Tuesdays Daily Flash news (Unedited report)

Watch commodities closely...gold, silver and platinum could move go sharply higher...

Dear Members,

On Monday most of markets traded mix, commodities struggled and palladium prices collapsed. Tech earnings are so far not negative but stocks are trading sideways except Microsoft. Currencies started gaining value, dollar struggled to move further higher.

On Tuesday we are recommending staying sideline. Commodities shall start acting positive from today. Late today buy precious metals and etfs.

Energy prices will remain in the mix directions. Grains and softs shall be best bet today so don't miss opportunity of buying.

Earnings session is going without making any major moves.

I am recovering very well so soon letter will be out on normal timing.

Now let's watch dollar index level 97.18 closely.

Watch the important support & resistance levels updated on Monday, the 28th April 2019:

- Gold moved above \$1281 level which is great news for metal investors. Silver also held \$14.75 level which confirms that silver bullish is on the way. Gold may test \$1301 level. Metal stocks will gain momentum, JUNG and NGUT looks great bet.
- Base metals are running into negative time cycle. Sell copper around \$295, Palladium will be great short \$1468.
- S&P's support level will be at 2921 and now higher side 2951. Global markets will remain mix. Next level will be
- Higher side we may see \$65.68 in oil and lower side support will be 61.18 level.
- Natural Gas will be great buy now, chances of going toward \$2.84.
- ERX major astro resistance point is at \$25.55, sell at these levels.
- Bond will trade between 147-00 to 143-00.

- Dollar Index traded above 97.18 level, which is bit positive but closing below this level could bring bear market in dollar.
- Orange Juice has strong astro support at \$106, Coffee tested \$93.25, Sugar's key astro support level at \$11.71 and \$12.27. Cotton has support at \$68.68, Lumber selling level is \$428.
- Cocoa came down as predicted now; important astro support levels are \$2125 and higher side \$2625.
- Now the major support for soy is at \$855 corn \$343, Soy meal \$293, and wheat \$428.

Here are the trading strategies and ranges for Tuesday:

GOLD/SILVER/BASE METALS

On Monday precious and base metals traded negative. On Tuesday we are recommending buying some aggressive positions around lower side or after opening of USA market. Buy gold, silver and platinum for the short period. Buy also NUGT and JNUG.

Sell base metals or stay short in Nickel, Palladium, copper, twenty percent fall will come.

Palladium prices collapsed, be aware of buying. It was great short yesterday. This is what we stated yesterday for palladium and metal stocks: Palladium moved higher, and this is a great time to sell around \$1441 to \$1478 fearlessly. Tuesday evening buying some aggressive positions in NUGT and JNUG, as well precious metals.

Tuesday's astro combination recommendation – Avoid any buying in base metals, buy precious metal.

Tuesday's trading range: (July 2019 future contract):

GOLD: \$1288.10 to \$1275.50 June (Spot ranges \$1286.20 to \$1274.00)

SILVER: \$15.15 TO \$14.75 (Spot ranges \$15.12 to \$14.77)

INDEXES

On Monday most of markets traded mix, on Tuesday mix to negative trend will continue. Wednesday evening will be best time to acquire some more positions.

USA, European and emerging market will struggle on Tuesday.

UVXY will be good bet for the one day. Now most important level for S&P 2948, S&P is struggling to move above this level, once I close above this level then we

may see aggressive rally.

Must remember, this is what we stated yesterday: On Monday we are recommending trading in and out. Now S&P's next level is 2948, and then 3089, and 3189. We are recommending staying long in the market. Closing above 2948 for three days will push S&P another 200 points higher.

Apple will be the stock to bet on as it is ready to move higher. I am expecting it to move \$14 to \$18 higher in the coming few weeks so buy **Apple**. **AVGO, OLED, SWKS** will gain value because of Apple's move.

Tuesday's astro combination recommendation: Trade in and out, don't shorts stocks, buy Apple.

TREASURY BOND

Thirty Year Bond traded negative as predicted, higher side level is recommended as by Friday it will move further lower. SHORT TERM trading is recommended in bond.

First lower side target 145-00, and in the next few weeks 143-00 is the target so plan your trades accordingly.

145-00 could be achieved during this week.

Last year in January, we stated: *We started recommending selling in Bond at 172-00 with first most important support levels at 137-00, which was achieved.*

Tuesdays astro combination recommendation – Trade in and out or sell on higher sides.

