**25 February 2018**

## **Weekly Newsletter from 26 – 2 March 2018**

**This is not about 2018, it is about planning for the next ten years.**

Dear Members,

The first four paragraphs of this letter here below are an important read, it is not about me being right or wrong, but I am planning on giving you a feeling of the future coming time which is what is most important. Now It is important to know where to invest your money from here and for the next five or ten years, and that investment should make you fortune so lets discuss it.

There are a few people on this planet who don't go through rough patches (People like Buffett and Bill Gates) otherwise we all have to go with different patches and all different cycles in life. Sometimes we see financial ups and downs, sometime issue with family, health, Friends, relative, work, or career. I have always witnessed through research or study that these events/issues change life most of the time for the betterment of people. In my career I never thought that I could completely be wrong about predicting the astro cycle, but what happened last year was amazing as I was dead wrong on the market and base metals.

Now I know why I was wrong, but it is too late to undo that. Now the only path for me is to keep being damn accurate consistently. I have been wrong many times on a short term basis but our longer-term outlook still remains on track. Many said that 2016 gold fall prediction was not accurate, but you have to remember that since 2011 we kept recommended staying away from gold, and that advice still proved right because gold is still struggling around \$1335 after making a high of \$1935 in 2011. In the end of 2015 we predicted that gold may test \$1045 and it would collapse if it breaks \$1045, but gold bounced back from that level, and it never traded below that level.

Last year I think I developed a split personality and let my emotions, likes, and dislikes towards Trump put me on the wrong path and forced me to pay attention to the wrong things rather than keeping watch on every aspect of astro cycle. I went against my own principle of not letting my personal likes and dislikes get in the way of my predictions. I always just predict what I see, and that is the reason that I made such a big mistake for the first time in my last 30 years of predicting the financial markets. Many intellectuals, very wealthy people, technical analysis, big fund managers, and higher authorities remain our members and they always admire our work.

I am happy that so far in 2018 the markets are moving as per our predictions. I have also been receiving positive responses from members and this shows that I am on the right path. Most of the investors have a little bit of an idea about what is happening in the economy, the market, and what technicals are indicating, but since we came out with our theory people have started investing in the future

outlook because we provided an insight of the future coming time, and many have made a fortune through our work. The recommendation of buying Tech in 1996 was an amazing one and followed by the next prediction in 2001 to buying gold, silver, euro, base metals, oil, other commodities and natural resource stocks provided new areas of investment not only to lovers of commodities, but also to hedge funds, institutions, and banks. Millions of new people started investing money in commodities after 2001, and our prediction of the rise in commodities was amazing and it gave new life to commodities and investors started investing in commodities. I know no one can forget about the market crash of 2007/8, and off course followed by the prediction of the greatest bull era to start which was made on 26 February 2009. During 2009, I recommended investors to put everything in the market or buying financial stocks, tech stocks, as well as leader in the industry.

All this happened in the past, many of you were part of this journey, but it is now important about how to make money from here. Lets forget about what I predicted in the last thirty year, lets even forget about 2017's wrong recommendation of selling the market because the present and the future is important. We need to start rebuilding again, especially for those who lost money by being on the wrong side of the market in 2017. It is important that they become successful in 2018 and from now onwards.

I am sure most you must have read our "2018 Financial Predictions" book, if you haven't then first buy the "2018 Financial Predictions". In 2001 when I came out with my first book, except for my good friends in Africa and India, no one else on Wall-street wanted to buy the book because I was unknown to them and they didn't want to bet on the astro cycles, but as soon gold, oil, and euro started moving higher, people started buying the book, and in a short period of time in 2001, the financial book was sold out. I not pushing you to buy the "2018 Financial Predictions" book, but if you are an investor then you must have a feel about the future or what is coming in the future in the financial markets.

2018, and onwards a new interesting era is starting for investors. It will be a challenging time for investors to make money as trading is becoming very sophisticated and technology driven. It is becoming difficult for small traders to make money and it will continue to become more difficult, and only medium and longer-term strategies will make money from here. 2009 to 2016 was a very easy time for me because I was 100% sure that the market would rise on every fall, I kept recommending buying the market for eight years.

