Tuesdays Daily Stock Report (Unedited report)

Crypto currencies...

Dear Members,

On Monday GBTC bitcoin etf moved 29% higher, it moved 200% in the last one month. Bitcoin and other crypto currencies are making everyday headline and all products related to Crypto currencies could still go crazy till 8 January. I started writing about GBTC when it was \$138, and now \$3465. It can keep moving higher another 10 to 15 trading days but now time is very close to crash. We already predicted that Bitcoin and Major Crypto currencies will collapse after 8 Jan 2018.

close to crash. We already predicted that Bitcoin and Major Crypto currencies will collapse after 8 Jan 2018.

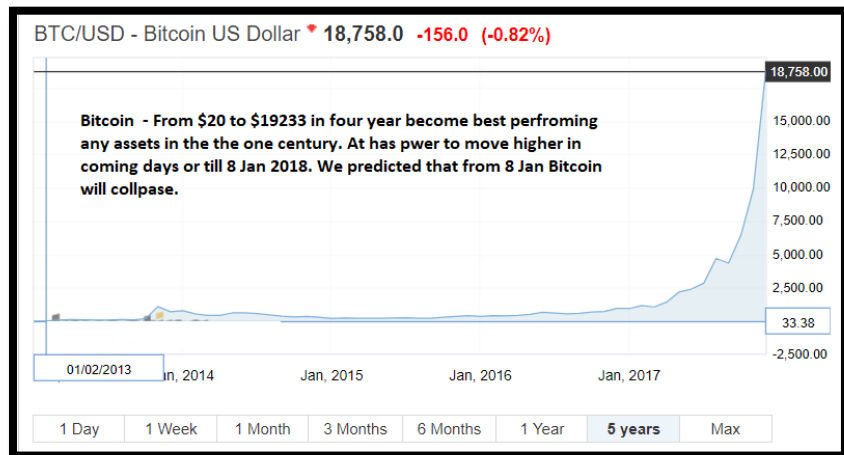

LONGFIN (LFIN), serge 2500% in the last two days, it is small cap after acquiring a blockchain company. It madness but for many it is working those who are putting money a risk. If you are putting 10% with thinking of losing everything then you can enter in this crypto currency market. Keep your eye open and anything new coming in this area a worth taking small risk for the time being.

Still largely 99.9% investment community doesn't have clue how to trade, what to trade and whether it is safe trade in crypto currencies. In fact, those who initially invested in these areas also doesn't have clue what will be price and what is right price. It is mystery to everyone. You can take some limited exposure for the next two weeks if you are ready to lose 50% money.

LFIN may move aggressively both sides but there are chances of making some money, it may also 90% value in coming time but before that happens it can go crazy. Market cap multiplied unbelievably in the three days.

Stock market made another high, now

everyone is waiting for Tax bill to pass which shall happen in the next 48 hours. Modi won key Gujarat elections state election, but margin was very thin which really put bit dent in his image. We expected 55% seats which he got but most of exit poll predicted huge victory which never materialized. Also Yesterday, Cyril Ramaphosa won ANC chair as president which pushed South African Rand Sharply higher. This is what we predicted in Sundays' letter: *On the other hand, most of the exit polls have given an overwhelming majority of votes to Modi's government in the Gujarat State Election. Yes, there is no doubt that Modi can win the election, but I don't see a landslide victory for him. He may get a 55% majority or maximum 110 seats in the Gujarat elections.*

*Indian Investors should close all bear bets in the market once the election results get clearer. In South Africa the ANC will also chose a new leader who will be the next candidate in the 2019 election. **There is no doubt that Saturn has impacted geo-politics ever since it changed its house on the 26th of October. The GOP lost a total of 4 state elections; Mugabe was overthrown; Brexit is getting complicated; The Germans are not very clear whom their next leader will be, or which party shall rule; power is shifting in Saudi Arabia; Austria chose a 'Far Right' candidate; and Republicans lost in Alabama and Virginia - which was the biggest surprise to the Trump camp. There is no doubt that Saturn is in a different mood and if it provides a simple majority to the BJP, it could be a dangerous sign. If the ANC of South Africa choses Cyril Ramaphosa, it is 100% a sign of change coming in the world geo-political system, for now and the next two years.***

Tax bill is ready to pass in the next 36 hours, and market is moving in joy, cooperates are completely gainers but not common man. Let's see how this tax cut works for USA, at this stage it is working nice and it will work good for the next few years as it will boost financial health of corporate world.

Lithium stocks started moving higher, SQM moved around 7.5%, keep building long positions in lithium stocks or lithium etfs.

19 November 2017, 03.00 AM, Mumbai

This is what we predicted on 19 September - *We are still recommending to hold positions in **GTT, MXL, ORBC, BLDR, IPHI and MCHP**, we recommend to hold positions in these stocks. (discloser – we are holding positions in these stocks).*

*Chinese stocks are doing well, **YINN (3X Shanghai Index)** should be in your list of buying, and ADR's **NTES, MOMO, YY, EGRX, and BABA** will keep moving higher, and big rally shall start from middle of October. We recommend **WUBA** many time, if you don't have in your portfolio then must add **WUBA**.*

Recommended on 15 Feb 2016: *Important note - **We are expecting MARCH TO JUNE 2016 a major bull cycle in equity market which may put all major global market on extreme upward trend. USA market shall keep making new higher during this cycle.***

This is what we mentioned 15 April 2015: *As we said, our most favorite stocks just buy and keep it on the side until the bull market is there; and this bull market is still to remain for the next two years. In 1995/96 I bought Satyam computer at Rs. 15 (sold in early 2000 before tech crash at 5900.00), SSI at Rs. 29 (I sold it at 11230.00) and Mastek Rs. 210 (sold at 5900) & BFL Software at Rs. 55 (sold at Rs. 980). In 1995/96 I saw a historic bull market coming in tech and internet stocks, I also predicted that there will be a rush to buy these stocks and they could move thousands of percent and that happened by 2000. This was the first fortune I made from nothing.*

Make wave of nature/astronomical cycle an integral part of your trading/Investment strategies!

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