Tuesday's trading range (June 2019 contract):

TREASURY BOND – 147-04 TO 146-05

SOFT COMMODITIES

On Monday grains traded negative, we are expecting softs to turn around from today so get in as major move is on the way any time from today.

Today buy coffee and sugar. Stay away from orange Juice and lumber but cover shorts.

Trade in and out in cotton and cocoa on Tuesday.

On Tuesday evening a fantastic astro time cycle is starting so don't miss the opportunity to buy. Expect 9 to 11% move in both these softs in the next two weeks, so this is a great time to make some short money.

Coffee is ready to test \$145 in the next three months and after that a big rally will start. Cover 100% shorts in Orange Juice and Lumber.

Coffee, cotton, and sugar will move aggressively higher from here by 10 to 12%. A lifetime buying opportunity is coming in coffee at \$93.25, cotton at \$72.75, sugar at \$12.17, and cocoa \$2125.

Tuesday astro combination recommendations – Add some aggressive positions in coffee and sugar.

LUMBER: 347.04 TO 338.15

ORANGE JUICE: 103.55 TO 101.00

GRAINS

On Monday grains trade traded sharply lower. If I am not mistaking then grains should have mega rally any from this week, this week will be final week.

I am expecting grains to bottom out from today, big move on Friday will be witnessed and we may see 18 days rally in grains.

Soy oil moved higher on Monday, still more upside move is indicating. This is one of the best buying opportunities and trader can buy grains.

Buy Wheat at \$423, Soy \$855, and Corn \$343; as we don't see prices going below this level. The higher side for Soy is \$975, Wheat \$557, and Corn \$398 by the end of April.

Tuesday astro combination recommendations – Great time to buy grains.

Tuesday's trading range (May future 2019 contracts):

CORN: \$364.00 TO \$357.00

WHEAT: \$440.00 TO \$430.00

SOY: \$866.00 TO \$855.00

SOY MEAL: \$303.60 TO \$298.00

SOY OIL: \$28.42 TO \$27.82

ENERGY

On Tuesday we are still recommending selling more positions in oil without fear on higher side ranges mentioned below here.

On Tuesday, higher side sell more heating oil, RB Gas and oil. Sell more or short energy stocks.

Gas moved higher, now \$2.62 will be crucial level to cross. Buy more UGAZ.

The Astro combinations are not positive for the energy market so stay short, and one can cover some shorts at \$60.93 and further lower side \$54.55 level is indicating.

Overall, in the last three years, this is what we stated: So far, short-term trading has provided great returns in the last 18 months after my selling recommendation at \$97.00 mid-2014. You must remember what we mentioned two weeks ago. In 2001, we recommended buying oil at \$16.78 with a target of \$100 and higher. In August 2008, we recommended selling at \$145 with the target of

\$32.00. Once again in 2014 we recommended selling oil at \$100 with target of \$27.71. I couldn't ask more from nature.

Tuesday astro combination recommendations for oil – On Tuesday selling is recommended on higher side in oil, heating oil and RB Gas.

Tuesday's trading range (May 2019 contracts):

OIL: \$64.08 to \$62.41

NATURAL GAS: \$2.62 to \$2.55

HEATING OIL: \$2.0751 TO 2.0244

RB GAS: \$2.0355 TO \$2.0005

CURRENCIES

On Monday dollar lost value, on Tuesday dollar may gain small value due to positive astro day. As predicted late Wednesday or Thursday will be best day to take buying positions.

Toward the end of this week we are expecting dollar to breach 97.18 level.

Tuesday remain sideline without any taking major positions in currency market. Surely one can take long positions Brazilian Real. Rupee, Peso and Rand will trade mix.

Buy today more positions in Japanese Yen. Expect 70 pips move in the next 36 hours.

Stay away from Euro, pound and Australian dollar. Watch our mentioned ranges closely, and if you have deep then on lower side add more positions.

One dollar closes below 97.18 level then we may see sharp corrections, until dollar doesn't close below 97.18 level, you should not take any aggressive short positions in USD.

We stated these eight months back and after that we are keeping the same recommendations - Great selling in euro around 1.2488 to 1.2555, Pound 1.3988 to 1.4375, Canadian 0.8188, and Australian dollar 0.8098.

Tuesday astro combination recommendation – Trade in and out on Monday and wait for our instructions on Tuesday.

