Tuesdays Daily Flashnews (Unedited report)

Markets will trade higher in coming days so acquire more positions on weakness, stay away from gold

Dear Members,

Metals struggled to remained higher, stay away on Tuesday as predicted in the newsletter. Oil is trading around our predicted higher side level, stay sideline and read our weekly newsletter if you are medium and longer-term trader because weekly newsletter always walks about weekly trend as well as medium to longer term.

Markets traded mix to bit negative, buying recommended on Tuesday and Wednesday on weakness so buy on weakness or around lower side level is our advise so please follow our daily ranges closely as mentioned in daily flashnews.

Bond traded as predicted and stay sideline in grains and softs.

Most of currencies tried to gain value but Australian dollar and Canadian dollar struggled to gained value. Yen went down as predicted.

We are strongly recommend not to sell market, stay away from metals. Trade in and out in energy as for the few days, but longer term trade can build sell.

Bond to trade negative.

Keep buying frontline stocks in every market, stay away from mid-cap and small cap now from here onward.

On Tuesday we are recommending selling more positions on higher sides in oil as in this week weekly newsletter mentioned that oil prices will move lower from Wednesday so keep this in mind. Many analysts are predicting oil going back to \$100 but we are predicting that we don't see it going above even \$80.00 in 2018. At this stage we have been predicting that it may not move above even \$72.88 level so follow these selling levels closely. In the longer term no analyst on the planet ever able to beat our longer-term predictions (this is not my ego), they were remaining far behind to come even closer to match our accuracy level of longer term out look on market, commodity, bond and currencies, and **that's the reason we are so proud on astro cycles**. Stop following people those who copy our work, they copy and do some technical study and tell people that they can predict market trend, they are cheating themselves and other.

I have put more than 80% of my life time in this subject, I started studying astro cycle at age 8, and now running 51 but still I am not able to come closer to 5% of this subject. I am not claiming that I am 100% accurate because I came many times wrong in predicting short term trend, few times I failed completely predicting medium term trend like last year my failure is one of key example. In predicting the longer term outlook our predictions never failed so far.

Don't look for the free advice, those who couldn't afford our fee for weekly and daily (which is \$15 dollar a day), can buy our book "2018 Financial Predictions" which will be able to guide you in trading and investment strategy. I leave all decisions on you. Many times, in the past I stated that traders are ready to lose thousands of dollars in trading or investing in wrong areas but they don't invest in any good letters or advice, they try to look for always free advice which is a bit strange.

This is what we stated yesterday: One of the most uncertain cycles ended on 29th April; we have already entered a positive cycle, but surely the other coming cycles in 2018 will be very positive and you can read these cycles in our book "2018 Financial Predictions".

We still believe that a \$375 investment in a copy of the "2018 Financial Predictions" or in \$99, \$151, and \$199 for the different sections of the book is worth every penny if you trade or invest in the market, especially with the risks that people take in trading and investing.

This is what we stated yesterday: To get a complete feel of 2018, the 2017, was very simply a year with a bullish trend, if you have bought market, crypto currency, energy and base metals then you did well without using much of your brain and logic. 2018 on the other hand will be a completely different year. I highly recommend reading "2018 Financial Predictions" book from cover to cover to get a complete feel of 2018. Many readers have the habit of jumping directly to the chapter they are interested in but don't make this mistake this time. Even if you are a metal trader you must read the dollar section, what other commodities will be doing, and what the market's and crypto's trend will be, so please read the book in detail.

The Indian market is our favorite one in 2018, so stay long in Indian market ETF's and stocks.

<https://www.mahendraprophecy.com/2018-financial-predictions-book.php>

Watch the important support & resistance levels updated on Monday, the 14th May 2018:

- Last week Gold held \$1305 level which is great news for investors as last week astro combinations were weak. At this stage watch \$1305 on the lower side and \$1333 on the higher side. Silver will follow gold, but platinum will gain value. Base metals will start a negative trend, copper will move towards \$2.91 and Palladium \$825.
- The important astro resistance level for oil will be \$71.29/72.78, and these should be the highs of 2018; it won't close above these levels. This level will be the top for 2018 and on the lower side the first support level be \$65.88.
- Buy gas only if it closes above \$2.61 for three days. Closing below \$2.61 may take gas towards \$2.43 level. The maximum higher side is \$2.82 and lower side \$2.42 level for the short to medium term so keep these levels in mind.

