Wednesdays Daily Flash news (Unedited report)

It is not Hippie's era, it is magic of astro wave cycle which is creating wave in Cannabis...Yes, this bubble could be bigger than tech as predicted

Tuesday USA market closing higher could open door for amazing era of bull market but...

Dear Members,

Since last six months, I have been constantly recommending buying Cannabis stocks. When I was writing about Cannabis I felt some kind of very weird feeling that pushed me to used extreme words in my letter like biggest bull market or historic bull market in Cannabis.

May time in the 2018 we constantly predicted that Cannabis stocks bull market could be bigger than Tech/internet stocks bubble of 1997/1999, we also said that this Cannabis stocks **will create euphoria bigger than bitcoin.**

In the last one-month price actions in few of our recommended stocks have been moving very aggressive higher and this is nothing, it is just starting point. My future visions pushed me to start Cannabis letter, and finally two months back we stated added Cannabis recommendation lithium stocks letter. Better you start putting some money in Cannabis if you like to be part of most exciting ride of coming time.

In 1996, I was screaming to invest money in internet and tech stocks, in 2001/2 all-natural resources stocks (mining and energy), in 2009 back to financial and tech stocks, in 2012 Chip and semiconductor stocks, in 2012 end Cloud stocks and now Cannabis stocks.

In between in 2009 I recommended buying Uranium stocks, they performed very well initially but Tsunami of Japan killed that sector as everyone started moving away from nuclear energy.

Two months back we predicted in our note that Elon Musk will be man of this century, but in same note that he would have tough time till 11 March 2019, and time could be very tough for him and he must take care. I also said that **if he survives than his rise will be limitless. Lately we have been witnessing that he has been going through rough patch.**

Now we are close to time, we need to take very important decisions if we are holding big portfolio because money sifting will take place in different area and this I will discuss in

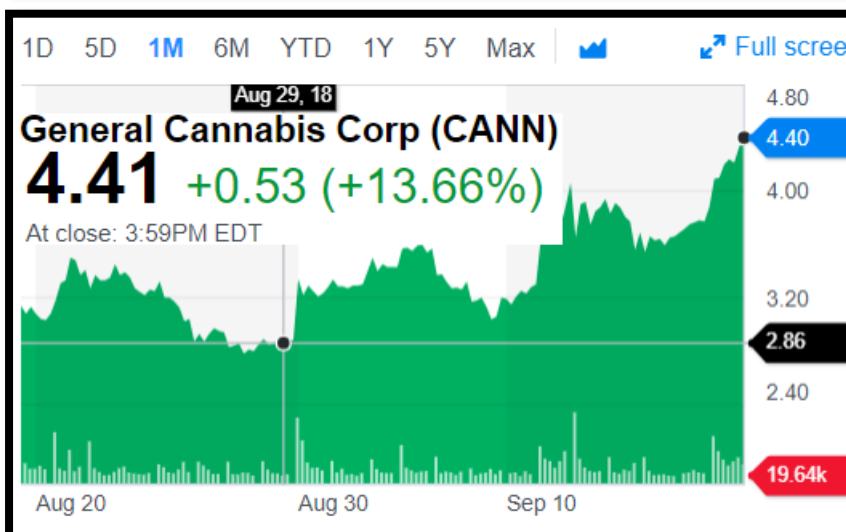

coming week newsletter.

Here are few Cannabis stocks, looks at their price actions, this is starting point and I don't know what will happen in the next two years so get ready to be part of this most exciting journey. I strongly recommend to subscribe this services.

Let's see how few of these stocks performed in the last one month:

I already decided to we will put every few times in a week note in Cannabis letter rather than only monthly report. I am very excited about Cannabis stocks as they will play key role in medicine or biotech industry and they will be part of food or recreational industry.

I am not saying that hippie's era is coming back but now it will be completely different industry.

Yesterday metals gained value, energy prices traded both sides, grains and softs traded negative and dollar traded both sides. Thirty Year Bond tested new multi-year lows as predicted. Except Coffee, rest of predictions are doing amazingly well.

I am in India for some time so timing of sending this letter will be around 6.00 Indian time. Next month I will be in Africa then back to Santa Barbara.

This is what we stated yesterday: Cannabis stocks were on fire: **CBDS, ACBFF, CANN** and many stocks gaining momentum when on other hand markets was falling sharply lower with most of sectors. It is my most favorite pick area and I know that trader and investors will make fortune. I am planning to put updates few times in a week on Cannabis area so don't miss to subscribe this service.

Mahendraprophecy.com fresh look just launched today morning...I am sure you will like it, it is user friendly with PC and Mobile.

Now we are entering in the most crucial week because Sun and Mercury will be changing house, they will move in 12th house of Jupiter, so expect volatility in market.

Commodities like metals shall hold lower side value but closing negative could be negative news. Energy prices to trade in the uncertain directions and soy in process of bottoming out so remain watchful.

Cannabis stocks shall trade stable after last week volatility and watch financial stocks closely as we shall get ready to buy some positions on weakness as financial will start announcing earning from end of first week of October.

Gold need to close above \$1209 for the three days to confirm that it can push toward \$1227 or higher closing below \$1182 level could trigger selling so stay alert.

Oil is close to achieve top so get ready to sell positions aggressively.

Dollar Index closed blow 95.15 level which is negative news for dollar, closing below this level for the three days could push two point lower in coming day.

