## Fridays Daily Flash news (Unedited report)

**Markets are holding value, but gold is trading in very negative as predicted and there are possibility that it may test \$1180 and then \$888 is possibility if it....**

Dear Members,

Many of yesterdays recommended stocks did well (MASI, TSLA, IRTC, TDOC and EXEL) except EXAS but we recommended to add more on weakness for the medium term. STAMP we recommended buying put and call, but I was more expecting on weakness side which never happened, STMP was one of our favorite pick of 2016.

**TSLA** turned around as expected, most of Wall-Street analysts and media are against Musk but my view is positive for him and TSLA. I always recommended buying TSLA on weakness.

**MED** is just up \$36.00 from \$170 to \$206.

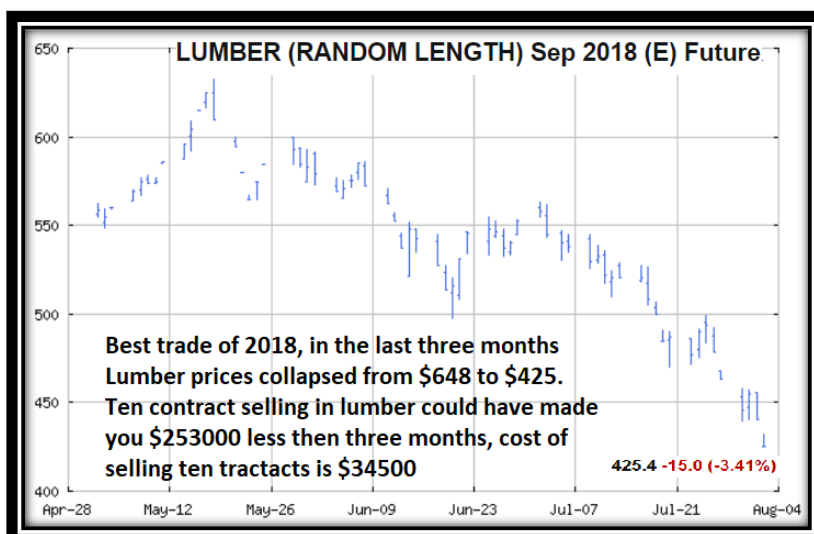

Markets rebounded as expected, S&P is holding 2791 level which is great sign and now we would like to see 2828 to cross strong that would be best news for investors.

Gold is keep moving lower as predicted since \$1357 level, and now closing below \$1209 could be worst news. Stay away from metals. Grains and softs traded negative. Thirty Year bond remained in the mix directions.

Currencies are moving lower against USD, on other hand once again dollar Index bounce

back to 95.00 level. It will be crucial but we are still believing that we may see weakness in USD coming back from higher levels.

**If you have sold 100 contracts of lumber in middle of May, when we recommended selling aggressively around \$645, today you could have made profit of \$2.53 million dollar.**

I am excited to write next week newsletter because most of market, metals and dollar are around our crucial levels.

Dear Members,

This prediction I released on 16 July 2018, this was focusing on Future of Tesla and Elon Musk.

### **Elon Musk make or break in current time cycle, but I trust so...**

The most innovative and visionary man is at battle and is single handily fighting a battle with the media, wall-street big guys, other auto companies, and of course those who don't believe in climate change. Yes, this man is none other than **Elon Musk**. I got up early and decided to read his astro chart because I wanted to see what is going on, why he is so unique, and whether Tesla will survive or not. Most of you aware that I hardly read individuals charts, I just do it for my own reference and knowledge and I decided to do a detailed study of Musk's chart.

Before I write about his chart I would like to say that he is a genius, and many on Wall-street are betting against him by shorting his stock, Tesla is the number one most short stock in the S&P. I don't understand human behavior pattern, rather than supporting a genius, and why many like to see them falling. A few known names from the US auto industry and experts on walls-street hate Musk. I often see they are talking negatively about **Tesla and Musk** rather than appreciating that he has brought a revolution. Yes, you won't understand about Tesla and his car until you don't take a test drive. Every time I read an article from CNBC, Wall-Street Journal, Bloomberg, or any other media, they all sound always skeptical. Anyways, if they want to go down that path let them do so but let's see what his future looks like in his astro chart.

