Thursday Daily Flash news (Unedited report)

Thursday will be important day for us...

Dear Members,

On Wednesday the US markets lost further value, though the worst is almost over on the 19th of January as predicted, but there will still be some volatility for the next 48 hours, and any sharp corrections should be taken as a buying opportunity.

Precious and base metals went sharply higher as predicted, it was a fantastic call for not only for the metals, but the other commodities as we expected

them to perform well during this week.

Dollar lost value on Wednesday, and most of the currencies recovered, but Brazilian Real gained amazing value as predicted in this week's letter as well as yesterday's Flashnews.

Grains and softs had one of the best days, and the positivity will continue. Coffee and cotton are trading very well as predicted.

Oil prices held value, and energy prices are towards a top so keep this in mind.

Thirty Year Bond recovered from 153-00 as predicted. Next week's weekly newsletter will be the most important one. **2022 Financial Predictions book price will change to \$991 later today.**

Crypto traded mixed, and Bitcoin is holding \$41788 which is good news. Bitcoin and Cryptos are safe bets as long as Bitcoin trades above \$41788.

Here are the trading strategies and ranges for Thursday:

GOLD/SILVER/BASE METALS

On Wednesday precious metals and base metals acted positive as predicted. Silver, Nickel and platinum gained big value, Nickel almost gained 6% value. Our view for base metals and precious metals very positive for coming but follow weekly newsletter and book cycles as there are always time when some profit booking comes when cycles are not supportive.

On Thursday still astro combinations are very supportive so stay long in precious metals and base metals. I am sure you must have bought **JNUG** and

<p>Direxion Daily Gold Miners Index Bull 2X Shares (NUGT)</p> <p>🇺🇸 NYSE ▾</p> <hr/> <p>▲ 53.18 +6.59 (+14.14%)</p> <p>🕒 15:59:59 - Closed. Currency in USD (Disclaimer)</p>

NUGT as well both moved around 14% higher on Wednesday and they can move further higher.

Copper, palladium, and

other metals also traded very well.

Our view for Nickel and Lithium are very bullish, copper will also test

<p>Nickel Futures - (NICKELc1)</p> <p>▲ 23,355.50 +1,282.50 (+5.81%)</p>

historic high in 2022 so watch our metals daily, weekly letters and book predictions closely as finally era for metal investors is coming. Yes, Silver will outperform all metals, it is create the historic bubble in coming few year time.

On Thursday remained long in metals and mining stocks, if they breach higher side level and close above \$1852 and \$24.88 for the next three days then upward journey may start from here onward only so watch very closely.

There are possibility that lower ranges mentioned in the daily ranges below may not get achieve due to positive astro day. Don't short metals. I would like to see on negative astro day metals outperforming that will be sign of fire. **In the last three months we have been predicting that gold may not close below \$1751, silver \$21.98, copper, \$403 and platinum \$905, these were great buying level as per our theory and far they acted according.**

2022 will be great for metals and mining stocks as per our book so great ready buy in positive cycle. Wait for next weeks weekly newsletter.

Later this week gold, silver, copper, nickel and zinc will move higher so lets see whether astro combinations able push metals higher side or not.

- Still astro support for Gold will be \$1808 and Silver 22.98, The first important Astro resistance will be at \$1853 for Gold, and Silver \$24.95. Platinum's astro resistance will be at \$1087 and support at \$905.
- Copper's Astro resistance will be at \$459, and support at \$432. Palladiums astro resistance will be \$2088 and support at \$1575. Other base metals like ZINC, NIKCEL, Aluminum will move higher.

Thursday's Astro combination recommendation – On Thursday positive trend will continue in metals and add more long lower side in Asian and European markets in metals.

