Thursday's Flash news (unedited copy)

Historically market always made low during Scorpio and bull market started from there

Dear Members,

Many of you must be wondering how this Scorpio Moon has such a major effect and how it always brings losses in the trading accounts of those who trade with small money or leveraged positions. We never recommend staying away from leveraged or short term trading whenever a scorpion moon arrives because it creates scarcity and volatility. This what has been happening for the last 39 hours.

Read very carefully few points here below:

S&P has been holding 1864 level very strongly since last April 2014, and most of you are witness to this. Once again today S&P moved towards 1864 but bounced back sharply. I was about to send an alert to buy some positions in S&P aggressive when it was trading around 1869 but I decided not to

do that due to the Scorpio Moon. **Today on the worst day the Brazilian market moved almost 2.5% higher, the Brazilian market ETF BRZU moved up 19%, Russian etf (RUSL) move 22%, EDC moved**

8.5% and the Indian INDL 5%. All these moves happened due to gains in their currencies.

Today we can call the end of the bear market in equities. Most of European, Asian and emerging markets will start their rising journey and we are very excited about it. On Thursday the market will digest all the news and everything that is happening but surely on the lower side you can keep adding positions in the market.

Dollar lost value today as expected. We have been predicting a weaker trend in Dollar Index since the last two months and that Dollar Index may not move above the 100 mark, and today's weakness has opened the door for it move towards 95.00.

We have been advising most international market traders to buy aggressive positions in emerging market currencies because we see a huge rebound in emerging market currencies during the month of February and we are witness to REAL, PESO, RUBBLE and RAND gaining value. They have gained more than 2 to 5% value during this week. Rupee has to also adopted this path. Look at the chart of Real and Rubble over the last week, Dollar came down from

4.15 to 3.89 and lost over 4% value and dollar lost 6% value against Russian Rubble. Many other currencies like Argentina Peso, Rand, Mexican peso and other currencies also gained big value against USD so at this stage commodity trader in the emerging market countries should watch their currencies value closely as we are expecting a huge move in the coming time.

I think traders have to watch the Currencies trend careful as many commodities that are gaining in terms of emerging market currencies could lose big value if these currencies gain value as per our predictions.

Oil has also gained value as expected, and the positivity in oil will continue.

I hate to write, meet or advise people on Scorpio Moon, and always I recommend our members to stay away from the market but its human nature, so they somehow get involved in the market even though they are aware that the trend will be very volatile. Next time please close your computer screen and finish your other work.

This is what we recommended yesterday: *Tuesday the Scorpio Moon dominated the markets trend, and we all know that the market always turns very volatile during a Scorpio Moon and always warn investors for short term trades. In our research we have discovered that whenever there was a Scorpio Moon, it affected the markets trend nine times out of ten, and since then we have always recommend investors to stay away from the market or just finish other pending work. To longer term buyer's we recommend accumulating positions, but we don't, and never will recommend any short term trade. Every month I also mention that if members allow me then I will skip writing the report during the Scorpio Moon.*

On Tuesday around 10.00 AM Indian Standard time the Scorpio moon started and on Thursday around 7.00 PM IST it will end. Short term traders should stay away from the market even though it looks like a great buy here.

On Tuesday most of the markets closed negative, and on Wednesday uncertainty will continue. Longer term traders can buy positions if S&P goes to 1864 and it will be great buy around that level as we don't see the market remaining below that level.

We do not recommend any aggressive trades on Wednesday. Please finish your pending work, and around the lower side one can add more positions without taking any leveraged positions. This is a great time to accumulate positions in stocks because financials, tech, biotech, and many great companies are trading at very cheap prices. Those who will invest in these for six months to a year time horizon will be rewarded greatly. Once the Scorpio moon gets over on Thursday, it will be a great time to add more money in the market.

Here below trading strategy and ranges for Thursday:

GOLD/SILVER/BASE METALS

On Wednesday the fall of USD played a key supportive point to push gold and silver prices higher in USD value but gold and silver were not able to make much against Euro, Pound, Rupee, Rand, Real,

Peso and in other currencies terms because these currencies moved sharply higher which offset gold's gain.

This week our view was not that negative for gold and silver, and we are expecting gold to achieve a top on Thursday or Friday. After that weakness starts, if you are holding any positions then you must close them around the current levels of \$1146 as gold may not be able to hold this value after this week. Silver won't be able to cross \$14.95 level. Gold will have a small support at \$1132 level at this stage. Stay away from base metals or just trade in and out as per the predicted level here below.