**Elon Musk has a great birth Chart;** surely his current astro time cycle is going through tough period. There are two important dates which he has to pass through smoothly. The first one is 11 October 2018 and the second one is 7 March 2019. If he is able to go through both these cycles, then sky will be the limit for him. During the next 19 years he will not only rule Wall-Street, but he will become the richest person, and he will bring many new innovative technologies and will make changes in human life. He will be the man of 21 century, and the world will remember him for many centuries. This is my honest reading, I am not keeping any soft corner for him. He needs to take care things very carefully until the 7 March 2019 because

his current astro chart is showing negativity. In the short term, from the 15<sup>th</sup> of August to the 15<sup>th</sup> of September we will see some good news for him but overall the astro chart is negative, so I will bet on him from the end of first week March 2019. After the 9<sup>th</sup> of March

one can invest not only in Tesla but any other company he starts.

I trusted **Steve Jobs** astro chart from 2004, and when he just came out with the **iPod** and then the **iPhone**, his chart had entered a positive astro cycle in 2003, I felt that success was coming for him and Apple. His North Node was in house of Jupiter and it gave a completely negative impact on his health. I knew before he become a God in technology and innovation, and nature will take away him. **Apple** stocks made not only fortune, but thousands of investors lives changed.

If you remember my Article on **Bill Gate** of 2011, I said his and Microsoft powerful era is starting. We predicted buying **MSFT** with first three digits target. It achieved this year, and now I see it will double from here in the coming few years.

My view was very bullish and optimistic on **Tesla**, I was first one to believe in Tesla, and I recommended buying the stock at \$31.00. From next year invest in **Elon Musk** as his chart showing magic and miracle after March 2019. He will create 10 to 50 times value for investors in the next twenty years.

Companies like Ford “Great iconic American company” haven’t been able to provide any great returns to stock holders. They failed to create innovations that’s the reason Ford is a dead stock.

If Elon Musk passes through this crucial cycle, then from next year Lithium, Cobalt e-car related stocks will go crazily higher. It will be the era of Musk and his fun and so-called boring technology. Today we are releasing our thirty monthly letter which covers lithium/cobalt/E-car Battery sector.

Today **Tesla** moved higher. TSLA turned around as expected, most of Wall-Street analysts and media are against Musk but my view is positive for him and TSLA. I always recommended buying TSLA on weakness.

Many of yesterdays recommended stocks did well (MASI, TSLA, IRTC, TDOC and EXEL) except EXAS but we recommended to add more on weakness for the medium term. STAMP we recommended buying put and call, but I was more expecting on weakness side which never happened, STMP was one of our favorite pick of 2016.

**MED** is just up \$36.00 from \$170 to \$206.

Markets rebounded as expected, S&P is holding 2791 level which is great sign and now we would like to see 2828 to cross strong that would be best news for investors.

**DUST** moving higher as predicted because moving lower. Metals stocks are trading lower. Gold is keep moving lower as predicted since \$1357 level, and now closing below \$1209 could be worst news. Stay away from metals. I am excited to write next week newsletter because most of market, metals and dollar are around our crucial levels.

On Thursday once again S&P bounced back strongly from 2791 level and tested our higher side 2828 level. Astro Support and resistance level working with 98% accuracy. Most of frontline stocks moved higher, Apple hit \$1 Trillion market value. TSLA clearly indicated that most of analyses and market pundit as well as medias are guiding wrong. TSLA is most hated and most short stock in Wall-street.

What a beautiful day it turns out for investors as market recovered sharply higher from lower level and close at day high. Currently overall, we are in positive astro cycle so negative days are not able to punish market.

We are strongly recommended to stay long in market without booking any profit. Don't short market as positive momentum to continue and if S&P closes above 2828 level for three to five days then we may see 3200 in the medium term.

Biotech and tech will support market. Friday market will remain in positive directions, in the late hours may see small profit booking.

Buy more positions in **FTSI London**, buy emerging market index or etfs, stay long in biotech stocks.

This is what we stated yesterday: *On Wednesday APPLE, PAYC and BCOR performed well, other stocks traded mix, market remained in the mix trading pattern. On Wednesday TSLA announced after market close and finally stock moved sharply higher after market close, we see this one keep outperforming in coming time so don't short TSLA. Billionaire hedge fund owner David Einhorn is short in Tesla and Netflix losing big time. His Hedge Fund constantly performing negative and this is he is down around 19%. Investors are withdrawing money from his fund on every day. Three years back we predicted that don't invest with David Einhorn as astro chart is negative and we would keep losing big time. Also, I went with Carl Icahn and told not to follow Ackman, Ackman also lost billions in Herbalife and VRX.*

*Starbuck partnership with Alibaba will surely put some positive impact on trade war, on other hand Tesla will move higher tomorrow morning. Big traders are historic biggest short on Tesla and it will be interesting to see whether they come forward to cover shorts or they will keep holding billions of dollar worth of short positions in Tesla.*

*Other recommended stocks today are not acting that well after market HUBS and EXAS, I recommend adding more positions in EXAS, and hold HUBS as I don't see any major weakness.*

We also we recommended buying **TDOC, PRAH, NTR, SQ, IRTC** so lets see how they perform once market opens, we are expecting positive performance.

