30 April 2020

Thursday Daily Flash news (Unedited report)

Markets are having great time and stocks are going on roof after earnings...

Dear Members,

I don't think I have seen any best rally like this in the last 33 year of watching market. Yesterday many blames me for this bull market, one said that "Bill Gate controls you" and same time one email came saying that "I am puppets of all these big banks". People can say whatever, let me tell these people that I am very ordinary guys, surely big name globally subscribe to our services and these is nothing wrong. Whenever I came wrong that time people criticized very badly, and I accept my error humbly but at this stage let me enjoy most amazing accuracy time of our theory. In the month of November, I kept writing and requesting that traders and investors must follow our predictions as we expected very higher accuracy due to astro combinations, since November accuracy I have been noticing that not only medium to longer term but even short-term predictions accuracy is at optimum level so please follow our daily work until accuracy remains high.

Yesterday oil went higher as predicted in weekly and daily letter.

Emerging market currencies gained handsome value, frontline currencies also gained value. Globally market went aggressively this week so far as predicted and S&P can test 2991 level as predicted. We strongly recommended buying this week most of markets including India and European markets and holding

long in stocks, etfs of these markets and indexes. Our bull market predictions is becoming discussions among many big guys in Wall-Street. I am really happy for all my members and I am sure they must have really done well if they trusted our work and took bets. S&P have been rallying nonstop since 2200, and today it achieved 2950, one of the biggest rally every took place in Wall-Street.

Our recommended stocks and earning recommendations have really done well, below few list of stocks: **AMZN** looks great. **BRZU**, **ERX**, **INDL**, **LBJ** are etfs and they really done well. Many Cloud, biotech and healthcare stocks are testing all time high. **NFLX** only one stock which underperformed.

DexCom, Inc. (DXCM) NasdaqGS - NasdaqGS Real Time Price. Currency in USD 345.47 +31.94 (+10.19%) At close: 4:00PM EDT	Tesla, Inc. (TSLA) NasdaqGS - NasdaqGS Real Time Price. Currency in USD 800.51 +31.39 (+4.08%) 874.23 +73.72 (9.21%) At close: 4:00PM EDT After hours: 8:00PM EDT

Disclose of my holding: I bought oil Tuesday around \$11.00, I have been accumulating very small positions in **DXCM**, and holding long in **HUM**. I am also holding long in market and recommended many biotech, healthcare and tech stocks.

Let's talk about book third cycle, here is what we mentioned in "2020 Financial Prophecies"

Third Cycle: From the 23rd of March to the 5th of May

During the first seven days of this period there will be volatility, but on any sharp correction between the 23rd of March to the 31st of March, one can buy some positions in indexes or stocks on weaknesses. During the month of April, the stock market will move higher once again.

During this period, we see biotech stocks rallying in a big way, along with mining and commodity stocks. By the end of this cycle, I strongly recommend booking profits if the stocks rally well as the next cycle is negative.

A few stocks related to COVID-19 are in our top buying list so follow **GILD**, **REGN**, **INO**, **VIR**, **MRNA**, **NNXV**, **DAYI**, **CODX** and **NNVC**. We recommended most of these stocks and most of them gained value.

After 5th of May we need to watch the market trend closely as astro cycles may lose some grip on pulling the markets higher.

As predicted, we shall see some form of positive news regarding the drug for Coronavirus by 15th May; we are also holding our prediction of the world becoming a normal place by 30th June so from 1 of July world will reopen.

As per our book "2020 Financial prophecies", Now we are running is the third positive cycle which started from 23 March and market have been moving higher since third cycle started. Now stable third cycle which started on 23rd March will end on 5th May 2020.

This is what we mentioned on Tuesday 21 April and this is most important strategy so follow this: for Oil trading strategy: *Any future contracts like June or July if you are buying then must put stop loss at \$18.81 level. My view still is negative for energy market, and if you really like to buy then buy at \$12.15 level June contract with strict stop-loss \$11.43. On Wednesday June contract tested \$09.48.*

Now June contract must close above \$18.81 for the three days which may bring some stability in market. July contract must hold \$18.81 and we believe that may happen. Buy some July call options if prices move toward lower sides. I have been not recommending trading positions in energy, if you want trade then to trade with strict stop-loss.

