## Weekly Newsletter from 26-30 July

Most of you are smarter than me to pick stocks and plan trading strategy so I just want to remain your trend or path guider and we tother can do miracles...

Dear Members,

Last week coffee topic dominated on Wall-street as well as financial media. The huge move in coffee pushed traders, whole sellers, commercials, and farmers in a different mindset because everyone is now scared that any new frost news could move coffee towards \$275. Many people play a hedging, and many sell their crop in advance, many play

the short term game to keep coffee lower so they

keep collecting premium on options but now all these traders are in trouble except for the buyers. **Apart from coffee selling lumber, grains**

predictions done very well in the last two months, also buying natural gas moved 50% as predicted.

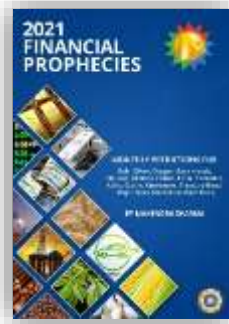

In 2004/5 I made nice money for myself in coffee trade, and the

timing was so perfect that my investment went 25 times higher in five months.

**Coffee went from \$64 to \$141, in the one side rally.**

It will be fun for the world to read when I release my final book after 17 years because I will stop all market related work in 2039. So far it has been an interesting journey because of the financial market and every single day, every minute something new happens so we try to adjust to what is happening. So much excitement that traders never get bored, so much to learn every hour in the market is packed with emotion, excitement, pain, loses, profit, and the list goes on.

Coffee tested \$200 which is miracle for many, and this was an amazing prediction that came true as mentioned in our book “**2021 Financial Prophecies**”, all books are amazing because we write every book in advance, we predict the markets trend in the book one year in advance and that’s what amazes many.

Today is **Guru Purnima**, I am bowing to my Gurus who guided and taught me astrology and gave me a great lesson on how to become a good human being.

**Nostradamus** work inspired me to see into world, or to become a prophet. My

**father Guru** inspired me to learn about the **Sanyasi** life, and my **maternal Grandfather** who taught me about the great subject of astrology. My **father** had a great sixth sense and he could tell and see or pinpoint many things which made him such a unique astrologer or supernatural person.

I always highly recommend buying my books if you trade or invest money in the market because they are in detail about every market with the monthly cycle. We all have a connection and that’s the reason we meet, you found my website and my website found you, it is the same thing but our journey has been unique.

**The only problem with my work that people don't reveal my work to others because they want to keep for themselves, and I don't blame them, but it will be nice if my members tell other people about our work because this will gain respect of astrology. Many think that astrology is an occult subject but let me tell you it works on mathematics, and it is 100% scientific.**

Last week apart from coffee, frontline tech stocks performed well. Grains and softs traded mixed. Oil traded mixed but natural gas moved higher. Currencies remained in a mixed direction, and dollar held value on the higher side.

Precious metals acted mixed, but base metals started recovering. **Chinese stocks are falling hard, it has been painful to see people losing money in Chinese stocks. Last week education stocks wiped out more 50% value on Govt decisions. Big tech stocks are suffering. We recommended to stay away from China and investing in Brazil and India advice done far better.**

This week will be an interesting one as earnings session is starting, so follow our daily stock recommendations in the stock report.

Time so short **Thirty-Year Bond** and stay long in the markets.

Our viewership clicks on the website almost hit **16.8 million!** Thank you for your support and we are sure you all must be doing well with our trading strategies and guidance.

**Coffee achieved \$200 as mentioned in the book:** I like to put a small section of “2021 Financial Prophecies” book from the coffee section. At the time I was writing book, coffee was trading around \$108 and in our book, we expected \$171 by July end, Isn’t astro cycle are amazingly, an those who spend and buy our services know the value of our work.

Here is from page 121, 122 “2021 Financial Prophecies”

*I still remember our call for Coffee in January 2005 as it surprised many, we saw Coffee moving sharply higher, in fact it doubled from the low in just a few months.*

*We have been waiting for 2021 for the last seven years as we have been predicting a major bull run in Coffee to start from this year. Historically there have been many occasions when panic started in the market on concerns of climate conditions. Coffee went limit up for many days on many occasions in history on news of a Frost or drought conditions in Brazil, because Brazil is a key player in Coffee growing.*

*I have been predicting that weather conditions will start getting uncertain in Brazil from 2021 which could create major havoc in the Coffee market as traders and commercials will rush to acquire positions. Even though there are other countries which may be able to support the Coffee market, Brazil crop production still plays a key role. We are expecting the wealth situation in Brazil to start getting worse from March 2021. News of a serious drought will get confirmed and after the drought we may see extreme cold weather on the hills of Minas Gerais, Espirinto Santo, Bahia, Rondania, Parana, and Sao Paulo, as these areas play a key role in Coffee production. 2019 wildfires in the*

*Amazonian forest created great concerns globally because it plays a major eco role of supplying enough oxygen to our planet. Astrologically it is a bad omen because weather conditions will start deteriorating in Brazil, it will take a five-to-nine-year cycle to bring back normal weather conditions in Brazil.*

*Other countries like Colombia, Indonesia, and many African countries are key growing nations of Coffee, but our focus will be Brazil. If things turn out the way the Astro combinations are developing for Coffee, then 2021 and 2022 could be one of the biggest bull market eras of all time for Coffee. We won't be surprised at all if Coffee prices move towards a historic high, and it may move limit up for several days.*

*Overall, 2021 is a bullish year, and the rising trend in Coffee will start from the 7<sup>th</sup> of January 2021, and the bullish trend will become aggressive from the 18<sup>th</sup> of April 2021.*

*We clearly see Coffee prices moving toward \$171 by the end of July, and I won't surprise at all if prices move towards \$200 or above by the end....*

I bow to nature and astro cycle for giving us such a great prediction.

I want to write about the market and metals in the first section but decided to write in the individual sections.

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
