## Fridays Daily Flashnews (Unedited report)

**Volatility, you have to active traders...so watch these levels...**

Dear Members,

On Thursday USA market went down sharply lower after the announcement of President putting heavy tariff on China's steel and Aluminum. This announcement surely helped steel producer in USA today but still traders will like to wait and sell. **AKS and US Steel** prices moved up sharply higher today. Trade war is beginning now, and China will announce something soon, may be putting some of tariff or duty on USA products.

We are sure you must have bought some positions around lower sides. We still see S&P holding 2650 level at this stage. We recommended buying positions on lower side and we are sure you must have bought some positions.

Gold, silver and platinum prices lost value, Thursday was our buying day in precious metals and they finally recovered from lower side level mentioned in the Thursdays trading ranges.

Base metals lost big value, palladium lost 5% value, it is going toward \$755 level as predicted. Prices of palladium have been falling non-stop after achieving high of \$1137 have to switch shorter term strategy with part of money to take advantage of short term price fluctuations. Rest of base metals also came down sharply lower.

Dollar almost achieved our higher side predicted target, and came down, I am sure many of you must have book some profit around higher sides. Emerging market currencies lost value against most of currencies but emerging markets are acting far better so watch emerging market trend closely. Down side in emerging market is very limited and may bottom on Friday or Monday.

Grains gained value, and softs also trade positive. Watch grains higher side trading ranges closely as mentioned in the below section of grains. Lumber lost big value like Palladium, lumber have been trading limit down as predicted, it was best trade and we are sure still it will keep moving down like this. Look at lumber chart here.

Lithium and cobalt stocks had some more pressure from seller, but you have to remember that journey have just started and long way to go from here, so keep accumulate these stocks. I am just preparing first report on lithium, cobalt, gold, and regular resources letter, it will be monthly letter. I am very excited about it so wait for announcement.

Oil prices traded negative as predicted, on Wednesday and Thursday oil and base metals traded negative which is very negative sign.

UVXY closed higher, we recommended booking profit today, and on higher side keep booking profit up to \$24.00 level. It will be difficult for UVXY to move above \$24.00 level as predicted last month as this stage. In future coming time is different story will emerge and UVXY would in our buying list.

Thirty Year bond traded bit positive as expected.

Respect nature's law, don't go against it - Please don't forward letter. I write every area of financial market in daily flash news and weekly newsletter, buying cost is just \$18.00 a day and any one can afford this so please tell them to subscribe copy rather than asking from you. If they can't spend \$18.00 day, then they should leave this market and take some better job to do something else.

**DPW** is our favorite pick in Crypto area but also watch or take some buying in **TERM** on Tuesday.

I humbly request not to share the book predictions or newsletter with non-subscribers. Surely you can tell them about our work, and let them the make decision about whether they would like to subscribe to it or not. I still believe that a \$351 investment by buying a complete copy of the **"2018 Financial Predictions"** or in \$99, \$151, and \$199 for different sections of the book is worth every penny if you trade or invest in the market, especially with the risks that people take in trading and investing.

Check out all different sections of book which you can buy individually each sections rather than buying whole book. Now metals, energy, currencies, USA and Global stock market, Crypto currency, and Indian market (which has metals, Indian market and Rupee).

This is what we stated yesterday: **To get a complete feel of 2018**, the 2017, was very simply a year with a bullish trend, if you have bought market, crypto currency, energy and base metals then you did well without using much of your brain and logic. 2018 on the other hand will be a completely different year. I highly recommend reading "2018 Financial Predictions" book from cover to cover to get a

complete feel of 2018. Many readers have the habit of jumping directly to the chapter they are interested in but don't make this mistake this time. Even if you are metal trader you must-read the dollar section, what other commodities will be doing, and what the market's and crypto's trend will be, so please read the book in detail.

The Indian market is our favorite one in 2018, so stay long in Indian market ETF's and stocks.

