9 April 2015

Thursday's Flash news (unedited copy)

Dear Members,

On Wednesday markets traded positive. Chinese stocks were roaring which are listed on USA exchange and **YINN** Chinese etf which we recommended at \$26 last year now it closes yesterday at \$56.20. Wednesday it closed 19% higher.

Chinese stocks like **China Mobile, China Life Ins, YY, YOKU, HOLI, WB. CHA, EJ, CJJD, BIDU and JD** went sharply higher over 10% today.

BRZU also moved 50% higher in the last two weeks, we recommend holding positions and adding more **INDL**.

On Wednesday most of commodities traded negative. Currencies traded mix and Thirty year moved both sides. Energy prices lost big value after inventory showing access supply. Precious and base metals lost value but metal stocks traded stable.

Thursday we recommend buying energies and energy stocks.

Stocks are showing great sign, biotech and tech stocks are on fire. Hold positions and we are not recommending any sell or shorts in markets.

Tuesday market started acting uncertain as soon Moon entered in Scorpio house. In our weekly newsletter we recommended short term traders should book profit on higher side on Tuesday in stocks.

This is what we mentioned Monday: **BRZU, YINN, and INDL** are our favorite etfs as recommended last week, we recommend adding more positions in both these etfs.

Sugar prices moved sharply higher more than 6% during last week, we still recommend holding positions in sugar add more cotton and coffee.

Venus will be changing house on Monday which may help biotech and Pharma stocks. Venus will also support cotton and coffee.

This is what we mentioned on the 22nd of January and are holding the same predictions: *Stocks are trading mixed as some stocks are rising sharply and many are falling. We strongly recommend holding positions in the market as well as our recommended stocks until S&P holds 1982. S&P shouldn't close down below 1982 for more than two days. USA market is volatile but at the same time it has been consolidating around 2000. Tech stocks are performing very well. Precious metals and energy bounced back from lower levels on Monday. Oil held \$44.55 level very well. Grains and soft commodities struggled as predicted.*

So far S&P is holding 1982, oil \$44.55 (these are buying levels) and gold has not been able to hold above \$1307, also watch 152 (these are selling level) level for Thirty year.

Here are the trading ranges and strategies for Thursday:

METALS

On Wednesday gold, silver and other base metals lost value after Fed minutes. Metals are struggling but gold will remain in sideways trend or will trade both sides until it holds \$1181. Silver will follow gold.

Base metals will trade mix to negative.

Thursday metals will both sides, metal stocks may gain some value.

This is what we mentioned yesterday: *Monday precious metals went sharply higher after weak job report of Friday. In this week letter we mentioned that metals may trade bit positive but gold will struggle to move above \$1222.*

Tuesday metals will trade both sides, once again this week great selling opportunity is coming in metals so don't miss it. Avoid any aggressive trading until Thursday.

This is what we mentioned on last week 6 March: *Higher will remain limited in metals. Metals stocks will struggle, DUST and GLL performed very well as predicted. Gold has three major astro support point, \$1193, 1182 and \$1143, watch these levels closely. On higher side astro resistance \$1212 and 1221. Worst case scenario \$1247.*

This is what we mentioned 3 March: *Gold is struggling to close above \$1220, silver \$16.98 and copper \$\$270. These are great selling levels so take an opportunity of selling on Monday around the higher sides. We see gold will hold \$1182 but if this level is taken out then gold prices can have a free fall. On the higher side gold will struggle to move above \$1220 so this will be a great level to sell.*

This is what we mentioned on the 1st of September: *Gold breached \$1283 level which clearly indicating that is moving toward \$1248 to \$1153 and silver \$17.57 to 14.87 level soon. Metal stocks will also suffer setback.*

Here is Thursday's range: **(May 2015 contract):**

GOLD: \$1209.80 to \$1195.00 June

SILVER: \$16.61 TO 16.30

COPPER: \$275.90 TO \$270.00

PALLADIUM: \$765.00 TO \$746.00

PLATINUM: \$1175.00 TO \$1157.00

INDEXES

On Wednesday markets traded positive which is positive sign. Thursday most of global markets will trade both sides. We strongly recommend holding positions in markets, hold positions in biotech and tech.

Huge move will start in market after S&P closes above 2088. At this stage S&P is holding 2062 which is great sign and emerging market start moving higher which is also emerging sign for traders.

Thursday Scorpio moon may bring both sides move in market.