On Wednesday most of markets traded mix, European and London market struggled and closed negative. Most of FAANG stocks remained in the positive directions, Apple help tech stocks and aftermarket hours TSLA is helping trend.

On Thursday we are expecting positive trend in market. China and USA trader may get some positive news so remain watchful. Stay long in market and frontline stocks. Stay long in call options but get rid of non-quality stocks. Close energy stocks portfolio and have very limited exposure in mining stocks expect Lithium/Cobalt and Graphite.

Buy more positions in **FTSI London**, buy emerging market index or etfs, stay long in biotech stocks.

Overall our view is positive for Thursday. Tomorrow evening few important earning so we will update tomorrow.

We are recommending to still hold **Walmart**, in fact add more on today.

We still believe that a \$155 investment in a copy of the “**2018 Financial Predictions**” or in \$99, \$115, and \$75 for the different sections of the book is worth every penny if you trade or invest in the market, especially with the risks that people take in trading and investing.

This is what we stated yesterday: **To get a complete feel of 2018**, the 2017, was very simply a year with a bullish trend, if you have bought market, crypto currency, energy and base metals then you

did well without using much of your brain and logic. 2018 on the other hand will be a completely different year. I highly recommend reading “2018 Financial Predictions” book from cover to cover to get a complete feel of 2018. Many readers have the habit of jumping directly to the chapter they are

interested in but don't make this mistake this time. Even if you are metal trader you must-read the dollar section, what other commodities will be doing, and what the market's and crypto's trend will be, so please read the book in detail.

The Indian market is our favorite one in 2018, so stay long in Indian market ETF's and stocks.

**Here are the trading strategies and ranges for Friday:**

**GOLD/SILVER/BASE METALS**

On Thursday most of metals traded mix to negative as predicted yesterday.....

**On 11 June this is what we stated: Metals to entered in worst bearish cycle for the medium term and these prices are possible on lower sides, if metal trade below these levels then they may adopt worst cycle** – Gold has major support at \$1209 to \$1191, Copper tested \$268 astro support, silver at \$14.75 and platinum \$781. Palladium is in a longer-term bear market so no lower side limit or any major support till \$623 and medium-term support at \$842. Selling recommended in gold \$1357, copper at \$332, Zinc 3575, palladium \$1135 and many other metals around higher side.

**This is what we stated last week: From 7<sup>th</sup> May 2018, crucial astro cycle is starting for gold and you need to be remain very alert because trading negative could push gold toward \$1262 level and after that \$1238 and \$1209. Silver and platinum will follow gold.**

Get ready to sell or short aggressive positions in Copper, Zinc, Lead, Palladium, Nickel from 5 June 2018. In the next two and half months 20% or more correction is on the way in the base metals.

This is what we stated in the month of February 2018: On the lower side gold will hold \$1305, \$1298 to \$1262 in 2018, closing below \$1262 would open the door to collapsed toward new multiyear low toward \$1209 to \$1145 or even \$1055. If gold closes above \$1364 for the three to five days which looks very difficult, so it is getting clear that \$1364 is most crucial level for gold on higher side in 2018.

**Friday's astro combination recommendation** – Weakness to continue in precious metals and metal stocks.

**Friday's trading range: (September 2018 contract):**

**GOLD: \$1222.00 to \$1203.10 December (Spot ranges \$1214.90 to \$1195)**

**SILVER: \$15.48 TO \$15.23**

**COPPER: \$275.95 TO \$269.90**

**PALLADIUM: \$920.00 TO \$903.00**

**PLATINUM: \$835.00 TO \$812.00 October**

**INDEXES**

On Thursday once again S&P bounced back strongly from 2791 level and tested our higher side 2828 level. Astro Support and resistance level working with 98% accuracy.....