**Watch the important support & resistance levels updated on Monday, the 26<sup>rd</sup> of February 2018:**

- Gold is holding \$1298 and \$1312, on higher side gold achieved our first target of \$1357. It must close above \$1357 for three days which will clearly push prices up towards \$1428.
- Oil traded as predicted, and now once again selling level is \$65.68 as predicted, and on the lower side there is a small important support at \$61.38 and \$57.88 level.
- Buy only if gas closes above \$2.61 for three days. This is what we stated - Sell Natural gas at \$3.15 March contracts, closing below \$2.95 means that it could test \$2.61.
- As predicted ERX tested \$44.00 and came down to \$26.50 is as predicted. It will trade mixed.
- Close shorts in Thirty Year around \$143-00, it is holding 143-00 so now we shall see 147-00. One can hold buying positions in TTT, TBT, and TMV.
- S&P rebounded strongly from 2550 as predicted, and last week it tested our predicted higher side target of 2750 to 2788. Time to book some profit and buy if it falls toward 2655 level.
- Sell all major frontline currencies. Dollar Index bounced back from 88.17 so book profit at 91.00. Important astro resistance level for Pound at 1.4388 and Euro at 1.2495. Selling around these levels is recommended with a price target of 1.3725 and 1.2111.
- I am sure you must have closed all longs in Cocoa and Orange Juice at \$1800 and \$133. Cotton and coffee started acting positively. The major astro support for coffee is at \$118, sugar \$12.71, and cotton at \$75.68. In the worst-case scenario coffee may test \$112 or even lower if it closes below \$118, but a longer term bullish astro cycle is about to begin.
- Sell lumber at \$509 with the target of \$435.
- Soy oil has had a major astro support at \$31.11, and resistance at \$35.11. Selling is recommended at \$34.88.
- We have been buying Corn at \$340, Wheat \$415, Soy \$952, and Meal \$305, these are most strong astro support levels. On the higher side, the astro resistance level for wheat will be \$488 to \$525, Corn \$388 to \$403, Soy meal \$403 and Soy \$1068.
- Orange Juice will have a major support at \$132 and it is a must-buy. Cocoa must be in your buying list at \$1800 with higher side target of \$2259.

**Here are the trading strategies and ranges for Friday:**

**GOLD/SILVER/BASE METALS**

On Thursday precious metals and base metals lost value. We recommended buying precious metals on Thursday around lower side, we stated gold would hold \$1305 and won't go below \$1298 level and so far this proving right.

Silver and platinum prices also went down but recover with gold as predicted. Metal stocks bounced back, buying was recommended in **GLD, JNUG, NUGT** on Thursday on weakness.

Base metals traded as predicted on Thursday, weaker trend in base of Thursday confirming that time ahead is not good at all for base metals. Palladium was in our top short list, it fell one time today around 6% from the higher side levels. Zinc, Nickel, Aluminum and lead also closed lower. Stay away from any buying, sell these metals on any recovery.

On Friday stay long in precious metals and buy more positions in the precious metals on weakness and carry buying positions in the next week. Stay away from base metals or selling on rise is recommended. Stay sideline in copper as it will trade mix.

This is what we stated yesterday: *Wednesday base metals traded negative which is great news for bear those who have been selling base metals because if on Thursday base metals falls then expect at least 10% very quick corrections in the most of base metal prices (Palladium, zinc, nickel, lead and copper).*

*On other hand we see positive trend in gold, silver and platinum on Thursday so don't miss buying opportunity in precious metals around lower sides as astro combinations are positive for precious metals on Thursday and Friday.*

*Stay away from any buying or short covering of base metals.*

*Gold and silver mining stocks will act positive so buy small positions in **NUGT, JNUG, and GLD.***

*Gold will hold \$1305, and \$1298 level so watch these levels closely and on higher side still \$1357 will remain important astro resistance levels.*

Positive time cycle is very nearer in precious metals as predicted in the "2018 Financial Predictions" book. If you have investments in gold/silver, then must read the 2018 Financial Predictions.

**ON the lower side gold will hold \$1298 to \$1264 in 2018, and on higher side I am raising my target for gold to \$1509 or even higher during the middle of this year. Gold will outperform silver, platinum, and the rest of the metals.**

**Friday's astro combination recommendation** – Buy positions in PRECIOUS METALS and stay short in base metal.

**Friday's trading range: (April/May 2018 contract):**

**GOLD: \$1325.90 to \$1310.00**

**SILVER: \$16.55 TO \$16.16**

**COPPER: \$314.70 TO \$309.80**

**PALLADIUM: \$993.00 TO \$963.00**

**PLATINUM: \$971.00 TO \$951.00 April 2018**

## **INDEXES**

On Thursday USA markets had big sell-off on news of Trump imposing tariff on steel and aluminum. S&P went very close to 2655 level which is most important astro support level at this stage so wait for this to happen to take some buying but wait for next week weekly newsletter. At this stage our weekly and daily trading recommendations strategy is working very well so take advantage of it.

We are recommending buying positions in the most of market around lower side level mentioned here below. I am writing very important pieces of predictions on emerging market in the next week newsletter so get ready to read that. If you are weekly newsletter member then must subscribe weekly letter as it is most popular service and it goes to most important trading houses. Many believes that when we predict something new, big money moves in that direction for the longer period so must remember this.

I strongly recommend accumulating emerging markets on weakness, and keep buying without fear positions in India, China and South Africa.

