Weekly Newsletter from 3-7 July 2020

Commodities and currencies are at important juncture....

Dear Members,

We all must remember that everything has been created by us; we created religions, we created the concept of God, we created mathematics, we have been understanding the natural and physical world through science, we have been creating technology and great medications, we created law and order, political systems, and the list goes on. People created the theory of economics, technical charts, and we created the theory of astro cycles and market behavioral patterns. Every creation came at the juncture at which we were faced with problems. In problematic situations, our brains begin to activate in order to solve the puzzle, and so far, it has been encoding every complex code for the last century non-stop... and we will continue as long as the earth is there and we are on it. This clearly indicates that we have limitless power which was given to us by nature when we were born, and as we grow we keep expanding as per our internal capacity.

I was very a modernized child even though I used to live in a small rural village. My brain and thought processes always focused on the future intriguingly, and my intuitive power often sparked during meditation. I could see a vague picture of the future; I could feel and touch it. That journey used to be so

amazing, even though I never had a guru to teach me Yogic Kriya, Chakra activation, mediation, or how to bring the mind, body (Indriya), and the soul in one alignment at center of our internal light.

The human brain has limitless power, but unfortunately, we are too busy with our daily routine in life and with our daily commitments that we are hardly able to enjoy those precious moments of enlightenment and awakening of every particle in our body. Yes, we were able to awaken every particle of our body, and in that process (knowingly or unknowingly), we awaken the God that has always been within us. Oh, it is so beautiful, I want to leave this Karmic world and would like to walk towards the most beautiful journey of awakening the God within in me, and you can do it as well as it is also exists within you. However, I still think there is some time pending before I walk on that path.

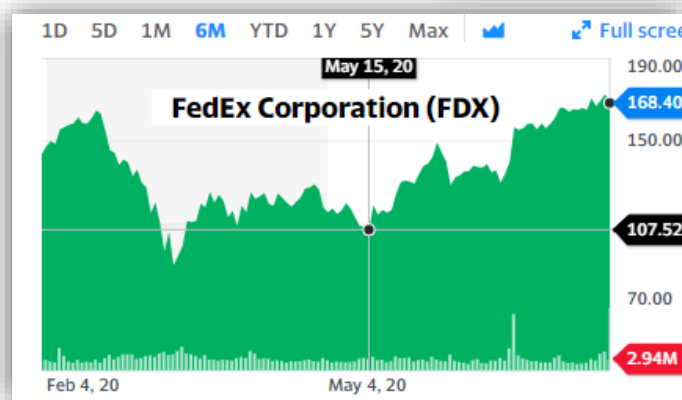

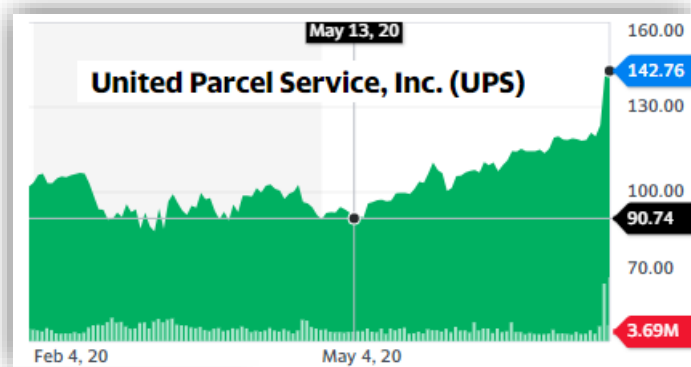

In 2001, I started writing two books, “**God Within Us**” and “**Awaking God**”. I don’t know when I will ever finish these books. Let’s go back to the market’s subject because that is why you subscribe to this letter, and my motto is always to remind you about mediation, as that will be able to help with your investment planning.

Last week, the US markets traded higher, while the European and Asian markets struggled. Precious metals went higher and held value very well as predicted, and it looks like frontline currencies achieved a top. Coffee prices moved aggressively, and the rest of the commodities traded mixed.

On Friday, Apple became one of the most valuable companies by surpassing Aramco of Saudi. Apple is approaching towards \$2 trillion, and Amazon is also on the same path. Both these stocks moved aggressively higher on Friday after the earnings announcements late Thursday.

Stocks - Companies like **FDX**, **UPS** moved higher last week, both these stocks have been in our long-term buying list in 2020; they moved over 45% in the last three months. Again, I want to remind you that planning longer term

investment strategies could make you a fortune and the last ten years are a great example of this advice. If you are still skeptical, then go to any financial website and see

the price movements of tech companies over the last ten years.

Commodities – Commodities are not stocks, that can keep moving higher over decades because they move up and down with demand and supply. So, we need to remain alert and we can trade them for the medium-term, earn some good money, and then we can wait for the next cycle.

Currencies – Currencies follow the same path, but Dollar is the one currency which has always moved higher against emerging market currencies in the longer term. It traded on both sides against developed world currencies. There is always a medium-term trading opportunity as per the cycles, and currencies can move aggressively on both sides.

We have been writing and advising about the market for around three decades but one sure thing that we have seen is that people have always made money in quality stocks and staying in the right sectors. It is important that you find

the right area where the wave is coming and invest there. In 2001 we recommended investing in mining and energy stocks. In 2008 we recommended closing all longs, and people made a fortune. In 2009, we started recommending buying again, but this time we recommended banks, tech, and biotech stocks and every year since then we have been recommending adding these stocks on weaknesses.

From here – surely the market will be volatile. Corona is still scaring investors because many don't know what will happen, whether there could be second wave, and whether a Vaccine will come or not this year. When will normal travel start, when will people start taking holidays, and when will stadiums, theaters, and social gatherings be filled with people? These all represent one part of a big economy which helps millions of people with daily earnings. It is good to know Apple, AMZN, NETFLIX, and FB are flying higher but we all know that we need every part of the economy to open back up so the lives of most businesses can become normal and millions of people can go back to normal daily work.

All these can become a reality the day a Vaccine is announced...Please subscribe weekly letter to read complete letter....

Weekly Newsletter: Let's see what this week's indicators for the world financial markets, commodities, and currencies from the 3rd to the 7th of August 2020:

Thanks & God Bless

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
