Tuesday's Flash news (unedited copy)

Tuesday will be testing time as Moon will be with Mars, Buy Dr. Reddy, Brittanie, and Mcload on Tuesday.

Dear Members,

On Monday most of markets traded negative, metals gained value with energy. Dollar also traded positive and rest of commodities traded mix. On Tuesday market will be great buy around lower level so don't miss buying opportunity. Once again S&P close below 1938 level and S&P should bounce back above this level because I don't like to see S&P closing below 1938 level for more than three days and at this stage we don't see it happening. Gold once again try to retest 1250 level but this time it will fail and if it fail then none-stop down downward journey may start.

Oil will show positive sign and watch \$135.18 levels. Thirty-year bond will trade mix.

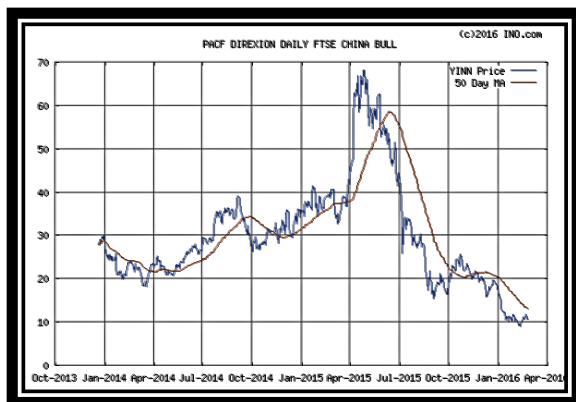

Last week India, Brazil and China etf's have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies

because any turn around in **Brazilian Real can push BRZU toward \$39.00 from 9.30**.

At this stage emerging market will blow upside in coming so take some aggressive positions in **INDL, BRZU and YINN**. Emerging market currencies have performed well as predicted on Monday when frontline currencies were falling.

This is what we mentioned yesterday: *Last week the USA and European markets performed very well as predicted. We are pleased with last week's performance because on Tuesday S&P made a low of 1888 and made a high of 1968 on Friday so it was an 80 point move in S&P. Finally, S&P settle down at 1941 level, above 1938 level which is a great sign.*

1888 and made a high of 1968 on Friday so it was an 80 point move in S&P. Finally, S&P settle down at 1941 level, above 1938 level which is a great sign.

Precious Metals lost their shine. Silver traded horribly and gold failed to close above \$1250 which closed the door for gold to make a move any further from here. Palladium and Platinum also traded negatively but material stocks traded positively.

Energy prices moved higher. On the other hand, grains and softs struggled. Thirty Year bond struggled but dollar moved higher.

This week on Monday the USA market will open under the influence of the Scorpio Moon but this Scorpio moon could play the most powerful role for the markets because the Scorpio Moon will be joining Scorpio Mars and both these planetary combinations can influence investors behaviour pattern so strong that big buying could be witnessed globally. The game spoiler Saturn will also in Scorpio and it may try to play a negative role with some negative news but the positive news and investors behaviour pattern will be so strong that no negative news will be able to damage the markets trend. We believe that Mars and the Moon can bring some very positive news for the market either from China or the USA. Emerging markets like China, India and Brazil can move up aggressively. Read our weekly newsletter carefully because we will achieve a new high in the market and new lows in precious metals in the coming time so trade carefully. Don't drag yourself in emotions and extreme comments.

We are approaching towards the 3rd of March for the first positive astro cycle of 2016 after three negative cycles and it could be a very solid cycle for the market. It was difficult to keep faith when everything was falling apart from January to the 12th of February but as usual we trusted the astro cycle and predicted that S&P won't fall below 1812, oil below \$27.71 and that gold won't close above \$1250. We also predicted that the market could rebound strongly from the 15th of February.

Today is Oscar, there is no doubt that Leonardo DiCaprio has performed amazing well in the movie 'The Revenant', and he is my most favorite actor. On other hand USA market is our most favorite from here onward.