- ERX held \$25.50; it was an important level, now \$35.98 is an important resistance level and ERX trading above this level could take prices up to \$39.83 level so keep this in mind. On the lower side strong astro support will be at the \$30.25 level. Closing below this level could push prices sharply lower.
- As predicted, Thirty Year is close to testing \$143-00, and below this, 138-00 is the important resistance level. As predicted it won't be able to move above 147-00. One can add more positions in TTT, TBT, and TMV.
- S&P tested 2718 level as predicted last week. The major astro support is still at 2618 and the higher side resistance is at 2698/2718. The month of April will remain very volatile.
- Dollar Index bounced back from 88.31 and it passed the important level of 91.98; the max higher side could be 93.48. Selling recommendations pound at 1.4475 and Euro at 1.2495. Selling around these levels is recommended with a price target of 1.3475 and 1.2011, and another 200 pips can fall more if these levels could be break.
- For Orange Juice the lower side is \$133 and the higher side \$169. Cotton and coffee started acting positively. Sugar tested \$11.71 lower side predicted target, may test \$10.81 and cotton is ready to test \$87.88 level, close all long. Coffee shall be in buying list.
- Sell lumber at \$609 with the target of \$435, and cocoa \$2881 with target of \$2275 level.
- Soy oil has had a major astro support at \$30.11, and resistance at \$35.11. Selling is recommended at \$34.88. Selling recommended in wheat at \$520, Corn \$388, soy bean \$1088 and Soy meal \$400.
- Last week buying recommended in Soy around \$1008, corn \$368, and wheat at \$435 level. On higher side major astro resistance level for wheat will be \$532, Corn \$423, Soy meal \$403 and Soy \$1068/1088.

Here are the trading strategies and ranges for Tuesday:

GOLD/SILVER/BASE METALS

On Monday higher and Tuesday we recommended selling precious metals, and we are holding this advise. Stay away from precious metals like gold and silver. Lets see whether gold tests \$1305 level or not in coming few days, so far this level have proven like Wall of China.

In the rest of base metals trade in and out on Tuesday.

Stay away from metal stocks, buy some positions in DUST for the 10% gains.

This is what we stated yesterday: *From the middle of Tuesday, we recommend selling positions in precious and base metals.*

Last week astro combinations were weak but gold held our most important level of \$1305 which is a bit encouraging sign, which confirms that gold may not adopt any major negativity in the medium term but still watch Tuesday to Thursdays trend during this week. Read our weekly newsletter.

On Monday, we recommend buying in metals around the lower sides as it is a positive day but close positions either on higher side on Monday or on Tuesday in Asian or European market.

This is what we stated last week: *From 7th May 2018, crucial astro cycle is starting for gold and you need to be remain very alert because trading negative could push gold toward \$1262 level. Silver and platinum will follow gold.*

Base metals traded as predicted during this week, on Friday most of base metals will trade in the mix pattern. Crucial astro cycle is starting for BASE metals from 7 May as well. We are expecting big correction. Get ready to sell Zinc, Lead, Palladium, Nickel on 2 May 2018. 20% correction is on the way.

On the lower side gold will hold \$1305, \$1298 to \$1264 in 2018, and on higher side I am raising my target for gold to \$1509 or even higher during the middle of this year once gold closes above \$1364 for the three days . Gold will outperform silver, platinum, and the rest of the metals.

Tuesday's astro combination recommendation – Tuesday sell precious metals and trade in and out base metals but one can sell.

Tuesday's trading range: (July 2018 contract):

GOLD: \$1321.80 to \$1308.00

SILVER: \$16.73 TO \$16.45

COPPER: \$310.50 TO \$306.10

PALLADIUM: \$1001.00 TO \$984.00

PLATINUM: \$925.00 TO \$905.00

INDEXES

On Monday most of markets traded directionless. We are seeing same kind of trend in the most of markets. We are strongly recommend buying some more positions on weakness. Day traders must take advantage of buying on weakness.

In our book in precious cycle we mentioned that some middle-east tensions indicating which could drag market lower but thank God that cycle is over two weeks back but still Middle-east tensions indicating.

Read one more time we started yesterday: *Last week most of the markets traded positive as predicted. S&P achieved our most important short-term level of 2723. Asian, emerging and European markets gained value. So far, we have been able to guide correctly on the market trend so keep following our predictions closely.*

On Monday we see a positive trend to continue in most of the markets, and Tuesday will be a deciding day for markets and once I finish this flash news, I will be writing key notes in our weekly newsletter about Tuesday.

At this stage we are recommending staying long in the market because S&P has closed above 2723 level, and if it remains above this level for the next three days then the whole scenario will change in the market as predicted. We still believe that one of the greatest bull markets is coming.

On Monday book profit on the higher side in most of the markets but don't short any markets, but if the situation changes then I will update you promptly.

Stay long in Asian, European and USA market.

Now Thursday the USA market made a big move, the rest of the global markets are struggling to match the US market trend. We recommend staying long in most of the markets but stay aggressively long in USA market.

Watch 2723 level for S&P; if S&P closes above this level for three days then we may see 2769, 2800 to 2833 levels. On the lower side we don't see S&P going below 2688 and 2671 level so keep this level in mind. If I am not mistaken in reading my theory then the market won't go below 2671 from here onwards for the entire 2018.

Stay away from UVXY or any volatile etfs. Stay away from energy and metal stocks.

They will hold value at the lower side so buying is our call in China and Indian. Underline point: We still see S&P moving towards 3200; read our book carefully.

