## 2016 Financial Predictions

Dear Members

I am not supposed to put these confidential predictions from the “**2016 Financial Predictions**” book before it is out on **Monday, 18 January 2016**. However, today we decided to put out the first cycle predictions for Indexes, Metals and Energy because we received tons of emails and everyone is asking us about the markets and oil situation and it looks like everyone is scared because of the recent fall. It is my duty to write about what we see from here so we decided to share with you the first predicting cycles from few sections in our book.

This Book was finished in the third week of November. Editor took three weeks to edit it and the printers two and half weeks to print the book. We are pleased to say that we have received the book from the Printer as mentioned day before yesterday. I read the book carefully for one more time after the market fell sharply today because I wanted to make sure whatever I predicted in the book is matching with what is currently happening in commodities, currencies, and stock markets.

**One regret:** I wish that I could have released this book in the last week of December and it could have helped readers, but I made the decision long back to release this book after Sun moves out from Sagittarius, which is on 15 January 2016. Anyways, 354 days are pending in the 2016 calendar year so let’s look forward and release this book in good spirit rather than regretting.

Here below are the predictions cycle taken from **2016 Financial Predictions** book.

**Here are the monthly cycles of 2016 for the USA Equity Market:**

**First Cycle:**

From the **1st of January to the 11th of January 2016** - The market will trade in an uncertain trading pattern due to the Scorpio Moon and New Moon. The moon will rise on the 10<sup>th</sup> of January, so we recommend investors to watch this cycle very carefully. Many traders who booked losses or closed trades during the end of the year might start reinstating positions, but we are not recommending any aggressive buying during this period. You can plan what you want to buy and what positions you want to accumulate for the medium and longer term during this cycle. This cycle may bring some uncertainty in the market because we are all aware what the Scorpio moon is capable of.

### Second Cycle:

From the **11th of January to 21st of January 2016** - During this time cycle, the market will remain directionless but buying will keep coming on the lower side, and if I am right in my reading of the astro cycle then the market may form a great solid bottom. Any sharp correction during this period should be taken as a buying opportunity. The overall sentiments in all the major markets will remain mixed to a bit negative. We do strongly recommend taking aggressive positions during the last 63 hours of this cycle, or before the 20th of January, because on the 20th of January Mercury will rise in the east which is a positive astro move for the market.

### 2016 Short Term Astro Cycles for Gold/Silver:

#### First Cycle:

From the **1st of January to 14th of January 2016** - During this short cycle metals may try to rebound from the lows that they made in 2015. As compared to metals futures, we see metals stocks performing very well during these 14 days; so short term traders can take advantage of this short term bull cycle by buying Metals stocks of ETF's, and we are sure that you will make a nice profit.

### 2016 Short Term Astro Cycles for Energy:

#### First Cycle:

From the **1st of January to 14th of January 2016** - We do not see any major positive price movement in oil and other energy products. Trading in and out will remain the best strategy during this period as we already mentioned last year oil will hold \$34.55. If oil trades below

\$34.55 for three days, then we may see 31.78 to 29.88 levels but chances of happening this is limited. Avoid any buying in Heating Oil and RB Gas, but make sure that you are not trading with aggressive or leveraged positions in energy products during this cycle. Stay away from Energy stocks and energy etf's.

\*\*\*\*\*

Here is the table of contents with each of the chapters we have covered in our new book "2016 Financial Predictions" so look at the contents below and make the decision of whether you want to buy this book or not. This Book, which covers the pending 353 days of 2016, will be priced at \$199.00, which comes out to less than \$1.00 a day for predictions that give you a glimpse of the future and assist you in making investment and trading decisions in the year 2016.

Book has detail predictions covering most of countries stock market and currencies, as well commodities. It also has detail rising and falling cycles with ranges of 2016 on each and every market, commodity and currencies. I am sure you will find great value in it which may help you making important investment and trading decisions.

This is what same we mentioned in this week’s weekly newsletter about why we haven’t launched book earlier.

In the mid December I decided to launch the “2016 Financial Predictions” book on the 3 of January but then realized that in the first week of January a Scorpio Moon and New Moon will be ruling the earth so I postponed the books release until the Sun moves out of Sagittarius, which will happen on 15 January “Makar Sankranti”. In Vedic Astrology Makar Sankranti is the most important day and in India, most important work is put on hold from the 15<sup>th</sup> of December to the 15<sup>th</sup> of January (Sun transiting through Sagittarius “Dhanark”). Our new book release date is the 18<sup>th</sup> of January 2016. You will receive a launch update at 10.27 PM Santa Barbara time so wait for the release alert.

We wish that we could have released the book on 3 January, because in the stocks market section of our book we clearly mentioned that there would be a sharp correction in the first week January, and that Metals prices would rise. Both these predictions were in the right direction, so we are happy to see that the books predictions are going in right direction so far, and we believe that the buyer will get the full value out of it.

I feel that this book will become the most valuable tools for you this year. We are releasing it at the most crucial stage when everyone is looking for a clear answer as to what exactly will happen in the markets in 2016. We don't want to give away any more about the book, but we are sure that you will enjoy reading it and would love to know our reader's thoughts about the book.

As many requested a physical copy when the 2015 book was released, we have decided that we will release the 2016 book in E-book as well as people can order physical copy of book.

*9 December 2016, from our weekly newsletter of 11-15 January 2016*
