee can move towards the astro resistance level of \$154. We are sure you must have booked profit in most of the softs (cotton at \$75.00, coffee \$154, sugar \$19.98, orange juice \$190, and cocoa \$3090), and now is the time to stay away.

This is what we mentioned on the 26th of May: We strongly recommend staying away from any short positions as sugar prices may move towards \$17.65 level and that will be the level to take some short positions with stop-loss of 17.89 and if Sugar start trading above \$17.89 for 26 hours than we may see \$19.98 level.

Coffee prices will hold value on the Down side so one can buy some positions in coffee on Monday. \$128 level will play the resistance level. On the other hand orange juice will move higher but we don't see it moving above 165.00 level so close all positions if you have any in Juice.

Stay short in cocoa and buy coffee as prices will hold \$122 level.

Remember what we mentioned on February 2016 - Coffee will struggle to close above \$118 and \$128. The maximum down side is \$112 or \$109. One can start accumulating coffee with target of \$128. Cotton will struggle to close above \$64.88 and on the down side one can buy around \$57.50. Sugar selling is recommended at \$16.65 buying around \$12.78 to \$12.50 is recommended.

Wednesday's trading range: (September 2016 Contract)

COFFEE: \$146.75 TO \$142.30 Buying recommended at \$112.50 and \$118.00

SUGAR: \$20.70 TO \$20.19 First bought at \$12.78 – Now book profit above \$19.98

COTTON: 66.05 TO 65.32 Buy recommended at \$65.00

GRAINS

Fall continued in grains on Tuesday, we are expecting huge turn around in grain prices from Thursday so those who like to take some aggressive positions in grains must finish buying on Wednesday or early part of Thursday. WE are expecting grains to outperform metals, energy and softs from Thursday onward.

Expect 10% move in the grains in the next three weeks. Soy oil will trade in the right range.

Medium and longer term traders can buy corn at \$318, Wheat \$392 and soy \$945 (all December futures contracts), we don't see these three grains remaining below these levels.

Last week on the 9th of June, we stated - *Buying recommendations in soy and meal from November 2015 have done very well. Corn will struggle to move above \$451, Soy \$1211, and Soy meal \$435; these are the levels to sell.*

This is what we mentioned on the 2nd of March 2016: Buy May/Sep 2016 call options in wheat, corn and soy. An interesting trend will develop any time in grains so you must have some positions in grains. 3 March is the turnaround day for grains so plan your trades accordingly. Short term traders can trade in and out.

The lower side in Soy, soy oil, corn and wheat is limited from current levels, not more than 2%; but on the higher side we see 5-7% positive moves. **We don't see corn going below \$354, wheat \$455, soy \$845, Soy oil \$29.70 and soy meal \$260.**

Wednesday's trading range (September 2016 contracts):

CORN: \$307.25 TO \$300.25

WHEAT: \$370.00 TO \$357.00

SOY: \$977.00 TO \$952.00

SOY MEAL: \$318.00 TO \$311.00

SOY OIL: \$33.01 TO \$32.05

ENERGY

As predicted oil failed to move above \$48.88 level, our recommendations of selling oil around \$48.88 done so far well and this is forth time oil came down from \$48.88 levels. Short term traders can cover some positions around \$44.55 level. Center point in oil will be \$46.78 level, price below this is negative for oil.

On Wednesday oil will struggle to move higher but we may see some bounce from lower levels. Selling is recommended on higher side in oil, heating oil and RB Gas on Wednesday. Stay short in ERX and energy stocks.

Natural gas will trade mix on Wednesday. Positive so trade in and out.

This is what we mentioned 1 August 2016: *Selling oil at \$98.00, covering all shorts at \$44.55 and \$27.71 were best call of last two years in oil. Early this year buying back at \$27.71 with higher side target \$48.88 level. Last month we recommended shorting oil around \$48.88 to \$49.88 levels with target of \$39.88 which got achieved today.*

On Monday oil, heating oil and RB Gas traded sharply lower. Energy stocks also lost big value, as predicted wait for ERX to test 25.00 level before you take any actions in energy stocks so avoid any buying in energy stocks.

Trading in and out is recommended in gas on daily basis, those who like to take sell should wait for another 10% move on higher side in gas, and keep buying on lower side if prices reaches to \$2.63 level.