Remember this Feb 2018 statement - Now my eye will be on 2550 level; if S&P closes below this level for the three days, then disaster will take place for stocks and S&P may test 2478 and 2171 level. I may recommend closing long in stocks but let's see whether S&P will close below 2550 or it bounce back from this level. Yes. April is a very crucial month of investors. I am not worried after April but let's focus on April at this stage. If everything goes smooth, then we may see S&P testing 2900 level or even 3200. **April will be the deciding month for the future.**

Astro cycle still recommends buying YINN and INDL. Last week we mentioned that YINN won't go below \$28.00 and INDL \$72.00 level in the longer time, these levels will remain strong supports like a wall.

This is what we stated eight weeks back on Monday when S&P was at 2550 level: Last week we stated that S&P won't go below 2550 level and I still hold this prediction, in fact we don't see S&P remaining below 2650 level for more than five days. Buy most of the markets and hold positions. I am sure you must have closed long in UVXY between \$24.00 to \$34.00 level.

INDL, SPY, QQQ, TMV, TECH, AMZN, GOOGL and MSFT look like good buys on weakness.

Tuesdays astro combination recommendation: Tuesday one must watch stocks closely as it is most important day, if stocks fall then don't rush to buy but get ready to buy aggressive positions on late Wednesday or early Thursday on weakness.

Tuesday's trading ranges: **(June 2018 Contracts)**

HONG KONG (cash) – 31629 to 31291

NIFTY S&P (Spot) – 10852 TO 10745

NIKKEI – 23009 to 22745

FTSE – 7715 TO 7678

CAC – 5488 TO 5435

DAX – 13023 TO 12902

DEX EURO STOXX – 3535 – 3495

FTSE/JSE (Cash) – 52325 to 51882

DOW e-mini – 24933 TO 24777

S&P e-mini – 2742.00 TO 2723.00

NASDAQ 100 e-mini – 7005 TO 6945

RUSSELL e-mini – 1615.00 TO 1595.00

TREASURY BOND

So far our advise of selling Thirty Year bond is working, sell more positions on Tuesday as late part of this week Bond prices will fall sharply lower. Read what we stated yesterday as we are keep same predictions: Our advice in Thirty Year is working very well; we recommend staying sidelined or to keep selling Thirty year on the higher side. On Monday to Thursday Thirty year will trade mixed so short-term trading must trade in and out without any major trading positions. Read this week's newsletter to plan your medium-term trade.

Medium term bear cycle is about to begin which will take prices towards 137-00 level.

Hold your short positions in Thirty Year bond, Medium term traders must hold short positions as prices will move towards 137-00 level by June 12th.

Stay long or add more positions in TMV, TBT, and TTT.

We already stated that Bond prices will hit 137 or lower up to 127-00 level. We started recommending selling in Bond at 172-00 and a lot is still pending on the down side.

Tuesdays astro combination recommendation – Sell higher sides.

Tuesday's trading range (June 2018 contract):

TREASURY BOND – 143.06 TO 142-11

SOFT COMMODITIES

On Monday lumber and orange Juice moved higher and Tuesday will be deciding day for lumber so remain watch, great time to sell but both are very thinly traded softs, so I will recommend selling on weakness on rise. Sell orange Juice at \$169, and lumber \$615.

Coffee and rest of softs traded bit negative, we already predicted that coffee will start trading higher from Thursday so don't miss this opportunity. Cocoa will remain in the weaker trend as predicted, sugar will bottom out. Cotton will trade both side to some negative trend till Thursday.

Coffee will hold \$118 level and sugar \$10.45 so buying is recommended. Cocoa may test \$2289, lumber \$435 and orange Juice \$149 level in coming time so selling is recommended.

This what we have been saying since the last two months: *We already predicted that major trend will develop in coffee from the 16th of May so remain watchful, keep acquire positions. Cover all short in Sugar around \$11.71 and lower side it can test \$10.81 level. Coffee closing below \$118 level could open the door for it to test \$112.00 level and on higher side \$128 shall be resistance level.*

This is the fourth time Orange Juice gained value from \$133.00. At this stage in 2018 Orange Juice may trade in the range of \$133 to \$169. Higher side cotton won't move above \$87.78 level, once it closes above this level then we may see \$93.88 to \$105.73 level.

Stay away from any buying in Orange Juice and Sugar. Start buying "JO", coffee ETF.

Tuesday astro combination recommendations – Sell cocoa and orange Juice on Tuesday, wait for lumber. Buy coffee and sugar on Thursday.

Tuesday's trading range: (July 2018 Contract)

COFFEE: \$118.45 TO \$116.35

COTTON: 84.32 TO 82.88

SUGAR: \$11.40 TO \$11.07

COCOA: 2819 TO 2736

LUMBER: 617 TO 610

ORNAGE JUICE: 174.00 TO 168.15

GRAINS

Our advise of staying from the wheat, corn and soy oil remain best. We also recommended buying small positions in soy bean that proven right. On Tuesday trade in soy and meal. Stay away from soy oil.