Indian Rupee traded mixed without any major changes, but we still see Rupee moving aggressively higher against gold which may push gold prices sharply lower in the coming weeks. Gold in Rupee terms has gained an extra 25% or one can say lost less 25% value due to the fall of Rupee from 2011, but this is changing now so Indian gold traders

have to watch this closely as, if Rupee moves towards 64.25 then gold prices will obviously lose big value in Rupee terms. We are strongly recommending selling Gold in Rupee, not in dollar terms if you are an Indian trader. Look at the chart above, at how gold prices kept gaining premium in Rupee terms from July 2011. Before 2011 there was hardly any premium in gold between the USD and Rupee. You can also see Real and Ruble gold prices chart against USD. Any currency price move always plays a key role in any international commodities which is trading in

USD and local currency terms.

Metal stocks are gaining value. In 2016 we already predicted that mining stocks will outperform metals but HUI will still struggle to remain above 133 for more than three days.

On Monday we mentioned: Gold may not be able to gain in emerging market currency terms so one can sell gold against Rupee, Real, Rand, and PESO on Thursday and Friday because all these currencies are about to make a huge reversal.

This is what we mentioned on 29 January: *Important point to remember: After five years, gold's time cycle is changing against most of the emerging market currencies so it will start losing value against Rupee, Real, Peso, Rand, Rubble and many other currencies. Gold may lose 20 to 30% value against these currencies. If you are invested in gold in these currency terms, you should get out. This phenomenon will happen for the first time in many investors lives so traders in these countries have to be very careful. Sell gold and buy these emerging market currencies. Gold will keep losing value in dollar terms too.*

Here is Thursday's range: **(March 2016 contract)**:

GOLD: \$1149.95 to \$1136.00

SILVER: \$14.93 TO \$14.48

COPPER: \$212.90 TO \$207.50 Sell

PALLADIUM: \$521.00 TO \$505.00 Sell

PLATINUM: \$893.00 TO \$872.00

SOFT COMMODITIES

Today most of the softs traded mix to big negative except coffee. Sugar gain came down but one can start taking positions around \$12.66 level. Avoid rest of softs and hold positions in coffee but Coffee may struggle to move above \$127. Trade in and out in most of softs.

This is what we mentioned yesterday: *On Monday Sugar prices had roller-coaster ride, it opened higher, and went up to \$13.40 and closed very near nearer to our predicted target of \$12.78. It came to our prices but doesn't mean that you start buying any aggressive positions. Today if prices move toward \$12.53 then one should start buying positions. Trend is sugar have been damaged as expected, our selling recommendation in Sugar around \$15.50 level done well.*

Rest of softs traded mix, we are still recommending to stay sideline from most of softs or just trade in and out. Positive time for shorts will start from 12 February so by that time just trade with light positions as softs will remain directionless.

Remember - Coffee will struggle to close above \$128 and \$118, the maximum down side is \$112 or \$109. One can start accumulating coffee if it closed above \$118.00 for the three days. Cotton will struggle to close above \$64.88, and sugar \$15.45. On the down side cotton will hold \$60.28 and sugar \$12.78 to \$12.50. At this stage we not recommending any buying in cocoa, orange juice, lumber.

Thursday's trading range: **(March 2016 Contract)**

COFFEE: \$123.38 TO \$119.15 Buy

COTTON: \$62.55 TO \$61.55 Avoid

SUGAR: \$13.22 TO \$12.72 avoid

GRAINS

On Wednesday grains traded negative except wheat and soy oil. On Thursday around lower side you can take positions in corn and soy, hold positions in wheat and add more soy meal and soy oil. Grains prices are ready to move higher at least 5-7% higher from current levels. Those who already bought positions should hold positions. Buying grains will be the best bet in 2016.

After 6 of February we see strong rally starting in grains.

*The lower side in Soy, soy oil, corn and wheat is limited from current levels, not more than 2%; but on the higher side we see that 5-7% positive moves. **We don't see corn going below \$354, wheat \$455, soy \$845, Soy oil \$29.70 and soy meal \$260.***

Thursday's trading range (March 2016 contracts):

CORN: \$375.00 TO \$368.00

WHEAT: \$489.00 TO \$477.00

SOY: \$888.00 TO \$873.00 BUY

SOY MEAL: \$273.30 TO \$267.55

SOY OIL: \$31.45 TO \$30.92

ENERGY

Oil prices gained value as predicted on Wednesday, one should book some profit around higher sides of Thursday. We are not recommending any shorts but surely those who are trading in Rupee and other currencies term should book profit in oil as strong momentum in these currencies may put some pressure on commodities.

