Thursday's Stock Investment Report

India market doesn't care about Modi any more, but Trump has still weight on USA market...

Dear Members,

On Wednesday most of Asian markets gained handsome value, European markets also recover, and USA market moved higher on opening but gave away gains in the last two hours of trading. We expected Modi losing elections in three key state but still we recommended buying Nifty 10335 level and **INDL** at \$50.00, because astro indications were clearly showing market making huge come back, Indian market came back as predicted by ignoring Modi's defeat. This is clear sign that Investors are not worried of Congress coming back as they don't see any new hope or light in Modi's economic policies. On other hand Trump have deliver what we promised but Modi just made big speeches.

On Wednesday market moved sharply higher, but USA market gave gains away once again. On Thursday we are still recommending buying market on weakness.

On Thursday we are still recommend holding positions in USA tech stocks and also hold positions in emerging market.

Stay long but watch trading ranges due to December future & options contract expiry. I still recommend buying tech, biotech and financial on lower sides. **INDL** was great buy, **UVXY** was great sell and **ERX** was also good buy, these trades were recommended on Monday.

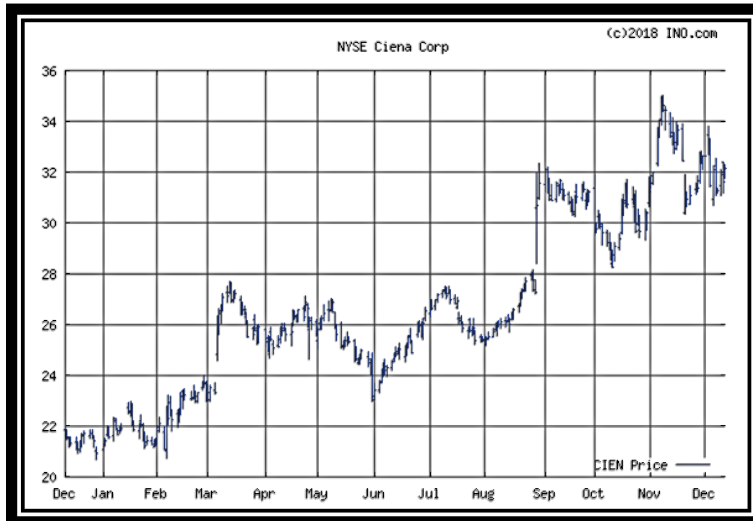

China/US trade war issues is getting in positive shape. On Monday we stated and we still believe that tech stocks may rally 10% to 15% in the next ten days if Jupiter supports. On higher side we may see 2725 level during this week so keep this in mind.

Yesterday we recommended buying frontline tech stocks, and still we are recommending adding frontline stocks as mentioned in the yesterday. **We are still believe that huge move in USA and Asian market can take place in the next two weeks so hold positions tightly.**
S&P will hold 27

Monday, we recommended buying more positions in **PBYI, TNDM, AMGN, BIIB, REGN, APPLE, NVDA, AMZN, GOOGL, and AMD**, we are still recommending holding positions in these stocks or adding more positions. **CIEN** will come out with earning report. On 13 December, I expect **CIEN** to perform very well.

Stay sideline in **ERX and DUST**. Sell **UVXY** on higher sides as prices may drop toward \$48.00 level.

CIEN will announce earning on Thursday morning, we are expecting big higher side move in stock. We are expecting at least 18% move on Thursday. We have been recommending buying **CIEN** from \$24.00 with target of \$55.00 to \$65.00 by of 2019.

After market **ADBE and COST** will announce earning. **ADBE**

will have limited higher side but **COST** still can gain value. Both these companies will announce strong earning.

ORCL will also announce earning, we are recommending to staying sideline.

Biotech stocks shall be in your watch list, we see big movement in **CELG, GILD and REGN**, all these stocks may move 10%.

NFLX, AMZN and GOOGLE are in our favorite buying list for the next ten days, great time to make short term money by buying these stocks.

INDL moved 20% higher in the last three trading days. Lately our accuracy have sharply increased in **INDL**. Six week back we recommended buying **INDL** at \$47 by targeting \$68.50, two weeks back we recommended closing long at \$68.50.

Once again on Monday we recommended buying at \$50.00 and now we are target once again \$65.00 level.

Thursday's astro combination recommendation: Trade in and out, stay long in Global market without fear.

This is what we predicted on 19 September - *We are still recommending to hold positions in **GTT, MXL, ORBC, BLDR, and MCHP**, we recommend to hold positions in these stocks. (discloser – we are holding positions in these stocks).*

*We recommend **WUBA** many time, if you don't have in your portfolio then must add **WUBA**.*

Recommended on 15 Feb 2016: *Important note - **We are expecting MARCH TO JUNE 2016 a major bull cycle in equity market which may put all major global market on extreme upward trend. USA market shall keep making new higher during this cycle.***

This is what we mentioned 15 April 2015: *As we said, our most favorite stocks just buy and keep it on the side until the bull market is there; and this bull market is still to remain for the next two years. In 1995/96 I bought Satyam computer at Rs. 15 (sold in early 2000 before tech crash at 5900.00), SSI at Rs. 29 (I sold it at 11230.00) and Mastek Rs. 210 (sold at 5900) & BFL Software at Rs. 55 (sold at Rs. 980). In 1995/96 I saw a historic bull market coming in tech and internet stocks, I also predicted that there will be a rush to buy these stocks and they could move thousands of percent and that happened by 2000. This was the first fortune I made from nothing.*

Make wave of nature/astronomical cycle an integral part of your trading/Investment strategies!

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