Stay away from wheat and corn or just trade in and out, no new buying is recommended. Stay day trader and this will provide good returns.

Wheat trading below \$488 is negative news for wheat and corn must hold \$388 other wise it can fall as well. Soy is holding \$1008 and \$988 level, these are buying level but against this buying one can sell soy meal.

This is what we stated yesterday and holding same predictions: Last week grains traded lower; soy, wheat and meal came down sharply lower. Corn and soy oil remained in a mixed pattern. Soy will be a good buy at \$988 level, or at least cover all shorts; wheat may struggle so just stay away. Corn will trade negative and stay away from soy meal.

On Monday grains will trade mixed to negative; we are not recommending any buying is grains, trading in and out will remain the best strategy. Selling pressure will continue in wheat and soy meal, don't buy both these grains products.

Soy will try to hold \$988 level, so buy some positions with a strict stop-loss as going below \$988 could force it towards \$954 because overall, the short-term cycle is not that favorable.

Watch this price as mentioned on last week Thursday. Now wheat will test or will hold value of \$488 and corn \$388 level. Soy prices closed negative and may test \$988 level if it closes below \$1008. Soy meal can keep trading lower. Stay away from soy oil.

We are not changing what we stated last three weeks: *Higher side we are still recommending to book profit in soy at \$1068 and lower side \$1025 to \$1008 are great buying levels. As predicted wheat struggled to close \$488, corn at \$389 for the three days, if they close higher then we may see \$423 in corn and \$523 in wheat. Wheat will have major astro support at \$442, soy \$1008 to \$988 and soy meal at \$364 to \$352.*

For the last three months we have been stating that Wheat \$407, corn \$341, and soy \$952, are great levels to buy which has proven very right.

Tuesdays astro combination recommendations – Trade in and out, no buying is recommended in wheat and soy oil, hold sell and buy small soy on lower sides.

Tuesday's trading range (July 2018 contracts):

CORN: \$398.00 TO \$393.00

WHEAT: \$495.00 TO \$484.00

SOY: \$1028.00 TO \$1011.00

SOY MEAL: \$391.90 TO \$384.00

SOY OIL: \$31.47 TO \$30.95

ENERGY

On Monday oil prices moved bit in green. On Tuesday we are recommending selling more positions on higher sides as in this week weekly newsletter mentioned that oil prices will move lower from Wednesday so keep this in mind. Many analysts are predicting oil going back to \$100 but we are predicting that we don't see it going above even \$80.00 in 2018. At this stage we have been predicting that it may not move above even \$72.88 level so follow these selling levels closely.

Yesterday gas traded positive as predicted, we are still recommend bit bullish on the short term out in gas from last week. We recommended buying at \$2.62 with target of \$2.88 to \$2.93. Stay long for the next few days, don't short.

Stay away from energy stocks, ERX will hold value.

This is what we stated yesterday: We have been predicting that oil would top-out around this level in 2018 with the maximum top side prices could be \$72.78 for the intra-day level or won't able to close above this for the more than three days so keep this in mind.

This week oil prices will trade on both sides and will struggle to remain above mentioned ranges. Your strategy shall be taking sell at the higher level and holding selling positions in oil, heating oil and RB Gas without fear.

Natural gas has been trading in the predicted ranges of \$2.62 to 2.88 and still gas will remain in these ranges for the medium term. Lower side buying, and profit booking around the higher side is recommended.

We already mentioned that ERX would struggle to close above \$40.55 level for the three days, and last week Friday it almost tested that level, so watch closely as ERX and Oil may perfectly achieve the top.

This is what we stated on last week Monday: This will be very crucial as the astro time is turning mixed, especially from 9th May the negative time cycle is starting so let's see oil prices form a top here, then move down quickly. Complete negative trend will start from 17th May when the Sun will be changing house so overall oil is soon adopting a bear cycle and oil prices could fall 20% without any warning. This week on Monday oil prices will open in the positive trend on Monday but late Monday it may give away gains, but still best-selling will be at \$71.39 and it won't be able to move higher above \$72.78 level so keep these both level in mind.

Trade in and out on Monday, higher side selling is recommended on Monday in oil, heating oil and RB Gas. Natural gas will be good buy around \$2.62 level, trade in and out on Monday but later part of this week gas will gain value.

ERX is trading around \$35.55 level, it may test \$40.55 level.

Those who trade with everything market can only enter in short trades from 17 May 2018 in oil and other energy products like etfs.

Overall last three years this what we stated: So far, short-term trading has provided great returns in the last 18 months after my selling recommendation at \$97.00 mid-2014. You must remember what we mentioned two weeks ago: In 2001, we recommended buying oil at \$16.78 with the target of \$100 and higher. In August 2008, we recommended selling at \$145 with the target of \$32.00. Once again in 2014 we recommended selling oil at \$100 with target of \$27.71. I couldn't ask more from nature.

