Thursdays Daily Flash news (Unedited report)

Russell 2000 and USA indexes moved sharply higher as predicted...

Dear Members,

On Wednesday globally markets performed very well. Russell 2000 outperformed most of indexes. **URTY** (Russell small cap etf) once again moved sharply higher.

Metals traded both sides, base metals remained firm.

Grains lost small value and, but softs started acting positive specially **COFFEE**, which has been performing well since last one week, prices

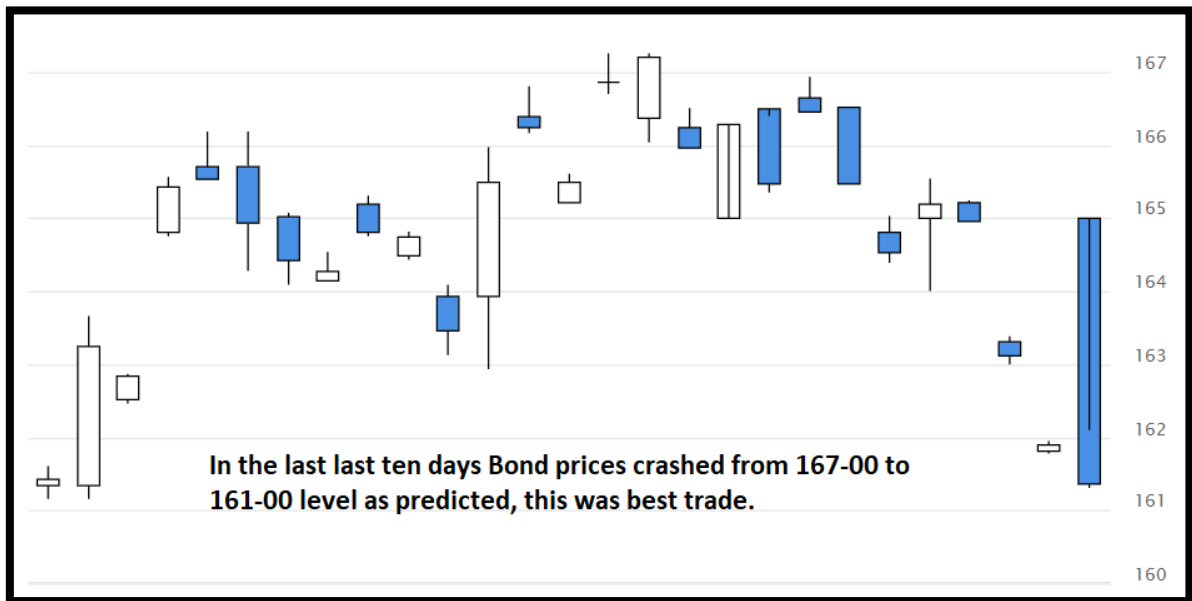

moved from \$93.70 to \$104.15.

Oil prices fall sharply lower as predicted from \$57.88. Gas and gas etf UGAZ witnessed profit booking.

Among emerging market currencies; Rupee and Real performed well. Frontline currencies lost value.

Japanese yen and Bond short trade worked very well for investors.

Overall best time for traders to follow our strategy as most of predictions are matching 100% as this stage.

FMCC and FNMA, recovered value, LCI moved sharply higher and VIAV our most favorite longer-term favorite moved higher. Two big companies like BA and

FDX has been recovering after worst cycle.

INDL, BRZU and other emerging market elf's gained value. Rise in Brazilian Real helped **BRZU** to move higher.