This is what we stated on 19 Feb: On Tuesday weakness in metal will continue, markets will keep moving higher so no need to book profit and weakness in Dollar will start from here levels so trade accordingly. Once again S&P started trading above 1864 level which is great sign, on other hand oil held \$27.71 and gold failed to close above \$1250 which clearly indicates that astro cycles are working well. I had very good time, and I am back with all positive news, Sun have changed house on Monday which is great astro indications and which is very positive for markets so stay long. This is what I mentioned on last week Friday: My problem is that I trust 100% astro cycles, they are not showing

market fall in medium and longer term, still bullish astro indicators are intact so how can I advise you to sell everything and get out when I see S&P going to historic high. Yes, S&P broke 1864, which is negative news but current time is volatile time, it is not bear market and same we mentioned in our book.

On other hand gold moved sharply higher and it achieved higher side mentioned in our book "**2016 Financial Predictions**" of 2016 high of \$1250. We don't see it remaining above \$1250 but rise in metals was so sharp that many traders must have been gotten out from market. In 2016 metal stocks looks good buy but not at this stage, this time to book profit and get out 100%.

Astro indicators are indicating 91 day's rally starting in all major markets from 3 March 2016 but wait for confirmations in next week Tuesday. Stay long, long positions in market as it is with selling and we will put 100% clear note on Tuesday.

Here below trading strategy and ranges for Tuesday:

GOLD/SILVER/BASE METALS

On Monday gold, silver, platinum and Palladium prices traded positive on Monday which indicates that one more time gold may test \$1250 level if it moves higher and the same for silver, platinum and palladium. Don't buy silver, platinum and palladium stocks away from metal stocks from Tuesday. Metal stocks can move higher in to buying this stocks now, we recommend booking 100% profit in next few days.

Buy some DUST, or buy some put option or short in JNUG and UGT and NUGT. Gold won't able to close above \$1250

Copper will m
sell or buy p
Scorpio Moon

Emerging market terms.

Must remember

Must remember - No leverage positions until 3 March, but major fall will start in gold and silver.

This is what we mentioned on 18 February: *Silver prices can fall sharply so stay away. Copper will stay sideline and metal stocks will start moving down from Friday so great time to buy DUST on Monday as it move again 150% value from here in the next three weeks so prices will move toward \$12.75 from \$4.65 so great time to make money.*

Gold will struggle to close \$1242 and \$1250 level so these are great level to take small sell positions. I just bought put options in silver of \$15.50 and gold \$1230 for March expiry as well as May expiry. I invested 20% in March 2016, and 80% in May 2016 put options so if I wanted to buy put options for

\$10000, I invested \$2000 in March put options which will be expiring in the next week and \$8000 put options which will expire in third week of April.

Be aware in gold trade because in the Month of March it can fall more than \$100 to \$150, in current time is volatile but not bullish trend from here so watch closely. Silver can fall 15% in the month of March. Gold will not able to close above \$1250 for three trading days.

This is what we mentioned Monday, 8 February 2016: *In 2016, maximum higher side for gold will be \$1250 and lower side \$988 to \$880, and silver \$975 level on lower sides and maximum higher side \$16.35. After five years, gold's time cycle is changing against most of the emerging market currencies so it will start losing value against Rupee, Real, Peso, Rand, Rubble and many other currencies. Gold may lose 20 to 30% value against these currencies. If you are invested in gold in these currency terms, you should get out. This phenomenon will happen for the first time in many investors lives so traders in these countries have to be very careful. Sell gold and buy these emerging market currencies.*

Here is Tuesday's range: (March 2016 contract):

GOLD: \$1247.90 TO \$1227.9 Time to sell

SILVER: \$15.12 TO \$14.75 Time to sell

COPPER: \$214.78 TO \$210.00 Positive trend

PALLADIUM: \$501.00 TO \$491.00 Time to sell

PLATINUM: \$944.90 TO \$925.00 Time to sell

SOFT COMMODITIES

On Monday softs traded negative but on Tuesday story will start turning around for cotton, cocoa and coffee so one can start buying positions in cotton, coffee and cocoa from lower ranges here mentioned below.

Orange Juice and lumber will trade negative or will fall sharply lower. Sugar will trade both sides.