This is 2018, we don't see oil going above \$71.28 level and on lower side it will hold \$57.88 to \$53.88 levels.

Tuesday astro combination recommendations for oil – One can add more sell in oil, heating oil and RB Gas on higher sides on Tuesday and Wednesday. Trade in and out in natural gas. Close long in energy stocks.

Tuesday's trading range (June 2018 contracts):

OIL: \$71.55 to \$70.10 June

NATURAL GAS: \$2.87 to \$2.80

HEATING OIL: \$2.2645 TO 2.2215

RB GAS: \$2.2175 TO \$2.1710

CURRENCIES

On Monday of currencies traded as predicted. Emerging market currencies are falling hard but they are falling hard to prepare their independent trend in the coming time without following or walking behind Euro, pound and Yen.

I am watching Rupee, Real, and Peso very closely. They are trading lower and if you have deep pocket then keep building positions in these currencies from here onward without giving attentions to noise of currency market. We already predicted in this week newsletter that most of emerging market currencies will turn around from Thursday of this week. They will start gaining value against USD and many other currencies.

Frontline currencies will gain value from the lower, most of currencies have held value around lower side level as predicted in the last week newsletter.

Trading in and out will be great strategy for Tuesday. Wait for tomorrow and Thursday Flash news as we may write some important note on coming currency trend. Don't forget to read this week newsletter.

As predicted on Monday we are still recommending holding short or sell in Australian dollar and Canadian dollar. On Tuesday Yen and Franc may gain small value but watch Thursday.

In brief trade in and out, surely buy euro, Franc and Pound on any sharp weakness on Tuesday for the short term only as from the middle of week we may see some positive momentum will start but higher side will remain very limited in frontline currencies.

Dollar Index won't be able to cross 93.28 level as this stage, and this was our predictions last week and it proven very accurate.

These are great levels to take small long positions as mentioned last week and these levels may be bottom for the short term: Yen will test 0.8888, euro may achieve our most crucial level 1.1775 and Pound 1.3475 level. For Franc, the lower side target will be 0.9959. We predicted these levels three weeks back and most of currencies collapsed.

We strongly recommend buying more Rupee Real and Peso. Stay away from Rand.

We stated three months back and keeping the same recommendations - Great selling in euro around 1.2488 to 1.2555, Pound 1.3988 to 1.4375, Canadian 0.8188, and Australian dollar 0.8098.

In the worst-case scenario, we may see USD testing 88.61 level so remember this and buy USD on weakness as May 2018 onwards a major bull market is starting in USD. Don't trade with leverage positions in the current time cycle. Dollar won't fall below 88.61 and 88.31 and will have difficult time to cross 91.00 level at this stage, and Pound is ready to move towards 1.3525, Franc 1.0217, and Euro 1.2021.

Tuesday astro combination recommendation – Cover shorts in most of currencies around lower side level or buy some small positions. Start buying emerging market currencies.

Tuesday's trading range: June Contract

DOLLAR INDEX – 92.69 to 92.12

AUSTRALIAN DOLLAR – 0.7553 to 0.7488

CANADIAN DOLLAR – 0.7839 to 0.7787

BRITISH POUND – 1.3602 to 1.3527 (Spot – 1.3603 to 1.3495)

EURO – 1.2001 to 1.1901 (Spot – 1.1965 to 1.1868)

JAPANESE YEN – 0.9168 to 0.9105 (Spot – 0.9151 to 0.9081)

USD/Japanese Yen - (Spot – 109.97 to 109.29)

SWISS FRANC – 1.0071 to 1.0003 (Spot – 1.0041 to 0.9969)

USD/Franc - (Spot – 1.0036 to 0.9959)

RUPEE – 67.98 to 67.41 (Spot)

RAND – 12.41 to 12.23 (Spot)

Thanks & God Bless, Mahendra Sharma

15 May 2018, 05.00 AM, Mumbai

Small part from past Flashnews:

Remember this what we stated on 22 September 2016: **Gold will struggle to move above \$1348 and silver \$20.28; these are the selling levels in both these precious metals but remain as a day trader for this week.**

This is what we mentioned on 11 August 2016: **Higher side in gold can rise maximum \$15 from current level of \$1348 and lower side more than \$300 by end of February 2017. Sell more NUGT around \$178 and JNUG around \$320; these levels were the previous highs last month. Add more buying in DUST.**

From stock market sections:

INDEXES:

This is what we mentioned on Tuesday, the 25th of January 2016: **Tuesday will be a great time to acquire positions in the emerging markets as well as in the European markets. If what we are seeing happens then S&P should move towards 1936 or even higher and down side, it won't go below 1844 or it won't close below 1862 level.**

On last week Thursday and Friday S&P closed higher and finally settled at 1901 levels. Those who have been following our works for decades must know how important our astro support and resistance levels are. Last year also the lower side astro resistance was 1827, and the higher side 2088. Both these levels played a very important role for the market. So far the support level of 1821 played an important role on Wednesday and we are hopeful that S&P won't go below this level in the year 2016 and that the astro support and resistance levels continue playing an important role.