S&P has important astro support at 2741 and 2721, I don't see S&P closing below these level for three days. If market close positive on Wednesday, then expect 2881 to 2988 level or higher by Friday. Today I am expecting to hold lower side level. Still health care Pharm looks great bet. Hold long in our recommended biotech and healthcare stocks.

This is what we stated on 29 March:

<https://www.mahendraprophecy.com/article/cure-for-covid19-coronavirus-predictions-for-europe-usa/1604>

This is what we stated on 22 March:

<https://www.mahendraprophecy.com/article/coronavirus-covid19-predictions-march-april-2020/1600>

When I was writing this year's book "2020 Financial Prophecies", the main point that we saw was that there would be some uncertainty and that's the reason we predicted that the second cycle would remain negative, and advised investors to stay away from the market. **Now we are running is the third positive cycle which started from 23 March and market have been moving higher since third cycle started. Now stable third cycle which started on 23rd March will end on 7th May 2020.**

Watch the important support & resistance levels for this week (27th April – 1st May 2020):

- Gold, silver and platinum key important astro support will be...
- New astro resistance for copper and palladium will be at...
- S&P's major astro support is at...
- Oil now astro support...
- Gas's new level...
- Bond resistance will be 183-00, on lower sides 174-00 support level.
- Dollar Index trading range will be 98.55 to 102.75 level...
- Watch these level in emerging market currencies, for dollar against Rand, Peso, Rupee, and Real at...
- Orange Juice held a strong astro support level at \$90.65, Sugar's \$09.68, Cotton has support at \$47.88, cocoa support level \$2125. Coffee support at \$105.75 and \$119.00 first astro resistance and second one \$135.
- Wheat \$501, corn at \$311 and Soy \$821 will be great buy.

Here are the trading strategies and ranges for Thursday:

GOLD/SILVER/BASE METALS

On Wednesday metals gained small value, on Thursday we are expecting positive trend...

Thursday astro combination recommendation – On Thursday we are expecting positive trend in...

INDEXES

On Wednesday globally markets moved higher as predicted. Now S&P is going toward interesting astro level of....

Most of global markets will act mix to positive as they have been following Wall-street but not able to match powerful trend of Wall-

street.

This earning session stocks are on fire, tech, healthcare stocks are going amazingly well. Few financial are also started moving higher, our favorites Master card, Visa and fintech like Paycom (PAYC).

On Thursday markets will...

I still believe that in the year 2003 predictions of bottoming out of tech stocks, 2009 March bull market predictions, 2018 December bottoming out of S&P at 2400 with a higher side target 3200 for 2019, and so far this year on 23rd March at 2388 buying recommendations real were a few great calls we able to make because of the astro cycle. In 2007 our predictions of worst bear market in

history proven great call, we were able to save long of people big money as our warning was very strong and horrific.

All these stocks are in our buying list since 2011 and we constantly recommended adding on weakness in 2019, still they are great bet: **TSLA, NFLX, DXCM, AMZN, Google, MSFT, Apple, GILD, and REGN.**

Thursday's astro combination recommendation: On Thursday most of global markets will gain value...

RUSSELL e-mini –

ENERGY

On Wednesday as predicted oil moved higher perfectly. Energy etfs also moved higher as predicted.

On Thursday we will see...

This is what we stated yesterday: *Tuesday June future contract of oil made low of*

\$10.07 and bounce back. I strongly recommend staying long today as we expected oil to move higher from Wednesday, or from lower side of Tuesday.

Tuesday's when oil started recovery we got confirmation that oil to move higher and this rally could push oil toward \$18.71 level, book profit that level and this may get achieve by Friday this week.

Overall Wednesday oil will get great boost from astro combinations so hold long in energy market.

This is what we mentioned in our this week weekly newsletter 27 April - 1 May:

On Wednesday the astro combinations are turning very positive that one shall start buying Oil or energy ETF from the European market session, and we may see a huge upside price move in the US trading sessions. Also buy heating oil and RB Gas.

On Thursday, oil prices will keep moving sharply higher so buying on weakness is our advice.

We made some important note on June and July prices on last week Tuesday so follow closely: *Now June contract have become very active, I recommend buying positions in June contract at \$12.11 level as I don't see oil closing below this level for the three days so if you have deep pocket then buy but put stop-loss at \$9.48 which is huge gap almost 30% but we need to remember that price fluctuations is so big.*

*At this stage I will be happier to recommend buy **July contracts**, and we see prices may July contract holding \$18.81 level, and lower side we may see \$16.78 so focus on July contract rather than June one.*

June contract *will have tough time to close above \$18.71 level so keep this level in mind either to book profit if you are buying and prices reaching there or one take some sell positions around this level.*

Astrologically some positivity will come in from tomorrow, today prices will move in the both side directions in oil so take some long around lower side level or in the late sessions. Stay away from heating oil and RB Gas.