Thursday's trading ranges: (Continue 2021 Contracts):

GOLD: \$1854.00 to \$1823.00 (Spot: 1853 to 1823)

SILVER: \$24.68 TO \$23.87 (Spot:24.63 to 23.75)

COPPER: \$450.00 TO \$443.70

PLATINUM: \$1053.00 TO \$1005.00

PALLADIUM: \$2073.00 TO \$1957.00

INDEXES

On Wednesday global equity markets performed uncertain, it was uncertain day and they acted uncertain. Also we have been predicting that markets to trade volatile until 19 January. Now in the another 48 hours markets will settle down so buy only on corrections or lower side level mentioned in the daily flashnews.

On Thursday astro combinations will be mix but surely one must get ready to buy long positions in USA market as markets will bottom out either today or on Friday and after that upward journey will start. Today there are possibility that lower ranges mentioned in the daily ranges below may not get achieve due to positive astro day.

Don't expect anything major from financial and banking stocks earning. **AMZN, NFLX, APPLE, MSFT** and many hundreds of stocks are great buy today around lower side.

Also **SOXL and TECL** looks great buy so time to build long positions in markets. Next weeks weekly newsletter will be important one for investors but I will be traveling so will try to write brief most important note.

This is what we stated yesterday: This is a year of big swing trading so any sharp rise shall be taken as profit booking opportunity and sharp fall shall be buying opportunity if our mentioned cycle in book is supporting that sides trend. Like until 19th of January uncertain and volatile trend expected, so wait for

opportunity rather than jumping, and toward end of negative cycle one should start buying like tomorrow will be day to buy.

Last month we clearly stated that S&P may struggle to close 4817 astro resistance level, this predictions was right now important crucial astro support will be at 4511 to 4438 for S&P and NASDAQ 14971 and 14711 levels, these are great buying level so don't miss opportunity of buying in the next 48 hours.

Tech, EV related stocks shall be in your buying list. Major banks will finish announcing earning this week, expect mix trend in stocks even though earning will be robust but we are not recommending any buying because Jupiter is expected to provide mix directions to financial stocks in the next three months, so they are not in our buying list.

As per astro combinations we are aware that we are in process of ending of covid-19 era in the next three months. By the end of this year all short supply scarcity will end, in fact over supply will be issue which will create fall in drastic prices in many areas especially industrial goods by end of this year.

From 2011, we have been recommending adding all these stocks, we are still not recommending profit booking in these stocks: **TSLA, NFLX, DXCM, AMZN, Google, MSFT, Apple, VEEV, AMD, NVDA, HZNP, MA, V, BAC, COST, and REGN.**

- S&P 4737 and Nasdaq 15932 closing above they need to close above these levels for the new bull era. Important astro support will be 4611 and 15201 levels, shouldn't close below these level for the days.

Thursday's astro combination recommendation: On Thursday still volatility will continue but great buying opportunity will come today around lower side in the most of markets, and Friday also we see buying opportunity.

CURRENCIES

On Wednesday dollar lost value and most of currencies traded as predicted. We expected weakness in Mexican Peso and South African Rand. We also predicted that Brazilian Real will be one of the best trade of this week as we expected 5% move in the short period and Wednesday Real made huge move against USD.

On Thursday we predict upward move in the most of currencies will continue so remain long in the frontline currencies and Brazilian Real. Rest of emerging markets currencies will remain uncertain or profit booking will come. Trade in and out in Swiss Franc and Yen as mentioned below levels.

Euro, Pound and Australian dollar will gain value along with Canadian dollar.

This is what we stated yesterday: *Tuesday Dollar gained value against most of frontline and emerging market currencies. Canadian dollar acted very well.*

We see weakness to continue in emerging market currencies but frontline currencies will be great buy so time to buy some positions in Australian dollar, Canadian dollar and Euro.

Stay away from Yen and Franc. Higher side sell Pound.

Emerging market currencies will lose value, so close all long in emerging market currencies for the short term. One can stay long in Brazilian real as it is our favorite trade for 2022.

Overall higher side selling is recommended in USD on Wednesday, and get ready to sell more USD ON Thursday.

In the short term we see dollar trading in the range of 95.75, and 94.55 levels.

So far our selling recommendations in USD around 96.57 level proven great in the last one month. We still see Dollar clearly struggled to close above 96.57 in 2022 and the important Astro support will be 94.55 so keep these levels in mind.