This is what we mentioned the 18th of Jan 2016: **On Friday investors experienced a nightmare. It was day that no investor likes to see because on this kind of day the trading accounts of longer term investors are always deep in the red. In 2000 when the tech stocks crashed we never recommended any buying to investors because the astro cycle was negative for two years and it was clear that the market may remain down for the next two years. In 2008 crash which we predicted, we were also aware that the market would rebound from the 26th of February 2009. We recommended that the market would bottom out on the 6th of March 2009 and that investors should start accumulating stocks keeping in mind that they have to hold them for five years and that they would make a fortune. We strongly recommended, not to focus on the daily volatility and keep busy accumulating quality stocks. This proved to be very accurate advice.**

This is what we mentioned Monday 8 August: Billions of dollars follow our predictions closely so some support always comes around our predicted levels. 12th February 2016, S&P moved more than 360 points rally which no one expected.

This is what we mentioned on the 29th of February: At this stage we are expecting that the Indian market will perform, so this is a great time for international investors to put money in the US market as Rupee is at a historic low and the market has already corrected 26% from higher levels. Brazil and China have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies because any turn around in **Brazilian Real can push BRZU toward \$39.00 from 9.30**. S&P closed above 1938 and if it closes above 1938 for more than two days then expect it to move towards 1988 during this week or next week.

Two weeks ago we predicted that 1864 is a great buying level with the first target of 1938 and 1988. The first target got achieved very quickly and the second target will get achieved soon and after that our most important astro resistance level will be 2088, which has played a crucial role in keeping the bull away to move above 2088 for the last 16 months.

Thirty Year Bond

This is what we mentioned 10 September: *Tuesday Thirty Year Bond gained value, and same indicating on Wednesday. Fed may leave rate decision sideline which can push bond toward 168/169. Rate hike may bring prices 162 level. Overall trend is negative so get ready to sell on any rise if FED refuse to hike.*

In the last ten weeks' bond prices came down from 176 to 165 as predicted and our longer-term view is very negative so keep building sell positions on any rise.

By the end of this year we may see 162-25 and 157. Stay long in TTT, TBT and TMV.

Energy:

This is what we stated 17 April, Monday: *ERX lost more 5% value and if ERX trade below \$30.00 then there are chances that it will test \$25.50 level which means oil prices will trade negative in coming time.*

Once again oil will try to test \$54.78 but if this week it fails then we may see \$47.00 level once again. Major astro support point is \$49.88 level. RB Gas and HEATING OIL will follow oil.

On Monday oil prices will trade mix to negative but in USA trading one can take small buying, if oil fail to rise on Tuesday then expect major corrections in once again in coming time.

On Monday Natural gas will trade mix and prices will move both sides, trading in and out will remain best strategy in gas on Monday. Sell or short around \$3.38 level.

This is what we mentioned on 8 January - *Natural gas went down sharply as predicted and tested \$3.16 from \$3.83, and the volatile trend will continue in GAS so trade carefully. Oil will only be able to move higher if it closes above \$54.78 for three days which we don't see happening.*

Energy stocks traded mixed. ERX is unable to move above \$43.00 and oil above \$54.78 which is not a good sign for the energy market.

We are not changing any of the predictions we mentioned on the 3rd of June: Same kind of positive, RB GAS and heating oil also moved higher. Natural gas traded mix. ERX have been hanging around \$29.00 level and it must close above \$33.00 level to give bullish signal in energy stocks which we don't see at this stage moment.

Oil has been failing to close above \$48.88 level but same time it is not closing below 48.88 level as well. If oil closes above \$48.88 for three days, then the next price level of \$52.55 may get achieved. At this stage some

selling is recommended around \$48.88 level and on the down side the important level to buy is at \$44.55. Oil prices have gained almost 70% from \$27.71 which we called the perfect bottom for oil.

This is what we mentioned on the 2nd of February: Many are predicting oil remaining in the teen's, but we do not see oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will struggle to move above \$35.18 levels, and if it does than \$44.55 is next target with \$48.88 selling level.

Natural gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural gas around \$1.72 and below.

This is what we mentioned in our book "2016 financial Predictions" in oil sections:

IMPORTANT NOTE: As most of you are aware our view for energy has been very negative since June 2014. The overall trend in energy prices will remain negative so we do not recommend adopting long term positions. This means that do not take any trades earlier in the year and continue holding them for the rest of the year, because the higher side in oil will remain limited. There will be better opportunities to make money by trading in and out. Heating oil and RB gas will follow oils trend, so during this year we may see oil moving towards \$48.50 or \$52.95, and on the down side it may hold \$34.55. If it closes below \$35.55 for three days then there are chances that oil prices could fall towards \$29.65. Traders should take advantage of buying short term call options before any of the above-mentioned cycles start, and also book profit quickly before the positive cycles end.

