## Wednesday's trading range for Stocks & Indexes (Unedited copy)

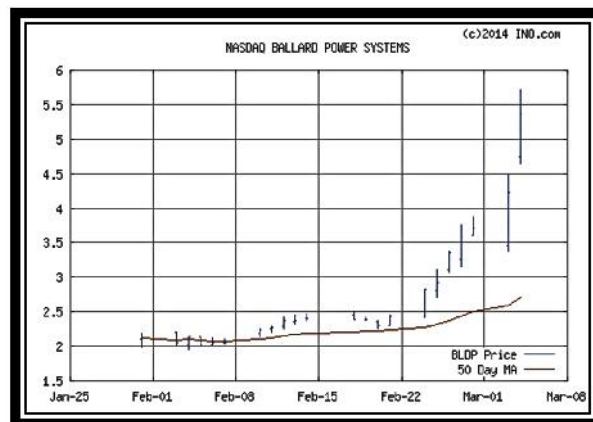

### Strong rebound will happen so take buying opportunity

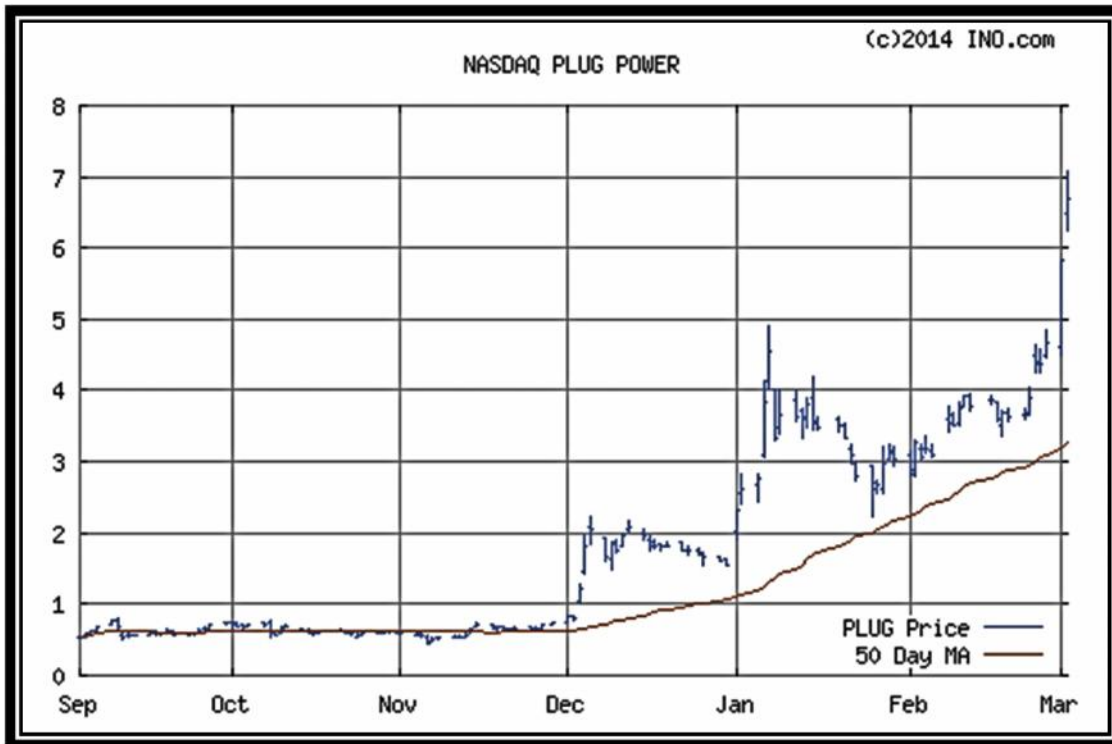

Dear Members,

Tuesday was one of the best day for market under most uncertain international political circumstance when Russia is trying to dangerous situations in people's eye but astrologically we don't see this is all true. According astro cycle we don't see any threat to world but surely Russia will remain c=loser with whole situations and that is reason we recommended buying markets and selling commodities on late Monday and Tuesday. If I didn't had a knowledge of astrology then I wouldn't have recommended buying, markets and selling metals and energy in the last twenty four hours. On Tuesday stocks prices went up sharply and commodities (metals and energy fell sharply), also Thirty year bond fell as predicted. We don't recommend selling or shorting markets at this stage, we also won't recommend buying precious metals so trade carefully. Our recommended stocks performed well specially **FCEL**, **BLDP**, **PLUG**, **UQM**, **CPST**, **ZNGA**, **ATHN**, **DXCM**, **FNMA**, **FMCC** and **VIPS**. These stocks gained between 100 to 1000% percent. Hold positions in these stocks.

