25-29 March weekly newsletter

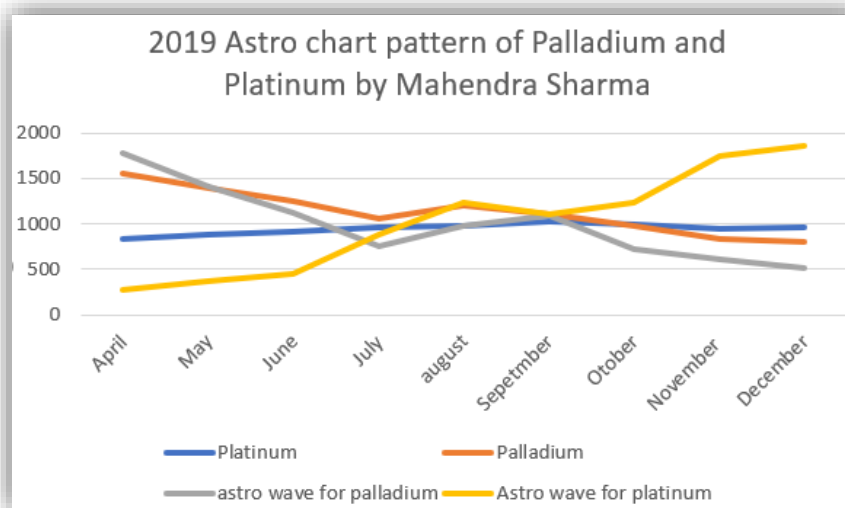

Nasdaq has power to push this market back toward high of last week, don't short tech stocks, if Monday was not scorpion moon then I would have recommended aggressive buying... buy short term call in NASDAQ...

Dear Members,

Let's talk about a few trades today which could make you money in the coming time, BUT before we do that let's keep discussing planetary movements so that you are aware about what is happening.

Last week on the night of the 21st Mars changed its house which created panic in the market, this Mars could be dangerous for the market, but we must remember that Jupiter is changing its house this Thursday around mid-night, which is another important transit for the month. I take every transit very seriously so let see what these planets bring for commodities, the market, and currencies, but I just want to focus on a few traders which could provide you with a great amount of returns in the next three months.

Metals: Mars entered in support of precious metals because it is the opposite of Jupiter, but at the same time it is not supporting base metals, and that is the reason we are predicting a weaker trend in base metals. At this stage we are strongly recommending staying away from **copper, zinc, and palladium**. Gold, silver, and platinum may hold value but I won't recommend any aggressive buying.

Best trade: Buying platinum and selling palladium will be great hedging trade for the next six months to five years. You will not go wrong at all. Yes, there is a short squeeze in palladium and that is the reason it has been moving higher, but Mars changed last Friday, and copper and palladium are falling hard since

that day which is good.

Markets: Last week market performed very well. For the last few months we have stating that closing longs in S&P around 2843 will be great steps, and have been recommending taking some short positions between 2843 to 2881, as we didn't see S&P going above 2881. This proved very right during last week.

Yes, we had 550-point rally in S&P from 24 December from 2315, which was our buying level. No one on this planet confidently recommended buying the market in the last week of December but we did, and what a beautiful recommendation it was. Anyway's now Mars has changed its house and the market didn't like it so we saw uncertainty, **but I am hoping that Jupiter still can push this market higher if it start supporting it from the last hour during the USA trading sessions on Thursday**, as that will be the best news. At this stage market volatility will continue. Trading in and out will be best advice before I either advise you to bet with the bear or bull this Thursday. **Monday and Tuesday is Scorpio Moon but market has power to rise and Nasdaq or tech stocks can do this.**

Currencies: There could be major volatility in the currency market from Thursday onwards, If Jupiter fails to support USD, then we may see huge corrections starting in USD. Emerging market currencies, Pound, Euro, and Australian dollar can gain significant value but my advise will be to bet on Australian Dollar and Pound with emerging market currencies.

Whatever Jupiter supports from late Thursday, that will be the trend that will last for one month, and after that once again a new trend will develop.

We mentioned last month that I am really excited to guide you during this North Node cycle. Please take each piece of our advise seriously and must bet on our recommendations as we may come more accurate due to my charts astro cycle.