Energy stocks gained value, and book profit in energy stocks once ERX reaches to \$24.50 levels. Thursday oil prices will trade both sides, but surely they will close in green. Oil gaining over 8% helped USA stocks to regain some value. Oil may have difficult to move above \$35.18 level so watch this level or book profit around this level.

This is what we mentioned yesterday: *Many are predicting oil remaining in the teen's, but we do not see oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. On Wednesday and Thursday, on the lower side we recommend buying positions. Thursday will be the best day to acquire oil and most of the energy products around the lower side.*

Natural gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring positions in natural gas around \$1.92 and below, or whatever the low of Thursday is. Energy stocks may rebound strongly from late Thursday.

This is what we mentioned on last week Thursday, 28 January: *Oil achieved \$34.70 level and We don't see oil moving above \$35.18 levels so one should book profit those who have been buying from \$28.00 levels, there are chances that Crude oil may retest one more time \$28.78 level on more time.*

Few past important predictions and levels for energy of daily Flashnews are at end of this letter.

Thursday's trading range (All March 2016 contracts):

OIL: \$33.77 to \$31.45

NATURAL GAS: \$2.05 to \$1.96

HEATING OIL: \$1.1155 TO 1.0455

RB GAS: \$1.0729 TO \$0.9915

INDIAN RUPEE

On Wednesday Rupee was not able to make enough gain like other currencies due to Indian forex market closes early before USA data came. Yesterday after ISM number most of global currencies gained handsomely and dollar index collapsed sharply lower so today we may see Rupee going below 67.50 level. This week Monday we predicted that Rupee may reach 67.23 by end of this week and we still that happening. Hold your selling position in Dollar against Rupee as at least 3% fall in USD is coming in the next one month.

Dollar struggled to close above 68.00 level as predicted which clearly give indications that USD will fall sharply.

This week positive trend in Rupee will continue as mentioned in weekly outlook which you can read here: *Last week Rupee remained very volatile. It reached our higher side predicted target of 68.23 and then came down and closed below 68.00. As mentioned Dollar has achieved a top against Rupee and there is 99% probability that dollar won't the higher levels of last week again.*

We are all aware that Indian Rupee has performed amazingly against most of currencies in the last one year, especially when the other emerging market currencies were falling none-stop under a gloomy outlook. Most fund managers didn't dare to touch any emerging market currency but Rupee remained firm, except for when it lost some value in the last one month.

I don't know how many economists or analysts are taking a stable trend in Rupee and falling commodity prices in account, because what happened in 2015 will have a huge impact on the GDP and economic data during this year.

We are still strongly recommending members to keep adding selling positions in USD against Rupee with the short term target of 66.23 which shall get achieved by the end of February. This week Rupee will keep trading positively or USD will keep losing value so watch the higher side levels in the daily news report and keep adding buying positions in Rupee.

On Monday Rupee will trade on both sides. On Tuesday and Wednesday, a mixed trend will continue and some weakness may come during the late hours of Wednesday. Late Thursday and Friday Rupee will gain value once again. This week's range for USD will be 68.18 to 67.35.

Thursday trading range: (Spot price)

RUPEE/DOLLAR – 67.91 to 67.48

INDIAN MARKETS

I don't want to talk too much today about market but in simple work market are in process of bottoming out, and it looks like that yesterday it got bottomed out and rally can start from here. Many stocks came down sharply during the six months and they will have turn around big way but you have to find stocks those which will make far better returns in coming time.

We are not worried at all about ongoing uncertainty because we are aware that Nifty will going to hit 9755 level by eth end of this year so I want to focus from here what we stock and what strategy we should adopt so we can maximum returns in the coming time. In longer term so far our view has away been right but many time in the short term we did some error like recommending banking stocks. Globally most banking stocks lost 50 to 70% value in the last one year.

During this weekend I will put some extra time and do my best to find our best stocks which can provide us great returns in the 2016 and 2017.

At this stage stay away from energy stocks, Auto, textile and stay away from Airline stocks as we never liked this week actions in airline stocks. In fact, one takes with small sell stock like Jet and Indigo with stop-loss of 3 percent and target 8% down side.

Technology will remain out performing sector in 2016 and 2017. In short term tech and Pharma stocks will outperform market and so far they are doing well. We are still recommending buying some aggressive positions in **Infosys, Wipro, HCL, ICPA, Lupin, Dr. Reddy, Pfizer Britannia, ACC and Tata Elxsi will perform very well in the next three weeks so great time to acquire positions in these stocks from today. You can buy in futures.** Hold or add some more call options in February and March 2016 in Nifty, strike price 7550, and 7650. We are sure your call may make you at least 5 time returns because we see Nifty achieving 7650 to 7700 by the end of February, and by March 7700 to 7838 level.