*Remember this Feb 2018 statement - Now my eye will be on 2550 level; if S&P closes below this level for the three days, then disaster will take place for stocks and S&P may test 2478 and 2171 level. I may recommend closing long in stocks but lets see whether S&P will closes below 2550 or it bounce back from this level. Yes. April is a very crucial month of investors. I am not worried after April but let's focus on April at this stage. If everything goes smooth, then we may see S&P testing 2900 level or even 3200. **April will be the deciding month** for the future.*

*Astro cycle still recommends buying YINN and INDL. Last week we mentioned that YINN won't go below \$28.00 and INDL \$72.00 level in the longer time, these levels will remain strong supports like a wall.*

This is what we stated two months back when S&P was at 2550 level: *Last week we stated that S&P won't go below 2550 level and I still hold this prediction, in fact we don't see S&P remaining below 2650 level for more than five days. Buy most of the markets and hold positions. I am sure you must have closed long in UVXY between \$24.00 to \$34.00 level.*

**Friday's astro combination recommendation:** Hold long positions in the most market and stocks.

**Friday's trading ranges: (September 2018 Contracts)**

**HONG KONG (cash) –29018 to 28651**

**NIFTY S&P (Spot) – 10319 TO 11235**

**NIKKEI – 22780 to 22488**

**CAC – 5501 TO 5435**

**DAX – 12698 TO 12541**

**DEX EURO STOXX – 3500– 3455**

**FTSE – 7597 TO 7511**

**FTSE/JSE (Cash) – 50695 to 50101**

**DOW e-mini – 25375 TO 25253**

**S&P e-mini – 2839.00 TO 2818.00**

**NASDAQ 100 e-mini – 7427 TO 7361**

**RUSSELL e-mini – 1691.00 TO 1675.00**

### **TREASURY BOND**

On Thursday Thirty Year bond traded both sides with small gain. On Friday we are recommending selling Thirty Year bond. We are expecting prices to 137-00 level so hold your short tight. It is getting clear that Bond prices are heading toward 137-00 level once it closes below 143-00 for three days.

Time to take some longs in bear ETF's like **TMV, TBT, and TTT**.

*We started recommending selling in Bond at 172-00 with first most important support at 143-00 which got achieved.*

**Fridays astro combination recommendation** – Sell higher side and hold short positions.

**Friday's trading range (September 2018 contract):**

**TREASURY BOND – 142-23 TO 141-18**

### **SOFT COMMODITIES**

On Thursday Lumber, Sugar, coffee and orange Juice traded sharply lower.....

**Friday astro combination recommendations** – Add more sell in Orange Juice. Trade in and out in cotton, stay sideline in sugar, cotton and cocoa as weakness may continue. Stay away from lumber and but small coffee.

**Friday's trading range: (Sep 2018 Contract)**

**COFFEE: \$107.95 TO \$106.50**

**COTTON: 89.70 TO 88.29 Dec**

**SUGAR: \$10.80 TO \$10.41**

**COCOA: 2107 TO 2043**

**LUMBER: 429 TO 410**

**ORANGE JUICE: 169.15 TO 165.50**

### **GRAINS**

On Thursday once again soybean, soy meal and soy oil traded negative.....

*Now follow these levels, as they are very crucial and if these grains trade below these levels (all September contract - corn at \$343, wheat \$468, soy at \$854 and meal at \$318 these they breach these prices for the five days, it could bring disastrous news for grains traders but at this stage we don't see that happening.*

**Friday astro combination recommendations** – Medium and longer-term traders can hold light long positions in soy bean. Short term traders can trade in and out in wheat, soy and corn.

**Friday's trading range (September 2018 contracts):**

**CORN: \$372.00 TO \$362.00**

**WHEAT: \$579.00 TO \$555.00**

**SOY: \$897.00 TO \$978.00**

**SOY MEAL: \$334.00 TO \$326.80**

**SOY OIL: \$28.57 TO \$27.91**

### **ENERGY**

On Thursday oil, heating oil and RB Gas closed higher, also natural gas moved higher but energy stocks closed negative....

**Overall last three years this what we stated:** So far, short-term trading has provided great returns in the last 18 months after my selling recommendation at \$97.00 mid-2014. You must remember what we mentioned two weeks ago: In 2001, we recommended buying oil at \$16.78 with the target of \$100 and higher. In August 2008, we recommended selling at \$145 with the target of \$32.00. Once

again in 2014 we recommended selling oil at \$100 with target of \$27.71. I couldn't ask more from nature.

This is 2018, we don't see oil going above \$72.38 to \$73.88 levels. On lower side it will hold \$65.88 to \$59.88 levels.

**Friday astro combination recommendations for oil** – On Friday selling is recommended in oil, RB Gas and Heating oil around higher sides, and cover lower sides.

**Friday's trading range (September 2018 contracts):**

**OIL: \$69.88 to \$67.81 Sep**

**NATURAL GAS: \$2.85 to \$2.77**

**HEATING OIL: \$2.1551 TO 2.1008**

**RB GAS: \$2.0935 TO \$2.0395**

## **CURRENCIES**

On Thursday dollar Index traded sharply higher.....

