On Tuesday gold and silver moved aggressively higher as predicted. Grains moved sharply higher as predicted and coffee started acting well as predicted.

Energy market traded mix and currencies market done well as predicted.

On Wednesday early morning Jupiter changed house, it will bring amazingly changes in many people's life. If you know any good astrologer, then consult him/her about this Jupiter transit but I don't trust 95% astrologer because they don't put their heart and soul in this hidden mystery subject and that's the reason name of astrology is not very well respected. I always been saying that astrology is 100% accurate, those who read they make error and because of that name of astrology get spoiled.

I do not read astro charts for people except some time I do for my personal clients or corporate clients and it is always fun to read charts. Astro subject can take you in to the future, it can give you glimpse about what is coming, it is amazing subject and I have devoted my life to understand hidden mystery and mystic of astrology and I don't think that I will ever able to master it. You can see many times I come wrong on timing in many areas which clearly indicates that I won't be able to master this subject in this lifetime. I am human being and so please keep in mind that error will going to happen but let me tell you that I always put my 100% effort when I am doing study and analysis of this subject.

Humble request – Please don't forward letter to anyone, yes you can forward them as sample copy but tell them to subscribe their own copy as I put so much hard work to provide you daily and weekly newsletter. Forwarding or copying work is bad karma in the principle of nature.

Let's talk about today's view for most of markets, currencies, commodities in each section below.

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