Watch the important support & resistance levels updated on Monday, the 17th September 2018:

- Gold is trading between \$1209 to \$1182, silver, platinum, copper and other and struggling. Gold staying below \$1209 is bearish sign. These both levels are now the important astro resistance level and both these metals need to close above these levels for the three days to give short term buying recommendations. Silver will follow gold. Gold closing below \$1182 could push gold toward \$888 level.
- Base metals are struggling but holding lower ranges; copper, zinc, aluminum, lead, nickel, and palladium are traded both sides. Base metals started a negative astro cycle from 11th June 2018. Copper came down from \$332 and tested \$2.57 as predicted on the lower side level, which is very crucial astro support; breaking this one could bring another 5% fall in copper prices and on the higher side it will struggle to move above 2.84. Most of the base metals are holding the lower side level which they achieved last month. Stay with light trading, this is not the time to buy.
- Palladium from \$1135 to \$821, platinum from \$1015 to \$775. Zinc from 3578 to 2286, and many other industrial metals traded around 2018 lower side, but they are holding lower side levels. Stay away from any buying.
- The important astro resistance level for oil will be \$73.88 and \$69.78, oil won't be able to close above this level for three to five days in a row, now the support level will be \$65.88 and \$63.88 support levels.

- Buy gas only if it closes above \$2.61 for three days. The maximum higher side is \$2.98 and lower side \$2.68 level. Selling recommended at \$2.98.
- ERX has been trading between 33.51 to 39.88 level, these will be trading level, if ERX trades below this level than don't buy recommended.
- Higher side 147-00 and lower side 143-00 is very important support level, below that 137-00 is our target.
- The major astro support is still at 2888 and 2861 levels for S&P, and now short term astro resistance at 2915, on higher side major astro resistance will be at 2978 level. Stay away from most of European markets, China, Russia and south American market.
- Dollar Index trading around 95.15 level, closing below this level for the five days could bring sharp currencies but at this stage remain short term trader. Higher side it tested 97.18 level as predicted and it won't able to move this level. Lower side it tested 94.41, 93.38 and 92.38 levels. These are both important numbers. These achieved: Selling recommendations pound at 1.4475 and Euro at 1.2495. Selling around these levels is recommended with a price target of 1.3025 and 1.1555. Stay away from Australian dollar, Canadian dollar and Franc. Yen will remain weaker. Emerging market currencies will gain value from first week of September.
- For Orange Juice came down from \$171 level and may test now \$150, sugar may test \$9.71 on lower side, cotton may move toward \$82.88 and \$78.78 in the worst-case scenario and higher side \$85.38.
- Coffee is trading around \$101.35, may hold these levels. Lumber bottom have achieved. Cocoa may trade mix, but close to bottom.
- Soy oil has had a major astro support at \$28.01, Selling is recommended at \$34.88. Selling recommended in wheat at \$568, Corn \$523, soy bean \$1088 and Soy meal \$400. Now major support for soy at \$815, corn \$343, Soy meal \$307, and wheat \$453.
- UVXY is great bet due to current astro cycle is volatile.

Here are the trading strategies and ranges for Wednesday:

GOLD/SILVER/BASE METALS

On Tuesday base metals gained value, china is key player and it will be interesting to watch in coming time with trade war situations. Precious metals remained mix. Precious Metal stocks marginally went higher.

On Wednesday late positive astro cycle is ending so lets wait and watch, if metals trade positive on late Wednesday to Friday then expect short term bottom in precious and base metals.

Our predictions that late Wednesday to Friday precious metal shall trade negative so let's wait and watch. You can trade in and out in precious and base metals as mentioned below ranges, and keep close watch higher side levels.

DUST is holding above \$38.88 level which is not a bullish sign for precious metal stocks.

At this stage gold will hold \$1182 and will struggle to close above \$1209 for five days. It is time to sell Palladium at \$875, and most of metals on the higher side. **Copper will move in the range of \$278 to \$257.00** in the medium term and Silver \$15.11 to \$13.89, so medium term traders must remember these levels.

Medium term outlook: Gold closing below \$1209 could be the worst new for metal traders; the first immediate target could be \$1180, \$1145, \$1059 and then \$891. Silver will follow gold and platinum as well. Maximum higher side \$1238 for gold and \$15.55 for silver in last four months of 2018.

On 11 June this is what we stated: Metals to entered in worst bearish cycle for the medium term and these prices are possible on lower sides, if metal trade below these levels then they may adopt worst cycle – Gold has major support at \$1209 to \$1181, Copper tested \$257 astro support, silver at \$14.15 and platinum \$781. Palladium is in a longer-term bear market so no lower side limit or any major support till \$623 and medium-term support at \$842. Selling recommended in gold \$1357, copper at \$332, Zinc 3575, palladium \$1135 and many other metals around higher side.

This is what we stated last week: From 7th May 2018, crucial astro cycle is starting for gold and you need to be remain very alert because trading negative could push gold toward \$1262 level and after that \$1238 and \$1209. Silver and platinum will follow gold.

Get ready to sell or short aggressive positions in Copper, Zinc, Lead, Palladium, Nickel from 5 June 2018. In the next two and half months 20% or more correction is on the way in the base metals.