*This is what we stated three weeks back on Monday: Last week it was a great short term buying recommendation in Euro and Pound at 1.1555 and 1.3055. Next higher side level could 1.1888 for Euro and 1.3575 Pound and these are selling level, don't rush to buy Pound because it may test 1.3055 level. Dollar Index will struggled to move above 95.00 level so remember this predictions.*

**We stated three months back and keeping the same recommendations** - Great selling in euro around 1.2488 to 1.2555, Pound 1.3988 to 1.4375, Canadian 0.8188, and Australian dollar 0.8098. Great time to buy Real 3.88, Rupee \$68.75 and Peso 20.00.

*In the worst-case scenario, we may see USD testing 88.61 level so remember this and buy USD on weakness as **May 2018 onwards a major bull market is starting in USD. Don't trade with leverage positions in the current time cycle. Dollar won't fall below 88.61 and 88.31 and will have difficult time to cross 91.00 level at this stage, and Pound is ready to move towards 1.3375, Franc 1.0117, and Euro 1.1775.***

**Friday astro combination recommendation** – Buy on weakness in Euro, Pound. Stay away from Yen, Franc, Australian dollar and Canadian dollar. Stay long in Real, peso, Rand and Rupee.

**Friday's trading range: (September future Contract)**

**DOLLAR INDEX – 95.18 to 94.55**

**AUSTRALIAN DOLLAR – 0.7398 to 0.7331**

**CANADIAN DOLLAR – 0.7705 to 0.7655**

**BRITISH POUND – 1.3105 to 1.2988 (Spot – 1.3071 to 1.2965)**

**EURO – 1.1651 to 1.1575 (Spot – 1.1621 to 1.1546)**

**JAPANESE YEN – 0.9020 to 0.8945**

**USD/Japanese Yen - (Spot – 112.15 to 111.28)**

**SWISS FRANC – 1.0119 to 1.0054**

**USD/Franc - (Spot – 0.9971 to 0.9928)**

**New Zealand Dollar – 0.6772 to 0.6700**

**USD/RUPEE – 68.71 to 68.35 (Spot)**

**USD/RAND – 13.52 to 13.32 (Spot)**

**USD/REAL – 3.7710 to 3.7410 (Spot)**

**USD/PESO – 18.7110 to 18.5908 (Spot)**

#### **Small part from past Flashnews:**

Remember this what we stated on 22 September 2016: **Gold will struggle to move above \$1348 and silver \$20.28; these are the selling levels in both these precious metals but remain as a day trader for this week.**

This is what we mentioned on 11 August 2016: **Higher side in gold can rise maximum \$15 from current level of \$1348 and lower side more than \$300 by end of February 2017. Sell more NUGT around \$178 and JNUG around \$320; these levels were the previous highs last month. Add more buying in DUST.**

#### **From stock market sections:**

##### **INDEXES:**

This is what we mentioned on Tuesday, the 25<sup>th</sup> of January 2016: *Tuesday will be a great time to acquire positions in the emerging markets as well as in the European markets. If what we are seeing happens then S&P should move towards 1936 or even higher and down side, it won't go below 1844 or it won't close below 1862 level.*

*On last week Thursday and Friday S&P closed higher and finally settled at 1901 levels. Those who have been following our works for decades must know how important our astro support and resistance levels are. Last year also the lower side astro resistance was 1827, and the higher side 2088. Both these levels played a very important role for the market. So far the support level of 1821 played an important role on Wednesday and we are hopeful that S&P won't go below this level in the year 2016 and that the astro support and resistance levels continue playing an important role.*

This is what we mentioned the 18<sup>th</sup> of Jan 2016: *On Friday investors experienced a nightmare. It was day that no investor likes to see because on this kind of day the trading accounts of longer term investors are always deep in the red. In 2000 when the tech stocks crashed we never recommended any buying to investors because the astro cycle was negative for two years and it was clear that the market may remain down for the next two years. In 2008 crash which we predicted, we were also aware that the market would rebound from the 26<sup>th</sup> of February 2009. We recommended that the market would bottom out on the 6<sup>th</sup> of March 2009 and that investors should start accumulating stocks keeping in mind that they have to hold them for five years and that*

*they would make a fortune. We strongly recommended, not to focus on the daily volatility and keep busy accumulating quality stocks. This proved to be very accurate advice.*

This is what we mentioned Monday 8 August: Billions of dollars follow our predictions closely so some support always comes around our predicted levels. 12<sup>th</sup> February 2016, S&P moved more than 360 points rally which no one expected.

This is what we mentioned on the 29<sup>th</sup> of February: At this stage we are expecting that the Indian market will perform, so this is a great time for international investors to put money in the US market as Rupee is at a historic low and the market has already corrected 26% from higher levels. Brazil and China have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies because any turn around in **Brazilian Real can push BRZU toward \$39.00 from 9.30**. S&P closed above 1938 and if it closes above 1938 for more than two days then expect it to move towards 1988 during this week or next week.