Tanla sol, is falling watch closely and add positions for the longer term.

Today BOB, PNB and BOI will perform well, after budge banking stocks will make huge move, they atre very attractive buy so don't miss opportunity buying them at current levels.

Thursday market will trade both sides to positive, add some aggressive positions in market as this is final few days are put everything in rather than holding cash.

Rupee trend will also help market sentiment. If we are not mistaking in reading astro cycle then market have already bottomed out, Scorpio Moon plays a short term uncertainty role but it is getting over today.

This is what we mentioned yesterday: **Watch Bank Nifty, two weeks back Bank Nifty made a low of 14754, and we don't see Bank nifty going there, and we don't see Nifty going to two weeks backs low 7241. This week is great to accumulate positions with leverage and without thinking of short**

term and we are sure you will be very happy investor by end of February and March and whole this year. Markets are hanging around low of 2016, and these prices will become history.

Yesterday's recommended tech stocks (**Tata Elxsi, HCL Tech, Wipro and Infosys**) held very well in falling market, and we are still recommending to buying these tech stocks, and add more banking stocks for the longer term as we like the actions in BOB, PNB and BOI.

On Tuesday we recommended: **Britannia, Amar Raja, TVS, ITC and TANLA.**

Close positions in energy stocks sell more or short Textile stocks.

We are still recommending buying or holding positions in yesterdays recommended stocks: Buying list Monday: Last week Sun Pharma and other recommended stocks performed well. You should be focusing on or you can buy the following stocks from Monday and as we see minimum 5% to 7% gains in these stocks. **L&T, Infosys, Wipro, KPIT, Indoco Remm** and hold or buy positions in stocks like **Indoco Remm, Sun pharma, Divi Lab, and Dishamn**. Add some aggressive positions in banking stocks like **BOB, BOI, PNB, AXIS, ICICI, HDFC, HDFC housing** and **Dhanlakshmi Bank**. Don't expect immediate gains in banking stocks, but surely by the end of this year you will be glad that you invested in banks because many banking stocks shall regain 50 to 100% value from current levels.

Tata Elxsi, Guffic Bio, Moldtek, MoldtekPac, Tanla, PTL and Axiscade are our top picks among cash stocks.

This is what we mentioned on 27 January of last week: We strongly recommended buying in Bank Nifty at 15000 and Nifty at 7323 level, one can these both indexes at even current level of 7400 and 15500.

This is what we mentioned on 16 January: Who don't recommend many stocks at this stage but surely some stocks we like for the short term and are: **Sanofi, DIVI, Dishman and Indoco**. On the other hand, **energy stocks** still look great and **Indraprastha Gas**. From the Tech sector we like **Infosys, Wipro, Mind Tree, Tata Elxsi and Tanla Sol**.

Final note: It is clear now that the market has formed a bottom of 2016. We don't see Nifty going below last week's low of 7241 and Bank Nifty 14755.

Thursday's trading range: (Spot price):

NIFTY: 7461 to 7355 (Spot) (recommended strong buy at 6065) Buy

BANK NIFTY: 15118 to 14808 (recommended strong buy at 10350) Buy

AXIS BANK: 389 TO 377 (recommended strong buy at 205)

ICICI Bank: 206 to 202

SBI: 169 TO 170

ACC: 1295 TO 1260

ITC: 325 TO 317

IOC: 400 TO 392

Hind Unilever: 845 to 815

RELIANCE: 997 to 971

2016 Financial Predictions
www.mahendraprophecy.com

Thanks & God Bless, Mahendra Sharma,

3 February 2016, 03.00 PM, Santa Barbara

Future Consumer: 17.00
Hindustan Food: 70.00
Tanla Solu: 33.00
Recommended on 12 Oct 2015

This is what we mentioned on 2 January: *Airline stocks remained very hot, in the Second week of November we recommended buying most of the Airline stocks and so far they performed very well. We are still recommending holding positions in Jet Airways, SpiceJet and Indigo. Also last week one of our favorite stocks of 2015 "GM Brew" did amazingly. In May 2015 it was trading at Rs. 118 and last week it closed at Rs. 932. Britannia, Vadilal, GM Brew, 3M India, Sequent Scientific and Guffic Bio performed very well in the 2015.*

Last week **Reliance** and other **frontline oil stocks (BPCL, HPCL, IOC, ESSAR OIL)** held value very well, **ACC** moved higher and other stocks like **Mastek, Mphasis Ltd, Tata Elxsi, Mindtek, Moldtech, Khoday India, Heritage** performed well, and we are still recommend holding positions in these stocks during this week.