This is what we stated in the month of February 2018: On the lower side gold will hold \$1305, \$1298 to \$1262 in 2018, closing below \$1262 would open the door to collapsed toward new multiyear low toward \$1209 to \$1145 or even \$1055. On higher side I am raising my target for gold to \$1509 if gold closes above \$1364 for the three to five days which looks very difficult, so it is getting clear that \$1364 is most crucial level for gold on higher side in 2018 and from this level only gold could start falling so at this stage \$1509 looks very difficult.

Wednesday's astro combination recommendation – Trade in and out in Precious and base metals on Tuesday, sell precious metals on higher side on Tuesday.

Wednesday's trading range: (December 2018 contract):

GOLD: \$1212.00 to \$1195.80 December (Spot ranges \$1206.80 to \$1193.00)

SILVER: \$14.33 TO \$14.09 Dec

COPPER: \$274.75 TO \$267.25 Dec

PALLADIUM: \$1012.00 TO \$993.00 Dec

PLATINUM: \$822.00 TO \$799.00 October

INDEXES

On Tuesday USA market made huge reversal, also other market gained as well. Indian market remained underperforming market due to no clear economy policy from Government, they seem very confused at this stage but astro chart is positive, so I am not that much worried about market trend in India.

On Wednesday one can hold stocks, remain day trader, Tuesday Wall street going higher clearly giving most powerful **ASTRO** indications. Stay long and close some positions at higher side, don't short USA market. S&P is above 2888 level which is bullish sign.

Cannabis stocks were on fire, stay long and add more. Subscribe to read daily flash news in detail.

S&P breached 2888, so there are three important astro support levels from here, the first will be at 2861 and then 2839, and 2827 level, we still believe that 2861 is very important astro support and S&P may respect this one as astro cycle is not that negative. We don't see S&P going below 2827 in the coming time so get ready to buy positions if prices go to this level. On higher side 2888 will be crucial for S&P, it must close more than three days higher this price to give clear bullish indications.

Remember this Feb 2018 statement - Now my eye will be on 2550 level; if S&P closes below this level for the three days, then disaster will take place for stocks and S&P may test 2478 and 2171 level. I may recommend closing long in stocks but lets see whether S&P will closes below 2550 or it bounce back from this level. Yes. April is a very crucial month of investors. I am not worried after April but let's focus on April at this stage. If everything goes smooth, then we may see S&P testing 2900 level or even 3200. April will be the deciding month for the future.

This is what we stated two months back when S&P was at 2550 level: *Last week we stated that S&P won't go below 2550 level and I still hold this prediction, in fact we don't see S&P remaining below 2650 level for more than five days. Buy most of the markets and hold positions. I am sure you must have closed long in UVXY between \$24.00 to \$34.00 level.*

INDL, SPY, QQQ, TMV, TECH, AMZN, GOOGL and MSFT look like good buys on weakness.

Wednesday's astro combination recommendation: Tuesday S&P closing positive is entering door for extreme bull market but lets wait for the few days.

Wednesday's trading ranges: **(December 2018 Contracts)**

HONG KONG (cash) –27271 to 27005

NIFTY S&P (Spot) – 10395 TO 11305

NIKKEI – 23905 to 23431

CAC – 5355 TO 5329

DAX – 12206 TO 12115

DEX EURO STOXX – 3355 – 3221

FTSE – 7282 TO 7241

FTSE/JSE (Cash) – 50191 to 49523

DOW e-mini – 26388 TO 26148

S&P e-mini – 2923.00 TO 2899.00

NASDAQ 100 e-mini – 7578 TO 7475

RUSSELL e-mini – 1725.00 TO 1706.00

TREASURY BOND

As predicted Thirty Year bond tested multi years low. We recommended selling at 172-00 with price target of 143-00 to 137-00 and chances of going toward 127-00 level. One of the best short trade recommended.

On Wednesday weakness will continue. Don't buy any positions, as prices could keep falling toward 137-00 level.

Hold long in **TMV, TBT, and TTT**.

We started recommending selling in Bond at 172-00 with first most important support at 143-00 which got achieved and next level 137-00.

Wednesdays astro combination recommendation – Stay short in bond.

Wednesday's trading range (December 2018 contract):

TREASURY BOND – 141-16 TO 139-23

SOFT COMMODITIES

On Tuesday cocoa, lumber, orange Juice, sugar and cotton fell as predicted. Coffee is in our buying list and also lost value. Short term bottom will take place in most of softs by next week Thursday, so cover all shorts in softs. In fact I will recommend covering all shorts today and start buying sugar, cocoa, and coffee from next week.

Orange Juice and lumber lost big value. Lumber trade was best short in 2018, it made fortune to few people I know, prices lost from \$648 to \$345. Tow months back recommended selling orange Juice at \$171 with target of \$145 to \$138, which shall achieve soon.

Monday most of softs closed negative. We are still not recommending any buying in softs expect coffee which has been trading negative as well. All short term positive astro cycle were not able to support coffee, let's see what happen in coffee after 11 October as I strongly believe that coffee prices may move more than 20 by December so 11 October will be most crucial day.

This is what we stated on Monday: Stay away from cotton and cocoa as weaker trend will push prices lower. Three weeks back we recommended buying sugar and on Friday last week recommended profit booking done very well. Get ready to buy sugar around \$10.18 level.