Two weeks ago we predicted that 1864 is a great buying level with the first target of 1938 and 1988. The first target got achieved very quickly and the second target will get achieved soon and after that our most important astro resistance level will be 2088, which has played a crucial role in keeping the bull away to move above 2088 for the last 16 months.

### **Thirty Year Bond**

This is what we mentioned 10 September: *Tuesday Thirty Year Bond gained value, and same indicating on Wednesday. Fed may leave rate decision sideline which can push bond toward 168/169. Rate hike may bring prices 162 level. Overall trend is negative so get ready to sell on any rise if FED refuse to hike.*

*In the last ten weeks' bond prices came down from 176 to 165 as predicted and our longer-term view is very negative so keep building sell positions on any rise.*

*By the end of this year we may see 162-25 and 157. Stay long in TTT, TBT and TMV.*

### **Energy:**

This is what we stated 17 April, Monday: *ERX lost more 5% value and if ERX trade below \$30.00 then there are chances that it will test \$25.50 level which means oil prices will trade negative in coming time.*

*Once again oil will try to test \$54.78 but if this week it fails then we may see \$47.00 level once again. Major astro support point is \$49.88 level. RB Gas and HEATING OIL will follow oil.*

*On Monday oil prices will trade mix to negative but in USA trading one can take small buying, if oil fail to rise on Tuesday then expect major corrections in once again in coming time.*

*On Monday Natural gas will trade mix and prices will move both sides, trading in and out will remain best strategy in gas on Monday. Sell or short around \$3.38 level.*

This is what we mentioned on 8 January - *Natural gas went down sharply as predicted and tested \$3.16 from \$3.83, and the volatile trend will continue in GAS so trade carefully. Oil will only be able to move higher if it closes above \$54.78 for three days which we don't see happening.*

*Energy stocks traded mixed. ERX is unable to move above \$43.00 and oil above \$54.78 which is not a good sign for the energy market.*

We are not changing any of the predictions we mentioned on the 3<sup>rd</sup> of June: Same kind of positive, RB GAS and heating oil also moved higher. Natural gas traded mixed. ERX have been hanging around \$29.00 level and it must close above \$33.00 level to give bullish signal in energy stocks which we don't see at this stage moment.

Oil has been failing to close above \$48.88 level but same time it is not closing below 48.88 level as well. If oil closes above \$48.88 for three days, then the next price level of \$52.55 may get achieved. At this stage some selling is recommended around \$48.88 level and on the down side the important level to buy is at \$44.55. Oil prices have gained almost 70% from \$27.71 which we called the perfect bottom for oil.

This is what we mentioned on the 2<sup>nd</sup> of February: Many are predicting oil remaining in the teen's, but we do not see oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will struggle to move above \$35.18 levels, and if it does than \$44.55 is next target with \$48.88 selling level.

Natural gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural gas around \$1.72 and below.

*This is what we mentioned in our book "2016 financial Predictions" in oil sections:*

**IMPORTANT NOTE:** As most of you are aware our view for energy has been very negative since June 2014. The overall trend in energy prices will remain negative so we do not recommend adopting long term positions. This means that do not take any trades earlier in the year and continue holding them for the rest of the year, because the higher side in oil will remain limited. There will be better opportunities to make money by trading in and out. Heating oil and RB gas will follow oils trend, so during this year we may see oil moving towards \$48.50 or \$52.95, and on the down side it may hold \$34.55. If it closes below \$35.55 for three days then there are chances that oil prices could fall towards \$29.65. Traders should take advantage of buying short term call options before any of the above-mentioned cycles start, and also book profit quickly before the positive cycles end.

*Energy stocks will trade mixed without any major movement, so longer term investors should not be putting any money in energy stocks. Any sharp rise should be taken as a profit booking opportunity if you are holding any energy stocks.*

*Natural Gas' trend will remain positive during 2016, so one can stay long in Natural Gas in the year 2016. However, it is very important to remember to keep booking profit before any of the above mentioned negative cycles start. Overall, Natural Gas will outperform oil in the year 2016.*

*For short term strategies and price targets please follow our weekly and daily newsletters.*

**Ninth Cycle:**

*From the 26th of November to 31st of December 2016 - During this cycle we see positive momentum coming back in the energy market and oil prices will form a bottom, and oil stocks will also act positively. Even though this is a positive cycle, the higher side will remain limited. Natural gas and RB gas will move sharply higher during this period.*

**Energy trading ranges for 2016:**

**Crude Oil: \$52.95 to \$29.78** (As predicted last year that oil may hold \$30.00 level and if its trade below for five days then possibility that could test 2002 low of \$27.78 level)

**Natural Gas: \$2.88 to \$1.82 (higher side \$3.57 if it cross \$2.88)**

Look at accuracy level about oil what we predicted in the book.

