Weekly Newsletter from 14-18 March

This will be a supportive final week for commodities, especially oil, but precious metals bull journey to start yet... most awaited FED event is coming but buy market... ..

Dear Members,

Putin is getting aggressive, and trying to finish this war as soon as possible, but on the other hand, the Ukrainians are giving the Russians a tough time. **“There are some battles worth fighting”**, and it feels like this is one of those battles for the Ukrainians. They know that the Russian army is much larger and better

equipped, but they are not worried about their lives, and even though they know that they may not survive, and leave their families behind in uncertainty, they continue to stand strong and keep fighting for their country.

The Ukraine/Russia war news may continue to bring uncertainty into the market. At this stage, the Russian Markets have been closed for more than two weeks. The Russian ADRs are losing value non-stop, and their value has been destroyed by 90% or more in terms of market cap since the beginning of the war. Russian companies are aware that as soon as the market opens, they may fall 50-90%, so at this stage, they are happy that the markets are closed, but they will eventually have to open. I am eagerly awaiting the opening of the

Russian Market, but no date has been announced yet. RUSL has been falling nonstop but now they have halted trading.

The Chinese markets have also been falling non-stop. Chinese

tech stocks and ADRs are also hitting new lows. **BABA, BIDU, Tencent**, and many other giants are losing value non-stop. The Chinese ETF **YINN** tested a historic low as it fell below \$4.00 from the high of \$62.

Many Chinese/Russian intellectuals, Communist party leaders, and business people are not very happy with Xi and as well as Putin's handling of international affairs. Both are very strong political leaders in their countries, and both have the intention to lead their country as long as they live. However, the inside intellectual circle in both these countries is not happy with all the recent developments, which have pushed both these countries down a path of economic ruin.

This year the Chinese leaders will meet and decide whether President **Xi** should continue to hold power or not, however, no one can remove **Putin** from power as he has already changed the constitution of the country and appointed himself as the president of Russia for life.

COVID-19 dominated the market trend over the last two years, and now the Russia Issue, which brought uncertainty in the commodity market, and some of the commodity prices went beyond our imagination, (i.e. Nickel). Oil, Wheat, Corn, and a few other commodities also moved sharply higher, which is creating inflationary pressure on every country. Many are afraid of a recession, while others are afraid of a low growth rate in the corporate world, especially in the USA and Europe.

This week one of the most important events will take place, which is the **FED meeting**. It will be the testing time for the FED committee and the FED chairman, to see what he does with the interest rate decision, and what he says during the Press conference. The equity market has been falling, the recession is knocking on the door, inflation is moving rapidly higher, the corporate world is still trying to recover from COVID, a historic energy crisis is looming in Europe, and the Ukraine/Russia war continues to get nastier.

Our viewpoint is very, very clear, and if I am not able to provide a clear viewpoint during the most uncertain time, then why should anyone listen to us? In our book “**2022 Financial Predictions**” as per the Astro cycles, we have already announced that the **Bull era in the financial markets is about to begin from the end of April**. We have already mentioned that from the end of April onwards the market will have a one-sided rally, at least for four to five months, which may push all the indexed towards a new high. From now to April end, you need to keep investing money if you have any extra lying around or continue to hold your investments in the market.

The Aquarius **Sun** will be changing on **Monday 14 March around the time that the US market closes, so it will certainly bring some good news for the global**

markets on Tuesday, which means that Monday's low will be the bottom for the US market during 2022.

The Sun in Pieces created a bottom in 2020 as well as a bottom in 2009, and we are expecting the same in 2022. We have been fortunate over the last three decades as we were able to pick up the bottom in the market at exactly the right time, and I hope we are right this time as well.

The FED meeting on Wednesday will push the market sharply higher, so keep cash ready to buy the market if it moves lower after the FED rate hike announcement. From Monday to Friday, deploy your cash into the market every day, and I am sure that you won't regret making this decision by September end, as these decisions will be very fruitful. This is my advice to you.

The dollar is close to the top, so keep this in mind, and this week Dollar will form the top of 2022.

Commodities are close to the top, but our view is still very bullish for other commodities during 2022/23, so buy longer-term calls in precious metals and some for crop commodities, or adopt a strategy where you lock your risk and take the maximum benefits.