Today when market was falling hard, but all these countries etfs were trading in green, they marginally close in negative.

<b>Direxion Daily MSCI India Bull 3x ETF (INDL)</b> <small>NYSEArca - NYSEArca Delayed Price. Currency in USD</small> <b>84.62</b> -0.51 (-0.60%)

--

On Thursday S&P broke small astro support level of 2688 level, and went lower, I still believe that S&P will hold support of 2655 level so watch this level closely.

On Friday and next still volatility will continue but quick trading recommended in daily flashnews will help you to make some quick buck on shorts term or on daily basis.

Friday we are recommending trading in and out on both sides as predicted ranges below here in the flashnews.

Stay long in **JO, INDL, and GLD**. Get ready to buy emerging market on Friday on any weakness, buy etfs of these markets. Tech and energy sector will struggle, financial will also struggle. Tech sector in USA will trade volatile, focus on recommended sector, mining sector will come back so wait for our weekly newsletter of next week.

**ALB, SQM and FMC** are trading sharply lower, you can't ask more nature to get good rates, maximum down side is 5 to 7% from current levels and higher side 200%, so what to worry.

New era for few emerging market is starting, start doing your own study.

**This is what we stated on Tuesday - Stay away from any buying, we are sure you must have close long on Tuesday.**

This is what we stated two weeks back on Monday when S&P was at 2550 level: *Last week we stated that S&P won't go below 2550 level and I still hold this prediction, in fact we don't see S&P remaining below 2650 level for more than five days. Buy most of the markets and hold positions. I am sure you must have closed long in UVXY between \$24.00 to \$34.00 level.*

**INDL, SPY, QQQ, TMV, TECH, AMZN, GOOGL and MSFT** look like good buys on weakness.

*In the short-term S&P may struggle to close above 2700 so book some profit around this level, and close more at 2750.*

**Fridays astro combination recommendation** –Start buying small positions for intra-day trading

**Friday's trading ranges: (March 2018 Contracts)**

**HONG KONG (cash) – 30895 to 30472**

**NIFTY S&P (Spot) – 10491 TO 10401**

**NIKKEI – 21505 to 20802**

**CAC – 5287 TO 5171**

**DAX – 12198 TO 11990**

**DEX EURO STOXX – 3401 – 3331**

**FTSE – 7153 TO 7018**

**FTSE/JSE (Cash) – 51007 to 50575**

**S&P e-mini – 2699.00 TO 2655.00**

**NASDAQ 100 e-mini – 6803 TO 6701**

**DOW e-mini – 24835 TO 24405**

**RUSSELL e-mini – 1520.00 TO 1486.00**

### **TREASURY BOND**

On Thursday Thirty Year bond gained small value from lower levels, on Friday prices will gain but get ready to buy profit if you have bought some positions around 143-00 level in Thirty Year bond. We are expecting maximum high of 147-00 level.

At this stage get ready to sell on any sharp rise or around 147-00 level as predicted.

We are sure you must have booked 50% profit as recommended in TMV, TTT, TBT. We are still recommending holding 50% positions.

*We already stated that Bond prices will hit 137 or lower in 2018. We started recommending selling in Bond at 172-00 and a lot is still pending on the down side.*

**Fridays astro combination recommendation** – Trade in and out.

**Friday's trading range (March 2018 contract):**

**TREASURY BOND – 146-07 TO 144-18**

### **SOFT COMMODITIES**

On Thursday lumber prices fell limit down, it was best recommendations of selling as now prices will keep moving down. There will be small astro support level at \$482, below that it will test \$435 level very quickly.

Coffee gained value as predicted with cocoa. Close long in cocoa on Friday as we don't see it remaining below \$2269 level for the more than three days.

Buying in Coffee can be hold. Stay away from any buying in lumber and Orange Juice. Trade in and out in sugar.

Yesterday we recommended closing long in cotton, prices close to in red after opening higher as predicted. Stay away from any new positions or just trade in and out.

Start buying "JO", coffee ETF.

**Friday astro combination recommendations** – Book profit 100% in cotton at 82.98 level or above, sell lumber and trade in and out in the rest of softs.

**Friday's trading range:** (May 2018 Contract)

**COFFEE: \$125.90 TO \$123.20**

**COTTON: 82.28 TO 81.50**

**SUGAR: \$13.91 TO \$13.51**

**COCOA: 2273 TO 2211**

**LUMBER: 495 TO 482**

**ORNAGE JUICE: 145.40 TO 142.80**

## GRAINS

On Thursday more upside moves came in grains. we are sure you must close long in wheat, corn, soy and meal. We are also recommending taking small short at \$522 in wheat, \$403 in corn. Don't take any aggressive short.