This is what we mentioned Monday: *Last week markets rebounded from lower levels. Emerging market gained value and among emerging market Shanghai is outperforming. We strongly recommend keep adding positions in INDL and BRZU, also Russian market will start trading stable.*

Emerging market currencies trading positive which clearly indicating that these local market ready to move higher. Also rate cutting and weaker energy cost surely support economy like China and India. In the last six months back YINN "Chinese etf" moved over 70%.

Last week S&P remained above 2042 which is great sign for market and any weakness should be taken as buying opportunity.

Overall astro cycle is mix so markets may move mix directions for the next ten day but medium and longer term bullish trend is intact.

Monday all major markets will trade both sides.

INDL, BRZU will be great buy on weakness. USA looks great buy once again on any weakness and tech stocks ready to roar. Banking and retailers are ready to take this market toward historic high.

This is what we mentioned on the 12th of December: ***S&P broke the most important level of 2014 after breaking \$2033 and now 1988 and 1980 will be great buying opportunities as our astro indicators are not showing any weakness below 1980 so one can start buying on any weakness in stocks and indexes on Monday.***

Here are Thursdays' ranges: **(June contracts)**

HONG KONG (cash) – 26299 to 25990

NIKKEI – 20090 TO 19808

NIFTY S&P (Spot) – 8760 to 8690

CAC – 5095 TO 5025

DAX – 12175 TO 12050

DEX EURO STOXX – 3709 – 3660

FTSE – 6957 TO 6850

FTSE/JSE (Cash) – 46929 to 46425

S&P e-mini – 2087.00 TO 2057.00

NASDAQ 100 e-mini – 4395.50 TO 4368.25

RUSSELL e-mini – 1268.50 TO 1253.00

DOW e-mini – 17952 TO 17770

TREASURY BOND

On Wednesday Thirty year bond lost value in early hours but gain after FED minutes. Thursday one can add more selling positions on higher sides. Buy June put options of 160 at 0-48 which should be great trade. Buy TMV \$26.00.

Build more 2017 call options in TMV and TBT as great amount of money can be made.

This is what we mentioned on 2 March: *March contract came down to 144 from 152 and June from 171 to 159 in the last ten trading days. TMV and TBT performed well in the last ten days.*

This is what we mentioned on the 2nd of Feb: *Thirty year bond will just collapse without any news so watch closely. As mentioned last week that it is always a very difficult time for traders when any market is at a historic top or at a low. On Monday Thirty year may open higher but surely it will start moving down after the USA market opens. Sell around 172 (June contract) or the below mentioned higher side ranges.*

Buy call options of Jan 2016 and Jan 2017 in TBT, TMV.

Thursday trading range (June 2015 contract):

TREASURY BOND – 165-19 TO 164.05 (June contract)

SOFT COMMODITIES

Most of softs traded mix but coffee lost value. Monday we recommended booking profit in coffee and we are still recommend buying coffee around \$133 to \$130 level which shall provide you good profit in coming days.

Cotton and sugar moved bit higher, hold positions in both these softs. Avoid rest of softs.

This is what we mentioned Monday: *On Monday we still recommend buying cotton. Those who bought positions in sugar and coffee should hold positions. If you missed coffee and sugar around lower levels must buy on any weakness.*

Lumber and orange juice will also bottom out, don't short these both softs. Cocoa will trade mix to negative.

This is what we mentioned last week Tuesday: *Don't go aggressive on softs. Coffee will be good buy on Friday. \$128 level is good buy but breaking \$142 and \$137 put coffee under bearish trend. Astro cycle is turning positive from 15 March for softs and grains so until then trading in and out will remain right strategy.*

Lumber, orange juice and cocoa will keep trading unstable to weaker. Lumber should be in your buying list for the longer term.

Coffee and sugar will move aggressively higher in the coming time. Cotton will trade mixed to negative on Tuesday.

Thursday trading range: (May 2015 Contract)

COFFEE: \$139.00 TO \$134.05

COTTON: \$67.38 TO \$66.28

SUGAR: \$13.17 TO \$12.80

COCOA: 2820 TO 2782

GRAINS

On Wednesday grains traded positive, we strongly recommend buying some positions in grains on Thursday, buy soy oil, soy meal and soy bean but take small positions as still medium term trend is negative.

Corn and wheat will trade both sides, buy at lower sides.

