Weekly Newsletter from 25-29 July

Fed is ready to hike so after this event FED will pause, no economic problem...but we are more worried about the weather and food supply in the next three years...

Dear Members,

Last week the markets performed very well globally. A few of the emerging markets gained momentum, and the European markets also acted positively. The EV giant Tesla went crazily higher after strong profit numbers, even though the revenue was a little soft. Tesla is our top pick in the medium to longer term, and we still see the stock

going towards historic highs. Every investor on this planet must own tesla stock. I think I have mentioned a few times that I missed the greatest money-making opportunity in Tesla in 2018/19. Nature provided me with the trade, but as most of you know I haven't been trading for the last 17 years. If I had taken that trade, it would have provided me with a \$450 million profit. Even though I don't have any regrets, the important thing is that I respected the Astro combinations and maybe making that kind of money would have changed

my attitude, and I might not have remained the same person, so nature does what it is supposed to do to keep things in order.

Soon I will be buying tesla call options, and once I design the trade I will let you know at the right time. The Astro combinations are showing great momentum in lithium stocks, and many of the semiconductor stocks. A great time to make money is coming, so do not focus on what is currently happening in the world.

The Russian invasion created problems for Russia. Many of the Russian commodities are falling very hard, and they have even gone below the prices they were trading at before the invasion. Overall, the commodities cycle is becoming good, and they are very close to bottoming out as per the Astro combinations. Major hyperinflation is on the way in 2023, so the FED and the world's businesses will face challenges, and slowly the world will adopt and accept the higher level of inflation.

Our view is extremely bullish for agricultural commodities like coffee, corn, wheat, and Corn. These commodities will perform very well in the coming time. The second half of 2022 may put some pressure on the commodities, and the commodities will trade in a mixed trading pattern throughout the next five months. **Wait for the September letter because major weather-related issues are coming and a better world should get prepared for catastrophe.** Food and famine crises may be saviors in coming so ignore Russia, war, FED, and the economy, and we should focus to secure food supply.

The dollar index has made a top and a great buying opportunity in currencies against the USD, especially in a currency like the Pound and Yen, which is poised to gain 10% in a short period of time. Many of the emerging market currencies will turn around this week so one should start planning to invest in emerging market currencies.

FED Meeting: This week the FED meeting will leave many doubts behind regarding the FED strategy as according to the Astro cycle theory we do not see any major higher rates after this one, so this could be the final hike of 2022, and we predict today, that we won't see any hikes in the remaining of 2022. This will be very crucial for the Dollar, commodities, and the market. **We won't be surprised at all if the Dollar comes down after the FED meeting, the commodities gain value, and the market starts moving higher aggressively.**

Last week Russia and Ukraine agreed to start supplying grains which is good news, but wheat prices have also already dropped almost 40-50% from the higher side. Both the countries were not able to take advantage of the higher prices. Russia has hardly gained anything from the invasion, surely some political power, and some territory from Ukraine, but apart from that they haven't achieved anything major. Their oil is selling at a more than 30% discount to India and China, and now oil prices falling is not helping Russia either. Surely the sanctions have hurt Russia badly, and most of you must be aware that most of the ADRs stopped trading in the international markets, no major finances are available for Russian companies, and many of the industrial and auto parts are not available for the companies. This has had a huge economic impact on the country and will take many years to recover. The Russian invasion put pressure on the global equity market, but we are a glass-half-full kind of person, as this is one of the best buying opportunities in the market.

We still see the market moving towards historic highs, and the rally will continue in the market for at least the next 5-6 years, and semiconductors will play one of the biggest roles in this rally. Invest your hard-earned money in semiconductor and lithium stocks.

Here is this week's newsletter from the 25th to the 29th of July 2022:

GOLD/SILVER/BASE METALS

Let me be very honest when I say that I have not been very accurate lately on the silver call, especially during the last year since I predicted that silver will hit \$50-\$75. Many members are still asking me whether silver will still hit \$50, and my answer is yes, it will hit even the 3-digit mark, but over the next five years. In the short term silver has formed a bottom, and in the worst case scenario it can test \$16.16, and in the worst case it can trade in a mixed trading pattern for the next 7 months, but after that, no external power on this planet can stop silver from rising.

Last week precious and base metals bottomed out on Thursday, which was a very important Astro day. Last Thursday and Friday were very important Astro days, and precious and base metals bottomed out which is very good news. It looks like the worst is over for metals. If this week metals move lower after the announcement, that should be taken as a buying opportunity in precious and base metals.

This week the Astro combinations are turning positive from late Wednesday, which means that the Fed event may not be able to push down precious and base metals lower than last week's prices, which means that the low has been formed in precious and base metals.