Cannabis stocks are making moves so stay long. **Nasdaq has the power to move higher so don't hurry to bet against the market because Jupiter may come forward and start supporting the market from late Thursday this week so watch the evening of Thursday and Friday.**

Scorpio Moon on Monday and Tuesday, so stay on the sidelines without taking any aggressive positions. Remain a day trader as both side move movements can come in currencies, commodities, and the market. Any extreme move on either side should be taken as a trading opportunity, and Scorpio Moon has the power to reverse that direction.

Please don't forward our letter to anyone as we put of heart and soul in it to guide you so don't break our mutual trust. Tell people to subscribe their own rather than asking for free information.

Our book "2019 Financial Predictions" showing very positive sign for market in March and early April so be aware about it and follow it closely. This is worth giving anyone gift those who can't afford our services because I am sure this book will guide them to plan trading and investment strategy in each commodities, stocks and currencies in 2019.

Here is this week newsletter from 25-29 March 2019

GOLD/SILVER/BASE METALS

Last week metals traded mixed as predicted, and both side trend was witnessed. Thursday and Friday proved to be negative days for base metals. Copper, Zinc, and Palladium prices went down sharply and this is good news as Mars started taking more control on Base metals rather than precious metals, so base metal traders must remain a bit alert.

This week astro the cycles are supporting precious metals (gold, silver, and platinum) and it might give some support to base metals, but I will recommend taking aggressive short positions in base metals on Thursday and Friday. March provided clear indications on Palladium on Friday which means that Palladium is in the most dangerous zone and aggressive selling is recommended late Thursday and Friday as this is a life time opportunity to sell palladium.

Last and early this month I mentioned that I may start writing about Iron ore. We also recommended selling at \$92.00, and since then it has been trading in a 10% range after testing \$92.00. Early this week looks positive, if prices move toward \$92.00 then book profit but don't short it until our clear indications comes.

This week astro indicators:

Monday, we see precious and base metals recovering from lows, but I am not recommending any buying in base metals. You can surely buy precious metals on Monday. Buy gold, silver, and platinum.

On Tuesday positivity will continue in Precious metals but base metals will come down.

On Wednesday we are recommending adding more positions in gold, silver, and platinum. Base metals will trade mixed.

On Thursday most of the metals will move higher during the Asian and European trading sessions. In the USA prices will hang around after testing this weeks high.

On Friday the astro combinations clearly indicate to book profit in precious metals but sell base metals aggressively without fear.

Note: We already mentioned that the most powerful era is starting for platinum so buy platinum and sell palladium. This is a great money-making hedging trade, and if the astro forces support the market as I see then even small time traders can make 20 to 50% returns in the futures market.

Gold will hold lows of \$1292 and on the higher side \$1328 to \$1335. Silver will follow gold, but platinum will start taking the lead from here.

Wait for next week newsletter as it will be an interesting one as Jupiter is changing its house from Scorpio to Sagittarius.

Monday's astro combination recommendation – Day traders can buy positions in precious metals and add on lower side on Monday. Trade in and out in base metals.

Monday's trading range: **(May 2019 future contract):**

GOLD: \$1319.00 to \$1306.50 April (Spot ranges \$1319.00 to \$1306.00)

SILVER: \$15.68 TO \$15.31 (Spot ranges \$15.60 to \$15.32)

COPPER: \$287.95 TO \$280.90

PALLADIUM: \$1534.00 TO \$1505.00

PLATINUM: \$863.00 TO \$840.00 April 19

INDEXES

Last week the markets traded as predicted. On Thursday the USA market made a huge move on the upside but Friday's rally proved very fake as the US market had one of the worst days in recent time on Friday. Our prediction of S&P not going above 2881 proved very accurate, but I will still take a few more days before I confirm it 100%.

I still see S&P having difficulty crossing this level **but still Jupiter in favor of Technology stocks so I recommend not to short any tech stocks at this stage, on any weaker opening one must buying NASDAQ without fear as it is moving higher in coming days.** Only Jupiter has the power to make this happen. We are sure you must have close short on Friday because **NASDAQ** is still in our favorite list.

On Monday and Tuesday, the Scorpio Moon will bring uncertainty on both sides in the markets trend so be aware of that, don't remain naked short or long, have some hedging trade. Trade on both sides as the Scorpio moon has the nature of bringing a both side trend in the markets. **Any sharp correction on Monday should be taken as a buying opportunity, buy tech stocks aggressively.** Any sharp rise should be taken as a selling opportunity due to Scorpio Moon.