Natural gas traded mix, trading in and out on daily basis will be best strategy.

In the last 20 years we able to predict every move in energy market so follow our advise very closely regardless whatever expert says.

Thursday's astro combination recommendations for oil – Thursday is positive astro for oil.

Thursday's trading range (June 2020 contracts):

OIL: \$17.18 to \$13.51 June

NATURAL GAS: \$1.94 to \$1.80

RB GAS: \$0.7918 TO \$0.7305

HEATING OIL: \$0.8139 TO 0.7505

CURRENCIES

On Wednesday most of currencies gained value, emerging market currencies had best day in long time as predicted, Real, Peso and Rand stated gaining from 24th April and still rally has room more room to move further higher.

On Thursday....

This is what we stated yesterday: Tuesday most of currencies gained value as predicted. On Wednesday stay long in currencies to add some more long on lower sides.

Buy some more positions around lower side in Japanese Yen as it can gain 150 pips value this week, Australian dollar, Canadian dollar, Pound, and Franc will also gain value.

Trade in and out in Euro. Stay long and add more long positions today in emerging market currencies as they are acting as predicted after 24 April. We still may see sharp rise in Peso, Rand, and Rupee, but Peso and Rand can gain around further 5% by Friday. USD/Rupee may gain 1% more value as it has been acting positive since last week.

*This is what we stated yesterday: **Mercury changed house in the last hour of trading on Friday and we saw emerging market gaining value which is the first positive sign.***

Monday astro combinations are showing a positive sign for most of currencies so buy emerging market currencies and frontline currencies. Medium term trend doesn't look very promising for frontline currencies so remain a short-term trader.

On Monday one can buy small long on the lower side in Euro, Franc, Pound, Australian dollar, Canadian dollar and Rupee, Real, Peso, Rand.

Frontline currencies will trade in the 300 pips ranges for the same time, so take small long when Euro goes to 1.0700, and sell around 1.1000, Pound 1.2675 and 1.2011, Franc 1.0500 and 1.0078.

Lifetime selling level in Dollar against Rand 20.04, Peso at around 25.37, Rupee at 76.78, and Real at \$5.68.

Thursday's astro combination recommendation – Thursday...

Thursday's trading range: (June 2020 future Contract)

DOLLAR INDEX – 100.00 to 99.41

AUSTRALIAN DOLLAR – 0.6571 to 0.6521 (Spot 0.6586 to 0.6531)

BRITISH POUND – 1.2588 to 1.2411 (Spot – 1.2582 to 1.2426)

CANADIAN DOLLAR – 0.7246 to 0.7183 (Spot 0.7247 to 0.7185)

EURO – 1.0915 to 1.0837 (Spot – 1.0901 to 1.0829)

JAPANESE YEN – 0.9405 to 0.9343 (Spot 0.9398 to 0.9341)

SWISS FRANC – 1.0299 to 1.0243 (Spot 1.0297 to 1.0238)

USD/Japanese Yen - (Spot – 106.98 to 106.50)

USD/Franc - (Spot) – 0.9778 to 0.9682

New Zealand Dollar (Spot) – 0.6163 to 0.6081

USD/RUPEE – 75.51 to 75.09 (Spot)

USD/RAND – 18.19 to 17.95 (Spot)

USD/REAL – 5.39 to 5.28 (Spot)

USD/PESO – 24.01 to 23.47 (Spot)

TREASURY BOND

Bond prices traded mix, On Thursday mix trend will continue so trade in and out. Bond Trading range will be 183-00 to 177-00 level in the next ten days. At this stage follow these ranges closely or just trade in and out as mentioned in daily ranges.

It looks like Thirty-Year bond will have a difficult time to close above 183-00 in the coming time.

Thursday's astro combination recommendation – Stay sideline or trade in and out.

Thursday's trading range (June 2020 contract):

TREASURY BOND – 182-18 TO 181-00

SOFT COMMODITIES/

On Wednesday Sugar gained value, other softs acted mix. Coffee lost still some more value but watch it closely. On Wednesday mix trend will continue in most of softs so trade in and out.

