## Tuesday Daily Flash news (Unedited report)

Biotech and health care was great identify form astro cycle in 2020...

Dear Members,

Last year I started recommending biotech stocks, in our top buying list we recommended to invest 70% money in the biotech and rest in the tech stocks. This year's book "2020 Financial Prophecies" also kept Biotech stocks in our top buying list as I mentioned that one of the biggest bull markets starting in biotech sector in 2020. So far in 2020 our recommended biotech stocks are performing amazingly well, and they may keep doing well. Look at **VRTX, REGN, DXCM,**

**ALNY,** and list goes on, many biotech stocks are at these stocks sitting at all-time high.

Most of Corona related recommended stocks done very well and few stock like **MRNA, CODX, ZLAB, VIR, NNVC,** and **NVAX** (NVAX we recommended at \$5.00

and today it closed at \$35.00) performed amazingly well along with other corona stocks. Last week in our earning recommendations I recommended

**QDEL** (recommended \$137.00), it has great news during the

**Novavax, Inc. (NVAX)**

weekend and stock performed amazingly well on Monday, after earning also it went higher. We all aware that company which will find Vaccine first will hit jackpot, stock may move 100 time.

Very long and interesting email I received yesterday from the one of new member, in brief he was saying: Mahendra I am very happy that I subscribed your services last month. In the middle of March I sold all my positions in fear when market was around low, I heard about your from one of my friend that I am recommending buying market from 23 March and I bought your services on 29 March, after reading I bought many biotech stocks and they provided best returns in the last one month.

Surely, I feel good when I receive positive response, but all credit goes to astro cycle theory and wave of nature.

On Monday globally markets performed uncertain, but USA market moved higher due to rise in biotech and tech stocks. **LABU** and other biotech etfs are performing amazingly well, we need to watch LABU level \$57.00, it must close above this level for the three days to confirm bullish trend.

Most of commodities traded negative, currencies also lost value. Tuesday commodities may lose big value so good day to sell commodities.

Tuesday markets may try to still value so trade in and out, lower side some buying once again will come.

Our top picks like **REGN, VRTX, ALNY, DXCM, LVGO, NFLX, AMZN and MSFT** are performing amazingly well.

Most of the stocks related to COVID-19 are in our top buying list so follow **GILD, REGN, INO, VIR, MRNA, NNXV, DAYI, CODX and NNVC**. We recommended most of these stocks and most of them have gained value.

Threat to mankind article is here which predicted in 5 may 2009:

As predicted, we shall see some form of positive news regarding the drug for Coronavirus by 15<sup>th</sup> May; we are also holding our prediction of the world becoming a normal place by 30<sup>th</sup> June so from 1st of July the world will reopen.

**This is what we stated on 29 March:**

This is what we stated on 22 March:

When I was writing this year's book "**2020 Financial Prophecies**", the main point that we saw was that there would be some uncertainty and that's the reason we predicted that the second cycle would remain negative, and advised investors to stay away from the market. **Now we are running is the forth cycle till third week of June, expect volatility from 15 May.**

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