This is what we recommended on Monday 26 December: *We are strongly recommend buying indexes and keep adding recommended stocks. Reliance have been moving higher and we are still recommending add more Reliance as our target is 1047 for this week. Our buying recommendation in Reliance around Rs. 826.*

Indian market is our most favorite at this stage among most of global markets. We are sure you must have been adding positions in Nifty, bank Nifty and stocks. Moldtech moved higher and keep adding mindtek, Tanla and food stocks will perform far better stocks like, Hind Unilever, Khoday India, Heritage, VST, Britannia, Vadilal, and Kwaliti. Hold positions in last week recommended stocks like Hind Unilever, Indoco, ITC, and Reliance, HPCL, BPCL, and IOC. Last week Steel stocks performed well, and the SBI also held 224 level which is a great sign; but let's see whether the SBI holds 224 this week or not. If it does, then the SBI will move in one direction and that is UP.

his is what we mentioned on last week 11 December: *We still recommend holding positions in last week recommended stock, if you don't have any positions in these stocks then start buying today: Hold*

positions in **Hind Unilever, IOC, VOLTAS, Essar Oil, and Auto stocks**, also one can add some positions in **SBI around 224**. Add **Tanla Sol, Mindtek, Moldtech, and Axiscade** on any weakness.

Last week the Indian market traded mixed but the undertone of the market still remained very stable. **Indian Rupee has been performing very well which is giving clear indications that something will unfold very soon. The Indian economic data will be very robust in 2016, and why not, when oil has provided a bonanza to the Indian economy. I don't know how many traders in India are giving importance to Rupee and Oil's trend, but surely Rupee and Oil will bring a huge positive impact on the Indian equity market and banking stocks so get ready for the most interesting time.**

Take some more call options on January 2016, buy 8000 call options. The next big trend will be in energy stocks and banking stocks as the **SBI** is holding 224 level and the rest of the energy stocks are trading in a tight range which is clearly giving us a great sign. **Banking stocks are trading negatively. Watch the SBI level of 224 as we don't see the SBI going below this level. If the SBI falls below this level, then it may take the whole banking sector lower. A positive time will start in banking stocks from 16 January 2016.**

This is what we recommended 25 November: **On Tuesday buy recommended Mastek went 12% higher, Tanla, Guffic Bio and energy stocks also moved higher. We are still recommend holding positions in most recommended energy stocks like IOC, Reliance, HPCL, BPCL, ABAN as well as mastek, Tanla and Guffic. In the last six months Guffic Bio moved from our recommended price 23.00 to 56.00 and we are still recommending holding positions.**

Buy hospital stocks for the longer term like Apollo Hospital, Forties Hospital, PTL, Wockhardt, and Kovai med for longer term.

In our longer term buying list we are still holding our old recommendations since last two years: Tata Elxsi, Lupin, Cadila, Gufic, Kaveri Seeds, Excel Crop, Heritage Food, Britannia, Jubilant Food, Tata Coffee, IPCA, Torrent Pharma, Nacto, Indoco Remm, Suven Bio, United Spirits, Bharat Immu, PNB, BOB, SBI, AXIS, HDFC, ICICI, IFCL, Dishman, Divi, Aurbindo, Vadilal, Sequent Sci, Welspum, Jet Airway and GM Brew.

This is what we mentioned last 6 June 2015: **On other hand we see fall in gold which may affect adversely a large number of India gold lover as well as investors. Many may lose lifesaving in gold so stay away, hold some cash and if you own gold and silver then get out today and cash in money which can be issue later in buy back or you can invest somewhere else. There are chances that Gold may go toward Rs. 18000 or even lower in 2016.**

This is what we mentioned 27 May 2015: **Today we are adding three hospital stocks in our buying list for first time. These are all three stocks only bought for medium and longer term: Apollo Hospital, Regency Hospital and Kovai med. Cadila, Indoco, Lupin, Aurbindo, DIVI Lab, Sequent, Suven and Ajanta should be in your buying list on Monday, most of these stocks performed very well during last week. In banking you can add BOB, AXIS, SBI and UNION Bank. Hold investment in recommended food stocks.**

Last Monday's (25th of May) recommendations: **Reliance Ind, ONGC, McLeod Russell, M&M, Max India, HCL, Cipla, INDOCO Remm, Kopran, Torrent Pharma, Pfizer, Aurbindo Pharma and in banking sector one can buy SBI, Axis, Union Bank, Vijya Bank, and Citi Union**

Add more **Britannia, Vadilal, GSK and other food stocks**. Last year we recommended **LT Food, KRBL and Lakshmi Energy** in food sector. Add these stocks in your portfolio. On Tuesday we strongly recommend buying in: **Britannia, ONGC, Maharashtra Seamless, Monsanto, JBF IND, AXIS and SBI**.