Next important day is 16 May 2020 so either you can wait, or just trade in and out or if you have deep pocket then buy some aggressive long positions.

In our weekly newsletter we mentioned that we are 2 months away from a major bullish cycle in coffee, prices may double immediately so wait for another two months to buy some leverage positions in coffee.

I don't see coffee going below \$105.00 level so it's great to buy. Start acquiring longer term call options in coffee, buy December 2020 calls of \$150, and our target is \$195.00 level.

Cotton will be a great buy at \$50.00, Sugar \$09.11, coffee \$107.11 and Cocoa \$2125.

Thursday astro combination recommendations – Stay sideline or just trade in and out.

Thursday's trading range: **(July 2020 Contract)**

COFFEE: \$107.00 TO \$104.21

COTTON: 58.05 TO 56.55

COCOA: 2398 TO 2336

SUGAR: \$10.27 TO \$09.71

GRAINS

On Wednesday grains traded mix, trade in and out but remember that world will become normal from 1st July so great time to build long on weakness as they are trading around our predicted lower side levels.

Adopt strategy of trading in and out on daily basis.

The new level to buy in SOY is \$812, wheat \$505 and corn \$312, if grains breaches these levels then expect further negativity of another 15%. 2020 July onwards a great bull market in grains will start.

Thursday astro combination recommendations – Trade in and out with small buying on lower sides.

Thursday's trading range **(July future 2020 contracts):**

CORN: \$317.00 TO \$310.00

WHEAT: \$522.00 TO \$510.00

SOY: \$846.00 TO \$830.00

SOY MEAL: \$292.00 TO \$286.00

SOY OIL: \$26.43 TO \$25.89

Thanks & God Bless, Mahendra Sharma

29th April 2020, 05:00 PM, PST

From stock market sections:

INDEXES:

Remember thi4s Feb 2018 statement – Now I will be watching 2550 level; if S&P closes below this level for the three days, then disaster will take place for stocks and S&P may test 2451. I may recommend closing long in stocks but lets see whether S&P will not close below 2550 or it bounce back from this level. I am not worried after April but let's focus on April at this stage. If everything goes smooth, then we may see S&P testing 2900 every soon in 2018.

This is what we mentioned on Tuesday, the 25th of January 2016: Tuesday will be a great time to acquire positions in the emerging markets as well as in the European markets. If what we are seeing happens then S&P should move towards 1936 or even higher and down side, it won't go below 1844 or it won't close below 1862 level.

On last week Thursday and Friday S&P closed higher and finally settled at 1901 levels. Those who have been following our works for decades must know how important our astro support and resistance levels are. Last year also the lower side astro resistance was 1827, and the higher side 2088. Both these levels played a very important role for the market. So far the support level of 1821 played an important role on Wednesday and we are hopeful that S&P won't go below this level in the year 2016 and that the astro support and resistance levels continue playing an important role.

This is what we mentioned the 18th of Jan 2016: On Friday investors experienced a nightmare. It was day that no investor likes to see because on this kind of day the trading accounts of longer term investors are always deep in the red. In 2000 when the tech stocks crashed we never recommended any buying to investors because the astro cycle was negative for two years and it was clear that the market may remain down for the next two years. In 2008 crash which we predicted, we were also aware that the market would rebound from the 26th of February 2009. We recommended that the market would bottom out on the 6th of March 2009 and that investors should start accumulating stocks keeping in mind that they have to hold them for five years and that they would make a

fortune. We strongly recommended, not to focus on the daily volatility and keep busy accumulating quality stocks. This proved to be very accurate advice.

This is what we mentioned on Monday, the 8th of August: Billions of dollars follow our predictions closely so some support always comes around our predicted levels. 12th February 2016, S&P moved more than 360 points rally which no one expected.

This is what we mentioned on the 29th of February: At this stage we are expecting that the Indian market will perform, so this is a great time for international investors to put money in the US market as Rupee is at a historic low and the market has already corrected 26% from higher levels. Brazil and China have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies because any turn around in **Brazilian Real can push BRZU toward \$39.00 from 9.30**. S&P closed above 1938 and if it closes above 1938 for more than two days then expect it to move towards 1988 during this week or next week.

Two weeks ago we predicted that 1864 is a great buying level with the first target of 1938 and 1988. The first target got achieved very quickly and the second target will get achieved soon and after that our most important astro resistance level will be 2088, which has played a crucial role in keeping the bull away to move above 2088 for the last 16 months.