- Dollar Index has an important Astro support at 94.55; and the astro resistance is at \$96.57, it will be difficult for USD to close above this level for the three days.
- In the short term the important astro support levels will be: Australian 0.6889, Canadian 0.7702, Pound 1.3183, Euro 1.1157 Franc 1.0605, and Yen 0.8678. Euro will have an important astro resistance at 1.1559, Pound 1.3788, Canadian at 0.8177, Australian dollar 0.7388, Yen 0.8948 and Swiss Franc 1.1111.

- Rand 13.01, USD/Peso 19.32, REAL 5.00 and Rupee 72.78 are crucial astro support for USD, and on the higher side dollar may struggle to close above astro resistance against Rand 16.98, Peso 22.88, Real 5.73 and Rupee 75.78.

Thursday's astro combination recommendation – On Thursday weakness in USD will continue. Stay away from emerging market currencies. Buy some more Australian dollar, Brazilian real, Euro and Canadian dollar around lower sides. Stay away in the rest of currencies.

ENERGY

On Wednesday energy markets acted mix after big move on Tuesday. Thursday still oil market will hold value but trading negative of closing in Red will be negative news for oil market.

Natural gas is in our buying list on Thursday so take long positions around lower sides.

Close long positions in energy stocks, great time to sell them as they already achieved high of 2022, and they may not see these prices gain from the next month to the next 11 months.

Thursday trade in and out in oil, heating oil and RB Gas. Maximum higher side in oil could \$87.48 to \$91.78 level but looks very difficult.

- Oil's Astro support will be \$78.03 and most important Astro resistance will be at \$87.78.
- The new trading ranges for Natural Gas will be from \$4.57 to \$3.81.

Thursday's astro combination recommendations for Oil – On Thursday trade in and out in oil, heating oil and RB Gas, buy natural gas.

SOY OIL: \$61.61 TO \$60.31

SOFT COMMODITIES/

Coffee and cotton are moving amazingly well as predicted. These are our favorite trade so stay long but I will also recommend booking part of profit on Friday around higher side as next week some profit may come but still overall trend to remain extremely bullish for coffee and cotton. Coffee have been in our buying list since \$98.00 and cotton \$77.11 level and still we are recommending longer term traders to book profit.

Trade in and out in cocoa and suagr, they will remain in the mix trading pattern. Lumber went sharply lower so stay away from any buying, On Monday we predicted that Lumber would be great short between – \$1250 to \$1298 with 50% price fall target.

Overall softs are in positive trend, if next two days coffee and cotton closes above \$238 and \$118.75 then we may see new historic bull market starting from here.

- Sugar has an astro support at \$18.01 and resistance at \$21.51. Cotton has an Astro support at \$98.88 and resistance at \$118.81. Cocoa's Astro support level is \$2275 and Astro resistance \$2775.
- Coffee has an important Astro pivot point is \$238.75, closing three days above or below this will push in that direction for minimum 7%.

Thursday astro combination recommendations – We predicted very positive cycle from 11th January for coffee and cotton, so far they are following our predictions. On Thursday positive trend will continue but sell lumber.

COFFEE: \$246.95 TO 241.30

COTTON: 124.95 - TO 122.70

COCOA: 2684 TO 2625

SUGAR: \$19.32 TO \$18.86

TREASURY BOND

three weeks back selling recommendations in thirty Year around 162 to 163-00 levels proven great call. Yesterday we recommended covering all shorts and I am sure you must have done that. Wait for opportunity so take more sell on

rise.

Thursday will be mix day so trade in and out by following our trading ranges.

Tuesday sharp corrections taken place in Thirty Year as expected. It is finally achieving our target of 153-00, close all shorts around this level but no buying is recommended.