Last week the financial markets traded very uncertainly, and they overall lost value during the week.

Commodities traded are very volatile as well.

The dollar remained very firm against frontline currencies.

Traders are feeling the most uncertain time in the financial markets. All the country's financial markets are acting differently, and we only recommend

building long positions in the Us market, Lithium stocks, semiconductor and Alternative energy stocks.

Interest Rate Decision: we already predicted that the FED will only hike rates twice in 2022, and we are still holding this prediction. These hikes will be lighter, and the FED will sound less Hawkish and will adopt a 'wait and watch' mentality.

The overall trend of this week: This week markets will form the bottom, commodities will move higher but energy and base metals will make the top, grains will remain firm.

Let's get back to the financial markets from the 14th to the 18th of March 2022:

GOLD/SILVER/BASE METALS

Last week Precious and Base metals tested their highs on Monday and then started losing value throughout the week. Our recommended profit booking around the higher side is Gold at \$2070, and silver at \$27.71, as both these metals, tested these levels and came down. Platinum is closely following Gold and Silver.

The rest of the base metals are trading volatile but witnessing selling pressure around their higher side trading levels.

After analyzing this week's Astro combinations, we still believe that Metals will trade volatile this week but the overall trend may remain positive, and after that, some serious correction may come.

If you have short-term buys in gold and silver, then you should be closing these positions on Thursday. Also, sell base metals on Thursday around higher sides.

After this week trade in and out and wait for the end of April to buy back some positions. **If you are holding longer-term call options in gold and silver, continue to hold on to these positions this week, and get ready to add new long positions in the last week of April.**

This week On Monday and Tuesday the Astro combinations are supportive buy precious metals on any sharp corrections and book profit on the higher side in Precious and Base metals.

On Wednesday we have the FED meeting, and we all know that Gold and Silver are very sensitive to the FED decision, but I will recommend buying some short-term call options in Gold and Silver. I am not recommending buying futures positions, as they are trading at the yearly high, and if you are trading the futures market, it can be very risky, and we haven't forgotten what happened last year.

On Wednesday the overall Astro combinations are supportive, and although Gold and Silver may go down after the FED meeting, they will bounce back.

Prices will move sharply higher on Thursday as well.

On Friday we see profit booking coming back in metals, so we recommend booking profit on the higher side or one close long in metals.

IMPORTANT NOTE: Whichever metal trades negatively on Wednesday and Thursday, it will be bad news for that metal, so keep a close watch on these metals. If Gold and Silver trade negatively, then I will be a little concerned, and won't recommend any new buyer for the short term but I expect a positive trend so I am not worried at this stage. However, if they trade positively then

follow our recommendation as mentioned in every week's newsletter, as both these metals will follow the Astro cycles.

Avoid holding any longs in Base metals after Thursday. Sell all the other base metals stocks and buy lithium stocks.

April outlook: Overall April will bring a very bearish cycle for base metals so keep this in mind.

- The Astro support for Gold will be \$2070 and Silver 27.71, they closed above \$1920 and \$24.71 closing below these levels will bring short term weakness. Platinum's Astro resistance will be at \$1187 and support at \$1018.
- Copper's Astro resistance will be at \$498, and support at \$443. Palladium Astro resistance will be \$3148 and support at \$2475. Closing below this level will make it test \$1811. The next resistance for Nickel will be \$50778 and Aluminum \$40238.

Monday's Astro combination recommendation – On Monday one can hold longs in precious metals if you buy at lows as it is a positive Astro day for precious metals and a mixed day for the base metals. Get ready for Wednesday's flash news as we may recommend aggressive trades.

Monday's trading ranges: (Continue 2022 Contracts):

GOLD: \$2003 to \$1959.00 (Spot: 2003 to 2060)

SILVER: \$26.42 TO \$25.90 (Spot:26.37 to 25.82)

COPPER: \$468.00 TO \$458.00

PLATINUM: \$1101.00 TO \$1073.00

PALLADIUM: \$2909.00 TO \$2707.00

INDEXES

Last week globally the markets traded negatively once again. Many great US companies are trading at very lucrative prices, especially semiconductor stocks, which are falling unnecessarily. What a great time to buy these stocks! Buy/Accumulate them without fear, and by the end of this year, you will be thankful for the Astro cycle theory. Keep accumulating SOXL as by the end of this year it will test the 3-digit mark.