Here is what this week's Astro combinations indicate for metals:

On Monday precious and base metals will trade on both sides. On the lower side one can buy positions, and book profit on the higher side, or if it opens

higher then book profit if you have long positions, and buy back around the lower side.

On Tuesday once again mixed movement will be witnessed in metals, but if there is a weak opening then we recommend buying or buying around the lower side levels in our daily flash news or day trading ranges.

On Wednesday, after the FED meeting ends get ready to buy precious as well as base metals. Wait for the correction after the FED meeting and jump into buying before the US market closes or in the last hour of trading.

On Thursday we see a sharp rise in precious metals, and base metals will trade mixed to positive.

On Friday the positive trend will continue, but some profit booking is recommended around the higher side.

IMPORTANT NOTE: It looks like the worst is over for metals, and they can have some rally for the next two weeks, but still overall consolidation time will start so remaining a medium to short term trader. Buy on any sharp correction, and booking profit on any rise should be the strategy.

Monday's Astro combination recommendation – On Monday metals will trade mixed so trade in and out as predicted levels here below.

Monday's trading ranges: (Continue 2022 Contracts):

GOLD: \$1747.00 to \$1706.00 (Spot: 1746 to 1711.00)

SILVER: \$18.95 TO \$18.35 (Spot:18.90 to 18.41)

COPPER: \$339.00 TO \$329.00

PLATINUM: \$882.00 TO \$855.00

PALLADIUM: \$2095.00 TO \$1945.00

INDEXES

Last week the US market performed very well. Tech stocks, especially semiconductor stocks gained value aggressively from the lower side. Some profit booking was witnessed on Friday, but that was expected, so we are not worried

about any weakness as we should be feeling excited, because any weakness from here will bring a great buying opportunity in the market, especially in tech stocks.

The Astro combinations have turned very positive for the market, and this week from the FED event, we may see a non-stop rally in the market till the 11th of

August, which can push the market another 5% higher, so get ready for this rally. Keep accumulating tech stocks, and some of our favorite names like VISA, MASTERCARD, SBUX, TESLA, AMZN, NFLX, and Lithium mining.

From Friday's close, the market can move down a maximum of 1.5% lower, and on the higher side, we see 5-7%. We would also like to predict once again that the worst is over for the market, and the market won't see last month's low again for the next 6-7 years, so this is a very strong statement. The US market will outperform and many stock prices will move in multi-folds. I won't be surprised at all if SQM moved to \$500, and ALB goes to \$700. If you can afford it then you must subscribe to the lithium letter. 1007 point non-stop rally is expected in NASDAQ, and almost a 300-point rally in S&P, so take August and mid-September calls, and you won't regret it, and these calls may provide you with great returns.

Here is what this week's Astro combinations indicate for the Indexes:

On Monday the Astro combinations are mixed, but buying is recommended around the lower side in most of the markets.

On Tuesday any weakness should be taken as an aggressive buying opportunity.

On Wednesday wait for the FED decision, and any weakness should be taken as more of a buying opportunity in all the major frontline tech, semiconductor, as well as financial stocks.

On Thursday financial and most of the other sectors will perform very well, including commodities.

On Friday the market will trade positively, and any weakness should be taken as an aggressive buying opportunity, because next week on Monday the market may open sharply higher.

IMPORTANT NOTE: It is time to build aggressive long positions in the market. Ignore all the negative news. Amazon looks like a great pick, so do not miss the buying opportunity. If you can afford it, then subscribe to the daily flash news as, after any important event, our notes in the daily flash news are very important.

Monday's Astro combination recommendation: On Monday aggressive buying is recommended in markets around lower side levels.

Monday's trading ranges: **(June 2022 Contracts)**

HONG KONG (cash) –20855 to 20411

NIKKEI – 27833 to 27529

NIFTY S&P (Spot) – 16775 TO 16570

CAC – 6201 TO 6131

DAX – 13281 TO 13035

DEX EURO STOXX –3598 to 3548

FTSE – 7235 TO 7135

S&P e-mini – 4008 TO 3931

NASDAQ 100 e-mini – 12588 TO 12293

RUSSELL e-mini – 1835 TO 1781

DOW e-mini – 32282 TO 31701

CURRENCIES

Last week the dollar struggled to move higher as predicted. The dollar index traded between 107.82 to 106.15 and closed around the lower side level. Every currency trader is waiting for the FED announcement, and I don't see any major excitement so get ready to sell the dollar on any rise after the FED meeting. The Japanese Yen has not bottomed out, and it is providing us with a great buying opportunity on Thursday, so wait for Thursday to get into the Japanese Yen.