19th Jan 2022, 03:00 PM, PST

“2021 Financial Prophecies” will guide you each day in 2021, I stated that every penny invested in our book will save or earn you millions. *Nature was so kind to narrate 2021, I was merely playing the role of the typist. It is a must have book for anyone who has even a small investment in the market, commodities and currencies.*

One of note from September 2020 letter:

On the other hand, most semiconductor stocks like **AMD, LSCC, UI, QCOM, XLNX, MXWL, AMZN, PYPL, APPLE, TSLA, GOOGLE, PODD, IRTC, TDOC, ZM, OKTA, HUM, UHS, MELI, TTD, SHOP, VEEV, PLUG, BLDP, JKS, SEDG**, are doing well, and the list goes on. Most of our recommended stocks have moved much higher in the last ten years, and even during the last one year of the Pandemic. I don't think I can ask for any more from nature because it's nature that has provided us with the indications, and it's our job to follow these indications. Many of those who have been investing in the market for the past three to four

decades are saying they haven't seen anyone recommend and write about the future trends of the stock market so confidently. I humbly thank you for your kind words and thank nature for guiding me so that I can help people create wealth in order for you to take care of the neediest people.

Since 2005, I have been enjoying my retirement-style life, and nature has been very kind to me. However, I am coming back to trading and investing world in 2023. I will be back on Wall Street and I am sure we all will have a lot of fun. After achieving a 13,218% accuracy record in just five months in 2005, I took a break from trading, and that decision was because of the astro cycle in my chart. I am announcing my return very soon. You can see I have lot of patience because I have been waiting since 2007 to restart trading, I respected natures message so I stayed away.

This is what we stated yesterday:

We are still recommending staying long in the markets. NASDAQ or tech stocks will come forward to push the market higher. S&P is heading towards 3800 and NASDAQ towards 12775.

This morning when I was bowing to nature and the mystic power of astro combinations, I got emotional because nature has guided us through 2020, the most uncertain time of our lives. None of the Wall Street experts are still able to believe how we were able to predict the monthly cycles of 2020 so accurately one year in advance ("2020 Financial Prophecies" book was written in 2019 and published on the 5th of January 2020). Every word was narrated by nature, I was just playing the role of a typist:

Eighth Cycle: From the 5th of October to the 20th of November

There will be sharp corrections initially when this cycle starts, but as this cycle progresses, the market will test an all-time high during this period. This will be a fantastic cycle for buyers. One must buy Financials, Tech, and Biotech stocks. During this period, stocks like Google, Apple, Amazon, Netflix, etc. will hit all-time highs. Tesla will also hit an all-time high. This cycle will look like a mini bubble due to aggressive moves in stock prices. Stay long in the market as the next cycle is also positive.

Now we are in the ninth and final cycle of 2020, must rad book.

*We are recommending staying long in **INDL, YINN, and BRZU**.*

Our theory is on the right track and we have been able to guide members accurately since the 22nd of March and that is what matters the most. You don't need to take trades every day, just focus on what the Astro cycles are indicating and you can plan your trades in that direction for the medium term, and I am sure no one can stop you from making money.

Seventh Cycle: From the 17th of August to the 4th of October

This will once again be a very volatile cycle, and I strongly recommend selling stocks during this period. Do not hold any long positions in tech and financial stocks as prices will fluctuate very fast, so have some sort of hedging strategy without holding any naked buying positions.

Hold some put options and buy some UVXY during this period. I still see biotech stocks performing very well during this cycle, so it will be very interesting when Tech and all the other sectors are trading negatively, and biotech outperforms all the sectors. If you see biotech performing well then you should start building positions in it as it will continue to perform well throughout the year.

Sixth Cycle: From the 1st of July to the 16th of August

Once again, this will be a very bullish cycle for the market, so stock and equity prices will gradually start moving higher. I strongly recommend start buying tech, financial, and biotech stocks. Some aggressive movements will come in these sectors, and if I am not mistaken in my readings of the Astro cycles, all the major global market will hit an all-time high. This is especially true for the US and India. Europe and Japan will also move higher, and China will also trade positively.