On Wednesday globally the market will act mixed but there will still be uncertainty. On the lower side of Wednesday, we are recommending buying so watch the lower side trading ranges in our daily Flashnews trading ranges sections to take trade.

On Thursday and Friday, the market can move higher. Jupiter changing late Thursday will open up prospects of China/USA deal but Mars is making me a bit nervous.

At this stage S&P will hold 2788 so one can buy positions in the market around this level and on the higher side 2843 to 2878 is possible.

I am not recommending buying any international market, last week we recommended selling Russell 2000 and buying UVXY as a hedging trade against holding stocks investment positions.

I still recommend selling Russell 2000 on any rise. Thursday and Friday are very crucial for most of the global markets, if market move through monthly then expect 195 points rally for S&P in the

month of April. If the market fails, then expect 133-points corrections. Wait for Fridays daily Flashnews, and next week's newsletter will be the most important one.

Trade in and out in UVXY, on the higher side \$45.15 is selling level for the short term (which already achieved on Friday) and may struggle to cross 49.00 level. On the lower side \$38.10 is also possible but everything is dependent on Thursday and Friday market trend.

Cannabis stocks are gradually moving higher, stay long in these stocks.

Monday's astro combination recommendation: On Monday avoid any aggressive trading, wait and watch will be best strategy as market has power to move higher.

Monday's trading ranges: **(June 2019 Contracts)**

HONG KONG (cash) –29059 to 28503

NIFTY S&P (Spot) – 11500 TO 11400

NIKKEI – 21201 to 20711

CAC – 5191 TO 5048

DAX – 11479 TO 11268

DEX EURO STOXX – 3247 – 3170

FTSE – 7177 TO 7039

DOW e-mini – 25738 TO 25351

S&P e-mini – 2835.00 TO 2782.00

NASDAQ 100 e-mini – 7438 TO 7371

RUSSELL e-mini – 1539.00 TO 1495.00

THIRTY YEAR BOND

Last week Thirty Year bond remained in a positive direction. The FED helped Bond prices. Last week we recommended closing all shorts in Thirty Year, so now expect prices to test 151-00 to 153-00 in the coming days.

Don't short Thirty-year bond for now but surely selling is recommended at 153-00.

On Monday we see both side moves coming in the market, it is a Scorpio Moon so avoid any trading.

On Tuesday we are recommending selling some positions but I still recommend to sell only on Friday as on Tuesday and Wednesday Bond prices can keep rebounding from the lower levels.

Now the trading ranges will be 146-00 to 153-00.

Mondays astro combination recommendation – Trade in and out as mentioned below ranges.

Monday's trading range (June 2019 contract):

TREASURY BOND – 149-11 TO 147.23

SOFT COMMODITIES

Last week cotton moved higher but the rest of the softs struggled. I have great hope on Jupiter pulling these soft commodities out of the bear market cycle. Jupiter is changing on late Thursday which means that on Friday coffee, cocoa, sugar, and cotton shall all move aggressively higher.

From Monday to Wednesday trade light in soft commodities but from Thursday start accumulating positions in the market without fear and lets see if Jupiter does the magic on Friday.

Buy cocoa, coffee, and sugar with exactions of a 15% rise, and 15% is lot for any commodities as all these commodities trades are very high leveraged.

Lumber prices collapsed and this week weakness will continue. Stay away from orange Juice.

Monday astro combination recommendations – Hold long in coffee, cotton, cocoa and sugar.

Monday's trading range: (May 2019 Contract)

COFFEE: \$95.15 TO \$93.11

COTTON: 76.50 TO 75.75

SUGAR: \$12.69 TO \$12.44

COCOA: 2178 TO 2107

LUMBER: 373.04 TO 363.15

ORANGE JUICE: 131.40 TO 127.04

GRAINS

Last week grain prices traded mixed, wheat bounced back to \$50.00 from the lows over the last two weeks. Soy and corn also bounced back.

Soy oil prices are slowly coming down as predicted without any rebound. We are recommending staying away from any buying in soy oil at this stage.

Soy meal will follow soy bean so stay long in soy meal this week.

Jupiter will play a supportive role for grains, so we are recommending buying more positions in grains on Thursday and hold positions tightly.