This is what we mentioned four months back: *Don't buy any position at this stage but wait for the next week's newsletter for the right advice. Selling recommendations in soy around \$1550,*

wheat at \$730 have done very well and we targeted Soy to fall below \$1000 and wheat \$550. Both these lower side targets are closer to being fulfilled. Selling grains remained the best advice in 2014, yes gold and silver selling has also done well.

This is what we mentioned two months back: *Avoid Soy products. We don't see soy going below \$930, wheat \$477 and corn \$330 so go aggressive if prices come to these levels.*

Thursday's trading range (May 2015 contracts):

CORN: \$385.00 TO \$375.00

WHEAT: \$537.00 TO \$518.00

SOY: \$982.00 TO \$966.00

SOY MEAL: \$321.30 TO \$316.00

SOY OIL: \$31.30 TO \$30.70

ENERGY

On Wednesday oil prices lost big value, Scorpio Moon impacting more on commodities than stocks. Tomorrow same Scorpio moon can support commodities like oil so we strongly recommend buying oil, RB Gas and heating oil.

Natural gas will trade positive and energy stocks shall rebound on Thursday so watch XOM and CVX.

We recommend booking profit on higher sides or around 55.88. Don't short oil at this stage, watch our range mentioned below for trading strategy.

This is what we mentioned on last week Wednesday: *On Tuesday energy prices traded mix or both sides. We are sure one must have bought some positions on lower sides, if not than buy it on Wednesday around lower sides as we see strong rebound in energy prices from late Wednesday or From Thursday.*

On Wednesday we recommend buying oil and other energy products on lower sides as we see oil moving higher so don't miss buying opportunity as oil prices may rise sharply on Thursday and Friday.

RB Gas and Natural gas will trade negative but heating oil will still show some positive sign.

On higher side we believe that oil won't able to cross \$54.75 to \$55.78 and lower side it may hold \$47.00 at this stage so buy oil around \$47.00 levels. Positive days for energy on Monday and Tuesday, if energy trades negative on both these days can be bad news and oil can touch once again \$44.55 so watch and trade accordingly.

This is what we mentioned on 5 March: *Monday was positive day for energy but energy stocks acted negatively, we recommend staying away from oil now. Book profit on Tuesday in oil*

those who bought positions around lower levels. Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors.

On Down side oil will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.

Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for oil is \$47.00. ERX won't be able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.

This is what we mentioned on the 3rd of January: ***On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating oil and natural gas lost value as well on Monday. Don't buy RB Gas and heating oil but surely natural gas can be bought around \$2.71.***

This is what we mentioned on the 23rd of December: ***Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.***

This is what we mentioned on the 11th of December: *Wednesday our fear proven very true, we strongly recommend to stay away from oil. When oil broke \$92.88 we recommended sell oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.*

This is what we mentioned last Monday (5th of December): ***Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, oil, RB gas and heating oil. Natural gain gained value from the lower levels on Friday as predicted.***

On Monday the higher side will remain limited, and if oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like oil is getting ready to break \$60.00 so stay short or add selling on any fall.

Thursday's trading range **(May 2015 contracts):**

OIL: \$52.09 to \$49.60

NATURAL GAS: \$2.68 to \$2.57

HEATING OIL: \$1.7425 TO 1.6800

RB GAS: \$1.7890 TO \$1.7200

CURRENCIES

On Wednesday currencies traded mix, euro and pound lost value. Australian dollar and sideline currencies gained some value. Emerging market currencies are showing great sign.

Thursday we see mix trend in currencies so trading in and out shall be your strategy. Hold buying positions in emerging market.

Selling recommended in leading currencies on any sharp rise but dollar Index will have tough time to close above 100 mark.

This is what we mentioned Monday: *Emerging market currencies performed very well as expected. Keep adding positions in Rupee, Real, Rand, Peso and Rubble. On other hand frontline leading currencies like Canadian dollar, Australian dollar, Pound, Yen and Euro will trade both sides.*

Higher side one can sell euro and other currencies. Once can start buying USD around 95.00 level.

Current time cycle is not giving any clear indications for either side move so better to remain short term trader because many of you must have taken complete advantage trading USD and selling all these currencies in the last eight months.

This is what we mentioned on 25 March: *Very rarely can one see this kind of volatility in the currency market. Euro and most of the other currencies went higher sharply and they moved crazily after 4:00pm New York time. Since last week we have been mentioning that Euro won't fall below 1.0388 and we recommended people to book all the profit in currencies for those who had been short for the last 8 months.*

Fall in Euro remain best short term call, after our recommendations it went down more 3500 pips.