30th April 2019, 03:00 AM, India

This is what we stated: *From the 7th of May 2018, fall predicted from \$1355, we targeted price \$1209 to \$1182. October 2018, we called bottom out for the short term.*

In the months of Jan to March 2018 Short recommended in Copper at \$330, Zinc 3355, Lead and Nickel. We predicted 20% to 30% or more correction in these base metals.

Small part from past Flashnews:

Remember this what we stated on the 22nd of September 2016: **Gold will struggle to move above \$1348 and silver \$20.28**; these are the selling levels in both these precious metals but remain as a day trader for this week.

This is what we mentioned on the 11th of August 2016: **Higher side in gold can rise maximum \$15 from current level of \$1348 and lower side more than \$300 by end of February 2017. Sell more NUGT around \$178 and JNUG around \$320; these levels were the previous highs last month. Add more buying in DUST.**

From stock market sections:

INDEXES:

Remember this Feb 2018 statement – Now I will be watching 2550 level; if S&P closes below this level for the three days, then disaster will take place for stocks and S&P may test 2451. I may recommend closing long in stocks but let's see whether S&P will not close below 2550 or it bounce back from this level. I am not worried after April but let's focus on April at this stage. If everything goes smooth, then we may see S&P testing 2900 every soon in 2018.

This is what we mentioned on Tuesday, the 25th of January 2016: *Tuesday will be a great time to acquire positions in the emerging markets as well as in the European markets. If what we are seeing*

happens then S&P should move towards 1936 or even higher and down side, it won't go below 1844 or it won't close below 1862 level.

On last week Thursday and Friday S&P closed higher and finally settled at 1901 levels. Those who have been following our works for decades must know how important our astro support and resistance levels are. Last year also the lower side astro resistance was 1827, and the higher side 2088. Both these levels played a very important role for the market. So far the support level of 1821 played an important role on Wednesday and we are hopeful that S&P won't go below this level in the year 2016 and that the astro support and resistance levels continue playing an important role.

This is what we mentioned the 18th of Jan 2016: On Friday investors experienced a nightmare. It was day that no investor likes to see because on this kind of day the trading accounts of longer term investors are always deep in the red. In 2000 when the tech stocks crashed we never recommended any buying to investors because the astro cycle was negative for two years and it was clear that the market may remain down for the next two years. In 2008 crash which we predicted, we were also aware that the market would rebound from the 26th of February 2009. We recommended that the market would bottom out on the 6th of March 2009 and that investors should start accumulating stocks keeping in mind that they have to hold them for five years and that they would make a fortune. We strongly recommended, not to focus on the daily volatility and keep busy accumulating quality stocks. This proved to be very accurate advice.

This is what we mentioned on Monday, the 8th of August: Billions of dollars follow our predictions closely so some support always comes around our predicted levels. 12th February 2016, S&P moved more than 360 points rally which no one expected.

*This is what we mentioned on the 29th of February: At this stage we are expecting that the Indian market will perform, so this is a great time for international investors to put money in the US market as Rupee is at a historic low and the market has already corrected 26% from higher levels. Brazil and China have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies because any turn around in **Brazilian Real can push BRZU toward \$39.00 from 9.30**. S&P closed above 1938 and if it closes above 1938 for more than two days then expect it to move towards 1988 during this week or next week.*

Two weeks ago we predicted that 1864 is a great buying level with the first target of 1938 and 1988. The first target got achieved very quickly and the second target will get achieved soon and after that our most important astro resistance level will be 2088, which has played a crucial role in keeping the bull away to move above 2088 for the last 16 months.

Thirty Year Bond

This is what we mentioned on the 10th of September: Tuesday Thirty Year Bond gained value, and same indicating on Wednesday. Fed may leave rate decision sideline which can push bond toward 168/169. Rate hike may bring prices 162 level. Overall trend is negative so get ready to sell on any rise if FED refuse to hike.

In the last ten weeks' bond prices came down from 176 to 165 as predicted and our longer-term view is very negative so keep building sell positions on any rise.

By the end of this year we may see 162-25 and 157. Stay long in TTT, TBT and TMV.

Energy:

This is what we stated on Monday, the 17th of April: ERX lost more 5% value and if ERX trade below \$30.00 then there are chances that it will test \$25.50 level which means oil prices will trade negative in coming time.