British Pound, Canadian Dollar, and Australian Dollar are great bets at this stage, so buy these three currencies, and keep accumulating on any weakness. Out of all these above-mentioned currencies, British Pound will make a major positive move, so take advantage and buy on any weakness in the Pound.

Euro and Swiss Franc will trade mixed, though they may have a final upwards trend in the remainder of 2022, and the first quarter of 2023, before the Euro starts trading below par value.

Emerging market currencies are a great bet so buy some aggressive positions on Thursday after the FED meeting, and most of the emerging market currencies are ready to move 10% or higher in the remainder of 2022.

Here is what this week's Astro combinations indicate for the Currencies:

On Monday a mixed trend is expected in the currency market, so trade in and out by following our daily trading ranges. The dollar may gain some value.

On Tuesday a mix to the tight trading range is expected in the dollar and most of the currencies, so follow our daily trading ranges as mentioned in the daily flash news to trade in and out.

On Wednesday we see a major buying opportunity coming in most of the currencies, and a selling opportunity in the dollar, so wait for the FED announcement. Any sharp rise in the dollar should be taken as a selling opportunity, and a sharp fall in currencies should be taken as a buying opportunity.

On Thursday from the European trading session, one should start building short positions in the Dollar and buy aggressive positions in the Pound and the other currencies.

On Friday a mixed trend will continue, but the dollar will still be a great sell on any rise.

[REDACTED]

Monday's Astro combination recommendation – Selling is recommended in USD and buying most of the currencies. finally, Yen bottomed out.

Monday's trading range: (June 2022 future Contract):

DOLLAR INDEX – 106.93 to 106.16

AUSTRALIAN DOLLAR – 0.6951 to 0.6880

CANADIAN DOLLAR – 0.7768 to 0.7711

BRITISH POUND – 1.2059 to 1.1947

EURO – 1.0288 to 1.0195

JAPANESE YEN – 0.7435 to 0.7315

SWISS FRANC – 1.0468 to 1.0384

USD/RUPEE – 80.01 to 79.70 (Spot)

USD/RAND – 17.00 to 16.70 (Spot)

USD/PESO – 20.69 to 20.48 (Spot)

USD/REAL – 5.52 to 5.45 (Spot)

ENERGY

Last week oil prices struggled to move higher as predicted, and any rise was a great selling opportunity as predicted. Oil traded between \$101-\$93 last week, and closing below \$92.28 will open the door for Oil to move towards \$81.88, which is very much possible in the coming month. Many financial experts and big names including Goldman, JP Morgan, Merrill, etc. predicted that oil could go to \$200, but we kept saying that Oil may not even cross \$130, and so far this prediction has proved to be very accurate. Though we were a little nervous because of the Russian invasion, and sanctions on Russia, we believe in the Astro cycles and predicted that oil will top out around \$130. We have been predicting that this year we may see \$71.38 in oil, and we still believe that that will be achieved.

Natural gas has performed very well during the last week. It gained almost 17%, and we are still not recommending any shorts in Natural Gas, but one can watch for \$8.18 and \$8.68. We recommended closing the longs around \$8.18, and one can take some short positions around \$8.65, but make sure that you have a strict stop loss in place. If Gas trades above \$8.65 for 3 days then it can easily start trading above the two-digit mark.

We have been predicting a major bear market in the energy prices will start in the second week of August, so close all the major long positions in energy stocks and the energy market by early August.

Here is what this week's Astro combinations indicate for Energy:

On Monday selling is recommended on the higher side of the energy market, and covers back positions around the lower side.

On Tuesday trade in and out in the energy markets. On the lower side, some buying will come.

On Wednesday once again some corrections will come, but then buying will come as well during the late trading sessions.

On Thursday and Friday energy prices will move higher, so your strategy should be to buy at the low and book profit at the higher side, so follow our daily trading ranges by following our day trading letter or daily flash news.

IMPORTANT NOTE: if on Thursday and Friday energy prices fail to rise, it will be bad news for the energy market and energy traders as prices will correct sharply towards the lower side in the coming weeks.

Monday's Astro combination recommendations for Oil – On the higher side selling is recommended in the energy market on Monday. Close also natural gas positions, or trade in and out. Watch important Astro support level \$92.28 level, closing below this level will push oil sharply lower.