Soy prices must trade above \$1068 (May contract) which is two cycles of Moon, then only new positive directions could start so at this stage trade in and out in soy and meal on Friday. Surely one must close all long today in soy and meal around higher side level we mentioned here below.

We are still not recommending any buying in soy oil, and we already recommended closing all shorts during the last week so no new trade initiated in soy oil, wait for our new strategy in soy oil.

For the last three months we have been stating that Wheat \$407, corn \$341, and soy \$952, are great levels to buy which has proven very right.

**Fridays astro combination recommendations** – Short term traders can trade in and out, but close all long in grains at this stage on Friday.

**Friday's trading range** (May 2018 contracts):

**CORN: \$389.00 TO \$381.00**

**WHEAT: \$524.00 TO \$509.00**

**SOY: \$1078.00 TO \$1060.00**

**SOY MEAL: \$403.00 TO \$391.00**

**SOY OIL: \$32.61 TO \$32.05**

## ENERGY

As predicted oil, heating oil and RB Gas traded lower. Few of members stated that Mahendra we love your oil trading recommendations as fortunately we have been able to predict every move in oil. On Friday we are recommending higher side selling in oil, heating oil and RB Gas.

Natural gas traded mix, if gas close above \$2.61 level on Friday and next Monday then we may recommend new buying in gas from Tuesday or late Monday.

As predicted stay away from energy stocks. ERX must hold \$25.55 level which is most important crucial astro support level.

Wait for our next week's weekly newsletter as oil prices approaching toward crucial levels.

This is what we stated yesterday: *Energy prices falling sharply lower on Wednesday, these all were in our selling list, heating oil and RB Gas shorts recommended from Tuesday of this week done amazingly well. Keep adding sell positions in oil on Thursday on any rise and hold your shorts in heating oil and RB Gas.*

*Natural gas traded in the tight ranges as predicted for Wednesday, same kind of trading pattern will continue on Thursday.*

*Stay short in energy stocks, or don't buy. ERX small buying was recommended at \$25.55 level with higher side target of \$29.98 level, now once again ERX may test \$25.65 level.*

This is what we stated Tuesday: *Oil came down on positive days of Tuesday which is not good sign for oil at all. Sell some aggressive positions in RB Gas and heating oil if they close negative on Wednesday. Oil will move toward \$57.88 level if it closes negative on Wednesday. Tuesday and Wednesdays are supportive astro combinations and energy refusing to act positive which is not good sign at all.*

*Natural gas holding value above \$2.61 level which is positive sign, lets wait for the next three trading days before we make any aggressive bet on gas.*

*Stay away from energy stocks.*

This is what we stated three months back: *We are not recommending any shorts in oil. One can stay long or buy around the lower side if oil goes down after inventory. Heating oil and RB Gas will follow oil. Oil trading above \$61.38 could push oil toward \$65.57. Oil held \$44.55 and moved above \$49.88 was a clear bullish sign and we predicted that. Pivot point will be at \$57.88 level and higher side \$65.68.*

**Overall last three years we stated:** So far, short-term trading has provided great returns in the last 18 months after my selling recommendation at \$97.00 mid-2014. You must remember what we mentioned two weeks ago: In 2001, we recommended buying oil at \$16.78 with the target of \$100 and higher. In August 2008, we recommended selling at \$145 with the target of \$32.00. Once again in 2014 we recommended selling oil at \$100 with target of \$27.71. I couldn't ask more from nature.

**Friday astro combination recommendations for oil** – Trade in and out oil, natural gas, heating oil and RB Gas. No buying is recommended, but cover some shorts on any sharp fall.

**Friday's trading range (April 2018 contracts):**

**OIL: \$61.69 to \$60.10**

**NATURAL GAS: \$2.75 to \$2.64**

**HEATING OIL: \$1.9310 TO 1.8628**

**RB GAS: \$1.9189 TO \$1.8525**

## CURRENCIES

On Thursday Dollar traded higher in Asian and European trading sessions but in USA sessions profit booking came in. Dollar Index tested 90.82 level on higher side, very close to our predicted level of 91.00 which was selling level.

Pound achieved our predicted target of 1.3725 on Thursday, we recommended selling Pound between 1.4225 to 1.4455 level with target on lower side 1.3725. I am sure many of you must have covered shorts today. On Friday trading in and out on both side will remain best strategy.

Euro also achieved our first target of 1.2125 and bounced back from there. Major astro support level is at 1.2021. Trading in and out is recommended on Friday in euro as mentioned below levels.

Stay away from commodity currencies like Australian dollar and Canadian dollar, weakness will continue so selling is recommended on higher sides.