Lower side we see oil moving toward \$39.88, watch this level closely, we don't see oil breaking \$36.55 level in the pending months of 2016. Expect ERX to reach the \$25.00 level and watch if it holds than start buy some positions.

Mentioned last month: *Overall oil won't be able to cross the \$48.88 level and on the down side it may break the \$40.00 level, but cover all shorts around the \$39.88 levels.*

We are not changing any of the predictions we mentioned on the 3rd of June: Same kind of positive, RB GAS and heating oil also moved higher. Natural gas traded mix. ERX have been hanging around \$29.00 level and it has to close above \$33.00 level to give bullish signal in energy stocks which we don't see at this stage moment.

Oil has been failing to close above \$48.88 level but same time it is not closing below 48.88 level as well. If oil closes above \$48.88 for three days, then the next price level of \$52.55 may get achieved. At this stage some selling is recommended around \$48.88 level and on the down side the important level to buy is at \$44.55. Oil prices have gained almost 70% from \$27.71 which we called the perfect bottom for oil.

This is what we mentioned on the 2nd of February: Many are predicting oil remaining in the teen's, but we do not see oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will struggle to move above \$35.18 levels, and if it does than \$44.55 is next target with \$48.88 selling level.

Natural gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural gas around \$1.72 and below.

A few past important predictions and levels for energy of the daily Flashnews are at the end of this letter.

Wednesday's trading range (All October 2016 contracts):

OIL: \$47.12 to \$45.32 October

NATURAL GAS: \$2.87 to \$2.78

HEATING OIL: \$1.5011 TO 1.4641

RB GAS: \$1.3951 TO \$1.3488

CURRENCIES

On Tuesday dollar gained value as expected. ON Wednesday USD may keep moving higher but we don't see USD going above 96.75 which we mentioned in this week newsletter so get ready to out form long positions in USD around this level if USD goes in the next three trading days. Get ready to buying positions in Euro, Pound and Rupee.

On Wednesday commodity currencies (Australian dollar, Canadian dollar and RAND) and emerging market currencies will trade negative except Rupee. Swiss Franc and Yen will also lose value but Pound shall be in your buying list from lower side of Wednesday.

This is what we mentioned for Monday 29 August: Friday currencies traded on both sides and finally lost value after the European market close. On Monday stay away from any currency trades, because there are chances that USD may move towards 96.75 level and this shall be a selling level.

Selling is recommended in commodity currencies like Australian dollar, Canadian dollar, and emerging market currencies (except for Rupee, which shall be in your buying list).

Swiss Franc will remain negative but Euro will remain in a tight range; we don't see Euro going below 1.11000 level. Pound will trade mixed; we recommend buying Pound on the lower sides on Monday as well as Tuesday.

Japanese Yen has a limited down side from here; we are not recommending any aggressive sell in Yen. They buying level in Yen is around 0.9681/0.9611 for the short term with the target of 1.0000.

This is what we mentioned Monday: *We see Euro holding 1.1055 level and Pound 1.2925 level. We don't see it falling below 0.9410 level and on the higher side it will have a difficult time to move above 1.0198 level. For USD index 97.00 to 97.50 level will play the role of a Wall for*

dollar which dollar may not be able to breach at this stage, or maybe even for the next six weeks, and on the down side USD may test 92.50 level.

This is what we mentioned last week on Monday, 25 July: This is what we mentioned on Wednesday, the 13th of July: *Any rise shall be taken as selling opportunity in Yen, in the next two months we can 900 pips in Yen or it will easily come down to 0.9200 level very soon. We don't see Yen moving above 0.9878 level and in the worst case scenario 1.0000 will be maximum side.*

*Friday USD tested 97.50 level and this is an important level. Dollar may keep testing this level during this week. **We don't see Euro going below 1.0923 and Pound 1.2988 level.** Pound should be in you aggressive buying list.*

On Monday, the 11th of April we stated: *Last week USD traded negative, and lost value against most of currencies. There are still chances that USD may test 92.50 level so watch USD trend closely, and start taking positions at 92.50 level.*

Emerging market currencies have done very well and it's time to close positions if you are short or medium term traders. Rupee won't fall much so don't short Rupee but surely Rand, Real, Peso and Rubble will lose some value from middle of Monday.

Australian won't hold above \$0.7725, Canadian dollar 0.7900, Euro 1.1475, Franc 1.0555, and Yen 0.9288 level.

A few of the past important predictions and levels for currencies of the daily Flashnews are at the end of this letter.