I am waiting for the Sun to end this uncertainty and bring some stability, which you will see from Tuesday onwards. Every major financial media is showing negative news regarding war, inflation, FED, growth, and inflation, but do not read this news at this stage, and just focus on your investment planning as you have another 6 weeks to finish all your investment planning. If I am not mistaken, then the US market should bottom out on Monday.

At this stage avoid the international markets even though they are looking very attractive, as our focus is mainly on the US market. Though YINN, BIDU, and BABA look like great bets, avoid them as compared to these stocks, US companies are managed far better.

Keep acquiring Lithium stocks, in fact, last week they performed very well.

Clean energy stocks are also among our top picks, but they will turn profitable in the longer term, so you need to keep this in mind.

Energy and Base material stocks are on our selling list, so avoid any major buying in both these areas.

Financials, transport, and retailers will trade in a mixed trend, but Hotel and Casino stocks are ready to move higher.

Among all the above-mentioned areas, you can plan your own strategy regarding whether you want to buy options, equities, ETF's, etc.

This week's Astro combinations indicate:

On Monday uncertainty will continue in the global markets because it is the last day of the **Sun in Aquarius so acquire some aggressive long positions around the lower side in the market without fearing FED and war situations.**

On Tuesday the Sun will be in Pieces which is great news for investors, and what a day to start accumulating stocks. I recommend all the big boys of Wall Street to cancel all other commitments and start focusing on investments because this will be one of the best days to put money in the market.

On Wednesday the FED news will make many nervous so traders be unsure, but there is no need to be nervous, and get ready to buy in the markets after the FED decision, if the market goes down.

On Thursday the market will have a good rally and will close in the green in a big way.

On Friday the market will open higher, and then will trade sideways.

- S&P has a very important Astro support at 4161 and Nasdaq 13161, we don't see both these indexes closing below this level for more than three to five days, so these are the most important Astro support levels. On the Higher side profit booking for short-term traders will be at 4459 in S&P and 14819 for NASDAQ.

Monday's Astro combination recommendation: On Monday we strongly recommend buying some short-term call options in the market and financial stocks. 15 Sun is changing which is great news for investors and I have been waiting for that.

Monday's trading ranges: (March 2022 Contracts)

HONG KONG (cash) –20789 to 19023

NIKKEI – 25198 to 24681

NIFTY S&P (Spot) – 16653 TO 16271

CAC – 6255 TO 6121

DAX – 13598 TO 13311

DEX EURO STOXX –3691 to 3621

FTSE – 7151 TO 7041

S&P e-mini – 4271 TO 4141

NASDAQ 100 e-mini – 13651 TO 13111

RUSSELL e-mini – 2015 TO 1951.00

DOW e-mini – 33335 TO 32771

CURRENCIES

Last week Dollar made another high, which should be the high of 2022. The dollar can hang around both sides for another two weeks, but after the 21st of March, weakness will start in the Dollar. We already stated that from the end of April, and for the rest of the year the Dollar will keep moving lower, which means that the Dollar may move towards a low of 2022.

Over the last two months, it has been very interesting to watch a few emerging market currencies performing very well while frontline currencies struggle. We believe that the same trend may continue. Our overall view is bullish for Emerging market currencies.

This week we still recommend selling the USD and buying most of the currencies on Wednesday and Thursday. Though in the uncertain time of war and depression, people like to stay long in US Dollar as it is a safe-haven currency, that won't be the case in the coming weeks.

This week's Astro Combinations Indicate:

On Monday Dollar can remain firm, and most of the frontline currencies can continue to lose further value. Some weakness will be witnessed in the emerging market currencies as well.

On Tuesday a mixed trend is expected in most of the currencies so trade in and out, by following the daily ranges mentioned in Tuesday's daily Flashnews.

On Wednesday any sharp rise can be taken as an opportunity to sell the USD, and buy most of the currencies.

On Thursday once again a mixed trend will continue, and we recommend trading in and out, because as mentioned Dollar can keep rebounding till the 21st of March.

On Friday most of the currencies will trade negatively, but they will recover half of the losses late during the trading sessions.