Franc and Yen will hold value on Friday, so lower side buying is recommended.

Emerging market currencies will trade negative in Asian and European trading sessions but in the USA trading hours we may see buying coming as our astro combinations.

Wait for next week newsletter, as we are having fun trading currencies due to astro cycles are guiding us well.

*This is what we stated yesterday: Wednesday US dollar gained further value. Dollar buying recommendations at 88.21 done great wonders for our members. It is time to take serious bet on our recommendations because our theory and predictions as matching with great accuracy.*

*On Thursday we see mix kind of trend in currencies so trading in and out is recommended as mention here below levels in the daily ranges.*

*Emerging markets currencies may lose some further value against USD but in the medium and longer term we are not recommending any aggressive shorts in emerging market currencies because they will turn around or will refuse to go down from end of March so keep this predictions in mind.*

*On Thursday YEN may gain some value, but keep adding sell in euro, Pound, Franc, Australian dollar, and Canadian dollar on any rise.*

*Pound is ready to achieved our first target of 1.3725 level, our selling recommendations in Pound at 1.4275 and 1.4425 level have done wonders. Also you have to remember that in 2016 and 2017 we constantly recommended buying stating that it won't below 1.2050 level.*

*Get ready to book some short term 50% profit in dollar Index around 91.00 level.*

**We stated two weeks and keeping the same recommendations** - Great selling in euro around 1.2488 to 1.2555, Pound 1.3988 to 1.4375, Canadian 0.8188 and Australian dollar 0.8098.

**Friday astro combination recommendation** – Buy more USD on weakness and start selling most of the frontline currencies especially Australian dollar, Pound and Euro, and sell these currencies against emerging market currencies.

**Friday's trading range: (March 2018 Contract)**

**DOLLAR INDEX – 90.63 to 90.01**

**AUSTRALIAN DOLLAR – 0.7801 to 0.7710**

**CANADIAN DOLLAR – 0.7823 to 0.7765**

**BRITISH POUND – 1.3840 to 1.3725**

**EURO – 1.2248 to 1.2170**

**JAPANESE YEN – 0.9486 to 0.9363**

**SWISS FRANC – 1.0668 to 1.0565**

**RUPEE – 65.41 to 64.95 (Spot)**

**RAND – 11.95 to 11.75 (Spot)**

#### **Small part from past Flashnews:**

Remember this what we stated on 22 September 2016: **Gold will struggle to move above \$1348 and silver \$20.28; these are the selling levels in both these precious metals but remain as a day trader for this week.**

This is what we mentioned on 11 August 2016: **Higher side in gold can rise maximum \$15 from current level of \$1348 and lower side more than \$300 by end of February 2017. Sell more NUGT around \$178 and JNUG around \$320; these levels were the previous highs last month. Add more buying in DUST.**

#### **From stock market sections:**

##### **INDEXES:**

This is what we mentioned on Tuesday, the 25<sup>th</sup> of January 2016: *Tuesday will be a great time to acquire positions in the emerging markets as well as in the European markets. If what we are seeing happens then S&P should move towards 1936 or even higher and down side, it won't go below 1844 or it won't close below 1862 level.*

*On last week Thursday and Friday S&P closed higher and finally settled at 1901 levels. Those who have been following our works for decades must know how important our astro support and resistance levels are. Last year also the lower side astro resistance was 1827, and the higher side 2088. Both these levels played a very important role for the market. So far the support level of 1821 played an important role on Wednesday and we are hopeful that S&P won't go below this level in the year 2016 and that the astro support and resistance levels continue playing an important role.*

This is what we mentioned the 18<sup>th</sup> of Jan 2016: *On Friday investors experienced a nightmare. It was day that no investor likes to see because on this kind of day the trading accounts of longer term investors are always deep in*

*the red. In 2000 when the tech stocks crashed we never recommended any buying to investors because the astro cycle was negative for two years and it was clear that the market may remain down for the next two years. In 2008 crash which we predicted, we were also aware that the market would rebound from the 26<sup>th</sup> of February 2009. We recommended that the market would bottom out on the 6<sup>th</sup> of March 2009 and that investors should start accumulating stocks keeping in mind that they have to hold them for five years and that they would make a fortune. We strongly recommended, not to focus on the daily volatility and keep busy accumulating quality stocks. This proved to be very accurate advice.*

This is what we mentioned Monday 8 August: Billions of dollars follow our predictions closely so some support always comes around our predicted levels. 12<sup>th</sup> February 2016, S&P moved more than 360 points rally which no one expected.