Three weeks back we stated: *We expect all these three softs (coffee, sugar and cocoa) to bottom around 15 August 2018. Watch important support level in Sugar at \$9.75, if it trades below \$10.71 for the five days but now start accumulating sugar on weakness from middle of this week. Cotton may see \$78.78 level and selling orange Juice at \$171 with target of \$151 level.*

Start buying cocoa at \$2098 level, and coffee will not close below \$101.25 level for the five days – December contracts. Lumber selling was recommended at \$645 with target of \$354.

Wednesday astro combination recommendations – Remain sideline in softs, cover short now.

Wednesday's trading range: **(Dec 2018 Contract)**

COFFEE: \$97.55 TO \$95.65

COTTON: 79.15 TO 77.53 Dec

SUGAR: \$10.77 TO \$10.29 Oct

COCOA: 2275 TO 2216

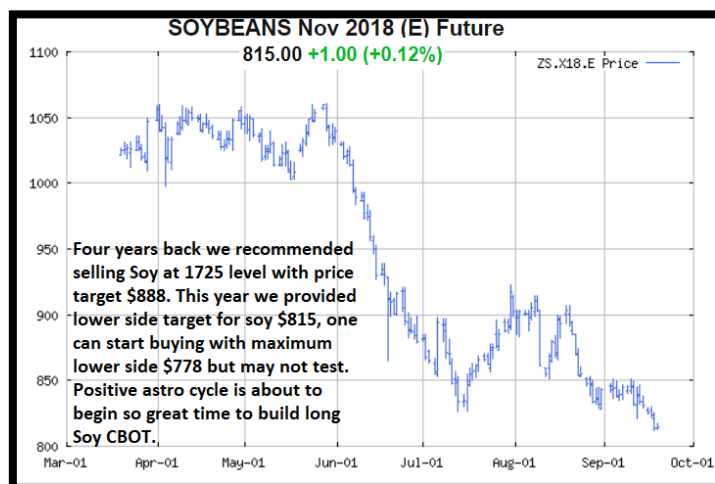

LUMBER: 352 TO 342 Nov

ORANGE JUICE: 147.25 TO 144.00 Nov

GRAINS

On Tuesday grains traded negative, stay away is still our advice though So tested yesterday our lower side predicted level of \$815 and it is life time buying opportunity in soy between \$815 to \$778 if it goes there so plan your trade well.

Trade in and out in wheat, corn, meal and soy oil. We are not recommending still any buying in soy oil and meal, but one can cover all short in soy oil and meal now. In the last one year we have been constantly recommending selling soy oil.

Brazilian Real is acting very well which may support soy and coffee, both these crop are important for Brazil as well as world.

In the worst case scenario soy can test \$778 but we don't believe that prices can test this lows but great buy is coming from today as astro time cycle is changing.

Four weeks back we stated: Next week onward soy prices shall move higher. Watch or buy at major astro support level for the 2018: Corn at \$343, wheat \$521, soy at \$815 and meal at \$308 (these levels for September contracts).

Now follow these levels, as they are very crucial and if these grains trade below these levels (all September contract - corn at \$343, wheat \$531, soy at \$815 and meal at \$308 these they breach these prices for the five days, it could bring disastrous news for grains traders but at this stage we don't see that happening.

Wednesday astro combination recommendations – Buy small soy positions and trade in and out in wheat and corn.

Wednesday's trading range (December 2018 contracts):

CORN: \$347.00 TO \$338.00

WHEAT: \$517.00 TO \$502.00

SOY: \$819.00 TO \$807.00

SOY MEAL: \$306.00 TO \$303.00

SOY OIL: \$27.61 TO \$27.11

ENERGY

On Tuesday oil market remained in the mix on Wednesday once again we see energy market traded mix but will remain in the ranges, higher side is very limited so be aware. Heating oil and RB Gas will follow oil. Energy stocks will remain in the mix pattern.

Sell positions in gas if prices move toward \$2.95 level as I don't see it moving above \$2.98 level.

Day trading is great strategy in oil and it has been working very well. Stay away from Energy stocks stay long in bear etfs like USOD and SCO.

It looks like that \$70.38 will be great selling level and lower side \$65.88 close all shorts.

Medium term – I don't see any major bear market in oil at this stage, it may trade in the range of \$63.88 to \$73.00 in the 2018. Sell gas at \$2.98 level and \$2.62 is buying level so keep these levels in mind.

In 2018, we don't see oil going above \$72.38 to \$73.88 levels. On lower side it will hold \$65.88 to \$59.88 levels.

Overall last three years this what we stated: So far, short-term trading has provided great returns in the last 18 months after my selling recommendation at \$97.00 mid-2014. You must remember what we mentioned two weeks ago: In 2001, we recommended buying oil at \$16.78 with the target of \$100 and higher. In August 2008, we recommended selling at \$145 with the target of \$32.00. Once

again in 2014 we recommended selling oil at \$100 with target of \$27.71. I couldn't ask more from nature.

Wednesday astro combination recommendations for oil – On Wednesday trade in and out in oil, heating oil and RB Gas. Short in natural gas.