Once again oil will try to test \$54.78 but if this week it fails then we may see \$47.00 level once again. Major astro support point is \$49.88 level. RB Gas and HEATING OIL will follow oil.

On Monday oil prices will trade mix to negative but in USA trading one can take small buying, if oil fail to rise on Tuesday then expect major corrections in once again in coming time.

On Monday Natural gas will trade mix and prices will move both sides, trading in and out will remain best strategy in gas on Monday. Sell or short around \$3.38 level.

This is what we mentioned on the 8th of January - Natural gas went down sharply as predicted and tested \$3.16 from \$3.83, and the volatile trend will continue in GAS so trade carefully. Oil will only be able to move higher if it closes above \$54.78 for three days which we don't see happening.

Energy stocks traded mixed. ERX is unable to move above \$43.00 and oil above \$54.78 which is not a good sign for the energy market.

We are not changing any of the predictions we mentioned on the 3rd of June: Same kind of positive, RB GAS and heating oil also moved higher. Natural gas traded mix. ERX have been hanging around \$29.00 level and it must close above \$33.00 level to give bullish signal in energy stocks which we don't see at this stage moment.

Oil has been failing to close above \$48.88 level but same time it is not closing below 48.88 level as well. If oil closes above \$48.88 for three days, then the next price level of \$52.55 may get achieved. At this stage some selling is recommended around \$48.88 level and on the down side the important level to buy is at \$44.55. Oil prices have gained almost 70% from \$27.71 which we called the perfect bottom for oil.

This is what we mentioned on the 2nd of February: Many are predicting oil remaining in the teen's, but we do not see oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will struggle to move above \$35.18 levels, and if it does than \$44.55 is next target with \$48.88 selling level.

Natural gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural gas around \$1.72 and below.

This is what we mentioned in our book "2016 Financial Predictions" in oil's section:

IMPORTANT NOTE: *As most of you are aware our view for energy has been very negative since June 2014. The overall trend in energy prices will remain negative so we do not recommend adopting long*

term positions. This means that do not take any trades earlier in the year and continue holding them for the rest of the year, because the higher side in oil will remain limited. There will be better opportunities to make money by trading in and out. Heating oil and RB gas will follow oils trend, so during this year we may see oil moving towards \$48.50 or \$52.95, and on the down side it may hold \$34.55. If it closes below \$35.55 for three days then there are chances that oil prices could fall towards \$29.65. Traders should take advantage of buying short term call options before any of the above-mentioned cycles start, and also book profit quickly before the positive cycles end.

Energy stocks will trade mixed without any major movement, so longer term investors should not be putting any money in energy stocks. Any sharp rise should be taken as a profit booking opportunity if you are holding any energy stocks.

Natural Gas' trend will remain positive during 2016, so one can stay long in Natural Gas in the year 2016. However, it is very important to remember to keep booking profit before any of the above mentioned negative cycles start. Overall, Natural Gas will outperform oil in the year 2016.

For short term strategies and price targets please follow our weekly and daily newsletters.

Ninth Cycle:

From the **26th of November to 31st of December 2016** - During this cycle, we see positive momentum coming back in the energy markets; oil prices will form a bottom, and oil stocks will also act positively. Even though this is a positive cycle, the higher side will remain limited. Natural gas and RB gas will move sharply higher during this period.

Energy trading ranges for 2016:

Crude Oil: \$52.95 to \$29.78 (As predicted last year, oil may hold the \$30.00 level, and if it trades below that for five days, then there's a possibility that it could test 2002's low of the \$27.78 level)

Natural Gas: \$2.88 to \$1.82 (higher side \$3.57 if it cross \$2.88)

Look at accuracy levels about oil that we predicted in the book.

This is what we stated Monday, the 31st of Oct 2016: *Friday oil, heating oil and RB Gas traded negative as predicted. Energy stocks also went down but gas traded mixed. On Monday, oil will trade negative; stay sidelined or those who are holding shorts can continue holding and cover some around \$47.50. If oil starts trading below this, then expect \$46.75 to \$44.88 level, cover all shorts at \$44.55 level. Heating oil and RB Gas will trade negative or will follow oil. On the higher side, oil will struggle to remain above \$49.88 level which is the most important astro resistance level.*

Natural gas will trade on both sides without any clear directions so avoid trading but on the lower side one can buy GAS for Tuesday. Don't touch energy stocks as they will keep struggling.