Thirty Year Bond

This is what we mentioned on the 10th of September: *Tuesday Thirty Year Bond gained value, and same indicating on Wednesday. Fed may leave rate decision sideline which can push bond toward 168/169. Rate hike may bring prices 162 level. Overall trend is negative so get ready to sell on any rise if FED refuse to hike.*

In the last ten weeks' bond prices came down from 176 to 165 as predicted and our longer-term view is very negative so keep building sell positions on any rise.

By the end of this year we may see 162-25 and 157. Stay long in TTT, TBT and TMV.

Energy:

This is what we stated on Monday, the 17th of April: ERX lost more 5% value and if ERX trade below \$30.00 then there are chances that it will test \$25.50 level which means oil prices will trade negative in coming time.

Once again oil will try to test \$54.78 but if this week it fails then we may see \$47.00 level once again. Major astro support point is \$49.88 level. RB Gas and HEATING OIL will follow oil.

On Monday oil prices will trade mix to negative but in USA trading one can take small buying, if oil fail to rise on Tuesday then expect major corrections in once again in coming time.

On Monday Natural gas will trade mix and prices will move both sides, trading in and out will remain best strategy in gas on Monday. Sell or short around \$3.38 level.

This is what we mentioned on the 8th of January - Natural gas went down sharply as predicted and tested \$3.16 from \$3.83, and the volatile trend will continue in GAS so trade carefully. Oil will only be able to move higher if it closes above \$54.78 for three days which we don't see happening.

Energy stocks traded mixed. ERX is unable to move above \$43.00 and oil above \$54.78 which is not a good sign for the energy market.

We are not changing any of the predictions we mentioned on the 3rd of June: Same kind of positive, RB GAS and heating oil also moved higher. Natural gas traded mix. ERX have been hanging around \$29.00 level and it must close above \$33.00 level to give bullish signal in energy stocks which we don't see at this stage moment.

Oil has been failing to close above \$48.88 level but same time it is not closing below 48.88 level as well. If oil closes above \$48.88 for three days, then the next price level of \$52.55 may get achieved. At this stage some selling is recommended around \$48.88 level and on the down side the important level

to buy is at \$44,55. Oil prices have gained almost 70% from \$27.71 which we called the perfect bottom for oil.

This is what we mentioned on the 2nd of February: Many are predicting oil remaining in the teen's, but we do not see oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will struggle to move above \$35.18 levels, and if it does than \$44.55 is next target with \$48.88 selling level.

Natural gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural gas around \$1.72 and below.

This is what we mentioned in our book "2016 Financial Predictions" in oil's section:

IMPORTANT NOTE: *As most of you are aware our view for energy has been very negative since June 2014. The overall trend in energy prices will remain negative so we do not recommend adopting long term positions. This means that do not take any trades earlier in the year and continue holding them for the rest of the year, because the higher side in oil will remain limited. There will be better opportunities to make money by trading in and out. Heating oil and RB gas will follow oils trend, so during this year we may see oil moving towards \$48.50 or \$52.95, and on the down side it may hold \$34.55. If it closes below \$35.55 for three days then there are chances that oil prices could fall towards \$29.65. Traders should take advantage of buying short term call options before any of the above-mentioned cycles start, and also book profit quickly before the positive cycles end.*

Energy stocks will trade mixed without any major movement, so longer term investors should not be putting any money in energy stocks. Any sharp rise should be taken as a profit booking opportunity if you are holding any energy stocks.

Natural Gas' trend will remain positive during 2016, so one can stay long in Natural Gas in the year 2016. However, it is very important to remember to keep booking profit before any of the above mentioned negative cycles start. Overall, Natural Gas will outperform oil in the year 2016.

For short term strategies and price targets please follow our weekly and daily newsletters.

Ninth Cycle:

From the 26th of November to 31st of December 2016 - During this cycle, we see positive momentum coming back in the energy markets; oil prices will form a bottom, and oil stocks will also act positively. Even though this is a positive cycle, the higher side will remain limited. Natural gas and RB gas will move sharply higher during this period.

Energy trading ranges for 2016:

Crude Oil: \$52.95 to \$29.78 (As predicted last year, oil may hold the \$30.00 level, and if it trades below that for five days, then there's a possibility that it could test 2002's low of the \$27.78 level)

Natural Gas: \$2.88 to \$1.82 (higher side \$3.57 if it cross \$2.88)

Look at accuracy levels about oil that we predicted in the book.