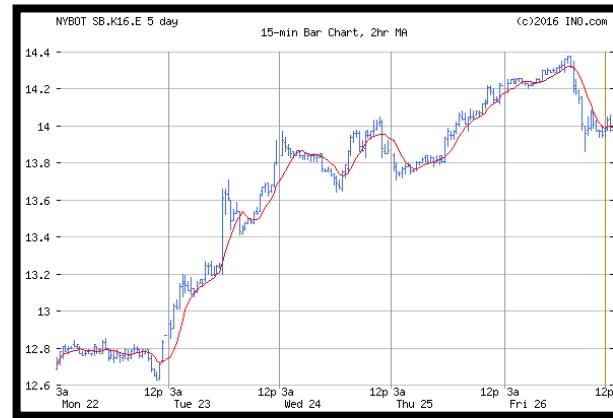

This is what we mentioned yesterday: *Friday softs traded negatively. On Monday we see an uncertain trend continuing in softs but you have to remember that the down side is limited in softs. There is no need to block big money. Coffee is the only soft we are interested in buying. Avoid sugar, or those who bought around \$12.68 must have booked profit last week and if not then one must book profit. Look at sugar prices move from \$12.68 to \$14.50 during last week. Time to sell.*

At this stage avoid cocoa, orange juice and lumber. Cotton will remain in mixed, and the down side will be very limited. Keep adding coffee, and get out from all positions in sugar. Trade in and out in cotton, sugar, and orange juice.

We don't see coffee remaining below \$111, so start accumulating positions as we may see coffee prices move towards \$128.00 to \$138.80.

On Monday softs will trade mixed, and late in the week coffee and cotton should be in your aggressive buying list.

Remember - Coffee will struggle to close above \$118 and \$128. The maximum down side is \$112 or \$109. One can start accumulating coffee. Cotton will struggle to close above \$64.88 and on the down side one can buy around \$57.50. Sugar selling is recommended at \$15.45 buying around \$12.78 to \$12.50 is recommended.

Tuesday's trading range: (March 2016 Contract)

COFFEE: \$115.28 TO \$111.45 Buy at 111.50

COTTON: \$58.75 TO \$57.11 buy at 57.20

SUGAR: \$14.60 TO \$14.05 Buy some at lower levels around \$12.68

GRAINS

On Monday grains traded bit negative, technical charts and experts are very negative on grains but our view is turning very positive from middle of this week so great time to add more money in grains. We are not changing of what we mentioned yesterday: we recommend taking some aggressive positions in grains. One should start accumulating or adding more aggressive positions in corn and wheat, soy also looks great but corn is our most favorite. On Monday grains will trade mixed (corn, soy oil and wheat). In our weekly newsletter we have recommended to start accumulating aggressive positions in grains from Thursday so don't miss this opportunity. If you don't like to take a risk, then just trade in and out on Monday but don't forget to accumulate on the lower sides.

Positivity will continue in grains. Buy May/Sep 2016 call options in wheat, corn and soy. An interesting trend will develop any time in grains so you must have some positions in grains. 3 March is the turnaround day for grains so plan your trades accordingly. Short term traders can trade in and out.

The lower side in Soy, soy oil, corn and wheat is limited from current levels, not more than 2%; but on the higher side we see 5-7% positive moves. We don't see corn going below \$354, wheat \$455, soy \$845, Soy oil \$29.70 and soy meal \$260.

Tuesday's trading range (March 2016 contracts):

CORN: \$355.50 TO \$350.00

WHEAT: \$447.00 TO \$441.00

SOY: \$863.00 TO \$848.00 BUY

SOY MEAL: \$262.20 TO \$257.00

SOY OIL: \$30.75 TO \$30.44

ENERGY

On Monday oil, heating oil and RB Gas traded positive as predicted, but energy stocks traded negative

This is what we mentioned yesterday: *Oil, heating oil and RB Gas moved sharply higher. Natural gas remained in a negative direction. This week oil will move towards \$35.18 level so on Monday one should buy around the lower side ranges mentioned below. Heating oil may take the energy market higher so this is a great time to buy heating oil. Don't short oil at higher level as trading above \$35.20 for 36 hours will open the door for oil to move towards \$38.00. Don't take too much risk buying oil as at this stage we are focusing on \$35.00 level.*

RB Gas and oil will act positively. Energy stocks will move higher after Monday. One can start buying oil around \$31.08 levels and we are strongly recommending booking profit around \$35.00 later this week. Natural gas will start trading positively from late Tuesday.