From next week we strongly recommend buying British Pound and the Euro, so do not take any aggressive long or short positions during this week and remain

a short-term trader. Australian & Canadian Dollar, South African Rand, Brazilian Real, and Mexican Peso are the best bets against the USD.

- Dollar Index has an important Astro resistance at 97.75, and closing above this level for three days may push it towards 99.68. Closing below 97.75 for the three days will push towards 95.78.
- In the short term the important Astro support level will be: Australian 0.7048, Canadian 0.7692, Pound 1.3073, Euro 1.0782, Franc 1.0545, and Yen 0.8368. Euro will have an important Astro resistance at 1.1519, Pound 1.3788, Canadian at 0.8177, Australian Dollar 0.7555, Yen 0.8948, and Swiss Franc 1.1111.
- Rand 13.01, USD/Peso 19.32, REAL 5.00, and Rupee 72.78 are crucial Astro supports for the USD, and on the higher side dollar may struggle to close above these Astro resistance levels against Rand 16.98, Peso 22.88, Real 5.73, and Rupee 75.78.

Monday's Astro combination recommendation – On Monday trade in and out as USD will remain firm on Monday and wait for Wednesdays as most of the currencies will come in buying list after the FED meeting.

Monday's trading range: (March 2022 future Contract):

DOLLAR INDEX – 99.65 to 98.81

AUSTRALIAN DOLLAR – 0.7328 to 0.7247

CANADIAN DOLLAR – 0.7883 to 0.7818

BRITISH POUND – 1.3082 to 1.2938

EURO – 1.0962 to 1.0863

JAPANESE YEN – 0.8570 to 0.8486

SWISS FRANC – 1.0715 to 1.0653

USD/RUPEE – 77.02 to 76.43 (Spot)

USD/RAND – 15.09 to 14.91 (Spot)

USD/PESO – 20.98 to 20.82 (Spot)

USD/REAL – 5.12 to 5.04 (Spot)

ENERGY

Last week a sharp rise and fall were witnessed in the Oil market. Heating Oil and RB Gas also lost significant value. If the war situation intensifies, it may bring more volatility, but it still looks very difficult for Oil,

Heating Oil, and RB Gas to breach the higher side level of last week.

This week's Astro Combinations Indicate:

On Monday the Astro combinations are supportive for the Energy market, so prices may move higher or hold value, but on the higher side one can book profit because Tuesday selling pressure will come at higher sides in the energy market.

On Wednesday Oil prices will move on both sides, and we are still recommending selling Oil, heating oil, and RB gas around the higher side, and covering back the positions around the lower side, so follow our daily trading ranges as mentioned in the daily Flash news.

On Thursday once again our strategy will be to sell oil around the higher side, but this time you can carry your shorts on to Friday as prices will start coming down.

In the short term, we do not see Oil testing \$130 again, and I won't be surprised at all if it goes back to \$94 in a few weeks' time. This week from Tuesday to Thursday keep building sell around higher sides.

Natural Gas' trend looks far better from Wednesday, so one can take long positions on this day, and hold on to the long trades.

- Oil's closing above 114.68 for three days will push it towards 124.98. Closing below \$108.71 will push it back towards \$90.91 so keep these levels in mind.
- The new trading range for Natural Gas will be from \$5.28 to \$4.38.

Monday's Astro combination recommendations for Oil – On Monday oil may hold or gain value because it is supportive of Astro day for the energy market.

Monday's trading range (Continued future 2022 contracts):

OIL: 111.98 to \$104.65

NATURAL GAS: \$4.80 to \$4.62

HEATING OIL: \$3.6301 TO 3.3211

RB GAS: \$3.3419 TO \$3.1955

GRAINS

Last week grain prices traded very volatile, but Wheat fell non-stop. Though Ukraine and Russia together produce 28% of the world's wheat and 16% of the world's corn, it doesn't mean that prices can keep moving higher.

Surely short-term volatility may continue, but as predicted, Corn will perform far better than wheat.

On Monday Wheat and Corn will be great buys on weakness as prices can recover, so if you are buying then book profit very quickly by Thursday or Friday. You can also follow our daily Flashnews ranges to trade in and out.

