Weekly Newsletter from 23 - 27 Dec 2019

Don't focus on high valuations because stocks have power top double from here..., most awaited "2020 Financial Prophecies" is ready to launch...

Dear Members,

Last week I was talking about how the world has created an unbelievable amount of wealth over the last ten years. In the USA, investors, Hedge funds, and money managers have made fortunes. Many people still complain that they haven't done that well, and there are very serious reasons for those who haven't performed that well, and here are the reasons:

1. They remained skeptical.
2. They thought that the world was full of problems.
3. Looking at the macro picture too much.
4. Following technical analysis too much.

Unfortunately, there are not many subjects that can tell you about the future, the way we have been for the last ten years, constantly recommending buying on every weakness or corrections every year since 2009.

It is always a challenging job for any investor to make money because the markets are so sensitive and volatility. Price movement scares people and disbelief takes over. Media and the current happenings in the world make them question what they are supposed to believe.

It is a very confusing fight within every investor about how to beat the market or make a great amount of money. It is very difficult to change our behavior pattern, and the nature we are born with. There is always fear try to get activate within every human being, that can get triggered by the smallest of events. This is what creates the problems. Even though I have been saying that meditation is a key part in every letter, I will stress, it is one of the most powerful tools to win over fear. My weekly newsletter is not just about the market, or how to make money. It is about the journey of investment the day we decided to build our careers in investing.

If you are successful, and if you are able to bet correctly in the market, then there is no other business that can create you such a great amount of wealth from a small amount of capital in the longer term.

We can keep talking about these things, as I have been over the last thirty years. Many of you have been our subscribers for the last 20 years, so those who have been subscribing to my letter for the last 20 years, should look back and see how much of a difference my letter has made in their lives. Have they been able to change from within?

Let me tell you one thing, mistakes about bound to happen because that is part of our journey, but the impact of errors should get reduced or minimized over time, and if it doesn't then there is a serious problem.

I do not want to talk much about this subject, it depends on how each individual takes their life ahead. I am not a preacher nor a spiritual guru, but I will urge that please take care of yourself by mediating or going with in.

Let's talk about markets, I know many of you will ask what is going to happen in 2020, will the market rise from here, or will the bulls journey end here.

Let me tell you that I have done hard work to write "**2020 financial prophecies**", and that book will answer all of your unanswered questions. Last year the recommendation of selling palladium was one of the biggest errors I ever made. Mistakes are bound to happen, but I should have realized my mistake much before, rather than allowing my mistake to spiral by remaining ignorant. The rest of the predicts for each and every areas did very well, and I can confidently say that 2019 was one of the best years for predicting.

I would like to put a very important note here, that over the last 7 years, I have frequently stated that the **valuation method for stocks needs to change**, because the worlds dynamic has changed, and I realized that in 2013, and that is the reason I said many of these frontline tech and biotech stocks could move 10-50 folds in the coming years. I think that was one of the best notes I made in my life. Keeping that in mind I am still bullish for many stocks, and they can still keep moving higher in multi-folds so remain aware about that.

The next two weeks are very short weeks, and there are only 6 trading days left in 2019, and the market is trading around an all time high. It looks like 2019 will end up being one of the best years for investors. I strongly recommend spending the next two weeks with family and friends, we deserve to spend this time with close ones, because we work so hard throughout the year. I would like to wish you merry Christmas in advance and lets see what this week indicates for most of the financial markets.

One of our members sent us a small note yesterday who were short in palladium:

My brother mahendra, we love u lots.
And u r corrects about palladium.

This one commodity in my disfavor I have bet on it numerous times but unfortunately it hasn't gone in our favor ...And I have lost a fortune

But as u have written on numerous occasions it's all to do with luck in our charts as well as yours and OURS haven't jelled connected to our expectations but it's still beautiful...

U r beautiful and I am sure that going forward there will be an opportunity where we will be able to make back.

I am astounded by your predictions and super intrigued by your abilities...and I really spiritually would love to be able to relate more in depth About astrology.

All is great and we thoroughly value your time with us and appreciate. All ..

But always just to keep u aware of what's happening with us.

That's why on the odd chance we like to remind u of our happenings

But all beautiful

Thx for all your updates

I want to tell u if I make anything, I would clearly reinvest it with u.

But since I have been subscribing to u and I am sure from about 2003 since carte blanche I am totally infatuated by astrology...and you...

Thx for all and we understand the risks

But it has taken me years to learn your methodologies

Thank u ...

Always

Martin wingate

Hello Mahendraji,

At the outset, Congratulation to you for S&P500 achieved your prediction Target of 3200.
Keep doing good job, may god bless you...

You should pen down & publish the book on your theory of Astro market cycles ...**Wave of Nature**
Let the knowledge & wisdom you have gained over years of research & experience, may get passed on to next generations.

With Regards,
Vijay Bhatt

This week's Newsletter from 23rd to 27th of December:

GOLD/SILVER/BASE METALS

Last week precious and base metals traded mixed without going in any clear direction. Gold has been unable to move above \$1488, and it is a very crucial level. Once it starts trading above \$1488 then a new era can begin

in gold.

This week looks somewhat very positive for precious metals due to positive astro combinations.

On Monday we are recommending buying gold, silver, and platinum around the lower sides. In the US market we see gold, silver, and platinum prices gaining value, so buying is recommended in Asia and European markets.

On Tuesday the positive trend in precious metals will continue so hold your long positions.

JNUG and NUGT are great buy for the short term on Monday.

On Thursday...Subscribe to read complete weekly newsletter

Make wave of nature/astronomical cycle an integral part of your trading/Investment strategies!

www.mahendraprophecy.com

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