This is what we mentioned 2 February: *Many are predicting oil remaining in the teen's, but we do not see oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will struggle to move above \$35.18 levels.*

Natural gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural gas around \$1.72 and below.

Few past important predictions and levels for energy of daily Flashnews are at end of this letter.

Tuesday's trading range (All April 2016 contracts):

OIL: \$34.71 to \$32.89 April

NATURAL GAS: \$1.74 to \$1.65 April

HEATING OIL: \$1.1295 TO 1.0695 April

RB GAS: \$1.3409 TO \$1.2965 April

INDIAN RUPEE

On Monday Rupee finally gained big value. We are recommending to hold positions now because it behaved as we expected. Tuesday Rupee will trade in the tight range but surely it will move below 68.00 level. Turnaround of Rupee have start and it will start medium and longer term bullish pattern. Rupee moved from 69.00 level to 68.20 which was big move on Monday after budget.

This is what we mentioned yesterday: Rupee traded negatively once again and that is negative news. This week is the most important week for Rupee because the astro indicators are now at zero points and it can break the historic trend.

We are still hopeful that Rupee will turn around from here without making further lows after the budget. On Monday Rupee may make new lows during the budget sessions but then in the evening session Rupee will gain great value. If Rupee turns around as expect on Monday, then it will make a huge move with the first target of 65.35 level in the next one month.

Tuesday is a Scorpio moon, and we may see Rupee turning around because this Scorpio moon will play the opposite role for Rupee. I will write a detailed outlook on Tuesday.

In 2008 we were screaming to buy USD against Rupee when it went below 40.00 with the target of 54.00, and in 2013 we recommended buying dollar at 54.80 level with target of 59.90 to 64.80. We are not recommending any new trade in Rupee on Monday. Buying or selling in USD is only recommended once USD starts trading below 68.16 level. If dollar fails to move higher from here onwards, then we will see 62.80 to 59.88 in the next 18 months.

Tuesday trading range: (Spot price)

RUPEE/DOLLAR – 68.3 to 68.95

INDIAN MARKETS

On Monday Indian market traded volatile as expected but settle down very calmly which was important sign. There is no doubt that Indian investors have suffered huge set back from March 2015 as Nifty made high of 9008 on 3, March 2015 and since then it has been constantly falling without any break. My astro cycle study indicated that positive move from 15 February for S&P and we thought that

globally most of equity markets may perform with S&P but that was not the case because emerging market with Indian market kept underperforming in the last two weeks but developed market performed well as predicted because S&P moved already from 1812 to 1964 since last two weeks. Either I am

missing something big or Indian market have adopted completely different in depended pattern cycle or just short term bearish cycle of Nifty is misguiding us. We never saw Nifty going below 7221 level but currently it is trading 300 point below from 7221 level. If Nifty was misguiding investors in the last two weeks, then from here it should move back to 7421 by the end of March. 7221 and 7421 are two most important levels for Nifty and once Nifty close above 7221 which shall be very relief sign and once it close above 7421 then market will have non-stop rally or bull rally can take place.

I am reading everything correctly in my astro cycles then yesterday on Budget day Bank Nifty, Nifty and Indian Rupee have formed the bottomed and here onward rally should start without going one point below from yesterday's level. Stocks should start seeing huge buying pressure from buyers and they should start running aggressively from here onward and by the next week we may see of the best week in Indian equity market history. **If I fail or come wrong in my bullish predictions from here onward, then you should stop following my work** because it means that after great accuracy for decades now something has changed drastically with Indian Nifty astro chart which I am not able to see correctly or clearly but I don't want lose hope at this stage because I have goes through many of touch patches and current negative time cycle of Indian market is nothing, it is providing one of the greatest buying opportunity of all time. On this note, we still recommend buying today Nifty, Bank Nifty and stocks around lower levels and expect huge rally from here onward and later in this week as well as next week.