This is what we stated Monday, the 31st of Oct 2016: *Friday oil, heating oil and RB Gas traded negative as predicted. Energy stocks also went down but gas traded mixed. On Monday, oil will trade negative; stay sidelined or those who are holding shorts can continue holding and cover some around \$47.50. If oil starts trading below this, then expect \$46.75 to \$44.88 level, cover all shorts at \$44.55 level. Heating oil and RB Gas will trade negative or will follow oil. On the higher side, oil will struggle to remain above \$49.88 level which is the most important astro resistance level.*

Natural gas will trade on both sides without any clear directions so avoid trading but on the lower side one can buy GAS for Tuesday. Don't touch energy stocks as they will keep struggling.

This is what we mentioned on Friday, the 2nd of Sept 2016: On Thursday oil, heating oil and RB Gas prices went down sharply lower and weakness will continue Friday. One can cover 50 to 70% shorts around \$42.61 level in oil and 100% around \$41.78, so one can cover positions in heating oil and RB Gas on Friday.

This is what we mentioned Monday, the 21st of December 2015: Last week energy traders remained very nervous as they felt like abandoned by the bigger financial institutions and other large energy investors, but the truth is that every energy trader or investor is badly stuck energy trades.

In 2008 we predicted a crash in oil from \$145 and in 2009 we predicted that it had bottomed out at \$33.00 level. That prediction provided great returns those who invested in oil and energy stocks. Now once again after the prediction of oil falling in 2014, since the last two weeks we have been predicting that oil would form a bottom around \$34.55 level so watch this prediction closely. I am not saying that oil won't fall below \$34.55 level but surely those who will buy around this level may be rewarded handsomely.

Maximum fearful days: According to the current astro cycle we see another 12 volatile or fearful trading days are pending but the down side is limited.

This is what we mentioned on the 27th of August 2015: If oil trades below \$47.00 for two days then there are chances it could retest our magic support figure of \$44.55. If it starts trading below \$44.55 then next level \$38.50 so avoid buying positions.

We are not recommending any buying in heating oil and RB gas, also one should avoid buying any energy stocks.

*This is what we mentioned on the 27th of April 2015: Adopt trading in and out strategy in energy, **but don't take any shorts in oil, heating oil or RB Gas. Sell some energy stocks.** Energy stocks will trade mixed without any major move so one can get ready to sell energy stocks. Higher side it is possibility that oil may see \$63.80 level, if its hold \$57.00 level. Keep adding positions in Natural gas around \$2.55.*

This is what we mentioned on the 5th of March 2015: *Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors. On Down side oil will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.*

Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for oil is \$47.00. ERX won't be able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.

This is what we mentioned on the 3rd of January 2015: ***On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating oil and natural gas lost value as well on Monday. Don't buy RB Gas and heating oil but surely natural gas can be bought around \$2.71.***

This is what we mentioned on the 23rd of December 2014: ***Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.***

This is what we mentioned on the 11th of December 2014: *Wednesday our fear proven very true, we strongly recommend to stay away from oil. When oil broke \$92.88 we recommended sell oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.*

This is what we mentioned on the 5th of December 2014: ***Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, oil, RB gas and heating oil. Natural gain gained value from the lower levels on Friday as predicted.***

On Monday the higher side will remain limited, and if oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like oil is getting ready to break \$60.00 so stay short or add selling on any fall.

Currencies:

This is what we stated on the 4th of January, 2017: *We don't see dollar index going above 103.78 level so watch closely and closing below 102.55 will push dollar toward 101.55 level. Most of currencies gained nice value on Wednesday, emerging market currencies had best day.*

On Thursday, most of currencies will trade both sides, buying is recommended on lower sides in most of currencies so don't miss opportunity.

Buy Pound, Yen, Australian dollar and Canadian dollar. Also buy Franc and Euro without fear.

Astro cycle changed late today on 3rd January so safe buying in all major currencies against USD.

Dollar closing below 102.75 will confirm that it would test the 101.55 level this week.