This is a fantastic cycle to make a great amount of money in tech and biotech stocks. Mining stocks will also gain handsome value during this period, so buy mining ETF's like NUGT or JNUG. You can also buy tech and biotech ETF's like SOXY and LABU.

From stock market sections:

INDEXES:

Remember this Feb 2018 statement – Now I will be watching 2550 level; if S&P closes below this level for the three days, then disaster will take place for stocks and S&P may test 2451. I may recommend closing long in stocks but let's see whether S&P will not close below 2550 or it bounce back from this level. I am not worried after April but let's focus on April at this stage. If everything goes smooth, then we may see S&P testing 2900 every soon in 2018.

This is what we mentioned on Tuesday, the 25th of January 2016: Tuesday will be a great time to acquire positions in the emerging markets as well as in the European markets. If what we are seeing happens then S&P should move towards 1936 or even higher and down side, it won't go below 1844 or it won't close below 1862 level.

On last week Thursday and Friday S&P closed higher and finally settled at 1901 levels. Those who have been following our works for decades must know how important our astro support and resistance levels are. Last year also the lower side astro resistance was 1827, and the higher side 2088. Both these levels played a very important role for the market. So far the support level of 1821

played an important role on Wednesday and we are hopeful that S&P won't go below this level in the year 2016 and that the astro support and resistance levels continue playing an important role.

This is what we mentioned the 18th of Jan 2016: On Friday investors experienced a nightmare. It was day that no investor likes to see because on this kind of day the trading accounts of longer term investors are always deep in the red. In 2000 when the tech stocks crashed we never recommended any buying to investors because the astro cycle was negative for two years and it was clear that the market may remain down for the next two years. In 2008 crash which we predicted, we were also aware that the market would rebound from the 26th of February 2009. We recommended that the market would bottom out on the 6th of March 2009 and that investors should start accumulating stocks keeping in mind that they have to hold them for five years and that they would make a fortune. We strongly recommended, not to focus on the daily volatility and keep busy accumulating quality stocks. This proved to be very accurate advice.

This is what we mentioned on Monday, the 8th of August: Billions of dollars follow our predictions closely so some support always comes around our predicted levels. 12th February 2016, S&P moved more than 360 points rally which no one expected.

This is what we mentioned on the 29th of February: At this stage we are expecting that the Indian market will perform, so this is a great time for international investors to put money in the US market as Rupee is at a historic low and the market has already corrected 26% from higher levels. Brazil and China have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies because any turn around in **Brazilian Real can push BRZU toward \$39.00 from 9.30**. S&P closed above 1938 and if it closes above 1938 for more than two days then expect it to move towards 1988 during this week or next week.

Two weeks ago we predicted that 1864 is a great buying level with the first target of 1938 and 1988. The first target got achieved very quickly and the second target will get achieved soon and after that our most important astro

resistance level will be 2088, which has played a crucial role in keeping the bull away to move above 2088 for the last 16 months.

Thirty Year Bond

This is what we mentioned on the 10th of September: *Tuesday Thirty Year Bond gained value, and same indicating on Wednesday. Fed may leave rate decision sideline which can push bond toward 168/169. Rate hike may bring prices 162 level. Overall trend is negative so get ready to sell on any rise if FED refuse to hike.*

In the last ten weeks' bond prices came down from 176 to 165 as predicted and our longer-term view is very negative so keep building sell positions on any rise.

By the end of this year we may see 162-25 and 157. Stay long in TTT, TBT and TMV.

Energy:

This is what we stated on Monday, the 17th of April: *ERX lost more 5% value and if ERX trade below \$30.00 then there are chances that it will test \$25.50 level which means Oil prices will trade negative in coming time.*

Once again Oil will try to test \$54.78 but if this week it fails then we may see \$47.00 level once again. Major astro support point is \$49.88 level. RB Gas and HEATING OIL will follow Oil.

On Monday Oil prices will trade mix to negative but in USA trading one can take small buying, if Oil fail to rise on Tuesday then expect major corrections in once again in coming time.

On Monday Natural Gas will trade mix and prices will move both sides, trading in and out will remain best strategy in Gas on Monday. Sell or short around \$3.38 level.