Dr. Reddy, Brittanie, and Mcload is for Tuesday. As mentioned Nifty won't go or close below 6871 and 13801, on higher side unlimited.

In the worst case scenario which we mentioned on 12 February: **Now most important astro support level for Bank Nifty is 13801, and Nifty 6871, we don't see market going to that level in even worst case scenario so now you know downside risk from here because next week the Sun changing house shall change market sentiments.**

We still believe that Nifty will move towards 12500 and S&P 3200 in 2017. Yesterday we recommended this and still we still are holding the same recommendation, so buy Nifty, Bank Nifty and the stocks that we have been recommending since last week: *Nifty may gain 5% or more on Indian budget but you need to take positions in March and April contract. We are not changing any of our buying recommendations, we are still recommending to buy Jet Airways, SpiceJet, BATA, Dr. Reddy and Cipla. Also you can take small positions in Britannia, Tata Global, Tata Coffee, L&T and McLeod Russel. Bata could be bought aggressively.*

Tuesday's trading range: (Spot price):

NIFTY: 7039 to 6901 (Spot) (recommended strong buy at 6065) Worst side low may be 6871

BANK NIFTY: 14173 to 14803 (recommended buy at 10350) Worst side low may be 13801

AXIS BANK: 378 TO 371 (recommended strong buy at 205)

Jet Airways: 508 to 484

SBI: 163 TO 156 Buy

Dr. Reddy: 3097 TO 3005 Buy

Sun Pharma: 873 to 842

Amara Raja: 870 to 842

BATA: 469 TO 447 Buy

Recommended on 12 Oct 2015

This is what we mentioned on 2 January: *Airline stocks remained very hot, in the Second week of November we recommended buying most of the Airline stocks and so far they performed very well. We are still recommending holding positions in Jet Airways, SpiceJet and Indigo. Also last week one of our favorite stocks of 2015 "GM Brew" did amazingly. In May 2015 it was trading at Rs. 118 and last week*

it closed at Rs. 932. **Britannia, Vadilal, GM Brew, 3M India, Sequent Scientific and Guffic Bio** performed very well in the 2015.

Last week **Reliance and other frontline oil stocks (BPCL, HPCL, IOC, ESSAR OIL)** held value very well, **ACC** moved higher and other stocks like **Mastek, Mphasis Ltd, Tata Elxsi, Mindtek, Moldtech, Khoday India, Heritage** performed well, and we are still recommend holding positions in these stocks during this week.

This is what we recommended on Monday 26 December: **We are strongly recommend buying indexes and keep adding recommended stocks. Reliance have been moving higher and we are still recommending add more Reliance as our target is 1047 for this week. Our buying recommendation in Reliance around Rs. 826.**

Indian market is our most favorite at this stage among most of global markets. We are sure you must have been adding positions in Nifty, bank Nifty and stocks. Moldtech moved higher and keep adding mindtek, Tanla and food stocks will perform far better stocks like, Hind Unilever, Khoday India, Heritage, VST, Britannia, Vadilal, and Kwality. Hold positions in last week recommended stocks like Hind Unilever, Indoco, ITC, and Reliance, HPCL, BPCL, and IOC. Last week Steel stocks performed well, and the SBI also held 224 level which is a great sign; but let's see whether the SBI holds 224 this week or not. If it does, then the SBI will move in one direction and that is UP.

This is what we recommended 25 November: **On Tuesday buy recommended Mastek went 12% higher, Tanla, Guffic Bio and energy stocks also moved higher. We are still recommend holding positions in most recommended energy stocks like IOC, Reliance, HPCL, BPCL, ABAN as well as mastek, Tanla and Guffic.** In the las six months Guffic Bio moved from our recommended price 23.00 to 56.00 and we are still recommending holding positions.

Buy hospital stocks for the longer term like Apollo Hospital, Forties Hospital, PTL, Wockhardt, and Kovai med for longer term.