On Monday around the higher side one can book profit in wheat and the rest of the grains like corn and soy will come down from the higher sides.

On Tuesday and Wednesday grains will trade mixed, and we are recommending staying on the sidelines.

Thursday will be best day to acquire positions in grains as on Friday grain prices will move aggressively higher and many bull markets will take birth from here onwards.

Corn, soy, and wheat will be great bets, and corn has the power to achieve a top of \$411. Soy can test \$971 in the coming few weeks. Wheat can see once again test \$515.

On the lower side we don't see corn going below \$368, soy \$888, and wheat \$443.

Monday astro combination recommendations – Trade in and out in grains.

Monday's trading range (May future 2019 contracts):

CORN: \$381.00 TO \$375.00

WHEAT: \$473.00 TO \$461.00

SOY: \$912.00 TO \$893.00

SOY MEAL: \$318.20 TO \$311.90

SOY OIL: \$28.93 TO \$28.35

ENERGY

Last week oil prices traded in tight ranges. Still oil is respecting our predicted astro resistance level of \$60.68 level and it failed to test this level. We are only recommended selling at this level. Natural gas moved sharply lower, but great time to acquire more positions this week.

On Monday we are recommending trading in and out without taking any overnight positions, lower side can

buy and higher side book profit.

On Tuesday Oil prices will gain, if oil fail to gain value then it will be bad news, if oil gains value on Tuesday then oil prices may move further higher.

On Wednesday we see oil trading negative from the higher side, so selling is recommended on higher side ranges.

Thursday one can cover shorts around lower sides, but positions in oil, heating oil and RB Gas. Same story could be repeated on Friday.

We are strongly recommend buying natural gas around \$2.66 to \$2.72 level, with target of \$2.96 to \$3.16. This will push UGAZ also sharply higher.

Monday astro combination recommendations for oil – Higher side selling is recommended in oil and buying is recommended in gas on Monday.

Monday's trading range (April 2019 contracts):

OIL: \$60.05 to \$58.18

NATURAL GAS: \$2.78 to \$2.70

HEATING OIL: \$1.9901 TO 1.9401

RB GAS: \$1.9395 TO \$1.8915

CURRENCIES

Last week from Wednesday onward currencies remained very volatile on both sides. Wednesday dollar went down sharply lower, On Thursday bounced back, on Friday opened weaker but move higher. Emerging market currencies traded sharply lower on Friday. Monday to Wednesday emerging market currencies performed very well.

Friday fear was back in market which forced traders go to back to USD. Dollar index held 65.65 level on lower side and once again ready to test 97.18 level.

In the six months dollar index test 97.18 level around 15 times and came down. Since last year I have

been saying that it would be difficult for USD index to move above 97.18 level and this prediction proven very accurate.

This week looks mix. Early in this week dollar will hold value but Thursday and Friday we may see big move coming came back in USD.

As per this week astro indicators; On

Monday Dollar index may gain value. Trade in and out in most of currencies, emerging market currencies looks great bet but due to last week of first quarter of 2019, I am recommend remaining

sideline as banks and financial institutions will push currencies in their favorable directions and close quarter book in their favor.

On Tuesday both side move will continue so trade in and out.

From Wednesday from the higher side dollar will come down.

Thursday and Friday dollar will come down so great time to acquire positions in Euro, Pound, Australian dollar as well as take aggressive buying in Rand, Real, Peso and Rupee.

Important note: From April 2nd, Dollar Index may start trading lower once again so get ready for the trade.

Last week Rupee and other emerging market currencies remained in the very volatile trend on both sides but Friday was worst day for most of emerging market currencies. This week buy emerging market currencies on late Thursday onward. Add more position on Friday.

Frontline currencies traded, but still euro struggled to performed. Yen and Pound acted bit positive.

Monday astro combination recommendation – Trade in and out, sell USD Index at 97.18 level, same time buy Euro, Pound and Australian dollar on Monday.