This Monday, Tuesday, and Wednesday, a mixed trend will continue with prices recovering from the lower levels. There is a possibility that prices can move sharply higher on Thursday, and on Friday prices can move sharply lower. I think most of the grains will make a top during this week.

Corn's Astro support will be at \$689 and \$651, Wheat \$938, and Soy's Astro support at \$1523. The next resistance for corn will be \$857, soy \$1725, wheat \$1305, these are selling levels.

Monday Astro combination recommendations – Grains will act positively on Monday so buying is recommended, if you are short then cover short at least for this week.

Monday trading range (Continue Future contracts 2022 contracts):

CORN: \$771 TO \$748.00

WHEAT: \$1139.00 TO \$1071.00

SOY: \$1691.00 TO \$1659.00

SOY MEAL: \$484.00 TO \$468.00

SOY OIL: \$77.01 TO \$74.28

SOFT COMMODITIES

Last week as predicted softs traded directionless, though some buying came in Cotton and Cocoa. Still as predicted one should stay on the sidelines in softs until the 15th of March. From last week's lower side prices, we do not see much of a fall on the lower side, but I would still like to wait for some more time before buying any aggressive longs in our favorite trades Coffee, and Cotton.

If softs trade negatively on Wednesday and Thursday, then I will recommend staying on the sidelines till the 14th of April because till mid-April volatility will continue in crop commodities. Though Coffee and Cotton are different type of crop commodities (not like traditional grains), the astrological fundamentals are the same because softs and grains grow from the earth.

This week's Astro Combinations Indicate:

On Monday softs will trade uncertain to negative, and the same kind of trend will continue Tuesday, so avoid them.

On Wednesday softs will trade mixed, and some buying will be witnessed in sugar and cotton.

On Thursday a positive trend will be witnessed in soft commodities, but on Friday once again some selling pressure will come back.

Cotton shouldn't close below \$118.75, and coffee \$218.75, otherwise short-term weakness may start with 5 to 7% further weakness.

Lumber is still on our selling list. Sugar has an Astro resistance at \$20.71 and support at \$18.11. Cotton has an Astro support at \$111.75 and resistance at \$127.81. Cocoa's Astro support level is \$2375 and Astro resistance \$2875.

- Coffee has an important Astro level that will be at \$218.25, below this prices will stabilize around the \$201 level.

Monday Astro combination recommendations – Finally softs are close to the bottom but I will recommend waiting for some more time, on Monday trade in and out.

Monday's trading range: (Continued future 2022 Contract):

COFFEE: \$224.25 TO 218.00

COTTON: 122.01 - TO 119.01

COCOA: 2653 TO 2581

SUGAR: \$19.51 TO \$19.01

THIRTY YEAR BOND

Last week Bond traded negatively as predicted. Bond prices faced challenges to move above 160-00, but the good news is that it has been holding 153-00. Closing below 153-00 will be bad news for the bond market, and a sharp

correction can be witnessed, which can push prices towards 148-00.

This week's Astro Combinations Indicate:

On Monday Bond prices will trade on both sides, so trade in and out.

On Tuesday higher side selling will be witnessed.

On Wednesday sell some aggressive positions in Bond after the FED meeting, and on Thursday and Friday prices will gain value.

Bond has been trading in the ranges as per predicted 160-00 to 153-00 for some time.

Monday's Astro combination recommendation – Sell bonds around the higher side and cover shorts around the lower sides on Monday.

Monday's trading range (March 2022 contract):

TREASURY BOND – 155-18 TO 154-08

CRYPTO CURRENCIES

Last week Crypto prices tried to recover on Janet Yellen's comments, but they failed to remain higher. We still do not see Bitcoin trading above 43878. Closing below 37278 will open the door for Bitcoin to trade below 33000. At this stage we are not recommending any buying in Bitcoin. Higher side selling is recommended.

This week's Astro Combinations Indicate:

On Monday Bitcoin and Crypto prices will lose value so selling is recommended.

On Tuesday during the Asian market some buying will come and cryptos may remain positive.

On Wednesday higher side selling is recommended and add more shorts on Thursday.

On Friday, Saturday, and Sunday prices will drop.

This is not a good time to hold longs in cryptocurrency and bitcoin.

Thanks & God Bless