This is what we mentioned on the 29<sup>th</sup> of February: At this stage we are expecting that the Indian market will perform, so this is a great time for international investors to put money in the US market as Rupee is at a historic low and the market has already corrected 26% from higher levels. Brazil and China have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies because any turn around in **Brazilian Real can push BRZU toward \$39.00 from 9.30**. S&P closed above 1938 and if it closes above 1938 for more than two days then expect it to move towards 1988 during this week or next week.

Two weeks ago we predicted that 1864 is a great buying level with the first target of 1938 and 1988. The first target got achieved very quickly and the second target will get achieved soon and after that our most important astro resistance level will be 2088, which has played a crucial role in keeping the bull away to move above 2088 for the last 16 months.

### **Thirty Year Bond**

This is what we mentioned 10 September: *Tuesday Thirty Year Bond gained value, and same indicating on Wednesday. Fed may leave rate decision sideline which can push bond toward 168/169. Rate hike may bring prices 162 level. Overall trend is negative so get ready to sell on any rise if FED refuse to hike.*

*In the last ten weeks' bond prices came down from 176 to 165 as predicted and our longer-term view is very negative so keep building sell positions on any rise.*

*By the end of this year we may see 162-25 and 157. Stay long in TTT, TBT and TMV.*

### **Energy:**

This is what we stated 17 April, Monday: *ERX lost more 5% value and if ERX trade below \$30.00 then there are chances that it will test \$25.50 level which means oil prices will trade negative in coming time.*

*Once again oil will try to test \$54.78 but if this week it fails then we may see \$47.00 level once again. Major astro support point is \$49.88 level. RB Gas and HEATING OIL will follow oil.*

*On Monday oil prices will trade mix to negative but in USA trading one can take small buying, if oil fail to rise on Tuesday then expect major corrections in once again in coming time.*

*On Monday Natural gas will trade mix and prices will move both sides, trading in and out will remain best strategy in gas on Monday. Sell or short around \$3.38 level.*

This is what we mentioned on 8 January - *Natural gas went down sharply as predicted and tested \$3.16 from \$3.83, and the volatile trend will continue in GAS so trade carefully. Oil will only be able to move higher if it closes above \$54.78 for three days which we don't see happening.*

*Energy stocks traded mixed. ERX is unable to move above \$43.00 and oil above \$54.78 which is not a good sign for the energy market.*

We are not changing any of the predictions we mentioned on the 3<sup>rd</sup> of June: Same kind of positive, RB GAS and heating oil also moved higher. Natural gas traded mix. ERX have been hanging around \$29.00 level and it must close above \$33.00 level to give bullish signal in energy stocks which we don't see at this stage moment.

Oil has been failing to close above \$48.88 level but same time it is not closing below 48.88 level as well. If oil closes above \$48.88 for three days, then the next price level of \$52.55 may get achieved. At this stage some selling is recommended around \$48.88 level and on the down side the important level to buy is at \$44.55. Oil prices have gained almost 70% from \$27.71 which we called the perfect bottom for oil.

This is what we mentioned on the 2<sup>nd</sup> of February: Many are predicting oil remaining in the teen's, but we do not see oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will struggle to move above \$35.18 levels, and if it does than \$44.55 is next target with \$48.88 selling level.

Natural gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural gas around \$1.72 and below.

*This is what we mentioned in our book "2016 financial Predictions" in oil sections:*

**IMPORTANT NOTE:** *As most of you are aware our view for energy has been very negative since June 2014. The overall trend in energy prices will remain negative so we do not recommend adopting long term positions. This means that do not take any trades earlier in the year and continue holding them for the rest of the year, because the higher side in oil will remain limited. There will be better opportunities to make money by trading in and out. Heating oil and RB gas will follow oils trend, so during this year we may see oil moving towards \$48.50 or \$52.95, and on the down side it may hold \$34.55. If it closes below \$35.55 for three days then there are chances that oil prices could fall towards \$29.65. Traders should take advantage of buying short term call options before any of the above-mentioned cycles start, and also book profit quickly before the positive cycles end.*

*Energy stocks will trade mixed without any major movement, so longer term investors should not be putting any money in energy stocks. Any sharp rise should be taken as a profit booking opportunity if you are holding any energy stocks.*

*Natural Gas' trend will remain positive during 2016, so one can stay long in Natural Gas in the year 2016. However, it is very important to remember to keep booking profit before any of the above mentioned negative cycles start. Overall, Natural Gas will outperform oil in the year 2016.*

*For short term strategies and price targets please follow our weekly and daily newsletters.*

**Ninth Cycle:**

*From the 26th of November to 31st of December 2016 - During this cycle we see positive momentum coming back in the energy market and oil prices will form a bottom, and oil stocks will also act positively. Even though this is a positive cycle, the higher side will remain limited. Natural gas and RB gas will move sharply higher during this period.*

**Energy trading ranges for 2016:**

**Crude Oil: \$52.95 to \$29.78** (As predicted last year that oil may hold \$30.00 level and if its trade below for five days then possibility that could test 2002 low of \$27.78 level)

**Natural Gas: \$2.88 to \$1.82 (higher side \$3.57 if it cross \$2.88)**

Look at accuracy level about oil what we predicted in the book.