This is what we stated Monday, 31 Oct 2016: *Friday oil, heating oil and RB Gas traded negative as predicted. Energy stocks also went down but gas traded mixed. On Monday, oil will trade negative; stay sidelined or those who are holding shorts can continue holding and cover some around \$47.50. If oil starts trading below this, then expect \$46.75 to \$44.88 level, cover all shorts at \$44.55 level. Heating oil and RB Gas will trade negative or will follow oil. On the higher side, oil will struggle to remain above \$49.88 level which is the most important astro resistance level.*

*Natural gas will trade on both sides without any clear directions so avoid trading but on the lower side one can buy GAS for Tuesday. Don't touch energy stocks as they will keep struggling.*

This is what we mentioned on for Friday 2 Sep 2016: *On Thursday oil, heating oil and RB Gas prices went down sharply lower and weakness will continue Friday. One can cover 50 to 70% shorts around \$42.61 level in oil and 100% around \$41.78, so one can cover positions in heating oil and RB Gas on Friday.*

This is what we mentioned Monday, the 21<sup>st</sup> of December 2015: *Last week energy traders remained very nervous as they felt like abandoned by the bigger financial institutions and other large energy investors, but the truth is that every energy trader or investor is badly stuck energy trades.*

*In 2008 we predicted a crash in oil from \$145 and in 2009 we predicted that it had bottomed out at \$33.00 level. That prediction provided great returns those who invested in oil and energy stocks. Now once again after the prediction of oil falling in 2014, since the last two weeks we have been predicting that oil would form a bottom around \$34.55 level so watch this prediction closely. I am not saying that oil won't fall below \$34.55 level but surely those who will buy around this level may be rewarded handsomely.*

*Maximum fearful days: According to the current astro cycle we see another 12 volatile or fearful trading days are pending but the down side is limited.*

This is what we mentioned on the 27<sup>th</sup> of August 2015: *If oil trades below \$47.00 for two days then there are chances it could retest our magic support figure of \$44.55. If it starts trading below \$44.55 then next level \$38.50 so avoid buying positions.*

*We are not recommending any buying in heating oil and RB gas, also one should avoid buying any energy stocks.*

This is what we mentioned on the 27<sup>th</sup> of April 2015: *Adopt trading in and out strategy in energy, **but don't take any shorts in oil, heating oil or RB Gas. Sell some energy stocks.** Energy stocks will trade mixed without any major move so one can get ready to sell energy stocks. Higher side it is possibility that oil may see \$63.80 level, if its hold \$57.00 level. Keep adding positions in Natural gas around \$2.55.*

This is what we mentioned on the 5<sup>th</sup> of March 2015: *Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors. On Down side oil will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.*

***Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for oil is \$47.00. ERX won't be able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.***

This is what we mentioned on the 3<sup>rd</sup> of January 2015: ***On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating oil and natural gas lost value as well on Monday. Don't buy RB Gas and heating oil but surely natural gas can be bought around \$2.71.***

This is what we mentioned on the 23<sup>rd</sup> of December 2014: ***Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.***

This is what we mentioned on the 11<sup>th</sup> of December 2014: *Wednesday our fear proven very true, we strongly recommend to stay away from oil. When oil broke \$92.88 we recommended sell oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.*

This is what we mentioned on the 5<sup>th</sup> of December 2014: ***Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, oil, RB gas and heating oil. Natural gain gained value from the lower levels on Friday as predicted.***

**On Monday the higher side will remain limited, and if oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like oil is getting ready to break \$60.00 so stay short or add selling on any fall.**

**Currencies:**

This is what we stated 4 January 2017: *We don't see dollar index going above 103.78 level so watch closely and closing below 102.55 will push dollar toward 101.55 level. Most of currencies gained nice value on Wednesday, emerging market currencies had best day.*

*On Thursday, most of currencies will trade both sides, buying is recommended on lower sides in most of currencies so don't miss opportunity.*

**Buy Pound, Yen, Australian dollar and Canadian dollar. Also buy Franc and Euro without fear.**

*Astro cycle changed late today on 3<sup>rd</sup> January so safe buying in all major currencies against USD.*