Monday's trading range: (June 2019 future Contract)

DOLLAR INDEX – 96.55 to 95.90 March Future

AUSTRALIAN DOLLAR – 0.7111 to 0.7045 (Spot 0.7099 to 0.7035)

CANADIAN DOLLAR – 0.7493 to 0.7438 (Spot 0.7455 to 0.7415)

BRITISH POUND – 1.3339 to 1.3191 (Spot – 1.3288 to 1.3123)

EURO – 1.1415 to 1.1319 (Spot – 1.1335 to 1.1246)

JAPANESE YEN – 0.9183 to 0.9105 (Spot 0.9135 to 0.9055)

SWISS FRANC – 1.0191 to 1.0111 (Spot 1.0111 to 1.0021)

USD/Japanese Yen - (Spot – 110.41 to 109.45)

USD/Franc - (Spot) – 0.9969 to 0.9890

New Zealand Dollar (Spot) – 0.6919 to 0.6840

USD/RUPEE – 69.43 to 68.70 (Spot)

USD/RAND – 14.60 to 14.33 (Spot)

USD/REAL – 3.93 to 3.85 (Spot)

USD/PESO – 19.19 to 18.98 (Spot)

Thanks & God Bless

Mahendra Sharma

London	23:16	🇬🇧	Rio de Janeiro	19:16	🇧🇷	New York	18:16	🇺🇸	Los Angeles	15:16	🇺🇸	Sydney	8:16	🇦🇺

24th March 2019, 03:00 PM,

This is what we stated: *From the 7th of May 2018, fall predicted from \$1355, we targeted price \$1209 to \$1182. October 2018, we called bottom out for the short term.*

In the months of Jan to March 2018 Short recommended in Copper at \$330, Zinc 3355, Lead and Nickel. We predicted 20% to 30% or more correction in these base metals.

Small part from past Flashnews:

Remember this what we stated on the 22nd of September 2016: ***Gold will struggle to move above \$1348 and silver \$20.28; these are the selling levels in both these precious metals but remain as a day trader for this week.***

This is what we mentioned on the 11th of August 2016: ***Higher side in gold can rise maximum \$15 from current level of \$1348 and lower side more than \$300 by end of February 2017. Sell more NUGT around \$178 and JNUG around \$320; these levels were the previous highs last month. Add more buying in DUST.***

From stock market sections:

INDEXES:

This is what we mentioned on Tuesday, the 25th of January 2016: *Tuesday will be a great time to acquire positions in the emerging markets as well as in the European markets. If what we are seeing happens then S&P should move towards 1936 or even higher and down side, it won't go below 1844 or it won't close below 1862 level.*

On last week Thursday and Friday S&P closed higher and finally settled at 1901 levels. Those who have been following our works for decades must know how important our astro support and resistance levels are. Last year also the lower side astro resistance was 1827, and the higher side 2088. Both these levels played a very important role for the market. So far the support level of 1821 played an important role on Wednesday and we are hopeful that S&P won't go below this level in the year 2016 and that the astro support and resistance levels continue playing an important role.

This is what we mentioned the 18th of Jan 2016: *On Friday investors experienced a nightmare. It was day that no investor likes to see because on this kind of day the trading accounts of longer term investors are always deep in the red. In 2000 when the tech stocks crashed we never recommended any buying to investors because the astro cycle was negative for two years and it was clear that the market may remain down for the next two years. In 2008 crash which we predicted, we were also aware that the market would rebound from the 26th of*

February 2009. We recommended that the market would bottom out on the 6th of March 2009 and that investors should start accumulating stocks keeping in mind that they have to hold them for five years and that they would make a fortune. We strongly recommended, not to focus on the daily volatility and keep busy accumulating quality stocks. This proved to be very accurate advice.

This is what we mentioned on Monday, the 8th of August: Billions of dollars follow our predictions closely so some support always comes around our predicted levels. 12th February 2016, S&P moved more than 360 points rally which no one expected.

This is what we mentioned on the 29th of February: At this stage we are expecting that the Indian market will perform, so this is a great time for international investors to put money in the US market as Rupee is at a historic low and the market has already corrected 26% from higher levels. Brazil and China have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies because any turn around in **Brazilian Real can push BRZU toward \$39.00 from 9.30**. S&P closed above 1938 and if it closes above 1938 for more than two days then expect it to move towards 1988 during this week or next week.

Two weeks ago we predicted that 1864 is a great buying level with the first target of 1938 and 1988. The first target got achieved very quickly and the second target will get achieved soon and after that our most important astro resistance level will be 2088, which has played a crucial role in keeping the bull away to move above 2088 for the last 16 months.