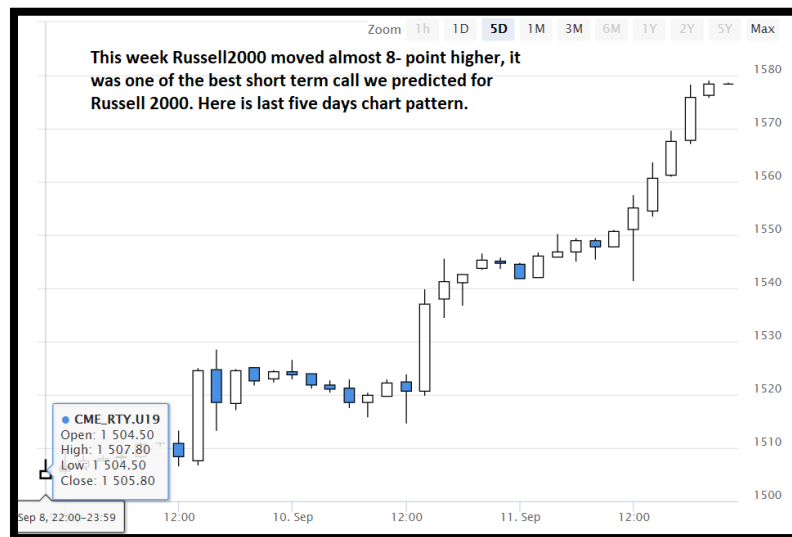

Hold positions in European, emerging and USA markets. **EXTR** and **LSCC** will be great buy.

Only **Palladium** predictions is

failing at this stage, but we still believe that miserable fall will come in overnight so remain alert and watch palladium prices closely.

On Wednesday markets gained handsome value as predicted. S&P moved above 2988 level which is most powerful sign.

We need to see S&P remaining above 2988 for the three trading days so watch closely.

Most of global markets are moving higher and they will keep moving higher. Thursday prices moved higher. Tech stocks are performing well. On Higher side 3017 to 3029 levels we predicted in this week newsletter so watch it.

Small cap biotech stocks were on fire today, many stocks moved between 10 to 50% higher.

These stocks moved higher, follow these stocks which mentioned in yesterdays report: Today few beaten stocks gained handsome value, someone

Akorn, Inc. (AKRX) NasdaqGS - NasdaqGS Real Time Price. Currency in USD 3.3200 +0.6200 (+22.96%)
Endo International plc (ENDP) NasdaqGS - NasdaqGS Real Time Price. Currency in USD 4.0000 +0.9300 (+30.29%)

Mallinckrodt plc (MNK) NYSE - NYSE Delayed Price. Currency in USD 3.8800 +1.7800 (+84.76%)

is acquiring big positions in these beaten stocks. **ENDP, PBYI, AKBA, MNK, AKRX, ACOR, MLNT, CLVS** and many other stocks were going aggressively higher. Out of all these I like **PBYI and LCI** (LCI already doubled in the last three weeks, and still has power to move higher). Rest also can move higher, but remember than to book profit if they move further 100% higher from here.

This is what we stated On Monday: *Small cap Index Russell will outperform most of Indexes so great time to bet on Russell 2000, URTY in coming days.*

Higher side 2988 will remain crucial astro resistance level and lower side we may see 2961 buying level so take opportunity of buying but safe will be at 2948 level which may not achieve but if markets goes there then buy.

Now after 2988, we see 3029 in the short term on the higher side could achieve later this week. Cannabis stocks will come back in life from this week.

*Stay long in the global markets. Stay long in **INDL and YINN**.*

UGAZ performed very well on Monday, **NUGT and JNUG** went more than 200% higher, and still has a lot of room to move higher from later this week.

Stay long in the global markets. Stay long in **INDL and YINN**.

Thursday's astro combination recommendation: Buy on lower in most of markets on Thursday in Asian and European markets. stay long in USA market.

This is what we mentioned 15 April 2015: *As we said, our most favorite stocks just buy and keep it on the side until the bull market is there; and this bull market is still to remain for the next two years. In 1995/96 I bought Satyam computer at Rs. 15 (sold in early 2000 before tech crash at 5900.00), SSI at Rs. 29 (I sold it at 11230.00) and Mastek Rs. 210 (sold at 5900) & BFL Software at Rs. 55 (sold at Rs. 980). In 1995/96 I saw a historic bull market coming in tech and internet stocks, I also predicted that there will be a rush to buy these stocks and they could move thousands of percent and that happened by 2000. This was the first fortune I made from nothing.*

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