Energy stocks will trade mixed without any major movement, so longer term investors should not be putting any money in energy stocks. Any sharp rise should be taken as a profit booking opportunity if you are holding any energy stocks.

Natural Gas' trend will remain positive during 2016, so one can stay long in Natural Gas in the year 2016. However, it is very important to remember to keep booking profit before any of the above mentioned negative cycles start. Overall, Natural Gas will outperform oil in the year 2016.

For short term strategies and price targets please follow our weekly and daily newsletters.

Ninth Cycle:

From the 26th of November to 31st of December 2016 - During this cycle we see positive momentum coming back in the energy market and oil prices will form a bottom, and oil stocks will also act positively. Even though this is a positive cycle, the higher side will remain limited. Natural gas and RB gas will move sharply higher during this period.

Energy trading ranges for 2016:

Crude Oil: \$52.95 to \$29.78 (As predicted last year that oil may hold \$30.00 level and if its trade below for five days then possibility that could test 2002 low of \$27.78 level)

Natural Gas: \$2.88 to \$1.82 (higher side \$3.57 if it cross \$2.88)

Look at accuracy level about oil what we predicted in the book.

This is what we stated Monday, 31 Oct 2016: *Friday oil, heating oil and RB Gas traded negative as predicted. Energy stocks also went down but gas traded mixed. On Monday, oil will trade negative; stay sidelined or those who are holding shorts can continue holding and cover some around \$47.50. If oil starts trading below this, then expect \$46.75 to \$44.88 level, cover all shorts at \$44.55 level. Heating oil and RB Gas will trade negative or will follow oil. On the higher side, oil will struggle to remain above \$49.88 level which is the most important astro resistance level.*

Natural gas will trade on both sides without any clear directions so avoid trading but on the lower side one can buy GAS for Tuesday. Don't touch energy stocks as they will keep struggling.

This is what we mentioned on for Friday 2 Sep 2016: *On Thursday oil, heating oil and RB Gas prices went down sharply lower and weakness will continue Friday. One can cover 50 to 70% shorts around \$42.61 level in oil and 100% around \$41.78, so one can cover positions in heating oil and RB Gas on Friday.*

This is what we mentioned Monday, the 21st of December 2015: *Last week energy traders remained very nervous as they felt like abandoned by the bigger financial institutions and other large energy investors, but the truth is that every energy trader or investor is badly stuck energy trades.*

In 2008 we predicted a crash in oil from \$145 and in 2009 we predicted that it had bottomed out at \$33.00 level. That prediction provided great returns those who invested in oil and energy stocks. Now once again after the prediction of oil falling in 2014, since the last two weeks we have been predicting that oil would form a bottom around \$34.55 level so watch this prediction closely. I am not saying that oil won't fall below \$34.55 level but surely those who will buy around this level may be rewarded handsomely.

Maximum fearful days: According to the current astro cycle we see another 12 volatile or fearful trading days are pending but the down side is limited.

This is what we mentioned on the 27th of August 2015: *If oil trades below \$47.00 for two days then there are chances it could retest our magic support figure of \$44.55. If it starts trading below \$44.55 then next level \$38.50 so avoid buying positions.*

We are not recommending any buying in heating oil and RB gas, also one should avoid buying any energy stocks.

This is what we mentioned on the 27th of April 2015: *Adopt trading in and out strategy in energy, **but don't take any shorts in oil, heating oil or RB Gas. Sell some energy stocks.** Energy stocks will trade mixed without any major move so one can get ready to sell energy stocks. Higher side it is possibility that oil may see \$63.80 level, if its hold \$57.00 level. Keep adding positions in Natural gas around \$2.55.*

This is what we mentioned on the 5th of March 2015: *Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors. On Down side oil will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.*

Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for oil is \$47.00. ERX won't be able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.

This is what we mentioned on the 3rd of January 2015: ***On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating oil and natural gas lost value as well on Monday. Don't buy RB Gas and heating oil but surely natural gas can be bought around \$2.71.***

This is what we mentioned on the 23rd of December 2014: ***Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.***

This is what we mentioned on the 11th of December 2014: *Wednesday our fear proven very true, we strongly recommend to stay away from oil. When oil broke \$92.88 we recommended sell oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.*

This is what we mentioned on the 5th of December 2014: ***Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, oil, RB gas and heating oil. Natural gain gained value from the lower levels on Friday as predicted.***

On Monday the higher side will remain limited, and if oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like oil is getting ready to break \$60.00 so stay short or add selling on any fall.

Currencies:

his is what we stated 4 January 2017: *We don't see dollar index going above 103.78 level so watch closely and closing below 102.55 will push dollar toward 101.55 level. Most of currencies gained nice value on Wednesday, emerging market currencies had best day.*

On Thursday, most of currencies will trade both sides, buying is recommended on lower sides in most of currencies so don't miss opportunity.