Wednesday's trading range (October 2018 contracts):

OIL: \$70.45 to \$68.35 Nov

NATURAL GAS: \$2.95 to \$2.84

HEATING OIL: \$2.2575 TO 2.2055

RB GAS: \$2.0325 TO \$1.9735

CURRENCIES

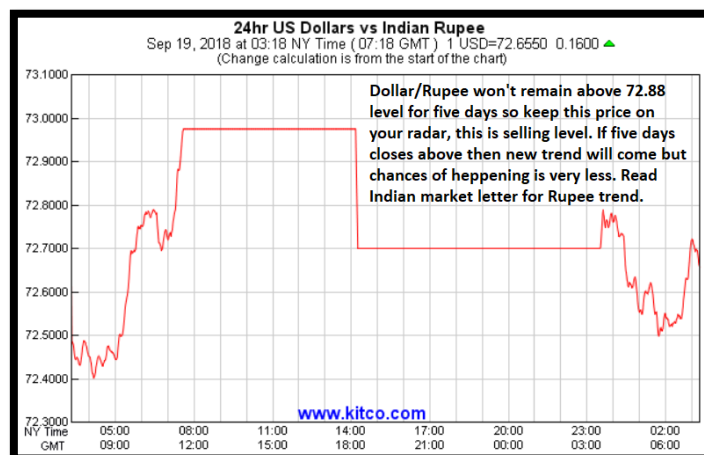

On Tuesday as predicted most of currencies gain value and also gave away some of grains. Dollar Index perfectly traded in the predicted range. From the here onward dollar will struggle to rise against emerging market currencies so add emerging market currencies against USD from Wednesday.

As predicted dollar came down from 97.18 level as predicted, and now started trading below 95.15 level as expected, and it shall bottom out soon. Now lower side Dollar Index will hold 93.38 level so keep this level in mind.

On Wednesday **Australian dollar**, **Canadian dollar** and emerging market currencies will gain but around lower side as mentioned in the daily ranges.

Franc and Yen will come down so selling is recommended at higher side levels.

Pound and Euro buying at 1.2727 and 1.1555 level done very well, time to book profit on higher side. Trade in and out in these both currencies on Wednesday as mentioned in daily ranges below.

Best trade - Buy **Rupee, Rand, Peso and Brazilian Real** on Wednesday. Many currencies like Argentina Peso, Rupiah, Ringgit and Thai Baht will be good bet for the short term. Turkish Lira will also gain today but stay away from any aggressive trade in Lira.

In the seven years back, I used term call "Currency war", and now they term is used by most of financial media. Watch as major volatility will come in currency market in 2020 onward.

I am not saying that it could happen now but just remember this: *Dollar Index is still holding 95.15 level, dollar trading above 95.15 level for the 21 days could change who outlook of currency market because then dollar Index could test 111.00 level or even higher and Euro could move toward 0.8300 level. We are not recommending any major trade in currencies at this stage because we would like to wait.*

Remain short term trader, dollar Index closing below 95.15 could push USD toward 93.37 level and on higher side at this stage I don't see USD going above 96.18 level.

I still see Euro at 1.1555 and Pound at 1.2711 will be good buy.

We stated three months back and keeping the same recommendations - Great selling in euro around 1.2488 to 1.2555, Pound 1.3988 to 1.4375, Canadian 0.8188, and Australian dollar 0.8098. Great time to buy Real 3.88, Rupee \$68.75 and Peso 20.00.

*In the worst-case scenario, we may see USD testing 88.61 level so remember this and buy USD on weakness as **May 2018 onwards a major bull market is starting in USD. Don't trade with leverage positions in the current time cycle. Dollar won't fall below 88.61 and 88.31 and will have difficult time to cross 91.00 level at this stage, and Pound is ready to move towards 1.3375, Franc 1.0117, and Euro 1.1775.***

Wednesday astro combination recommendation – Trade in and out in frontline currencies, keep adding Rupee and Real.

Wednesday's trading range: (December future Contract)

DOLLAR INDEX – 94.42 to 93.83 Dec Future

AUSTRALIAN DOLLAR – 0.7261 to 0.7181 (Spot 0.7248 to 0.7175)

CANADIAN DOLLAR – 0.7751 to 0.7680 (Spot 0.7741 to 0.7673)

BRITISH POUND – 1.3235 to 1.3138 (Spot – 1.3191 to 1.3095)

EURO – 1.1789 to 1.1701 (Spot – 1.1700 to 1.1616)

JAPANESE YEN – 0.8972 to 0.8928 (Spot 0.8911 to 0.8871)

USD/Japanese Yen - (Spot – 112.77 to 112.02)

SWISS FRANC – 1.0489 to 1.0407 (Spot 1.0410 to 1.0327)

USD/Franc - (Spot) – 0.9671 to 0.9608)

New Zealand Dollar (Spot) – 0.6609 to 0.6555

USD/RUPEE – 72.98 to 72.37 (Spot)

USD/RAND – 15.00 to 14.79 (Spot)

USD/REAL – 4.1888 to 4.1295 (Spot)

USD/PESO – 18.86 to 18.78 (Spot)

19 September 2018, 5.00 AM, Mumbai

Small part from past Flashnews:

Remember this what we stated on 22 September 2016: **Gold will struggle to move above \$1348 and silver \$20.28; these are the selling levels in both these precious metals but remain as a day trader for this week.**

This is what we mentioned on 11 August 2016: **Higher side in gold can rise maximum \$15 from current level of \$1348 and lower side more than \$300 by end of February 2017. Sell more NUGT around \$178 and JNUG around \$320; these levels were the previous highs last month. Add more buying in DUST.**

From stock market sections:

INDEXES:

This is what we mentioned on Tuesday, the 25th of January 2016: *Tuesday will be a great time to acquire positions in the emerging markets as well as in the European markets. If what we are seeing happens then S&P should move towards 1936 or even higher and down side, it won't go below 1844 or it won't close below 1862 level.*

On last week Thursday and Friday S&P closed higher and finally settled at 1901 levels. Those who have been following our works for decades must know how important our astro support and resistance levels are. Last year also the lower side astro resistance was 1827, and the higher side 2088. Both these levels played a very important role for the market. So far the support level of 1821 played an important role on Wednesday and we are hopeful that S&P won't go below this level in the year 2016 and that the astro support and resistance levels continue playing an important role.