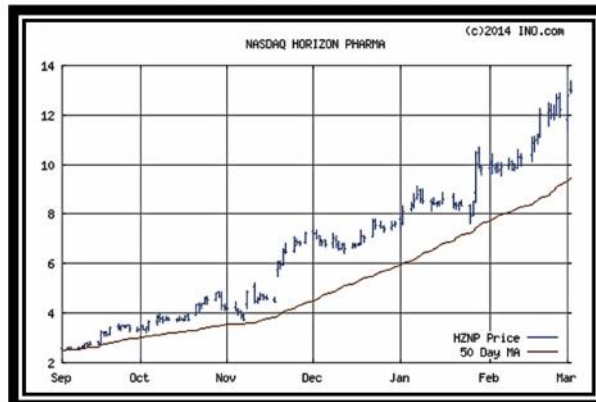

This is what we mentioned yesterday: On Monday stock market traded negative on war situations news Ukraine and Russia. Many are thinking that USA might get involve and that force many to sell stocks. Retro Mars impacted markets trend negatively but before we make any final predictions I would like to see another two days trading pattern. **We strongly still recommend not to buy metals and don't short stocks in USA, Asia as major upward move can take place.**

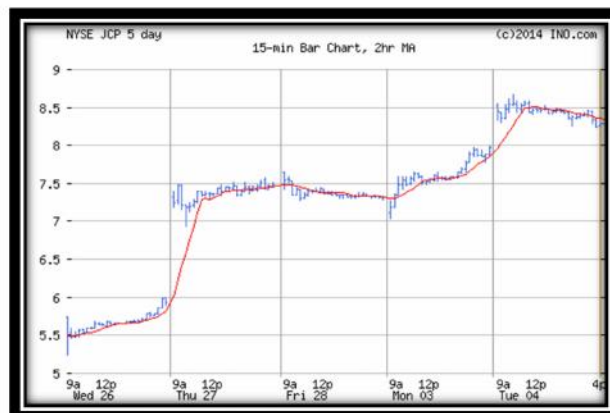

Watch another 24 hours because mars will start giving true results from late Tuesday. Also in our Astro cycle we don't see any major war between Ukraine and Russia so don't get yourself into all these fake news of war taking place between these two countries. **Also don't buy any predictions or don't listen to anyone who is saying Markets crashing and metals going to zoom.**

**I trust my astro indicators and at this stage stock market can go very wild on higher side if its close positive on Tuesday Wednesday, I believe markets will close positive.** On Monday S&P held value at 1834 as predicted, so watch this level close as we don't see S&P going below this level (so far all major our Astro support and resistance levels proven 100% accurate so watch our predicted points closely).

This is what we mentioned yesterday: *From In last 48 hours major changes took in planetary movements, Mars turned retrograde and Mercury from retro to normal cycle. Mars role to be watched closely because it is retrograding with Saturn and North Node so huge volatility will be seen in market for the next 48 hours. Retro Mars will have disagreement with Saturn and North-node for 48 hours but eventually it will start walking with both these planet. Most of you are aware that Saturn and North Node combinations in house of Venus (represent excitement) created bullish market trend in the last two years. Nature of MARS is argument, fight, anger and war, so some uncertain situations may get created in Ukraine for few days before dust get settle.*

*Markets may get volatile not because of Ukraine but because of Mars so don't miss opportunity of buying on any sell off of weaker trend in market because **Retro Mars always bring volatility whenever it turn retro but then it always created bigger bullish trend.***

*Down side S&P may hold 1844 to 1834 as mentioned last week: Last week we stated: S&P cross 1854 Astro resistance level first time but fail to close higher, we are not worried much because S&P is ready to trade higher from Thursday so acquire positions in it on any weakness. We see strong Astro support for S&P around 1838, 1834. .We strongly recommend trading in and out in S&P for the next two trading days.*

This is what we mentioned yesterday in our stock reports, we are not changing any veiw on Market and our recommended stocks so hold these stocks.