This is what we mentioned on Friday, the 2nd of Sept 2016: *On Thursday oil, heating oil and RB Gas prices went down sharply lower and weakness will continue Friday. One can cover 50 to 70% shorts*

around \$42.61 level in oil and 100% around \$41.78, so one can cover positions in heating oil and RB Gas on Friday.

This is what we mentioned Monday, the 21st of December 2015: *Last week energy traders remained very nervous as they felt like abandoned by the bigger financial institutions and other large energy investors, but the truth is that every energy trader or investor is badly stuck energy trades.*

In 2008 we predicted a crash in oil from \$145 and in 2009 we predicted that it had bottomed out at \$33.00 level. That prediction provided great returns those who invested in oil and energy stocks. Now once again after the prediction of oil falling in 2014, since the last two weeks we have been predicting that oil would form a bottom around \$34.55 level so watch this prediction closely. I am not saying that oil won't fall below \$34.55 level but surely those who will buy around this level may be rewarded handsomely.

Maximum fearful days: According to the current astro cycle we see another 12 volatile or fearful trading days are pending but the down side is limited.

This is what we mentioned on the 27th of August 2015: *If oil trades below \$47.00 for two days then there are chances it could retest our magic support figure of \$44.55. If it starts trading below \$44.55 then next level \$38.50 so avoid buying positions.*

We are not recommending any buying in heating oil and RB gas, also one should avoid buying any energy stocks.

This is what we mentioned on the 27th of April 2015: *Adopt trading in and out strategy in energy, **but don't take any shorts in oil, heating oil or RB Gas. Sell some energy stocks.** Energy stocks will trade mixed without any major move so one can get ready to sell energy stocks. Higher side it is possibility that oil may see \$63.80 level, if its hold \$57.00 level. Keep adding positions in Natural gas around \$2.55.*

This is what we mentioned on the 5th of March 2015: *Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors. On Down side oil will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.*

Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for oil is \$47.00. ERX won't be able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.

This is what we mentioned on the 3rd of January 2015: ***On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating oil and natural gas lost value as well on Monday. Don't buy RB Gas and heating oil but surely natural gas can be bought around \$2.71.***

This is what we mentioned on the 23rd of December 2014: ***Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.***

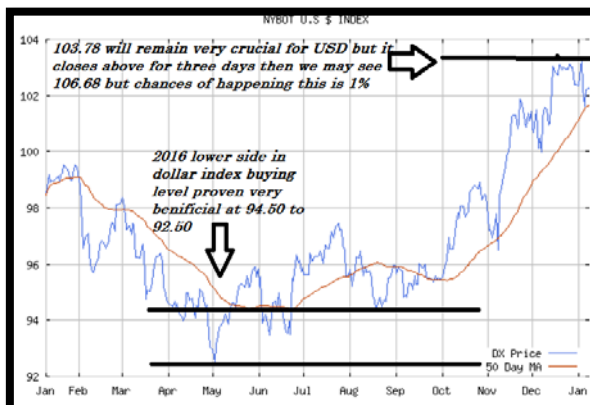

This is what we mentioned on the 11th of December 2014: *Wednesday our fear proven very true, we strongly recommend to stay away from oil. When oil broke \$92.88 we recommended sell oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.*

This is what we mentioned on the 5th of December 2014: **Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, oil, RB gas and heating oil. Natural gas gained value from the lower levels on Friday as predicted.**

On Monday the higher side will remain limited, and if oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like oil is getting ready to break \$60.00 so stay short or add selling on any fall.

Currencies:

This is what we stated on the 4th of January, 2017: **We don't see dollar index going above 103.78 level so watch closely and closing below 102.55 will push dollar toward 101.55 level. Most of currencies gained nice value on Wednesday, emerging market currencies had best day.**

On Thursday, most of currencies will trade both sides, buying is recommended on lower sides in most of currencies so don't miss opportunity.

Buy Pound, Yen, Australian dollar and Canadian dollar. Also buy Franc and Euro without fear.

Astro cycle changed late today on 3rd January so safe buying in all major currencies against USD.

Dollar closing below 102.75 will confirm that it would test the 101.55 level this week.