Buy Pound, Yen, Australian dollar and Canadian dollar. Also buy Franc and Euro without fear.

Astro cycle changed late today on 3rd January so safe buying in all major currencies against USD.

Dollar closing below 102.75 will confirm that it would test the 101.55 level this week.

We are not changing any predictions in currencies of what we mentioned on Monday, 31 October 2016: *Once again tested 99.00 level but then sharply came down from the middle of the trading sessions. We are still recommending to keep building positions in USD around 99.00 level. On Monday, we still recommend buying Euro and other currencies around the lower side, or selling USD around the higher side level. On the down side USD may hold 96.71 level so watch this level closely. Euro can move up to 1.1111 level in this week, so book profit if it goes there.*

On late Monday, the Scorpio Moon will bring both sides volatility. On Wednesday, the FED will announce decisions and due to the Scorpio Moon traders will get confused. Trade light or just trade in and out in currencies but medium term traders can hold selling positions in USD.

Stay short in Yen but one can cover Japanese Yen as it may move towards 0.9525 to 0.9250 level at this stage.

This is what we mentioned Monday on 29 August 2016: *We see Euro holding 1.1055 level and Pound 1.2925 level. We don't see it falling below 0.9410 level and on the higher side it will have a difficult time to move above 1.0198 level. For USD index 97.00 to 97.50 level will play the role of a Wall for dollar which dollar may not be able to breach at this stage, or maybe even for the next six weeks, and on the down side USD may test 92.50 level.*

This is what we mentioned last week on Monday, 25 July 2016: This is what we mentioned on Wednesday, the 13th of July: *Any rise shall be taken as selling opportunity in Yen, in the next two months we can 900 pips in Yen or it will easily come down to 0.9200 level very soon. We don't see Yen moving above 0.9878 level and in the worst case scenario 1.0000 will be maximum side.*

*Friday USD tested 97.50 level and this is an important level. Dollar may keep testing this level during this week. **We don't see Euro going below 1.0923 and Pound 1.2988 level.** Pound should be in you aggressive buying list until it holds this level.*

On Monday, the 11th of April 2016 we stated: *Last week USD traded negative, and lost value against most of currencies. There are still chances that USD may test 92.50 level so watch USD trend closely, and start taking positions at 92.50 level.*

Emerging market currencies have done very well and it's time to close positions if you are short or medium term traders. Rupee won't fall much so don't short Rupee but surely Rand, Real, Peso and Rubble will lose some value from middle of Monday.

Australian won't hold above \$0.7725, Canadian dollar 0.7900, Euro 1.1475, Franc 1.0555, and Yen 0.9288 level.

This is what we mentioned last Thursday: *Pound is ready for 1.4123 mark. Sell Pound and add more Swiss Franc sell.*

We are not recommending any new short in Euro, surely one can acquire some positions in Euro for the short period of time.

Emerging market currencies are getting ready to for bottoms expect few won't be trust like Rand and Rubble. Wednesday we see many currencies gaining some value but stay away from Pound, Canadian and Franc as they can keep making new lows so hold positions with 3% more corrections.

This is what we mentioned on the 22nd of December: *Euro will struggle to move above 1.1075 and may hold value 1.0725 so watch these both levels closely.*

This is what we mentioned on the 23rd of April 2015: *The Medium and longer term trend is still very positive for USD but for the short term a mix to bit weaker trend indicated. USD Index have achieved our target of 100 and now down side 95.00 or at worst case 90.00 level will be great buying.*

Dollar is our longer term buying trade so we won't recommend shorting dollar, we recommend buying USD on any weakness. Euro higher side 300 pips and lower side more than 3000 pips. We don't see USD index going below 95.00 levels.

Remember this what we mentioned on the 5th of March 2015: *Currency war has nothing to do with USD Friday USD gained value as predicted. Medium and longer term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.*

Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.

This is what we mentioned on the 15th of Jan 2015, Monday: *Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just finished one interview from Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell as it will going to go back to par levels.*

This is we mentioned on the 2nd of October: *On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.*

Remember, this is what we mentioned in the month of July: *At this stage USD is trading in a positive direction without any break since the last three weeks. Finally, it is reaching a most crucial level because once it breaks 81.78 then the nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.*

This is what we mentioned in the month of May (2014): Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.

In this year book "2015 financial predictions" we predicted "final bear cycle in market from 27 July to 15 August 2015", yes Sun can bring some uncertainty but take this uncertainty as buying opportunity in same time in 2015 in the month of August.

Watch 2088 level for S&P, as it is most tough astro resistance of 2015. In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

In our 2015 book we mentioned that commodities will have worst year of 2015, and so far precious metals, base metals, grains and softs have been struggling and they will keep moving down in the second half. Dollar will perform amazingly well in 2015 so hold positions and money in USD.

Make wave of nature/astronomical cycle an integral part of your trading/Investment strategies!

www.mahendraprophecy.com

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