We are not changing any predictions in currencies of what we mentioned on Monday, the 31st of October 2016: *Once again tested 99.00 level but then sharply came down from the middle of the trading sessions. We are still recommending to keep building positions in USD around 99.00 level. On Monday, we still recommend buying Euro and other currencies around the lower side, or selling USD around the higher side level. On the down side USD may hold 96.71 level so watch this level closely. Euro can move up to 1.1111 level in this week, so book profit if it goes there.*

On late Monday, the Scorpio Moon will bring both sides volatility. On Wednesday, the FED will announce decisions and due to the Scorpio Moon traders will get confused. Trade light or just trade in and out in currencies but medium term traders can hold selling positions in USD.

Stay short in Yen but one can cover Japanese Yen as it may move towards 0.9525 to 0.9250 level at this stage.

This is what we mentioned on Monday, the 29th of August 2016: *We see Euro holding 1.1055 level and Pound 1.2925 level. We don't see it falling below*

0.9410 level and on the higher side it will have a difficult time to move above 1.0198 level. For USD index 97.00 to 97.50 level will play the role of a Wall for dollar which dollar may not be able to breach at this stage, or maybe even for the next six weeks, and on the down side USD may test 92.50 level.

This is what we mentioned last Monday, the 25th of July 2016: This is what we mentioned on Wednesday, the 13th of July: Any rise shall be taken as selling opportunity in Yen, in the next two months we can 900 pips in Yen or it will easily come down to 0.9200 level very soon. We don't see Yen moving above 0.9878 level and in the worst case scenario 1.0000 will be maximum side.

Friday USD tested 97.50 level and this is an important level. Dollar may keep testing this level during this week. **We don't see Euro going below 1.0923 and Pound 1.2988 level.** Pound should be in you aggressive buying list until it holds this level.

On Monday, the 11th of April 2016 we stated: Last week USD traded negative, and lost value against most of currencies. There are still chances that USD may test 92.50 level so watch USD trend closely, and start taking positions at 92.50 level.

Emerging market currencies have done very well and it's time to close positions if you are short or medium term traders. Rupee won't fall much so don't short Rupee but surely Rand, Real, Peso and Rubble will lose some value from middle of Monday.

Australian won't hold above \$0.7725, Canadian dollar 0.7900, Euro 1.1475, Franc 1.0555, and Yen 0.9288 level.

This is what we mentioned last Thursday: Pound is ready for 1.4123 mark. Sell Pound and add more Swiss Franc sell.

We are not recommending any new short in Euro, surely one can acquire some positions in Euro for the short period of time.

Emerging market currencies are getting ready to for bottoms expect few won't be trust like Rand and Rubble. Wednesday we see many currencies gaining some value but stay away from Pound, Canadian and Franc as they can keep making new lows so hold positions with 3% more corrections.

This is what we mentioned on the 22nd of December: *Euro will struggle to move above 1.1075 and may hold value 1.0725 so watch these both levels closely.*

This is what we mentioned on the 23rd of April 2015: *The Medium and longer term trend is still very positive for USD but for the short term a mix to bit weaker trend indicated. USD Index have achieved our target of 100 and now down side 95.00 or at worst case 90.00 level will be great buying.*

Dollar is our longer-term buying trade so we won't recommend shorting dollar, we recommend buying USD on any weakness. Euro higher side 300 pips and lower side more than 3000 pips. We don't see USD index going below 95.00 levels.

Remember this what we mentioned on the 5th of March 2015: *Currency war has nothing to do with USD Friday USD gained value as predicted. Medium- and longer-term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.*

Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.

This is what we mentioned on Monday, the 15th of Jan 2015: *Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just finished one interview from Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell as it will going to go back to par levels.*

This is we mentioned on the 2nd of October: *On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.*

Remember, this is what we mentioned in the month of July: *At this stage USD is trading in a positive direction without any break since the last three weeks. Finally, it is reaching a most crucial level because once it breaks 81.78 then the*

nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.

This is what we mentioned in the month of May (2014): Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.

In this year's book "2015 financial predictions" we predicted the "final bear cycle in the market from the 27th of July to the 15th of August 2015". Yes, the Sun can bring some uncertainty, but take this uncertainty as a buying opportunity at the same time in 2015 in the month of August.

Watch the 2088 level for S&P, as it is most tough astro resistance of 2015. In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

In our 2015 book we mentioned that commodities will have worst year of 2015, and so far precious metals, base metals, grains and softs have been struggling and they will keep moving down in the second half. Dollar will perform amazingly well in 2015 so hold positions and money in USD.

Make wave of nature/astronomical cycle an integral part of your trading/Investment strategies!

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