Wednesday's trading range: (Septembre futures)

DOLLAR INDEX – 96.27 to 95.81

AUSTRALIAN DOLLAR – 0.7545 to 0.7451

CANADIAN DOLLAR – 0.7650 to 0.7589

BRITISH POUND – 1.3157 to 1.3037

EURO – 1.1187 to 1.1101

JAPANESE YEN – 0.9778 to 0.9675

SWISS FRANC – 1.0217 to 1.0151

RUPEE – 67.25 to 66.97 (Spot)

RAND – 14.57 to 13.36 (Spot)

Thanks & God Bless, Mahendra Sharma

30 August 2016, 3.05 PM, Santa Barbara

Some past important notes and important ranges from our daily flashnews:

From few past Flashnews - important commentary:

This is what we mentioned on the 18th of Jan 2016: *On Friday the sharp fall in all the major global markets created so much panic and dented every stock investors account. Fear was spreading and traders started dumping everything they were holding without trying to find out the reason behind what was happening. I received many emails, some saying that S&P will retest 1812, others said that S&P was going to move towards 1650, and many even targeted 1100, the price from where this entire rally started.*

Let me admit that when I read all these emails, even my confidence was shaken and for the few seconds I thought "What is going to happen to most of my members who have been trusting my view and making investments on my view?" There is no doubt that most of our followers accounts must have gone into the deep red.

After I started doubting my view for a few seconds I decided to check whether I was making any mistake in my reading of the astro cycles because if S&P goes to 1650 or 1100, many will lose a fortune. So, I started studying the market one more time to find out that if I was missing anything in my theory.

There is no doubt that till 21 January we don't have a positive view for the market but surely we never saw this kind of weakness in the market. This clearly says that after the 21st of January it will be the testing time for our theory. In our study, except for this current volatility we don't see anything that could bring a crash in this market.

Most of the global markets are very close to the lower side ranges in the books and the higher side from here is 20-30% for many of the markets. If this comes true, then surely most of our follower's will make a fortune. However, to make a fortune most of our members have to survive first without taking any more damage to their accounts.

INDEXES:

This is what we mentioned on Tuesday, the 25th of January: *Monday the market witnessed profit booking and Tuesday will be one of the best days to add more positions in the market around the lower side without any fear because after making Wednesdays low (What we are taking as 2016's low), Tuesday's low will be the second higher low of 2016.*

All the major markets are ready for a monster rally so this will be one of the best time to make money for the short term. Buy quality stocks, indexes and short term calls and we are sure that you will be rewarded handsomely by Friday. Within the next six weeks you will be way ahead.

Tuesday will be a great time to acquire positions in the emerging markets as well as in the European markets. If what we are seeing happens then S&P should move towards 1936 or even higher and down side, it won't go below 1844 or it won't close below 1862 level.

On last week Thursday and Friday S&P closed higher and finally settled at 1901 levels. Those who have been following our works for decades must know how important our astro support and resistance levels are. Last year also the lower side astro resistance was 1827, and the higher side 2088. Both these levels played a very important role for the market. So far the support level of 1821 played an important role on Wednesday and we are hopeful that S&P won't go below this level in the year 2016 and that the astro support and resistance levels continue playing an important role.

If we are not making a mistake in our reading of the astro cycles, then the negative time cycle for most of the financial markets has ended. Now is a great time to make money because the bullish cycle has already started from most of the equity markets.

This is what we mentioned the 18th of Jan 2016: *On Friday investors experienced a nightmare. It was day that no investor likes to see because on this kind of day the trading accounts of longer term investors are always deep in the red. In 2000 when the tech stocks crashed we never recommended any buying to investors because the astro cycle was negative for two years and it was clear that the market may remain down for the next two years. In 2008 crash which we predicted, we were also aware that the market would rebound from the 26th of February 2009. We recommended that the market would bottom out on the 6th of March 2009 and that investors should start accumulating stocks keeping in mind that they have to hold them for five years and that they would make a fortune. We strongly recommended, not to focus on the daily volatility and keep busy accumulating quality stocks. This proved to be very accurate advice.*

Energy:

This is what we mentioned Monday, the 21st of December 2015: *Last week energy traders remained very nervous as they felt like abandoned by the bigger financial institutions and other large energy investors, but the truth is that every energy trader or investor is badly stuck energy trades.*

In 2008 we predicted a crash in oil from \$145 and in 2009 we predicted that it had bottomed out at \$33.00 level. That prediction provided great returns those who invested in oil and energy stocks. Now once again after the prediction of oil falling in 2014, since the last two weeks we have been predicting that oil would form a bottom around \$34.55 level so watch this prediction closely. I am not saying that oil won't fall below \$34.55 level but surely those who will buy around this level may be rewarded handsomely.