We are not changing any predictions in currencies of what we mentioned on Monday, the 31st of October 2016: **Once again tested 99.00 level but then sharply came down from the middle of the trading sessions. We are still recommending to keep building positions in USD around 99.00 level. On Monday, we still recommend buying Euro and other currencies around the lower side, or selling USD around the higher side level. On the down side USD may hold 96.71 level so watch this level closely. Euro can move up to 1.1111 level in this week, so book profit if it goes there.**

On late Monday, the Scorpio Moon will bring both sides volatility. On Wednesday, the FED will announce decisions and due to the Scorpio Moon traders will get confused. Trade light or just trade in and out in currencies but medium term traders can hold selling positions in USD.

Stay short in Yen but one can cover Japanese Yen as it may move towards 0.9525 to 0.9250 level at this stage.

This is what we mentioned on Monday, the 29th of August 2016: **We see Euro holding 1.1055 level and Pound 1.2925 level. We don't see it falling below 0.9410 level and on the higher side it will have a difficult time to move above 1.0198 level. For USD index 97.00 to 97.50 level will play the role of a Wall for dollar which dollar may not be able to breach at this stage, or maybe even for the next six weeks, and on the down side USD may test 92.50 level.**

This is what we mentioned last Monday, the 25th of July 2016: This is what we mentioned on Wednesday, the 13th of July: *Any rise shall be taken as selling opportunity in Yen, in the next two months we can 900 pips in Yen or it will easily come down to 0.9200 level very soon. We don't see Yen moving above 0.9878 level and in the worst case scenario 1.0000 will be maximum side.*

*Friday USD tested 97.50 level and this is an important level. Dollar may keep testing this level during this week. **We don't see Euro going below 1.0923 and Pound 1.2988 level.** Pound should be in you aggressive buying list until it holds this level.*

On Monday, the 11th of April 2016 we stated: *Last week USD traded negative, and lost value against most of currencies. There are still chances that USD may test 92.50 level so watch USD trend closely, and start taking positions at 92.50 level.*

Emerging market currencies have done very well and it's time to close positions if you are short or medium term traders. Rupee won't fall much so don't short Rupee but surely Rand, Real, Peso and Rubble will lose some value from middle of Monday.

Australian won't hold above \$0.7725, Canadian dollar 0.7900, Euro 1.1475, Franc 1.0555, and Yen 0.9288 level.

This is what we mentioned last Thursday: *Pound is ready for 1.4123 mark. Sell Pound and add more Swiss Franc sell.*

We are not recommending any new short in Euro, surely one can acquire some positions in Euro for the short period of time.

Emerging market currencies are getting ready to for bottoms expect few won't be trust like Rand and Rubble. Wednesday we see many currencies gaining some value but stay away from Pound, Canadian and Franc as they can keep making new lows so hold positions with 3% more corrections.

This is what we mentioned on the 22nd of December: *Euro will struggle to move above 1.1075 and may hold value 1.0725 so watch these both levels closely.*

This is what we mentioned on the 23rd of April 2015: *The Medium and longer term trend is still very positive for USD but for the short term a mix to bit weaker trend indicated. USD Index have achieved our target of 100 and now down side 95.00 or at worst case 90.00 level will be great buying.*

Dollar is our longer-term buying trade so we won't recommend shorting dollar, we recommend buying USD on any weakness. Euro higher side 300 pips and lower side more than 3000 pips. We don't see USD index going below 95.00 levels.

Remember this what we mentioned on the 5th of March 2015: *Currency war has nothing to do with USD Friday USD gained value as predicted. Medium- and longer-term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.*

Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.

This is what we mentioned on Monday, the 15th of Jan 2015: ***Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just***

finished one interview from Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell as it will going to go back to par levels.

This is we mentioned on the 2nd of October: *On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.*

Remember, this is what we mentioned in the month of July: *At this stage USD is trading in a positive direction without any break since the last three weeks. Finally, it is reaching a most crucial level because once it breaks 81.78 then the nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.*

This is what we mentioned in the month of May (2014): Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.

In this year's book "2015 financial predictions" we predicted the "final bear cycle in the market from the 27th of July to the 15th of August 2015". Yes, the Sun can bring some uncertainty, but take this uncertainty as a buying opportunity at the same time in 2015 in the month of August.

Watch the 2088 level for S&P, as it is most tough astro resistance of 2015. In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

In our 2015 book we mentioned that commodities will have worst year of 2015, and so far precious metals, base metals, grains and softs have been struggling and they will keep moving down in the second half. Dollar will perform amazingly well in 2015 so hold positions and money in USD.

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