This is what we stated Monday, 31 Oct 2016: *Friday oil, heating oil and RB Gas traded negative as predicted. Energy stocks also went down but gas traded mixed. On Monday, oil will trade negative; stay sidelined or those who are holding shorts can continue holding and cover some around \$47.50. If oil starts trading below this, then*

expect \$46.75 to \$44.88 level, cover all shorts at \$44.55 level. Heating oil and RB Gas will trade negative or will follow oil. On the higher side, oil will struggle to remain above \$49.88 level which is the most important astro resistance level.

Natural gas will trade on both sides without any clear directions so avoid trading but on the lower side one can buy GAS for Tuesday. Don't touch energy stocks as they will keep struggling.

This is what we mentioned on for Friday 2 Sep 2016: On Thursday oil, heating oil and RB Gas prices went down sharply lower and weakness will continue Friday. One can cover 50 to 70% shorts around \$42.61 level in oil and 100% around \$41.78, so one can cover positions in heating oil and RB Gas on Friday.

This is what we mentioned Monday, the 21<sup>st</sup> of December 2015: Last week energy traders remained very nervous as they felt like abandoned by the bigger financial institutions and other large energy investors, but the truth is that every energy trader or investor is badly stuck energy trades.

In 2008 we predicted a crash in oil from \$145 and in 2009 we predicted that it had bottomed out at \$33.00 level. That prediction provided great returns those who invested in oil and energy stocks. Now once again after the prediction of oil falling in 2014, since the last two weeks we have been predicting that oil would form a bottom around \$34.55 level so watch this prediction closely. I am not saying that oil won't fall below \$34.55 level but surely those who will buy around this level may be rewarded handsomely.

Maximum fearful days: According to the current astro cycle we see another 12 volatile or fearful trading days are pending but the down side is limited.

This is what we mentioned on the 27<sup>th</sup> of August 2015: If oil trades below \$47.00 for two days then there are chances it could retest our magic support figure of \$44.55. If it starts trading below \$44.55 then next level \$38.50 so avoid buying positions.

We are not recommending any buying in heating oil and RB gas, also one should avoid buying any energy stocks.

This is what we mentioned on the 27<sup>th</sup> of April 2015: Adopt trading in and out strategy in energy, **but don't take any shorts in oil, heating oil or RB Gas. Sell some energy stocks.** Energy stocks will trade mixed without any major move so one can get ready to sell energy stocks. Higher side it is possibility that oil may see \$63.80 level, if its hold \$57.00 level. Keep adding positions in Natural gas around \$2.55.

This is what we mentioned on the 5<sup>th</sup> of March 2015: Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors. On Down side oil will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.

**Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for oil is \$47.00. ERX won't be able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.**

This is what we mentioned on the 3<sup>rd</sup> of January 2015: **On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating oil and natural gas lost value as well on Monday. Don't buy RB Gas and heating oil but surely natural gas can be bought around \$2.71.**

This is what we mentioned on the 23<sup>rd</sup> of December 2014: **Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.**

This is what we mentioned on the 11<sup>th</sup> of December 2014: **Wednesday our fear proven very true, we strongly recommend to stay away from oil. When oil broke \$92.88 we recommended sell oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.**

This is what we mentioned on the 5<sup>th</sup> of December 2014: **Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, oil, RB gas and heating oil. Natural gain gained value from the lower levels on Friday as predicted.**

**On Monday the higher side will remain limited, and if oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like oil is getting ready to break \$60.00 so stay short or add selling on any fall.**

**Currencies:**

This is what we stated 4 January 2017: *We don't see dollar index going above 103.78 level so watch closely and closing below 102.55 will push dollar toward 101.55 level. Most of currencies gained nice value on Wednesday, emerging market currencies had best day.*

*On Thursday, most of currencies will trade both sides, buying is recommended on lower sides in most of currencies so don't miss opportunity.*

**Buy Pound, Yen, Australian dollar and Canadian dollar. Also buy Franc and Euro without fear.**

*Astro cycle changed late today on 3<sup>rd</sup> January so safe buying in all major currencies against USD.*