This is what we mentioned the 18th of Jan 2016: *On Friday investors experienced a nightmare. It was day that no investor likes to see because on this kind of day the trading accounts of longer term investors are always deep in the red. In 2000 when the tech stocks crashed we never recommended any buying to investors because the astro cycle was negative for two years and it was clear that the market may remain down for the next two years. In 2008 crash which we predicted, we were also aware that the market would rebound from the 26th of February 2009. We recommended that the market would bottom out on the 6th of March 2009 and that investors should start accumulating stocks keeping in mind that they have to hold them for five years and that they would make a fortune. We strongly recommended, not to focus on the daily volatility and keep busy accumulating quality stocks. This proved to be very accurate advice.*

This is what we mentioned Monday 8 August: Billions of dollars follow our predictions closely so some support always comes around our predicted levels. 12th February 2016, S&P moved more than 360 points rally which no one expected.

This is what we mentioned on the 29th of February: At this stage we are expecting that the Indian market will perform, so this is a great time for international investors to put money in the US market as Rupee is at a historic low and the market has already corrected 26% from higher levels. Brazil and China have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive

positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies because any turn around in **Brazilian Real can push BRZU toward \$39.00 from 9.30**. S&P closed above 1938 and if it closes above 1938 for more than two days then expect it to move towards 1988 during this week or next week.

Two weeks ago we predicted that 1864 is a great buying level with the first target of 1938 and 1988. The first target got achieved very quickly and the second target will get achieved soon and after that our most important astro resistance level will be 2088, which has played a crucial role in keeping the bull away to move above 2088 for the last 16 months.

Thirty Year Bond

This is what we mentioned 10 September: *Tuesday Thirty Year Bond gained value, and same indicating on Wednesday. Fed may leave rate decision sideline which can push bond toward 168/169. Rate hike may bring prices 162 level. Overall trend is negative so get ready to sell on any rise if FED refuse to hike.*

In the last ten weeks' bond prices came down from 176 to 165 as predicted and our longer-term view is very negative so keep building sell positions on any rise.

By the end of this year we may see 162-25 and 157. Stay long in TTT, TBT and TMV.

Energy:

This is what we stated 17 April, Monday: *ERX lost more 5% value and if ERX trade below \$30.00 then there are chances that it will test \$25.50 level which means oil prices will trade negative in coming time.*

Once again oil will try to test \$54.78 but if this week it fails then we may see \$47.00 level once again. Major astro support point is \$49.88 level. RB Gas and HEATING OIL will follow oil.

On Monday oil prices will trade mix to negative but in USA trading one can take small buying, if oil fail to rise on Tuesday then expect major corrections in once again in coming time.

On Monday Natural gas will trade mix and prices will move both sides, trading in and out will remain best strategy in gas on Monday. Sell or short around \$3.38 level.

This is what we mentioned on 8 January - *Natural gas went down sharply as predicted and tested \$3.16 from \$3.83, and the volatile trend will continue in GAS so trade carefully. Oil will only be able to move higher if it closes above \$54.78 for three days which we don't see happening.*

Energy stocks traded mixed. ERX is unable to move above \$43.00 and oil above \$54.78 which is not a good sign for the energy market.

We are not changing any of the predictions we mentioned on the 3rd of June: Same kind of positive, RB GAS and heating oil also moved higher. Natural gas traded mix. ERX have been hanging around \$29.00 level and it must close above \$33.00 level to give bullish signal in energy stocks which we don't see at this stage moment.

Oil has been failing to close above \$48.88 level but same time it is not closing below 48.88 level as well. If oil closes above \$48.88 for three days, then the next price level of \$52.55 may get achieved. At this stage some selling is recommended around \$48.88 level and on the down side the important level to buy is at \$44.55. Oil prices have gained almost 70% from \$27.71 which we called the perfect bottom for oil.

This is what we mentioned on the 2nd of February: Many are predicting oil remaining in the teen's, but we do not see oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will struggle to move above \$35.18 levels, and if it does than \$44.55 is next target with \$48.88 selling level.

Natural gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural gas around \$1.72 and below.

This is what we mentioned in our book "2016 financial Predictions" in oil sections:

IMPORTANT NOTE: *As most of you are aware our view for energy has been very negative since June 2014. The overall trend in energy prices will remain negative so we do not recommend adopting long term positions. This means that do not take any trades earlier in the year and continue holding them for the rest of the year, because the higher side in oil will remain limited. There will be better opportunities to make money by trading in and out. Heating oil and RB gas will follow oils trend, so during this year we may see oil moving towards \$48.50 or \$52.95, and on the down side it may hold \$34.55. If it closes below \$35.55 for three days then there are chances that oil prices could fall towards \$29.65. Traders should take advantage of buying short term call options before any of the above-mentioned cycles start, and also book profit quickly before the positive cycles end.*

Energy stocks will trade mixed without any major movement, so longer term investors should not be putting any money in energy stocks. Any sharp rise should be taken as a profit booking opportunity if you are holding any energy stocks.