Fall in Gold prices and rise in Rupee will add positivity in Indian market. Investors should hold positions in market and recommended stocks. Our target of 8578 should fulfill soon.

This is what we mentioned on the 27th of March 2015: **Hold positions in Pharma stocks Thursday Indian Equity market gained value. Once again Pharma stocks performed extremely well. In the last two years Pharma stocks made many new millionaires in India. We were fortunate to find out move in this sector well in advance and we are still being bullish on this sector.**

One can add more **Indoco Remm, JB Chemical, Natco, Ranbaxy, and Torrent Pharma**. On other hand **Britannia and Vadilal** should be added. Those who are holding positions in **Lupin, Cadila, Torrent, Indoco, Suven, Dr Reddy, SUN Pharma, Stride, Sequent science, Ajanta and Ranbaxy**.

This is what we mentioned on the 5th of March 2015 (Thursday): **We confirm here that banking stocks are bottoming out here so don't miss to buy opportunity. Pharma and tech stocks bull trend is intact so hold positions in add more positions in our favorite stocks. Indoco Remm, Suven and IPCA is great buy now. Britannia, Vadilal, Jubilant food, Tata global, Tata coffee and hind lever should be added more today without fear in longer term portfolio. Cipla, Cadila and Lupin are our most favorite.**

This is what we mentioned on the 20th of January: **Yesterday 3M, United Spirit, SBI, MAX Indian, and AXIS Bank performed well as predicted.**

This is what we mentioned 17th of January: **From our recommend Siyaram, Raymond and MAX Ind traded mix but rest of them went higher. On Tuesday we are still recommending add more same stocks in portfolio. MAX India, Raymond, Cipla, Sun pharma and 3M will keep moving higher. Today we recommending to add Lupin in your portfolio.**

Reliance closed below 881, it has to trade above 881 as recommended yesterday for giving new life to reliance otherwise it will start moving down.

This is what we stated on the 15th of December 2014: **Yesterday our most of recommended stocks moved up nicely, United Spirit, DR. Reddy, Lupin, Max India, Wockhardt did well and will keep outperforming. Keep adding Max India aggressively as 10% move is coming. At this stage one should hold positions in Pharma, banking and recommended stocks. MAX India, IPCA, Pfizer, United Spirit, Wockhardt, and CADILA look like great buys so don't miss the**

opportunity of buying on Monday around lower side. All these stocks should move higher during this week.

Good news of Rate cut from RBI is on the way in the next two weeks.

*Last Thursday we recommend buying in a few stocks and we are still recommend holding positions in these stocks: **Cadila, Indoco Remmi, Sanofi, Torrent Pharma, Pfizer, Glaxosmith, IPCA, and Maruti** look like great buys for the short term*

This is what we mentioned on the 27th of Nov: *We still recommend holding positions in **Vadilal, Britannia, Nestle, JBF IND (performed very well).***

*On Monday we see the Indian stock market positivity outperforming most of the other emerging markets. The Indian market has been going through a positive astro cycle for the last one year which is getting a lot of attention from international investors. Our buying call on Nifty at 5750 and Bank Nifty 8700 did amazingly well for investors. We still see that money will keep flowing out from gold and silver as these both will perform very negatively. We are not recommending anyone to buy gold and silver at any level as a lost is still pending on the down side. Don't trade or speculate in metals, energy, and in the commodity market with limited funds as chances are that you will lose everything. **If anyone holding gold etfs should get out from positions, and take some buying Banking and Pharma stocks.***

We are not changing our recommendations of what we mentioned 21 November: *Three weeks back we recommended buying **Honeywell** at Rs. 5100, and last week it closed around Rs. 7000; **ING Vysya** Rs. 610 to Rs. 850. **Vadilal Ind** went also higher from Rs. 180 to Rs. 223 and we still recommend holding these three stocks as we are expecting huge move on the way.*

*Last week **Ajanta Pharma, Honeywell and Vadilal** remained hot, and we strongly recommended buying **Vadilal**. Last year we recommended buying it around Rs. 124 and we are still recommend buying it at Rs. 270 with the target of 650 in the next 18 months.*