In our longer term buying list we are still holding our old recommendations since last two years: **Tata Elksi, Lupin, Cadila, Gufic, Kaveri Seeds, Excel Crop, Heritage Food, Britannia, Jubilant Food, Tata Coffee, IPCA, Torrent Pharma, Nacto, Indoco Remm, Suven Bio, United Spirits, Bharat Immu, PNB, BOB, SBI, AXIS, HDFC, ICICI, IFCI, Dishman, Divi, Aurbindo, Vadilal, Sequent Sci, Welspum, Jet Airway and GM Brew.**

This is what we mentioned 27 May 2015: **Today we are adding three hospital stocks in our buying list for first time. These are all three stocks only bought for medium and longer term: Apollo Hospital, Regency Hospital and Kovai med. Cadila, Indoco, Lupin, Aurbindo, DIVI Lab, Sequent, Suven and Ajanta** should be in your buying list on Monday, most of these stocks performed very well during last week. In banking you can add BOB, AXIS, SBI and UNION Bank. Hold investment in recommended food stocks.

This is what we mentioned on the 27th of March 2015: **Hold positions in Pharma stocks Thursday Indian Equity market gained value. Once again Pharma stocks performed extremely well. In the last two years Pharma stocks made many new millionaires in India. We were**

fortunate to find out move in this sector well in advance and we are still being bullish on this sector. One can add more **Indoco Remm, JB Chemical, Natco, Ranbaxy, and Torrent Pharma**. On other hand **Britannia and Vadilal** should be added. Those who are holding positions in **Lupin, Cadila, Torrent, Indoco, Suven, Dr Reddy, SUN Pharma, Stride, Sequent science, Ajanta and Ranbaxy**.

This is what we mentioned on the 20th of January: **Yesterday 3M, United Spirit, SBI, MAX Indian, and AXIS Bank performed well as predicted.**

This is what we mentioned 17th of January: **From our recommend Siyaram, Raymond and MAX Ind traded mix but rest of them went higher. On Tuesday we are still recommending add more same stocks in portfolio. MAX India, Raymond, Cipla, Sun pharma and 3M will keep moving higher. Today we recommending to add Lupin in your portfolio.**

Reliance closed below 881, it has to trade above 881 as recommended yesterday for giving new life to reliance otherwise it will start moving down.

This is what we stated on the 15th of December 2014: **Yesterday our most of recommended stocks moved up nicely, United Spirit, DR. Reddy, Lupin, Max India, Wockhardt did well and will keep outperforming. Keep adding Max India aggressively as 10% move is coming. At this stage one should hold positions in Pharma, banking and recommended stocks. MAX India, IPCA, Pfizer, United Spirit, Wockhardt, and CADILA look like great buys so don't miss the opportunity of buying on Monday around lower side. All these stocks should move higher during this week.**

Good news of Rate cut from RBI is on the way in the next two weeks.

Last Thursday we recommend buying in a few stocks and we are still recommend holding positions in these stocks: Cadila, Indoco Remmi, Sanofi, Torrent Pharma, Pfizer, Glaxosmith, IPCA, and Maruti look like great buys for the short term

This is what we mentioned on the 27th of Nov 2014: **We still recommend holding positions in Vadilal, Britannia, Nestle, JBF IND (performed very well).**

On Monday we see the Indian stock market positivity outperforming most of the other emerging markets. The Indian market has been going through a positive astro cycle for the last one year which is getting a lot of attention from international investors. Our buying call on Nifty at 5750 and Bank Nifty 8700 did amazingly well for investors. We still see that money will keep flowing out from gold and silver as these both will perform very negatively. We are not recommending anyone to buy gold and silver at any level as a lost is still pending on the down side. Don't trade or speculate in metals, energy, and in the commodity market with limited funds as chances are that you will lose everything. If anyone holding gold etfs should get out from positions, and take some buying Banking and Pharma stocks.

We are not changing our recommendations of what we mentioned 21 November: *Three weeks back we recommended buying Honeywell at Rs. 5100, and last week it closed around Rs. 7000; ING Vysya Rs. 610 to Rs. 850. Vadilal Ind went also higher from Rs. 180 to Rs. 223 and we still recommend holding these three stocks as we are expecting huge move on the way.*

Last week Ajanta Pharma, Honeywell and Vadilal remained hot, and we strongly recommended buying Vadilal. Last year we recommended buying it around R.s 124 and we are still recommend buying it at Rs. 270 with the target of 650 in the next 18 months.