Thirty Year Bond

This is what we mentioned on the 10th of September: *Tuesday Thirty Year Bond gained value, and same indicating on Wednesday. Fed may leave rate decision sideline which can push bond toward 168/169. Rate hike may bring prices 162 level. Overall trend is negative so get ready to sell on any rise if FED refuse to hike.*

In the last ten weeks' bond prices came down from 176 to 165 as predicted and our longer-term view is very negative so keep building sell positions on any rise.

By the end of this year we may see 162-25 and 157. Stay long in TTT, TBT and TMV.

Energy:

This is what we stated on Monday, the 17th of April: *ERX lost more 5% value and if ERX trade below \$30.00 then there are chances that it will test \$25.50 level which means oil prices will trade negative in coming time.*

Once again oil will try to test \$54.78 but if this week it fails then we may see \$47.00 level once again. Major astro support point is \$49.88 level. RB Gas and HEATING OIL will follow oil.

On Monday oil prices will trade mix to negative but in USA trading one can take small buying, if oil fail to rise on Tuesday then expect major corrections in once again in coming time.

On Monday Natural gas will trade mix and prices will move both sides, trading in and out will remain best strategy in gas on Monday. Sell or short around \$3.38 level.

This is what we mentioned on the 8th of January - *Natural gas went down sharply as predicted and tested \$3.16 from \$3.83, and the volatile trend will continue in GAS so trade carefully. Oil will only be able to move higher if it closes above \$54.78 for three days which we don't see happening.*

Energy stocks traded mixed. ERX is unable to move above \$43.00 and oil above \$54.78 which is not a good sign for the energy market.

We are not changing any of the predictions we mentioned on the 3rd of June: Same kind of positive, RB GAS and heating oil also moved higher. Natural gas traded mix. ERX have been hanging around \$29.00 level and it must close above \$33.00 level to give bullish signal in energy stocks which we don't see at this stage moment.

Oil has been failing to close above \$48.88 level but same time it is not closing below 48.88 level as well. If oil closes above \$48.88 for three days, then the next price level of \$52.55 may get achieved. At this stage some selling is recommended around \$48.88 level and on the down side the important level to buy is at \$44,55. Oil prices have gained almost 70% from \$27.71 which we called the perfect bottom for oil.

This is what we mentioned on the 2nd of February: Many are predicting oil remaining in the teen's, but we do not see oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will struggle to move above \$35.18 levels, and if it does than \$44.55 is next target with \$48.88 selling level.

Natural gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural gas around \$1.72 and below.

This is what we mentioned in our book "2016 Financial Predictions" in oil's section:

IMPORTANT NOTE: *As most of you are aware our view for energy has been very negative since June 2014. The overall trend in energy prices will remain negative so we do not recommend adopting long term positions. This means that do not take any trades earlier in the year and continue holding them for the rest of the year, because the higher side in oil will remain limited. There will be better opportunities to make money by trading in and out. Heating oil and RB gas will follow oils trend, so during this year we may see oil moving towards \$48.50 or \$52.95, and on the down side it may hold \$34.55. If it closes below \$35.55 for three days then there are chances that oil prices could fall towards \$29.65. Traders should take advantage of buying short term call options before any of the above-mentioned cycles start, and also book profit quickly before the positive cycles end.*

Energy stocks will trade mixed without any major movement, so longer term investors should not be putting any money in energy stocks. Any sharp rise should be taken as a profit booking opportunity if you are holding any energy stocks.

Natural Gas' trend will remain positive during 2016, so one can stay long in Natural Gas in the year 2016. However, it is very important to remember to keep booking profit before any of the above mentioned negative cycles start. Overall, Natural Gas will outperform oil in the year 2016.

For short term strategies and price targets please follow our weekly and daily newsletters.

Ninth Cycle:

*From the **26th of November to 31st of December 2016** - During this cycle, we see positive momentum coming back in the energy markets; oil prices will form a bottom, and oil stocks will also act positively. Even though this is a positive cycle, the higher side will remain limited. Natural gas and RB gas will move sharply higher during this period.*

Energy trading ranges for 2016:

Crude Oil: \$52.95 to \$29.78 (As predicted last year, oil may hold the \$30.00 level, and if it trades below that for five days, then there's a possibility that it could test 2002's low of the \$27.78 level)

Natural Gas: \$2.88 to \$1.82 (higher side \$3.57 if it cross \$2.88)

Look at accuracy levels about oil that we predicted in the book.