**Dollar closing below 102.75 will confirm that it would test the 101.55 level this week.**

We are not changing any predictions in currencies of what we mentioned on Monday, 31 October 2016: *Once again tested 99.00 level but then sharply came down from the middle of the trading sessions. We are still recommending to keep building positions in USD around 99.00 level. On Monday, we still recommend buying Euro and other currencies around the lower side, or selling USD around the higher side level. On the down side USD may hold 96.71 level so watch this level closely. Euro can move up to 1.1111 level in this week, so book profit if it goes there.*

*On late Monday, the Scorpio Moon will bring both sides volatility. On Wednesday, the FED will announce decisions and due to the Scorpio Moon traders will get confused. Trade light or just trade in and out in currencies but medium term traders can hold selling positions in USD.*

*Stay short in Yen but one can cover Japanese Yen as it may move towards 0.9525 to 0.9250 level at this stage.*

This is what we mentioned Monday on 29 August 2016: *We see Euro holding 1.1055 level and Pound 1.2925 level. We don't see it falling below 0.9410 level and on the higher side it will have a difficult time to move above 1.0198 level. For USD index 97.00 to 97.50 level will play the role of a Wall for dollar which dollar may not be able to breach at this stage, or maybe even for the next six weeks, and on the down side USD may test 92.50 level.*

This is what we mentioned last week on Monday, 25 July 2016: *This is what we mentioned on Wednesday, the 13<sup>th</sup> of July: Any rise shall be taken as selling opportunity in Yen, in the next two months we can 900 pips in Yen or it will easily come down to 0.9200 level very soon. We don't see Yen moving above 0.9878 level and in the worst case scenario 1.0000 will be maximum side.*

*Friday USD tested 97.50 level and this is an important level. Dollar may keep testing this level during this week. We don't see Euro going below 1.0923 and Pound 1.2988 level. Pound should be in you aggressive buying list until it holds this level.*

On Monday, the 11<sup>th</sup> of April 2016 we stated: *Last week USD traded negative, and lost value against most of currencies. There are still chances that USD may test 92.50 level so watch USD trend closely, and start taking positions at 92.50 level.*

*Emerging market currencies have done very well and it's time to close positions if you are short or medium term traders. Rupee won't fall much so don't short Rupee but surely Rand, Real, Peso and Rubble will lose some value from middle of Monday.*

*Australian won't hold above \$0.7725, Canadian dollar 0.7900, Euro 1.1475, Franc 1.0555, and Yen 0.9288 level.*

*This is what we mentioned last Thursday: Pound is ready for 1.4123 mark. Sell Pound and add more Swiss Franc sell.*

*We are not recommending any new short in Euro, surely one can acquire some positions in Euro for the short period of time.*

*Emerging market currencies are getting ready to for bottoms expect few won't be trust like Rand and Rubble. Wednesday we see many currencies gaining some value but stay away from Pound, Canadian and Franc as they can keep making new lows so hold positions with 3% more corrections.*

*This is what we mentioned on the 22<sup>nd</sup> of December: Euro will struggle to move above 1.1075 and may hold value 1.0725 so watch these both levels closely.*

*This is what we mentioned on the 23<sup>rd</sup> of April 2015: The Medium and longer term trend is still very positive for USD but for the short term a mix to bit weaker trend indicated. USD Index have achieved our target of 100 and now down side 95.00 or at worst case 90.00 level will be great buying.*

***Dollar is our longer term buying trade so we won't recommend shorting dollar, we recommend buying USD on any weakness. Euro higher side 300 pips and lower side more than 3000 pips. We don't see USD index going below 95.00 levels.***

*Remember this what we mentioned on the 5<sup>th</sup> of March 2015: Currency war has nothing to do with USD Friday USD gained value as predicted. Medium and longer term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.*

*Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.*

*This is what we mentioned on the 15<sup>th</sup> of Jan 2015, Monday: Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just finished one interview from Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell as it will going to go back to par levels.*

*This is we mentioned on the 2<sup>nd</sup> of October: On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.*

*Remember, this is what we mentioned in the month of July: At this stage USD is trading in a positive direction without any break since the last three weeks. Finally, it is reaching a most crucial level because once it breaks 81.78 then the nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.*

***This is what we mentioned in the month of May (2014): Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.***

*In this year book "2015 financial predictions" we predicted "final bear cycle in market from 27 July to 15 August 2015", yes Sun can bring some uncertainty but take this uncertainty as buying opportunity in same time in 2015 in the month of August.*

Watch 2088 level for S&P, as it is most tough astro resistance of 2015. In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

In our 2015 book we mentioned that commodities will have worst year of 2015, and so far precious metals, base metals, grains and softs have been struggling and they will keep moving down in the second half. Dollar will perform amazingly well in 2015 so hold positions and money in USD.

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