Remember this what we mentioned on 5 March: *Currency war has nothing to do with USD Friday USD gained value as predicted. Medium and longer term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.*

Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.

This is what we mentioned last Monday: *Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just finished one interview from Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell.*

Now Swiss Franc will trade differently and it will be purely move with its own power or weakness. After breaking its pact with Euro, Franc will trade differently. We will question the decision timing because we see a positive trend starting for the European markets so euro

may stabilized and Swiss Franc will remain around here or may lose value in the medium and longer term. Read our weekly newsletter closely.

This is we mentioned on the 2nd of October: *On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.*

Remember, this is what we mentioned in the month of July: *At this stage USD is trading in a positive direction without any break since the last three weeks. Finally it is reaching a most crucial level because once it breaks 81.78 then the nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.*

This is what we mentioned in the month of May 2014: Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.

Thursday's trading range: **(June 2015 future contract)**

DOLLAR INDEX – 98.69 to 97.53

AUSTRALIAN DOLLAR – 0.7727 to 0.7619

CANADIAN DOLLAR – 0.8001 to 0.7950

BRITISH POUND – 1.4919 to 1.4791

EURO – 1.0870 to 1.0721

JAPANESE YEN – 0.8365 to 0.8289

SWISS FRANC – 1.0450 to 1.0345

RUPPEE – 62.28 to 62.00 (Spot)

RAND – 11.84 to 11.70 (Spot)

Thanks & God Bless, Mahendra Sharma,

This is a must have e-book for every institution, broker, trader and investor!
Make wave of nature/astronomical cycle an integral part of your trading/Investment strategies!

2015 Financial Predictions www.mahendraprophecy.com

Below are a few important notes from the last two months Flashnews:

This is what we mentioned on the 14th of December: ***We are not changing our outlook on market because still all astro indications are positive, so I would like to wait for more 48 hours before we give clear indications. We still believe that S&P won't close below 1982 for three days in row, and if it does then surely that will be most negative news but happening of this is 1% chances.***

Members must remember that S&P is just a few percentage points away from an all-time high. Mentioned on the 30th of October: ***S&P is back to a few percent away from an all-time high and everyone is wondering whether it will break this new high and move towards 2130. We are aware that most of our members are still trusting and hoping that our target may get achieved by the end of this year. The market tuned around the previous week on Tuesday from 1813 and it has been moving higher non-stop. Short sellers are having nightmares because the market unexpectedly went higher against all odds.***

Commodities are struggling at this stage, except for grains which just bounced back from lows as expected. Energy. Metals and softs are hanging around at the same levels. Commodity stocks are also suffering and we are not expecting any great news at this stage for commodities because our astro indicators are not indicating any supportive sign.

This is what we mentioned on the 26th of October: ***Wednesday short term traders should book profit but one should buy back on lower side as if S&P holds 1918 level. On Monday we mentioned that S&P would rock if it trade two days above 1918 which may take S&P toward 2000 level.***

Late Wednesday evening we see some profit booking coming back.

This is what we mentioned on the 12th of October: ***Those who like to trade for longer period can buy market aggressively from 16 October. We still believe that S&P may close around 2130 by end of this year which means that strong rally can take place in market.***

This is what we mentioned on the 20th of August: ***Soft and grains remained mix, but metals and energy lost value. Era of 1995 to 2000 is back now*** because equity and USD is showing positivity and commodities are struggling.

Hold positions in stocks, avoid commodities, sell bond and one can start buying USD on weakness. Indexes should be in your buying list. Watch our predicted ranges closely, once again 1988 will be crucial level for S&P, 1282 for gold and USD 81.00.

From our book: From here to 15 August markets will trade mix, but surely many stocks will move higher. We will be releasing more five stocks in retirement account in today's stock report. In this year book "2014 financial predictions" we predicted "final bear cycle in market from 27 July to 15 August 2014", yes Sun can bring some uncertainty but take this uncertainty as buying opportunity.

This is what we mentioned on the 18th of May (two days before the market started rebounding, as we predicted a huge rally starting from the 21st of May in all major indexes): In short, time is running out for most analysts who have been predicting a fall or crash. Investors will miss the opportunity of buying; in fact, they will go in the red if they short stocks and indexes, so we warn these analysts to advise investors carefully. We see a huge move coming from the 21st of May and S&P will achieve 1955 from the current levels of 1870.

In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

Make wave of nature/astronomical cycle an integral part of your trading/Investment strategies!

www.mahendraprophecy.com

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