This is what we stated Monday, the 31st of Oct 2016: *Friday oil, heating oil and RB Gas traded negative as predicted. Energy stocks also went down but gas traded mixed. On Monday, oil*

will trade negative; stay sidelined or those who are holding shorts can continue holding and cover some around \$47.50. If oil starts trading below this, then expect \$46.75 to \$44.88 level, cover all shorts at \$44.55 level. Heating oil and RB Gas will trade negative or will follow oil. On the higher side, oil will struggle to remain above \$49.88 level which is the most important astro resistance level.

Natural gas will trade on both sides without any clear directions so avoid trading but on the lower side one can buy GAS for Tuesday. Don't touch energy stocks as they will keep struggling.

This is what we mentioned on Friday, the 2nd of Sept 2016: On Thursday oil, heating oil and RB Gas prices went down sharply lower and weakness will continue Friday. One can cover 50 to 70% shorts around \$42.61 level in oil and 100% around \$41.78, so one can cover positions in heating oil and RB Gas on Friday.

This is what we mentioned Monday, the 21st of December 2015: Last week energy traders remained very nervous as they felt like abandoned by the bigger financial institutions and other large energy investors, but the truth is that every energy trader or investor is badly stuck energy trades.

In 2008 we predicted a crash in oil from \$145 and in 2009 we predicted that it had bottomed out at \$33.00 level. That prediction provided great returns those who invested in oil and energy stocks. Now once again after the prediction of oil falling in 2014, since the last two weeks we have been predicting that oil would form a bottom around \$34.55 level so watch this prediction closely. I am not saying that oil won't fall below \$34.55 level but surely those who will buy around this level may be rewarded handsomely.

Maximum fearful days: According to the current astro cycle we see another 12 volatile or fearful trading days are pending but the down side is limited.

This is what we mentioned on the 27th of August 2015: If oil trades below \$47.00 for two days then there are chances it could retest our magic support figure of \$44.55. If it starts trading below \$44.55 then next level \$38.50 so avoid buying positions.

We are not recommending any buying in heating oil and RB gas, also one should avoid buying any energy stocks.

*This is what we mentioned on the 27th of April 2015: Adopt trading in and out strategy in energy, **but don't take any shorts in oil, heating oil or RB Gas. Sell some energy stocks.** Energy stocks will trade mixed without any major move so one can get ready to sell energy*

stocks. Higher side it is possibility that oil may see \$63.80 level, if its hold \$57.00 level. Keep adding positions in Natural gas around \$2.55.

This is what we mentioned on the 5th of March 2015: *Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors. On Down side oil will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.*

Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for oil is \$47.00. ERX won't be able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.

This is what we mentioned on the 3rd of January 2015: ***On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating oil and natural gas lost value as well on Monday. Don't buy RB Gas and heating oil but surely natural gas can be bought around \$2.71.***

This is what we mentioned on the 23rd of December 2014: ***Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.***

This is what we mentioned on the 11th of December 2014: *Wednesday our fear proven very true, we strongly recommend to stay away from oil. When oil broke \$92.88 we recommended sell oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.*

This is what we mentioned on the 5th of December 2014: ***Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, oil, RB gas and heating oil. Natural gain gained value from the lower levels on Friday as predicted.***

On Monday the higher side will remain limited, and if oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like oil is getting ready to break \$60.00 so stay short or add selling on any fall.

Currencies:

This is what we stated on the 4th of January, 2017: We don't see dollar index going above 103.78 level so watch closely and closing below 102.55 will push dollar toward 101.55 level. Most of currencies gained nice value on Wednesday, emerging market currencies had best day. On Thursday, most of currencies will trade both sides, buying is recommended on lower

sides in most of currencies so don't miss opportunity.

Buy Pound, Yen, Australian dollar and Canadian dollar. Also buy Franc and Euro without fear.

Astro cycle changed late today on 3rd January so safe buying in all major currencies against USD.

Dollar closing below 102.75 will confirm that it would test the 101.55 level this week.

We are not changing any predictions in currencies of what we mentioned on Monday, the 31st of October 2016: Once again tested 99.00 level but then sharply came down from the middle of the trading sessions. We are still recommending to keep building positions in USD around 99.00 level. On Monday, we still recommend buying Euro and other currencies around the lower side, or selling USD around the higher side level. On the down side USD may hold 96.71 level so watch this level closely. Euro can move up to 1.1111 level in this week, so book profit if it goes there.