*I am traveling since last three days and another next two days I will be traveling so may be next two days I won't be able to send flashnews on time. On Monday stock market traded negative on war situations news Ukraine and Russia. Many are thinking that USA might get involve and that force many to sell stocks.*

***Retro Mars impacted markets trend negatively but we strongly still recommend not to buy metals and don't short stocks in USA, Asia as major upward move can take place.***

*Watch another 24 hours because mars will start giving true results from late Tuesday. Also in our Astro cycle we don't see any major war between Ukraine and Russia so don't get yourself into all these fake news of war taking place between these two countries. **Also don't buy any predictions or don't listen to anyone who is saying Markets crashing and metals going to zoom.***

*I trust my astro indicators and at this stage stock market can go very wild on higher side if its close positive on Tuesday Wednesday, I believe markets will close positive. On Monday S&P held value at 1834 as predicted, so watch this level close as we don't see S&P going below this level (so far all major our Astro support and resistance levels proven 100% accurate so watch our predicted points closely).*

***Our most favorite stocks FCEL, HZNP, RGEN, BLDP, PLUG, JCP and ISRG went up on most uncertain day. Hold positions in these stocks and add FNMA, FMCC, AAPL, ISRG, AMAZON and ACHC.***

***This is what we mentioned yesterday and so far proven very accurately as S&P held value of 1834 and this is most exciting news for investors. Hold positions in stocks and Indexes as US markets can blow upside. If Mars support this markets which I think it will then from Tuesday onward US and Indian market won't look back. S&P can easily move toward 1919 to 1932.***

***Housing stocks are our favorite, so hold positions in housing stocks and housing ETF (DRN – bull market), and one can hold shorts in bear etf (DRV).***

This is what we mentioned Monday: Mars is turn Retro on 28 February and this change may bring 48 hour some uncertainty but then after that things will move the way Saturn and North node want. Retro Mars will have disagreement with Saturn and North-node for 48 hours but eventually it will start walking with both these planet. Most of you are aware that Saturn and North Node combinations in house of Venus (represent excitement) created bullish market trend in the last two years. Nature of MARS is argument, fight, anger and war, so some uncertain situations may get created in Ukraine for few days before dust get settle.

On Monday keep adding **FCEL, FMCC, FNMA, BLDP, URZ, URG** and **DNN**. These seven stocks will do very well during this week. Book profit in FMCC and FNMA if they reaches to \$7.25. We are sure last week you must have made profit in all these stocks and we strongly recommend holding these stocks. Housing and banking stocks are in our buying list so buy on any weakness on Monday and Tuesday as these stocks won't fall.

This what we mentioned last week Friday: ***Anyway still 1854 looks solid wall for S&P but surely this wall will be demolish soon in the next few days. On downside 1833 has string Astro support so buy on any weakness below 1839. Emerging markets traded positive as predicted and we strongly recommend holding positions in these markets.***

***JC Penny, Sprint, FCEL, FMCC, and FNMA buying recommendations done very well in the last three trading sessions and we still recommend holding positions in all these stocks and another 30% move can come very easily. Our target of FCEL is \$5.00 in the next six months.***

This is what we mentioned on last Tuesday: ***Now time to take longer term positions JCP, S, FCEL, ISRG, and RAD. Here are our favorite housing stocks: KBH, TOL, PHM, ARL, TREE, MHO, VTR, MTG, FNMA and FMCC. Buy these stocks for the medium and longer term.***

This is what we recommended on last Monday and holding same recommendations: *Here are three new buying recommendations (INDY \$22.70) Indian etf, (FXP \$68.00) Buy Chinese ultra-short and buy Brazil ultra-short (URB 37.00). These are short, medium and longer term trades. I would like to watch the time cycle from the 28<sup>th</sup> of February to the 3<sup>rd</sup> of March 2014, because Mars will be retrograding and may bring some volatility.*

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
