## Friday Daily Flashnews (Unedited report)

**Guys it is GILD, its drug is working to treat Coronavirus...**

Dear Members,

Two months back out of all drug makers we recommended **Gilead Sciences Inc (GILD)** stocks to buy as we saw GILD as first one coming out with Corona treatment, and today after market hours it announced that its drug is working well to treat coronavirus patients. GILD is up 17%, and it shall open up sharply higher on Friday. Also, the market moved sharply higher on **Gilead** news and S&P tested 2884 level. Stay long

as once FDA approves it drug then we may see

minimum \$130.00 price. In every report since the last two months we have been recommending buying GILD for Coronavirus treatment.

All major recommended **healthcare companies** are moving aggressively higher in the last ten days. I am very thankful that Nature and the astro cycle have been kind on us to guide you in the right directions with the right recommendations. A few of our members today sent us notes of thanks, saying that "Mahendra we held the stocks you recommended in biotech, healthcare

and other tech stocks and they performed so well.” Yes, a few other emails were talking about the market trend and how accurately we have been guiding since the last one month in this most crucial time. I don’t want to take any credit because it is all about the astro cycle and wave of nature.

**TSLA, RNG, SHOP, VEEV** and many other testing all time high when market is still far below from all-time high.

I stated in November that follow our theory the on the market closely because it can work very well for that the next 19 years (if nature allows me to remain alive) and **after that we may stop publishing reports.** Our advice always has been to focus on the medium to longer term as I still haven’t seen in my life that anyone has made money by thinking and planning short term trades. Yes,

you can have small capital in short term trading but if you have views on something then you must hold positions for the longer term and that is how every big-name investor made money in Wall-street in the last 120 years. So, why don't we follow the theory which is working for 120 years. Astro cycles always guide us on what will perform better among market, list in 2015 we recommended closing long in biotech and since the middle of last year we have been recommending buying or investing in biotech. This year we have been aggressively recommending buying healthcare and selective stocks.

Buy stocks thinking for the medium to long term. Since 23<sup>rd</sup> March 2020 the negative astro cycle ended and markets and stocks have been moving nonstop higher as predicted, 2200 was a great level to buy on 23<sup>rd</sup> March and on the higher side we provided 2881 level which got achieved today. Our date of the bear cycle in market ending from 23 March was right on the dot, and the same was mentioned in our book as well.

Metals and energy traded mix, higher metals selling recommended on Friday, Energy prices are close to bottom, grains and softs remained in the mixed to negative directions.

Currencies remained negative as predicted, but on Friday we may see a sharp rise in emerging market currencies and may frontline currencies gain small value.

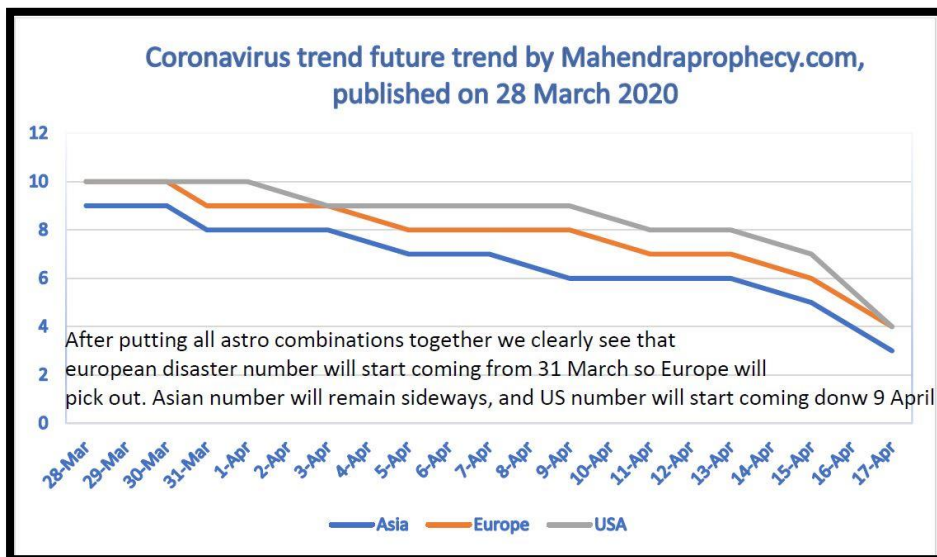

**AMZN, NFLX, DXCM, TSLA, RNG and ATVI** are performing very well, and these stocks will continue to perform well in the coming time.

**CLX and STE** are two great stocks to hedge against Coronavirus.

Coronavirus numbers in Europe are dropping, which is great news, and the number of deaths are also dropping so watch this carefully and Europe is ready to normalize in the next two weeks.

USA coronavirus numbers are to top out, and the numbers of deaths will fall sharply in this week so get ready for some great news. The Sun is ready to shine on the world, and I know the power of the Sun so trust my word because Corona Virus numbers are ready to drop drastically after this week. The worst will become 100% normal by the 30<sup>th</sup> of JUNE as predicted, I have 100% trust

in the astro cycle and wave of nature theory.

Below are two of the important

predictions that we made in the last ten days on this pandemic, please share with as many as people:

This is what we stated on 29 March:

<https://www.mahendraprophecy.com/article/cure-for-covid19-coronavirus-predictions-for-europe-usa/1604>

This is what we stated on 22 March:

<https://www.mahendraprophecy.com/article/coronavirus-covid19-predictions-march-april-2020/1600>

When I was writing this year's book "2020 Financial Prophecies", the main point that we saw was that there would be some uncertainty and that's the reason we predicted that the second cycle would remain negative, and advised investors to stay away from the market. Now we are running is the third positive cycle which started from 23 March and market have been moving higher since third cycle started.

16<sup>th</sup> April 2020, 05.00 PM, PST time

This is what we mentioned 15 April 2015: *As we said, our most favorite stocks just buy and keep it on the side until the bull market is there; and this bull market is still to remain for the next two years. In 1995/96 when I was Africa, I invested in Satyam computer at Rs. 15 (sold in early 2000 before tech crash at 5900.00), SSI at Rs. 29 (I sold it at 11230.00) and Mastek Rs. 210 (sold at 5900) & BFL Software at Rs. 55 (sold at Rs. 980). In 1995/96 I saw a historic bull market coming in tech and internet stocks, I also predicted that there will be a rush to buy these stocks and they could move thousands of percent and that happened by 2000. This was the first fortune I made from nothing.*

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