This is what we mentioned last Monday (8th of September): *On Monday our favorite stocks like **Cipla, Lupin, Cadila, Pfizer, Great Eastern Shipping, SBI, HPCL, BPCL, JBF Ind, Raymond, Zensar tech, Mastek and Testiy Bits.** Among all these **Mastek, Cipla, Zensar and Testy Bits** performed amazing well under pressure. We are sure many of you must have taken positions in these stocks. Here are few recommended stocks charts of last five days.*

This is what recommended on last Thursday: *On Wednesday few small cap Pharma stocks performed very well, stocks like **Suven** (we recommended around Rs.47 and yesterday it closed at Rs. 158) and **Venus Remm** (we recommended around Rs.180 and yesterday it closed at Rs. 295) and **Bharat Immu** (we recommended around Rs.09 and yesterday it closed at Rs.40 performed well. Hold positions in all these three stocks for medium and longer term. Yesterday we recommended **Indoco Remm**, keep adding position on any weakness.*

Yesterday **Cadila, Lupin, Suven** and other pharma performed very well, and we still see these stocks moving higher.

This is what we mentioned last 19 August, 2015 Tuesday: **S&P 1905 and NASDAQ 3842/3789 level should be watched closely as we don't see USA market falling much from here. We still hold our prediction of S&P moving towards 2150 by end of this year and NASDAQ 4500. Few other markets will follow but many other international markets will struggle to move higher.**

This is what we mentioned on Monday (the 18th of August): **Negative or uncertain cycle for equity market ended last week as predicted. Sun changing house will give new directions to stocks but commodity will struggle badly. Last week ACC, Reliance, Cipla, CCL, Britannia and TATA motor performed extremely well. One of our stock 3M India achieved predicted target and now our next target for is 6000.** Important note: At this stage we strongly recommend buying cash rich companies (we will put out this list soon), also our most favorite stocks **(Nestle, Britannia, Vadilal, SUVEN life, Sequent, Bharat Immu, Venus, coal India, Jubilant, Tata coffee, Lupin, Dr. Reddy, TCS and Tata Global).**

If Nifty breaks 7578 level and trade below for two days can bring volatility in Indian market. Nifty is safe zone until it holds 7578 level. Next astro support level at this stage is at 7421 and in the worst case scenario 7288. On higher side still Nifty will struggle to cross 7775 level.

Medium and longer positions: Our target for **Reliance** is 1350 from Rs. 838, which may have huge impact on index.

This is small part from Indexes sections from second week newsletter of August: **As per astro chart we see both sides move continuing in all major markets for the next two weeks until Sun remains in Cancer with Jupiter. On 15 August Sun will be transiting into Leo, which is its own house and this will be a great time to add money in market on weakens. We have experienced in the last 25 years that whoever invested in between 15 August to 15 September's Sun cycle always made a fortune. Please take advantage of this period to accumulate positions in quality stocks.**

In Indexes trading in and out will remain best strategy. In big name TCS, Reliance, Britannia, LUPIN, Wyeth, SUN Pharma, GlaxoSmith, Hindustan Lever and Dr. Reddy still are our favorite. (Nifty shouldn't close below 7421 other will market may fall more three percent from current level).

This is what I mentioned in June 2014: **Just focus on Pharma and Tata Group at this stage. It looks like that Pharma stocks are ready to create history in Indian market. What Indian software companies done from 1997 to 1999, same era can be repeated in Pharma stocks. I was invested in software Indian stocks, in fact I invested in February 1996 \$17200 and that portfolio went more than 1.5 Million dollar. Only reason portfolio went so much higher because I was held my positions. We strongly recommend holding positions in our recommended stocks rather than doing speculations. We always recommend taking minimum risk in day trading and speculations, put 90% money in quality investment and 10% in short term trading in whenever opportunity knocking door.**

This is what we mentioned 18 June 2014: **So far Nifty held value of 7425 and levels so now Nifty will have another astro support at 7475 and 7532, watch these levels closely. Astro resistance will be at 7775, so this level should be taken as profit booking.**

This is what we mentioned in the first week of June: *Mercury changing directions will surely bring some uncertainty, so book 80% profit in our recommended stocks, still hold positions in our favorite stocks (Pfizer, Torrent Pharma, Gellette, and CCL Product, add these four stocks in your portfolio. Rest or recommended stocks have been doing great and still you can hold positions in stocks like: Agrotech, Excel Crop, Kaveeri seeds, Tata Global, Tata Coffee, Tasty bits, Mount Eve, KGNENT, Hatsun, Rasoy PR, GM Brew, Radico Kh, Jagatjit Ind, EDL, Tilaknagar Ind, Mount Shiv, Nestle, Vadilal Ind and Britania and Aurbindo.*