Maximum fearful days: According to the current astro cycle we see another 12 volatile or fearful trading days are pending but the down side is limited.

This is what we mentioned on the 27th of August 2015: *If oil trades below \$47.00 for two days then there are chances it could retest our magic support figure of \$44.55. If it starts trading below \$44.55 then next level \$38.50 so avoid buying positions.*

We are not recommending any buying in heating oil and RB gas, also one should avoid buying any energy stocks.

This is what we mentioned on the 27th of April 2015: *Adopt trading in and out strategy in energy, **but don't take any shorts in oil, heating oil or RB Gas. Sell some energy stocks.** Energy stocks will trade mixed without any major move so one can get ready to sell energy stocks. Higher side it is possibility that oil may see \$63.80 level, if its hold \$57.00 level. Keep adding positions in Natural gas around \$2.55.*

This is what we mentioned on the 5th of March 2015: *Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors. On Down side oil will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.*

Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for oil is \$47.00. ERX won't be able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.

This is what we mentioned on the 3rd of January: ***On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating oil and natural gas lost value as well on Monday. Don't buy RB Gas and heating oil but surely natural gas can be bought around \$2.71.***

This is what we mentioned on the 23rd of December: ***Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.***

This is what we mentioned on the 11th of December 2014: *Wednesday our fear proven very true, we strongly recommend to stay away from oil. When oil broke \$92.88 we recommended sell oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.*

This is what we mentioned on the 5th of December 2014: ***Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, oil, RB gas and heating oil. Natural gain gained value from the lower levels on Friday as predicted.***

On Monday the higher side will remain limited, and if oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like oil is getting ready to break \$60.00 so stay short or add selling on any fall.

Currencies:

This is what we mentioned last Thursday: *Pound is ready for 1.4123 mark. Sell Pound and add more Swiss Franc sell.*

We are not recommending any new short in Euro, surely one can acquire some positions in Euro for the short period of time.

Emerging market currencies are getting ready to for bottoms expect few won't be trust like Rand and Rubble. Wednesday we see many currencies gaining some value but stay away from Pound, Canadian and Franc as they can keep making new lows so hold positions with 3% more corrections.

This is what we mentioned on the 22nd of December: *Euro will struggle to move above 1.1075 and may hold value 1.0725 so watch these both levels closely.*

This is what we mentioned on the 23rd of April 2015: *The Medium and longer term trend is still very positive for USD but for the short term a mix to bit weaker trend indicated. USD Index have achieved our target of 100 and now down side 95.00 or at worst case 90.00 level will be great buying.*

Dollar is our longer term buying trade so we won't recommend shorting dollar, we recommend buying USD on any weakness. Euro higher side 300 pips and lower side more than 3000 pips. We don't see USD index going below 95.00 levels.

Remember this what we mentioned on the 5th of March 2015: *Currency war has nothing to do with USD Friday USD gained value as predicted. Medium and longer term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.*

Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.

This is what we mentioned on the 15th of Jan 2015, Monday: *Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just finished one interview from Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell as it will going to go back to par levels.*

This is we mentioned on the 2nd of October: *On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.*

Remember, this is what we mentioned in the month of July: *At this stage USD is trading in a positive direction without any break since the last three weeks. Finally, it is reaching a most crucial level because once it breaks 81.78 then the nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.*

This is what we mentioned in the month of May (2014): Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.

In this year book "2015 financial predictions" we predicted "final bear cycle in market from 27 July to 15 August 2015", yes Sun can bring some uncertainty but take this uncertainty as buying opportunity in same time in 2015 in the month of August.

Watch 2088 level for S&P, as it is most tough astro resistance of 2015. In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

In our 2015 book we mentioned that commodities will have worst year of 2015, and so far precious metals, base metals, grains and softs have been struggling and they will keep moving down in the second half. Dollar will perform amazingly well in 2015 so hold positions and money in USD.

Make wave of nature/astronomical cycle an integral part of your trading/Investment strategies!

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