This is what we mentioned on the 8th of January - *Natural Gas went down sharply as predicted and tested \$3.16 from \$3.83, and the volatile trend will continue in GAS so trade carefully. Oil will only be able to move higher if it closes above \$54.78 for three days which we don't see happening.*

Energy stocks traded mixed. ERX is unable to move above \$43.00 and Oil above \$54.78 which is not a good sign for the energy market.

We are not changing any of the predictions we mentioned on the 3rd of June: Same kind of positive, RB GAS and heating Oil also moved higher. Natural Gas traded mix. ERX have been hanging around \$29.00 level and it must close above \$33.00 level to give bullish signal in energy stocks which we don't see at this stage moment.

Oil has been failing to close above \$48.88 level but same time it is not closing below 48.88 level as well. If Oil closes above \$48.88 for three days, then the next price level of \$52.55 may get achieved. At this stage some selling is recommended around \$48.88 level and on the down side the important level to buy is at \$44.55. Oil prices have gained almost 70% from \$27.71 which we called the perfect bottom for Oil.

This is what we mentioned on the 2nd of February: Many are predicting Oil remaining in the teen's, but we do not see Oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will struggle to move above \$35.18 levels, and if it does than \$44.55 is next target with \$48.88 selling level.

Natural Gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural Gas around \$1.72 and below.

This is what we mentioned in our book "2016 Financial Predictions" in Oil's section:

IMPORTANT NOTE: *As most of you are aware our view for energy has been very negative since June 2014. The overall trend in energy prices will remain negative so we do not recommend adopting long term positions. This means that do not take any trades earlier in the year and continue holding them for the rest of the year, because the higher side in Oil will remain limited. There will be better opportunities to make money by trading in and out. Heating Oil and RB Gas will follow Oils trend, so during this year we may see Oil moving towards \$48.50 or \$52.95, and on the down side it may hold \$34.55. If it closes below \$35.55 for*

three days then there are chances that Oil prices could fall towards \$29.65. Traders should take advantage of buying short term call options before any of the above-mentioned cycles start, and also book profit quickly before the positive cycles end.

Energy stocks will trade mixed without any major movement, so longer term investors should not be putting any money in energy stocks. Any sharp rise should be taken as a profit booking opportunity if you are holding any energy stocks.

Natural Gas' trend will remain positive during 2016, so one can stay long in Natural Gas in the year 2016. However, it is very important to remember to keep booking profit before any of the above mentioned negative cycles start. Overall, Natural Gas will outperform Oil in the year 2016.

For short term strategies and price targets please follow our weekly and daily newsletters.

Ninth Cycle:

From the 26th of November to 31st of December 2016 - During this cycle, we see positive momentum coming back in the energy markets; Oil prices will form a bottom, and Oil stocks will also act positively. Even though this is a positive cycle, the higher side will remain limited. Natural Gas and RB Gas will move sharply higher during this period.

Energy trading ranges for 2016:

Crude Oil: \$52.95 to \$29.78 (As predicted last year, Oil may hold the \$30.00 level, and if it trades below that for five days, then there's a possibility that it could test 2002's low of the \$27.78 level)

Natural Gas: \$2.88 to \$1.82 (higher side \$3.57 if it cross \$2.88)

Look at accuracy levels about Oil that we predicted in the book.

This is what we stated Monday, the 31st of Oct 2016: *Friday Oil, heating Oil and RB Gas traded negative as predicted. Energy stocks also went down but Gas traded mixed. On Monday, Oil will trade negative; stay sidelined or those who are holding shorts can continue holding and cover some around \$47.50. If Oil starts trading below this, then expect \$46.75 to \$44.88 level, cover all shorts at \$44.55 level. Heating Oil and RB Gas will trade negative or will follow Oil. On the higher side, Oil will struggle to remain above \$49.88 level which is the most important astro resistance level.*

Natural Gas will trade on both sides without any clear directions so avoid trading but on the lower side one can buy GAS for Tuesday. Don't touch energy stocks as they will keep struggling.