Natural Gas' trend will remain positive during 2016, so one can stay long in Natural Gas in the year 2016. However, it is very important to remember to keep booking profit before any of the above mentioned negative cycles start. Overall, Natural Gas will outperform oil in the year 2016.

For short term strategies and price targets please follow our weekly and daily newsletters.

Ninth Cycle:

From the 26th of November to 31st of December 2016 - During this cycle we see positive momentum coming back in the energy market and oil prices will form a bottom, and oil stocks will also act positively. Even though this is a positive cycle, the higher side will remain limited. Natural gas and RB gas will move sharply higher during this period.

Energy trading ranges for 2016:

Crude Oil: \$52.95 to \$29.78 *(As predicted last year that oil may hold \$30.00 level and if its trade below for five days then possibility that could test 2002 low of \$27.78 level)*

Natural Gas: \$2.88 to \$1.82 (higher side \$3.57 if it cross \$2.88)

Look at accuracy level about oil what we predicted in the book.

This is what we stated Monday, 31 Oct 2016: *Friday oil, heating oil and RB Gas traded negative as predicted. Energy stocks also went down but gas traded mixed. On Monday, oil will trade negative; stay sidelined or those who are holding shorts can continue holding and cover some around \$47.50. If oil starts trading below this, then expect \$46.75 to \$44.88 level, cover all shorts at \$44.55 level. Heating oil and RB Gas will trade negative or will follow oil. On the higher side, oil will struggle to remain above \$49.88 level which is the most important astro resistance level.*

Natural gas will trade on both sides without any clear directions so avoid trading but on the lower side one can buy GAS for Tuesday. Don't touch energy stocks as they will keep struggling.

This is what we mentioned on for Friday 2 Sep 2016: *On Thursday oil, heating oil and RB Gas prices went down sharply lower and weakness will continue Friday. One can cover 50 to 70% shorts around \$42.61 level in oil and 100% around \$41.78, so one can cover positions in heating oil and RB Gas on Friday.*

This is what we mentioned Monday, the 21st of December 2015: *Last week energy traders remained very nervous as they felt like abandoned by the bigger financial institutions and other large energy investors, but the truth is that every energy trader or investor is badly stuck energy trades.*

In 2008 we predicted a crash in oil from \$145 and in 2009 we predicted that it had bottomed out at \$33.00 level. That prediction provided great returns those who invested in oil and energy stocks. Now once again after the prediction of oil falling in 2014, since the last two weeks we have been predicting that oil would form a bottom around \$34.55 level so watch this prediction closely. I am not saying that oil won't fall below \$34.55 level but surely those who will buy around this level may be rewarded handsomely.

Maximum fearful days: According to the current astro cycle we see another 12 volatile or fearful trading days are pending but the down side is limited.

This is what we mentioned on the 27th of August 2015: If oil trades below \$47.00 for two days then there are chances it could retest our magic support figure of \$44.55. If it starts trading below \$44.55 then next level \$38.50 so avoid buying positions.

We are not recommending any buying in heating oil and RB gas, also one should avoid buying any energy stocks.

*This is what we mentioned on the 27th of April 2015: Adopt trading in and out strategy in energy, **but don't take any shorts in oil, heating oil or RB Gas. Sell some energy stocks.** Energy stocks will trade mixed without any major move so one can get ready to sell energy stocks. Higher side it is possibility that oil may see \$63.80 level, if its hold \$57.00 level. Keep adding positions in Natural gas around \$2.55.*

This is what we mentioned on the 5th of March 2015: Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors. On Down side oil will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.

Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for oil is \$47.00. ERX won't be able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.

*This is what we mentioned on the 3rd of January 2015: **On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating oil and natural gas lost value as well on Monday. Don't buy RB Gas and heating oil but surely natural gas can be bought around \$2.71.***

*This is what we mentioned on the 23rd of December 2014: **Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.***

*This is what we mentioned on the 11th of December 2014: **Wednesday our fear proven very true, we strongly recommend to stay away from oil. When oil broke \$92.88 we recommended sell oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.***

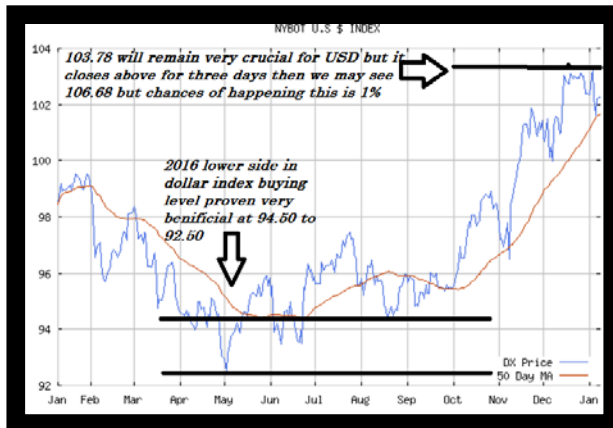

*This is what we mentioned on the 5th of December 2014: **Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, oil, RB gas and heating oil. Natural gain gained value from the lower levels on Friday as predicted.***

On Monday the higher side will remain limited, and if oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like oil is getting ready to break \$60.00 so stay short or add selling on any fall.