Food stocks are doing great so watch our recommended food stocks list mentioned below at end of newsletter. Here we are putting list of stocks which we recommended in the early 2013: **Tasty bits, Mount Eve, KGNENT, Hatsun, Rasoy PR, GM Brew, Radico Kh, Jagatjit Ind, EDL, Tilaknagar Ind, Mount Shiv, Nestle, Vadilal Ind, Britania, Suven, Sequent Scien.**

We don't want to say much today, we will talk more on Monday, here is what we mentioned yesterday: *Everyone who invests in India will be watching the elections results very closely; if NDA fails to get 282, then surely the market can correct five to ten percent. As predicted three weeks ago, the NDA getting closer to the majority, and BJP will get 245. It is always interesting to watch astro indicators, reading the astro cycle is an amazing study, but unfortunately, most of the financial astrologers don't have any past track records, but they start websites and try to fool people by copying other work and make investors fools (as few financial astrologer caught red handed by copying work). We hate to criticize them, but this is the truth.*

*In short we are not recommending shorting positions in India market, except small hedging positions. Also watch 7275 level closely on higher sides. Book profit in Pharma and tech stocks. **Add more Bharat Immu as this stock can fly sharply higher. After election result we will release new stock list.***

*Our predictions on Indian market have done amazingly well and at this stage don't focus do much on elections as money is always made in market with medium and longer term view. **Like six months our view was Nifty reaching 6775 when it was around 5950 and last same we predicted when it was at 5550.** I still remember when Bank Nifty broke 8800, we stated that it won't go below 8200 and 2014 target 13500 to 15900.*

This is what we mentioned two months back: *Indian market traded sideways, we still recommend staying away from any aggressive positions in emerging market as well as in India. **Ajanta Pharma, Torrent Pharma, Bharat Immu, Suven, Sequent, Cadila** done very well on Tuesday in weaker market and will perform well on Wednesday as well. Our recommended food stocks like **Hatsun, Radico, Jagatjit, Jubliant food, Vadilal** and many other stocks have also done well.*

By end of May Nifty may reach 7225 and then we will decide what to do next.

*Watch **Bharat Immu** it trading around **Rs. 9.00**, I have been recommending this one since last two years, but stock never moved, please do research before you buy this one. We own this stock and we still see this can be takeover target.*

Buy aggressively Lupin, and one can hold positions in Torrent, Aurbindo Pharma, Ajanata Pharma, IPCA, Cadilla and Dr. Reddy. After our recommendations these stocks have done well and still we see at least 300% more gain so don't miss opportunity of buying. Any weakness in Pharma stocks should be taken selling opportunity.

Bharat immu is doing well, also food stocks are doing well, add more Vadilal and our most favorite Excel Crop (already move 300% and our target of 1000% shall achieve). Kaveeri seed done well by achieving over 2000% return and now we recommend 90% booking profit in Kaveeri seeds.

Also Yesterday Venus Remm moved up sharply, hold positions in it and those who don't have any positions should take some buying positions in Venus. **Buying recommendations in Nifty proven one of the best call after S&P as in the last two six weeks nifty move from 6030 to 6750. Nifty has to cross above 6775 for the two day to give clear bullish indications and Nifty may touch 7250 in the next eight weeks. We would like to add SIX stocks during this week this we recommended on 10 March: NTPC, IDBI, Wockhardts, TATA COFFEE and TATA GLOBAL and Aurionpro Sol.** Hold our recommended stocks, add more Tata Global and TATA Coffee, Emami, Dabur, Federal Bank, Honeywell Auto, and Reliance Comm.

These stocks also done well and we still recommend holding these list which we recommended on 20 Feb: 3M India Ltd around 3700, our target is 4400 in the next one months. Buy BHEL around 173, and target 250 in the next three months.

These recommendations made last quarter of 2013: **Buy Sequent Scientific, Suven Life and Fresenius Kabi for medium and longer terms. Keep adding our favorite Tasty bit, Venus Rem, Jubilant Food. Excel crop and Kaveeri Seeds** done very well, hold these both stocks as they are also our favorite.

Hold our favorite recommended these of stocks of 2013. **Tata Global, Venus Remm, Hatsun Food, Tastybit and Jubilant Food, Vadilal ind 110, Excel Crop 180, Kaveri Seed, Agrotech 460, Britannia 710.**

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