On late Monday, the Scorpio Moon will bring both sides volatility. On Wednesday, the FED will announce decisions and due to the Scorpio Moon traders will get confused. Trade light or just trade in and out in currencies but medium term traders can hold selling positions in USD.

Stay short in Yen but one can cover Japanese Yen as it may move towards 0.9525 to 0.9250 level at this stage.

This is what we mentioned on Monday, the 29th of August 2016: We see Euro holding 1.1055 level and Pound 1.2925 level. We don't see it falling below 0.9410 level and on the higher side it will have a difficult time to move above 1.0198 level. For USD index 97.00 to 97.50 level will play the role of a Wall for dollar which dollar may not be able to breach at this stage, or maybe even for the next six weeks, and on the down side USD may test 92.50 level.

This is what we mentioned last Monday, the 25th of July 2016: This is what we mentioned on Wednesday, the 13th of July: *Any rise shall be taken as selling opportunity in Yen, in the next two months we can 900 pips in Yen or it will easily come down to 0.9200 level very soon. We don't see Yen moving above 0.9878 level and in the worst case scenario 1.0000 will be maximum side.*

*Friday USD tested 97.50 level and this is an important level. Dollar may keep testing this level during this week. **We don't see Euro going below 1.0923 and Pound 1.2988 level.** Pound should be in you aggressive buying list until it holds this level.*

On Monday, the 11th of April 2016 we stated: *Last week USD traded negative, and lost value against most of currencies. There are still chances that USD may test 92.50 level so watch USD trend closely, and start taking positions at 92.50 level.*

Emerging market currencies have done very well and it's time to close positions if you are short or medium term traders. Rupee won't fall much so don't short Rupee but surely Rand, Real, Peso and Rubble will lose some value from middle of Monday.

Australian won't hold above \$0.7725, Canadian dollar 0.7900, Euro 1.1475, Franc 1.0555, and Yen 0.9288 level.

This is what we mentioned last Thursday: *Pound is ready for 1.4123 mark. Sell Pound and add more Swiss Franc sell.*

We are not recommending any new short in Euro, surely one can acquire some positions in Euro for the short period of time.

Emerging market currencies are getting ready to for bottoms expect few won't be trust like Rand and Rubble. Wednesday we see many currencies gaining some value but stay away from Pound, Canadian and Franc as they can keep making new lows so hold positions with 3% more corrections.

This is what we mentioned on the 22nd of December: *Euro will struggle to move above 1.1075 and may hold value 1.0725 so watch these both levels closely.*

This is what we mentioned on the 23rd of April 2015: *The Medium and longer term trend is still very positive for USD but for the short term a mix to bit weaker trend indicated. USD Index have achieved our target of 100 and now down side 95.00 or at worst case 90.00 level will be great buying.*

Dollar is our longer-term buying trade so we won't recommend shorting dollar, we recommend buying USD on any weakness. Euro higher side 300 pips and lower side more than 3000 pips. We don't see USD index going below 95.00 levels.

Remember this what we mentioned on the 5th of March 2015: *Currency war has nothing to do with USD Friday USD gained value as predicted. Medium- and longer-term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.*

Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.

This is what we mentioned on Monday, the 15th of Jan 2015: *Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just finished one interview from Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell as it will going to go back to par levels.*

This is we mentioned on the 2nd of October: *On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.*

Remember, this is what we mentioned in the month of July: *At this stage USD is trading in a positive direction without any break since the last three weeks. Finally, it is reaching a most crucial level because once it breaks 81.78 then the nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.*

This is what we mentioned in the month of May (2014): Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.

In this year's book "2015 financial predictions" we predicted the "final bear cycle in the market from the 27th of July to the 15th of August 2015". Yes, the Sun can bring some

uncertainty, but take this uncertainty as a buying opportunity at the same time in 2015 in the month of August.

Watch the 2088 level for S&P, as it is most tough astro resistance of 2015. In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

In our 2015 book we mentioned that commodities will have worst year of 2015, and so far precious metals, base metals, grains and softs have been struggling and they will keep moving down in the second half. Dollar will perform amazingly well in 2015 so hold positions and money in USD.

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