This is what we mentioned on Friday, the 2nd of Sept 2016: *On Thursday Oil, heating Oil and RB Gas prices went down sharply lower and weakness will continue Friday. One can cover 50 to 70% shorts around \$42.61 level in Oil and 100% around \$41.78, so one can cover positions in heating Oil and RB Gas on Friday.*

This is what we mentioned Monday, the 21st of December 2015: *Last week energy traders remained very nervous as they felt like abandoned by the bigger financial institutions and other large energy investors, but the truth is that every energy trader or investor is badly stuck energy trades.*

In 2008 we predicted a crash in Oil from \$145 and in 2009 we predicted that it had bottomed out at \$33.00 level. That prediction provided great returns those who invested in Oil and energy stocks. Now once again after the prediction of Oil falling in 2014, since the last two weeks we have been predicting that Oil would form a bottom around \$34.55 level so watch this prediction closely. I am not saying that Oil won't fall below \$34.55 level but surely those who will buy around this level may be rewarded handsomely.

Maximum fearful days: According to the current astro cycle we see another 12 volatile or fearful trading days are pending but the down side is limited.

This is what we mentioned on the 27th of August 2015: *If Oil trades below \$47.00 for two days then there are chances it could retest our magic support*

figure of \$44.55. If it starts trading below \$44.55 then next level \$38.50 so avoid buying positions.

We are not recommending any buying in heating Oil and RB Gas, also one should avoid buying any energy stocks.

This is what we mentioned on the 27th of April 2015: Adopt trading in and out strategy in energy, **but don't take any shorts in Oil, heating Oil or RB Gas. Sell some energy stocks.** Energy stocks will trade mixed without any major move so one can get ready to sell energy stocks. Higher side it is possibility that Oil may see \$63.80 level, if its hold \$57.00 level. Keep adding positions in Natural Gas around \$2.55.

This is what we mentioned on the 5th of March 2015: *Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors. On Down side Oil will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.*

Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for Oil is \$47.00. ERX won't be able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.

This is what we mentioned on the 3rd of January 2015: **On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating Oil and natural Gas lost value as well on Monday. Don't buy RB Gas and heating Oil but surely natural Gas can be bought around \$2.71.**

This is what we mentioned on the 23rd of December 2014: **Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.**

This is what we mentioned on the 11th of December 2014: *Wednesday our fear proven very true, we strongly recommend to stay away from Oil. When Oil broke \$92.88 we recommended sell Oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if Oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.*

This is what we mentioned on the 5th of December 2014: ***Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, Oil, RB Gas and heating Oil. Natural gas gained value from the lower levels on Friday as predicted.***

On Monday the higher side will remain limited, and if Oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like Oil is getting ready to break \$60.00 so stay short or add selling on any fall.

Currencies:

This is what we stated on the 4th of January, 2017: ***We don't see dollar index going above 103.78 level so watch closely and closing below 102.55 will push dollar toward 101.55 level. Most of currencies gained nice value on Wednesday, emerging market currencies had best day.***

On Thursday, most of currencies will trade both sides, buying is recommended on lower sides in most of currencies so don't miss opportunity.

Buy Pound, Yen, Australian dollar and Canadian dollar. Also buy Franc and Euro without fear.

Astro cycle changed late today on 3rd January so safe buying in all major currencies against USD.

Dollar closing below 102.75 will confirm that it would test the 101.55 level this week.

We are not changing any predictions in currencies of what we mentioned on Monday, the 31st of October 2016: ***Once again tested 99.00 level but then sharply came down from the middle of the trading sessions. We are still recommending to keep building positions in USD around 99.00 level. On***

Monday, we still recommend buying Euro and other currencies around the lower side, or selling USD around the higher side level. On the down side USD may hold 96.71 level so watch this level closely. Euro can move up to 1.1111 level in this week, so book profit if it goes there.