Currencies:

his is what we stated 4 January 2017: *We don't see dollar index going above 103.78 level so watch closely and closing below 102.55 will push dollar toward 101.55 level. Most of currencies gained nice value on Wednesday, emerging market currencies had best day.*

On Thursday, most of currencies will trade both sides, buying is recommended on lower sides in most of currencies so don't miss opportunity.

Buy Pound, Yen, Australian dollar and Canadian dollar. Also buy Franc and Euro without fear.

Astro cycle changed late today on 3rd January so safe buying in all major currencies against USD.

Dollar closing below 102.75 will confirm that it would test the 101.55 level this week.

We are not changing any predictions in currencies of what we mentioned on Monday, 31 October 2016: *Once again tested 99.00 level but then sharply came down from the middle of the trading sessions. We are still recommending to keep building positions in USD around 99.00 level. On Monday, we still recommend buying Euro and other currencies around the lower side, or selling USD around the higher side level. On the down side USD may hold 96.71 level so watch this level closely. Euro can move up to 1.1111 level in this week, so book profit if it goes there.*

On late Monday, the Scorpio Moon will bring both sides volatility. On Wednesday, the FED will announce decisions and due to the Scorpio Moon traders will get confused. Trade light or just trade in and out in currencies but medium term traders can hold selling positions in USD.

Stay short in Yen but one can cover Japanese Yen as it may move towards 0.9525 to 0.9250 level at this stage.

This is what we mentioned Monday on 29 August 2016: *We see Euro holding 1.1055 level and Pound 1.2925 level. We don't see it falling below 0.9410 level and on the higher side it will have a difficult time to move above 1.0198 level. For USD index 97.00 to 97.50 level will play the role of a Wall for dollar which dollar may not be able to breach at this stage, or maybe even for the next six weeks, and on the down side USD may test 92.50 level.*

This is what we mentioned last week on Monday, 25 July 2016: This is what we mentioned on Wednesday, the 13th of July: *Any rise shall be taken as selling opportunity in Yen, in the next two months we can 900 pips in Yen or it will easily come down to 0.9200 level very soon. We don't see Yen moving above 0.9878 level and in the worst case scenario 1.0000 will be maximum side.*

*Friday USD tested 97.50 level and this is an important level. Dollar may keep testing this level during this week. **We don't see Euro going below 1.0923 and Pound 1.2988 level.** Pound should be in you aggressive buying list until it holds this level.*

On Monday, the 11th of April 2016 we stated: *Last week USD traded negative, and lost value against most of currencies. There are still chances that USD may test 92.50 level so watch USD trend closely, and start taking positions at 92.50 level.*

Emerging market currencies have done very well and it's time to close positions if you are short or medium term traders. Rupee won't fall much so don't short Rupee but surely Rand, Real, Peso and Rubble will lose some value from middle of Monday.

Australian won't hold above \$0.7725, Canadian dollar 0.7900, Euro 1.1475, Franc 1.0555, and Yen 0.9288 level.

This is what we mentioned last Thursday: *Pound is ready for 1.4123 mark. Sell Pound and add more Swiss Franc sell.*

We are not recommending any new short in Euro, surely one can acquire some positions in Euro for the short period of time.

Emerging market currencies are getting ready to for bottoms expect few won't be trust like Rand and Rubble. Wednesday we see many currencies gaining some value but stay away from Pound, Canadian and Franc as they can keep making new lows so hold positions with 3% more corrections.

This is what we mentioned on the 22nd of December: *Euro will struggle to move above 1.1075 and may hold value 1.0725 so watch these both levels closely.*

This is what we mentioned on the 23rd of April 2015: *The Medium and longer term trend is still very positive for USD but for the short term a mix to bit weaker trend indicated. USD Index have achieved our target of 100 and now down side 95.00 or at worst case 90.00 level will be great buying.*

Dollar is our longer term buying trade so we won't recommend shorting dollar, we recommend buying USD on any weakness. Euro higher side 300 pips and lower side more than 3000 pips. We don't see USD index going below 95.00 levels.

Remember this what we mentioned on the 5th of March 2015: *Currency war has nothing to do with USD Friday USD gained value as predicted. Medium and longer term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.*

Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.

This is what we mentioned on the 15th of Jan 2015, Monday: *Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just finished one interview from Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell as it will going to go back to par levels.*

This is we mentioned on the 2nd of October: *On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.*

Remember, this is what we mentioned in the month of July: *At this stage USD is trading in a positive direction without any break since the last three weeks. Finally, it is reaching a most crucial level because once it breaks 81.78 then the nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.*

This is what we mentioned in the month of May (2014): Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.

In this year book "2015 financial predictions" we predicted "final bear cycle in market from 27 July to 15 August 2015", yes Sun can bring some uncertainty but take this uncertainty as buying opportunity in same time in 2015 in the month of August.

Watch 2088 level for S&P, as it is most tough astro resistance of 2015. In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

In our 2015 book we mentioned that commodities will have worst year of 2015, and so far precious metals, base metals, grains and softs have been struggling and they will keep moving down in the second half. Dollar will perform amazingly well in 2015 so hold positions and money in USD.

Make wave of nature/astronomical cycle an integral part of your trading/Investment strategies!

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