**Dollar closing below 102.75 will confirm that it would test the 101.55 level this week.**

We are not changing any predictions in currencies of what we mentioned on Monday, 31 October 2016: *Once again tested 99.00 level but then sharply came down from the middle of the trading sessions. We are still recommending to keep building positions in USD around 99.00 level. On Monday, we still recommend buying Euro and other currencies around the lower side, or selling USD around the higher side level. On the down side USD may hold 96.71 level so watch this level closely. Euro can move up to 1.1111 level in this week, so book profit if it goes there.*

*On late Monday, the Scorpio Moon will bring both sides volatility. On Wednesday, the FED will announce decisions and due to the Scorpio Moon traders will get confused. Trade light or just trade in and out in currencies but medium term traders can hold selling positions in USD.*

*Stay short in Yen but one can cover Japanese Yen as it may move towards 0.9525 to 0.9250 level at this stage.*

This is what we mentioned Monday on 29 August 2016: *We see Euro holding 1.1055 level and Pound 1.2925 level. We don't see it falling below 0.9410 level and on the higher side it will have a difficult time to move above 1.0198 level. For USD index 97.00 to 97.50 level will play the role of a Wall for dollar which dollar may not be able to breach at this stage, or maybe even for the next six weeks, and on the down side USD may test 92.50 level.*

This is what we mentioned last week on Monday, 25 July 2016: *This is what we mentioned on Wednesday, the 13<sup>th</sup> of July: Any rise shall be taken as selling opportunity in Yen, in the next two months we can 900 pips in Yen or it will easily come down to 0.9200 level very soon. We don't see Yen moving above 0.9878 level and in the worst case scenario 1.0000 will be maximum side.*

*Friday USD tested 97.50 level and this is an important level. Dollar may keep testing this level during this week. We don't see Euro going below 1.0923 and Pound 1.2988 level. Pound should be in you aggressive buying list until it holds this level.*

On Monday, the 11<sup>th</sup> of April 2016 we stated: *Last week USD traded negative, and lost value against most of currencies. There are still chances that USD may test 92.50 level so watch USD trend closely, and start taking positions at 92.50 level.*

*Emerging market currencies have done very well and it's time to close positions if you are short or medium term traders. Rupee won't fall much so don't short Rupee but surely Rand, Real, Peso and Rubble will lose some value from middle of Monday.*

*Australian won't hold above \$0.7725, Canadian dollar 0.7900, Euro 1.1475, Franc 1.0555, and Yen 0.9288 level.*

This is what we mentioned last Thursday: *Pound is ready for 1.4123 mark. Sell Pound and add more Swiss Franc sell.*

*We are not recommending any new short in Euro, surely one can acquire some positions in Euro for the short period of time.*

*Emerging market currencies are getting ready to for bottoms expect few won't be trust like Rand and Rubble. Wednesday we see many currencies gaining some value but stay away from Pound, Canadian and Franc as they can keep making new lows so hold positions with 3% more corrections.*

This is what we mentioned on the 22<sup>nd</sup> of December: *Euro will struggle to move above 1.1075 and may hold value 1.0725 so watch these both levels closely.*

This is what we mentioned on the 23<sup>rd</sup> of April 2015: *The Medium and longer term trend is still very positive for USD but for the short term a mix to bit weaker trend indicated. USD Index have achieved our target of 100 and now down side 95.00 or at worst case 90.00 level will be great buying.*

***Dollar is our longer term buying trade so we won't recommend shorting dollar, we recommend buying USD on any weakness. Euro higher side 300 pips and lower side more than 3000 pips. We don't see USD index going below 95.00 levels.***

Remember this what we mentioned on the 5<sup>th</sup> of March 2015: *Currency war has nothing to do with USD Friday USD gained value as predicted. Medium and longer term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.*

*Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.*

This is what we mentioned on the 15<sup>th</sup> of Jan 2015, Monday: *Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just finished one interview from Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell as it will going to go back to par levels.*

This is we mentioned on the 2<sup>nd</sup> of October: *On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.*

Remember, this is what we mentioned in the month of July: *At this stage USD is trading in a positive direction without any break since the last three weeks. Finally, it is reaching a most crucial level because once it breaks 81.78 then the nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.*

**This is what we mentioned in the month of May (2014): Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.**

*In this year book "2015 financial predictions" we predicted "final bear cycle in market from 27 July to 15 August 2015", yes Sun can bring some uncertainty but take this uncertainty as buying opportunity in same time in 2015 in the month of August.*

Watch 2088 level for S&P, as it is most tough astro resistance of 2015. In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

In our 2015 book we mentioned that commodities will have worst year of 2015, and so far precious metals, base metals, grains and softs have been struggling and they will keep moving down in the second half. Dollar will perform amazingly well in 2015 so hold positions and money in USD.

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