This is what we mentioned last Monday (8th of September): *On Monday our favorite stocks like Cipla, Lupin, Cadila, Pfizer, Great Eastern Shipping, SBI, HPCL, BPCL, JBF Ind, Raymond, Zensar tech, Mastek and Testiy Bits. Among all these Mastek, Cipla, Zensar and Testy Bits performed amazing well under pressure. We are sure many of you must have taken positions in these stocks. Here are few recommended stocks charts of last five days.*

This is what recommended on last Thursday: *On Wednesday few small cap Pharma stocks performed very well, stocks like Suven (we recommended around Rs.47 and yesterday it closed at Rs. 158) and Venus Remm (we recommended around Rs.180 and yesterday it closed at Rs. 295) and Bharat Immu (we recommended around Rs.09 and yesterday it closed at Rs.40 performed well. Hold positions in all these three stocks for medium and longer term. Yesterday we recommended Indoco Remm, keep adding position on any weakness.*

Yesterday Cadila, Lupin, Suven and other pharma performed very well, and we still see these stocks moving higher.

This is what we mentioned last 19 August, 2015 Tuesday: *S&P 1905 and NASDAQ 3842/3789 level should be watched closely as we don't see USA market falling much from here. We still hold our prediction of S&P moving towards 2150 by end of this year and NASDAQ 4500. Few other markets will follow but many other international markets will struggle to move higher.*

Medium and longer positions: *Our target for Reliance is 1350 from Rs. 838, which may have huge impact on index.*

This is small part from Indexes sections from second week newsletter of August: *As per astro chart we see both sides move continuing in all major markets for the next two weeks until Sun remains in Cancer with Jupiter. On 15 August Sun will be transiting into Leo, which is its own house and this will be a great time to add money in market on weakens. We have experienced in the last 25 years that whoever invested in between 15 August to 15 September's Sun cycle always made a fortune. Please take advantage of this period to accumulate positions in quality stocks.*

In Indexes trading in and out will remain best strategy. In big name TCS, Reliance, Britannia, LUPIN, Wyeth, SUN Pharma, GlaxoSmith, Hindustan Lever and Dr. Reddy still are our favorite. (Nifty shouldn't close below 7421 other will market may fall more three percent from current level).

This is what I mentioned in June 2014: *Just focus on Pharma and Tata Group at this stage. It looks like that Pharma stocks are ready to create history in Indian market. What Indian software*

companies done from 1997 to 1999, same era can be repeated in Pharma stocks. I was invested in software Indian stocks, in fact I invested in February 1996 \$17200 and that portfolio went more than 1.5 Million dollar. Only reason portfolio went so much higher because I was held my positions. We strongly recommend holding positions in our recommended stocks rather than doing speculations. We always recommend taking minimum risk in day trading and speculations, put 90% money in quality investment and 10% in short term trading in whenever opportunity knocking door.

This is what we mentioned 18 June 2014: **So far Nifty held value of 7425 and levels so now Nifty will have another astro support at 7475 and 7532, watch these levels closely. Astro resistance will be at 7775, so this level should be taken as profit booking.**

This is what we mentioned in the first week of June: **Mercury changing directions will surely bring some uncertainty, so book 80% profit in our recommended stocks, still hold positions in our favorite stocks (Pfizer, Torrent Pharma, Gellette, and CCL Product, add these four stocks in your portfolio. Rest or recommended stocks have been doing great and still you can hold positions in stocks like: Agrotech, Excel Crop, Kaveeri seeds, Tata Global, Tata Coffee, Tasty bits, Mount Eve, KGNENT, Hatsun, Rasoy PR, GM Brew, Radico Kh, Jagatjit Ind, EDL, Tilaknagar Ind, Mount Shiv, Nestle, Vadilal Ind and Britania and Aurbindo.**

Food stocks are doing great so watch our recommended food stocks list mentioned below at end of newsletter. Here we are putting list of stocks which we recommended in the early 2013: **Tasty bits, Mount Eve, KGNENT, Hatsun, Rasoy PR, GM Brew, Radico Kh, Jagatjit Ind, EDL, Tilaknagar Ind, Mount Shiv, Nestle, Vadilal Ind, Britania, Suven, Sequent Scien.**

