## Weekly Newsletter from 4-8 May 2020

**How bad will be volatility in the 4<sup>th</sup> astro cycle...hedging bet is important from here onward...**

Dear Members,

Let me start this Newsletter with a note on Covid-19 because I want you to be very clear about what I see and what I said for the world. I still believe that the Gilead Drug will work well, and I expected a drug to be approved between the 15<sup>th</sup> of April and the 15<sup>th</sup> of May as mentioned in March, and finally on Friday night the FDA approved it for use for Covid-19 patients.

We still believe that the world will resume normal activities from the first week of July 2020. I am making this prediction purely by studying the behavior pattern of Jupiter. In the month of November when Jupiter and the South Node got together in the house Saturn was situated, and it gave birth to the most unique disease Covid-19. In March, Jupiter went in the house of Capricorn, which is a negative house for Jupiter, so this disease started playing a deadly role in the world. Thank God that Jupiter will be moving out on the 30<sup>th</sup> of June and going back to the house of Sagittarius, which happens to be its own house. This will nullify all the negative effects of the South Node which will also be in the house of Sagittarius.

I am not interested in playing the blame game at this stage, but I take it instead as a part of nature which needed this to happen for the world to wake up, and

for the human race to start taking steps to take care of ourselves, nature, and the future coming generations. I hope that the generations of this time will learn some important lessons from their time of Covid-19.

In the next ten years China will be in an economic disaster, the Euro Zone will split, and there will be major technological glitches in the world which will start from the US. This shows that the next ten years are going to be incredibly challenging but, 2021-22 will be the most interesting one for investors.

Last week globally the markets traded very well until Wednesday; and selling pressure or profit booking started coming in. And on Friday we saw a huge sell-off in the markets. Our date of 5<sup>th</sup> of May is coming closer and yes, I am a little bit nervous, but I will try my best to guide you during this uncertain time cycle. Last week S&P went very close to our most important level of 2971 on higher sides; it looks like this number will play an important astro resistance level for S&P at this stage. We will talk more about this in the indexes section, but sure some fire work is still pending in USA market, our favorite stocks are on fire and they may not stop moving higher.

Currencies traded very volatile during last week and the volatility will continue in the coming time.

Commodities are acting very uncertain but our buying recommendation in oil last week surprised everyone on Wall Street because prices moved exactly from \$10 to \$18.81. oil was best call last week and must follow daily flashnews for day trading.

Metals are acting negatively and will continue to act negatively. The best bet for the next one month will be selling all other metals and buying gold will be the best hedging bet.

I wish you good health, and safety. Enjoy this time with your family and try to learn something new during this period.

Let's talk about book third cycle, here is what we mentioned in "2020 Financial Prophecies":

### **Third Cycle: From the 23<sup>rd</sup> of March to the 5<sup>th</sup> of May**

During the first seven days of this period there will be volatility, but on any sharp correction between the 23<sup>rd</sup> of March to the 31<sup>st</sup> of March, one can buy some positions in indexes or stocks on weaknesses. During the month of April, the stock market will move higher once again. During this period, we see biotech stocks rallying in a big way, along with mining and commodity stocks. By the end of this cycle, I strongly recommend booking profits if the stocks rally well as the next cycle is negative.

A few stocks related to COVID-19 are in our top buying list so follow **GILD, REGN, INO, VIR, MRNA, NNXV, DAYI, CODX and NNVC**. We recommended most of these stocks and most of them gained value.

As per our book "2020 Financial prophecies", Now we are running is the third positive cycle which started from 23 March and market have been moving higher since third cycle started. Now stable third cycle which started on 23<sup>rd</sup> March will end on 5<sup>th</sup> May 2020.

**Watch the important support & resistance levels with daily trading strategy from Monday to Friday is here below for metals, global indexes, energy, currencies, grains, soft & Bond this week (4<sup>th</sup> April – 8th May 2020):**

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