On late Monday, the Scorpio Moon will bring both sides volatility. On Wednesday, the FED will announce decisions and due to the Scorpio Moon traders will get confused. Trade light or just trade in and out in currencies but medium term traders can hold selling positions in USD.

Stay short in Yen but one can cover Japanese Yen as it may move towards 0.9525 to 0.9250 level at this stage.

This is what we mentioned on Monday, the 29th of August 2016: We see Euro holding 1.1055 level and Pound 1.2925 level. We don't see it falling below 0.9410 level and on the higher side it will have a difficult time to move above 1.0198 level. For USD index 97.00 to 97.50 level will play the role of a Wall for dollar which dollar may not be able to breach at this stage, or maybe even for the next six weeks, and on the down side USD may test 92.50 level.

This is what we mentioned last Monday, the 25th of July 2016: This is what we mentioned on Wednesday, the 13th of July: Any rise shall be taken as selling opportunity in Yen, in the next two months we can 900 pips in Yen or it will easily come down to 0.9200 level very soon. We don't see Yen moving above 0.9878 level and in the worst case scenario 1.0000 will be maximum side.

*Friday USD tested 97.50 level and this is an important level. Dollar may keep testing this level during this week. **We don't see Euro going below 1.0923 and Pound 1.2988 level.** Pound should be in you aggressive buying list until it holds this level.*

On Monday, the 11th of April 2016 we stated: Last week USD traded negative, and lost value against most of currencies. There are still chances that USD may test 92.50 level so watch USD trend closely, and start taking positions at 92.50 level.

Emerging market currencies have done very well and it's time to close positions if you are short or medium term traders. Rupee won't fall much so don't short Rupee but surely Rand, Real, Peso and Rubble will lose some value from middle of Monday.

Australian won't hold above \$0.7725, Canadian dollar 0.7900, Euro 1.1475, Franc 1.0555, and Yen 0.9288 level.

This is what we mentioned last Thursday: Pound is ready for 1.4123 mark. Sell Pound and add more Swiss Franc sell.

We are not recommending any new short in Euro, surely one can acquire some positions in Euro for the short period of time.

Emerging market currencies are getting ready to for bottoms expect few won't be trust like Rand and Rubble. Wednesday we see many currencies gaining some value but stay away from Pound, Canadian and Franc as they can keep making new lows so hold positions with 3% more corrections.

This is what we mentioned on the 22nd of December: Euro will struggle to move above 1.1075 and may hold value 1.0725 so watch these both levels closely.

This is what we mentioned on the 23rd of April 2015: The Medium and longer term trend is still very positive for USD but for the short term a mix to bit weaker trend indicated. USD Index have achieved our target of 100 and now down side 95.00 or at worst case 90.00 level will be great buying.

Dollar is our longer-term buying trade so we won't recommend shorting dollar, we recommend buying USD on any weakness. Euro higher side 300 pips and lower side more than 3000 pips. We don't see USD index going below 95.00 levels.

Remember this what we mentioned on the 5th of March 2015: Currency war has nothing to do with USD Friday USD gained value as predicted. Medium- and longer-term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.

Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.

This is what we mentioned on Monday, the 15th of Jan 2015: Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just finished one interview from

Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell as it will going to go back to par levels.

This is we mentioned on the 2nd of October: On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.

Remember, this is what we mentioned in the month of July: At this stage USD is trading in a positive direction without any break since the last three weeks. Finally, it is reaching a most crucial level because once it breaks 81.78 then the nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.

This is what we mentioned in the month of May (2014): Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.

In this year's book "2015 financial predictions" we predicted the "final bear cycle in the market from the 27th of July to the 15th of August 2015". Yes, the Sun can bring some uncertainty, but take this uncertainty as a buying opportunity at the same time in 2015 in the month of August.

Watch the 2088 level for S&P, as it is most tough astro resistance of 2015. In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

In our 2015 book we mentioned that commodities will have worst year of 2015, and so far precious metals, base metals, grains and softs have been struggling and they will keep moving down in the second half. Dollar will perform amazingly well in 2015 so hold positions and money in USD.

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