Now, many say that the market has achieved a top, and many are saying that it will make a double top, and many are saying that the market will crash. Most of you would like to hear what we see in the future so lets discuss that.

There is no doubt that technology will rule the market, but it is a vast area because each and everything new technology is being used. My focus in 2018 and from now onwards will be the electric car area. I am not recommending buying car companies stocks, but areas related to electric cars. In 2004, we predicted that the electric car will replace the gas car, it will be a big revolution in the car industry and those who go into it first will be the leaders. Seven years ago we recommended buying

Tesla at \$32.00. I also stated that I don't care about whether you buy the Tesla car or not, but you must buy Tesla stock.

For the last three years we have been recommending buying lithium stocks, but since early last year we recommend focusing specifically on this area. Today once again I recommended shifting your money into this area and holding positions tightly for the next five to seven years, and we are sure you will make a fortune. Lithium is a key component, so we are recommending buying Lithium mining stocks. We are also recommending buying **specialty chemical electrolytes stocks, Nickle, cobalt, and Graphite stocks.**

At this stage everyone is in rush to break through or to beat **Tesla**. Surely, I would love to have an electric car which goes 500 plus miles on one charge, and like me many will be waiting for that range to be available before they buy an electric car. Solid State batteries could make this possible with a quick charge.

I am doing in depth research because this my favorite area now. Seven years ago we predicted that Amazon would move towards \$1550 and it did so last week. Our focus is no longer on Apple, Amazon, and other leading stocks because we want to make 10 to fifty times returns and my work is known for that. I strongly recommend start doing some research. I am also working hard to put together a Lithium, cobalt, and natural resources letter. I am very excited, and your work starts from here, or from today. Start building positions in this sector and we are sure you will make a fortune in the coming time. Forget about what you made in the tech bull run from 1996 to 1999; forget about how much you made in the gold and oil stocks run from 2001 to 2007; because a new area and new astro time cycle is about to begin which change the world very rapidly so let get ready for it.

A time will come when people will hate the gas car, and it will become history. I predicted this in 2004 and stated that wait for a decade, and today I predict to get ready to make a fortune, and surely the astro cycle will play one of the most powerful roles in the journey.

The screenshot shows a webpage titled "BUY SECTIONS OF OUR 2018 FINANCIAL PREDICTIONS E-BOOK". It features six individual product cards, each with a title, price, and an "Order Now" button. Below these cards is a larger button for the complete e-book. The prices are: Precious & Base Metals Outlook & Monthly Cycles Only (\$151.00 USD), Global Index with Monthly Cycles Only (\$199.00 USD), Global Currencies with monthly cycles Only (\$151.00 USD), Indian Market, USA market, Metals & Rupee Section Only (\$199.00 USD), Crypto Currency & 2018 cycles Only (\$99.00 USD), and Energy outlook & monthly cycles Only (\$99.00 USD). The complete e-book price is \$351.00 USD.

Section	Price (USD)
Precious & Base Metals Outlook & Monthly Cycles Only	\$151.00
Global Index with Monthly Cycles Only	\$199.00
Global Currencies with monthly cycles Only	\$151.00
Indian Market, USA market, Metals & Rupee Section Only	\$199.00
Crypto Currency & 2018 cycles Only	\$99.00
Energy outlook & monthly cycles Only	\$99.00
<b>Complete 2018 Financial Predictions E-Book</b>	<b>\$351.00</b>

I humbly request not to share the book predictions or newsletter with non-subscribers. Surely you can tell them about our work, and let them make the decision about whether they would like to subscribe to it or not. I still believe that a \$351 investment by buying a complete copy of the "2018 Financial Predictions" or in \$99, \$151, and \$199 for different sections of the book is worth every penny if you trade or invest in the market, especially with the risks that people take in trading and investing.

Check out all different sections of book which you can buy individually each section rather than buying whole book. Now metals, energy, currencies, USA and Global stock market, Crypto currency, and Indian market (which has metals, Indian market and Rupee).

**Reading daily range:** When we predict a **weaker trend** it means that prices can break on the lower side and can trade below the predicted lows.

When we predict a **positive trend**, it means that the daily price can break on the upside and can trade higher than the predicted price.