We don't want to say much today, we will talk more on Monday, here is what we mentioned yesterday: **Everyone who invests in India will be watching the elections results very closely; if NDA fails to get 282, then surely the market can correct five to ten percent. As predicted three weeks ago, the NDA getting closer to the majority, and BJP will get 245. It is always interesting to watch astro indicators, reading the astro cycle is an amazing study, but unfortunately, most of the financial astrologers don't have any past track records, but they start websites and try to fool people by copying other work and make investors fools (as few financial astrologer caught red handed by copying work). We hate to criticize them, but this is the truth.**

In short we are not recommending shorting positions in India market, except small hedging positions. Also watch 7275 level closely on higher sides. Book profit in Pharma and tech stocks. Add more Bharat Immu as this stock can fly sharply higher. After election result we will release new stock list.

Our predictions on Indian market have done amazingly well and at this stage don't focus do much on elections as money is always made in market with medium and longer term view. Like six months our view was Nifty reaching 6775 when it was around 5950 and last same we predicted when it was at 5550. I still remember when Bank Nifty broke 8800, we stated that it won't go below 8200 and 2014 target 13500 to 15900.

This is what we mentioned two months back: **Indian market traded sideways, we still recommend staying away from any aggressive positions in emerging market as well as in India. Ajanta Pharma, Torrent Pharma, Bharat Immu, Suven, Sequent, Cadila done very well on Tuesday in weaker market and will perform well on Wednesday as well. Our recommended food stocks like Hatsun, Radico, Jagatjit, Jubilant food, Vadilal and many other stocks have also done well.**

By end of May Nifty may reach 7225 and then we will decide what to do next.

Watch Bharat Immu it trading around Rs. 9.00, I have been recommending this one since last two years, but stock never moved, please do research before you buy this one. We own this stock and we still see this can be takeover target.

Buy aggressively Lupin, and one can hold positions in Torrent, Aurbindo Pharma, Ajanata Pharma, IPCA, Cadilla and Dr. Reddy. After our recommendations these stocks have done well and still we see at least 300% more gain so don't miss opportunity of buying. Any weakness in Pharma stocks should be taken selling opportunity.

Bharat immu is doing well, also food stocks are doing well, add more Vadilal and our most favorite Excel Crop (already move 300% and our target of 1000% shall achieve). Kaveeri seed done well by achieving over 2000% return and now we recommend 90% booking profit in Kaveeri seeds.

Also Yesterday **Venus Remm** moved up sharply, hold positions in it and those who don't have any positions should take some buying positions in Venus. **Buying recommendations in Nifty proven one of the best call after S&P as in the last two six weeks nifty move from 6030 to 6750. Nifty has to cross above 6775 for the two day to give clear bullish indications and Nifty may touch 7250 in the next eight weeks.** We would like to add SIX stocks during this week this we recommended on 10 March: **NTPC, IDBI, Wockhardt, TATA COFFEE and TATA GLOBAL and Aurionpro Sol.** Hold our recommended stocks, add more Tata Global and TATA Coffee, Emami, Dabur, Federal Bank, Honneywell Auto, and Reliance Comm.

These stocks also done well and we still recommend holding these list which we recommended on 20 Feb: **3M India Ltd around 3700, our target is 4400 in the next one months. Buy BHEL around 173, and target 250 in the next three months.**

These recommendations made last quarter of 2013: **Buy Sequent Scientific, Suven Life and Fresenius Kabi for medium and longer terms. Keep adding our favorite Tasty bit, Venus Rem, Jubilant Food. Excel crop and Kaveeri Seeds done very well, hold these both stocks as they are also our favorite.**

Hold our favorite recommended these of stocks of 2013. **Tata Global, Venus Remm, Hatsun Food, Tastybit and Jubilant Food, Vadilal ind 110, Excel Crop 180, Kaveri Seed, Agrotech 460, Britannia 710.**

Reading daily range: When we predict a weaker trend it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