Monday's trading range (Continued future 2022 contracts):

OIL: 96.01 to \$92.07

NATURAL GAS: \$8.38 to \$7.86

HEATING OIL: \$3.5010 TO 3.3400

RB GAS: \$3.0900 TO \$2.9711

GRAINS

Last week grains prices traded sharply negative, and now they are coming closer to our comfortable level of buying, because the Russia/Ukraine issue pushed the prices sharply higher, and now they have come to reasonable levels where we can recommend buying. They may move higher without any major news, but surely weather will be a key issue for grains to push higher in 2023. Any kind of war and short-term international conflict cannot play a major role in guiding any trend, and that is the reason we like to follow the natural trend.

Wheat and corn will be bringing a great buying opportunity if they correct a further 5% from here as they will be achieving our most important Astro

support level, and according to our theory, the Astro support levels are very important. Of course, the Astro time cycle plays a great role as well once the support and resistance get achieved.

From the 15th of August, we see gains prices moving sharply higher, which means you have another two weeks to accumulate grains. Most of you are aware that wheat and corn are our favorite trades.

Here is what this week's Astro combinations indicate for Grains:

On Monday grains prices will trade mixed, but we are recommending buying around the lower side.

On Tuesday add more positions in wheat and corn.

On Wednesday take some aggressive long positions in wheat and corn, as well as soy.

On Thursday and Friday grains prices will move higher, so overall this week is a supportive week for the grains.

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Monday Astro combination recommendations – On Monday lower side buying is recommended in grains.

Monday trading range (Continue Future contracts 2022 contracts):

CORN: \$570 TO \$556.00

WHEAT: \$778.00 TO \$748.00

SOY: \$1346.00 TO \$1312.00

SOY MEAL: \$401.95 TO \$395.11

SOY OIL: \$60.02 TO \$57.75

SOFT COMMODITIES.

Last week soft commodities traded negative. Coffee and cotton struggled and came down once again. This week is a very crucial week, and we see softs making a strong rebound once again. Great time to buy coffee and coffee.

Cocoa and sugar will trade mixed to sideways.

At this stage, we strongly recommend on Monday buying coffee and cotton.

This week's Astro combinations indicate:

On Monday softs will rebound strongly and Tuesday positive trend will continue.

On Wednesday mix to sideways trend is expected, on Thursday and Friday softs will once again move higher.

The coffee and cotton Astro cycle are turning very positive from here onward but coffee needs to close above the \$218 level to give a clear bullish single. The good news is that the Astro cycle is turning positive so coffee will breach this level and will start trading higher without any supportive news.

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

Monday's Astro combination recommendations – Buy some aggressive long positions in coffee and cotton on Monday.

Monday's trading range: **(Continued future 2022 Contract):**

COFFEE: \$209.30 TO 203.25

COTTON: 101.00 - TO 98.11

COCOA: 2320 TO 2373

SUGAR: \$18.03 TO \$17.68

THIRTY YEAR BOND

Last week Thirty Year bond traded higher. A longer-term Thirty Year bond will be a great buy and prices may move toward 155-00 in the pending 2022 which means the rate won't rise.

This week's FED meeting is coming up and FED is set to hike the rate but this could be the final one as we don't see any major hike in the pending 2022.

Buy aggressive long positions in Bond if it comes 135-00 level. we will recommend starting acquiring long positions from 137-00 level only.

The Astro combinations indicate:

On Monday Astro combinations are supportive but higher side selling will come.

On Tuesday mix kind of trend is expected.

On Wednesday lower side get ready to buy long positions.

On Thursday Bond prices will move higher.

On Friday both side trend is expected.

In the second half of 2022 and 2023, interest rates will not rise, which means that the Thirty-Year Bond might not see 130-00 again.

We don't see 129-00 getting breached by the Thirty-Year Bond in 2022, so this level will be a great buy (this prediction has proven to be very accurate). In 2020 we recommended aggressive short positions in Thirty Year at 182-00 and we targeted that Thirty Year may test 129-00 level which happened last month, this was an amazing prediction.

This is what we have been mentioning for the last two weeks: *If the Thirty-Year bond holds around 134-00, then we may buy with a higher-side target of 143-00.*

Monday's Astro combination recommendation – Trade in and out in Thirty Years.

Monday's trading range (March 2022 contract):

TREASURY BOND – 143-03 TO 141-12

CRYPTOCURRENCY

Last week bitcoin and Crypto gained some value. Bitcoin can test the \$25788 level on the higher side and still on the lower side \$13838 level is possible. We strongly recommend staying from any buying in Crypto, though this week Crypto may gain small value from Thursday to Sunday, the still higher side will remain limited.

On Monday Crypto will trade negative.

On Tuesday we small rebound and Wednesday Crypto will gain value.

On Thursday Crypto will trade mix but lower side one can buy small positions.

Friday to Sunday Crypto may gain value.

Thanks & God Bless
