Friday Daily Stock Report (Unedited report)

By today evening we will
get clear picture who is
leading USA but market

ignoring and keep making big move as predicted...

Dear Members,

Thanks to astro cycle and nature that I decided to choose what market will do during and after elections rather than who will win elections and that was right decision because originally we predicted that S&P may get 3597 to 3800 in 2020 and we want to stick with our own predictions. I won't surprise at all if S&P achieve 3800 in 2020. Even when S&P was 2300 in March 2020 during Covid-19 crash, we still believed and predicted that market is ready to make huge move and may test 3800 by the end of this year. This was only possible because of trusting my theory rather than watching world news. I think this was amazing prediction and those who trusted this prediction made fortune in the last even months.

Our earning recommendations are doing very well. Yesterday in stock investment report we recommended buying positions in; **SQ, MCHP, TTD, ROKU, ZG, PTON, TTWO, EPAM, NET, HUBS, TECH, PCTY, TNDN, IRTC, CWEN,**

NVRO, FOLD and RGEN. Only few traded negative but most of these stocks performed amazingly well.

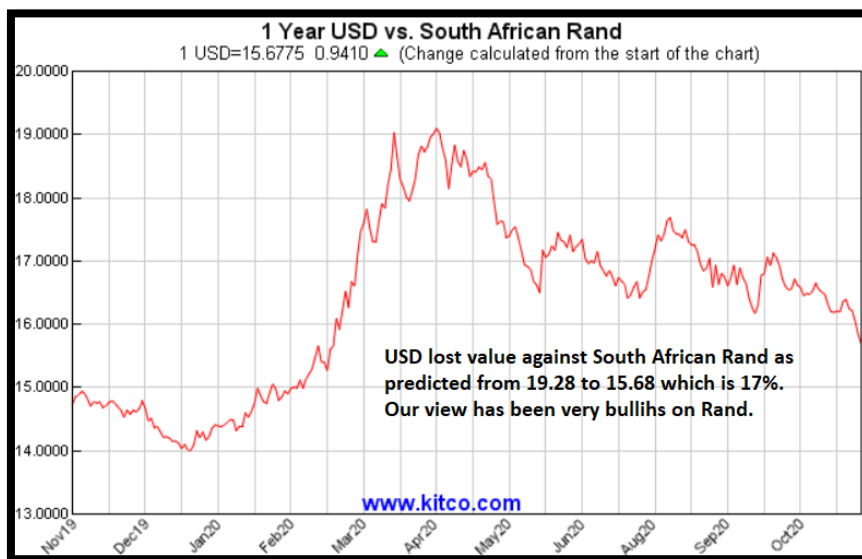

These are most of our favorite stocks and we keep recommending holding long positions in these stocks. Those focused on short term missed greatest money making opportunity and those who believed on our medium to longer term pick done amazingly well.

NET	\$	64.37	+8.25	+14.70
TTD	\$	725.00	+92.58	+14.64
SEDG	\$	235.66	+29.10	+14.09
HUBS	\$	370.00	+43.93	+13.47
PODD	\$	255.68	+24.25	+10.48
MELI	\$	1,435....	+119....	+9.07
ROKU	\$	231.50	+15.82	+7.33
QDEL	\$	284.00	+17.57	+6.59
WORK	\$	27.75	+1.62	+6.20
LMND	\$	63.35	+3.65	+6.11
CNC	\$	67.85	+3.86	+6.03
TEAM	\$	199.99	+11.17	+5.92
DDOG	\$	102.10	+4.48	+4.59
IRTC	\$	235.00	+9.04	+4.00
GDS	\$	96.31	+3.60	+3.88
ZS	\$	150.05	+4.70	+3.23

On Thursday markets performed amazingly well. Stay long in metals as our buying recommendations in precious metals predictions done very well on Thursday as per mentioned in weekly letter, but book one can book some profit around higher side today. Trade in and out in energy.

USA market moved aggressively higher and stocks are performing amazingly well. Stay long in market and recommended stocks.

USD dollar underperformed; in fact it went sharply lower so next few days are

important.
Rand, Peso and
Rupee
performing well
in the last six
months. Rand
and Peso
performed
amazingly well.

I think next two week weekly newsletter will be most important one as we will be publishing list of stocks which can make mega move if Vaccine is announce as per our predictions.

Stocks are moving sharply higher, surely on expectations of Democrat winning helped healthcare stocks like **HUM, CI, ANTM, UNH. Amazon** which is our most favorite stock gained handsome value. **QCOM** gained big value after earning.

I still believe that Vaccine which will change future of world and world will become normal once again. We see Vaccine news pushing market more than 10%. Vaccine can come out in the next two weeks.

INDEXES

On Thursday globally market moved sharply higher as predicted. On most of recommended stocks are performing very well. Now we are waiting for Vaccine to come which may arrive any time in the next 15 days. We are strongly recommend taking some aggressive positions in Covid-19 affected stocks and we shall send list in the next few weeks weekly letter.

On higher side S&P has small astro resistance at 3557 and 3595 level, book some profit but on lower side we don't see it going below 3423 and 3388 levels so keep this in mind. Also remember that S&P may hit 3800 by the end of this year.

On Friday higher side profit booking will come around higher sides as it is mix astro day.

Close some long in European market. Asian market will keep outperforming.

We are strongly recommend staying long, and LABU moved higher but need to close above \$72.00 level for seven days then only bull era can start.

Great time to build positions in **AMZN, DXCM, PYPL, APPLE, NFLX and GOOGLE. Biotech** stocks are performing well, and great era is starting in **biotech stocks.**

New list of buying is coming next week and this buying will be from Cruise, Rental car, Airline, Casino and Hotel Ind.

Our view for longer term: We are still holding longer term target of S&P moving toward 5000 and NASDAQ 25000. Downside risk is 10% so keep both in mind. Our target of 3800 by the end of this year.

From 2011 we have been recommending adding all these stocks: **TSLA, NFLX, DXCM, AMZN, Google, MSFT, Apple, VEEV, AMD, NVDA, HZNP, MA, V, BAC, COST, and REGN.** We are adding news stocks in our buying list from here onward are: **PYPL, PODD, IRTC, TNDM, SWAV, UPS, FDX, ZM, OKTA, FSLY, TDOC, PTON** performed well.

Friday's astro combination recommendation: Thursday globally markets moved sharply higher as predicted. On Friday we see market moving higher and may S&P will achieve 3557 level, this will be level to book profit but are not recommending any short in market because there are possibility that S&P may achieve 3800 which have been predicting this year even in pandemic time. This is what we stated yesterday: *Wednesday USA market had big rally, as rally was purely on future prospect not on Candidate. We said market will act positive regardless whoever wins. Thank to Mercury, it started playing major supportive role for Bull. S&P closing above 3443 level is most crucial and closing above this level will push market toward 3578 level very quickly.*

This is what we mentioned 15 April 2015: *As we said, our most favorite stocks just buy and keep it on the side until the bull market is there; and this bull market is still to remain for the next two years. In 1995/96 when I was Africa, I invested in Satyam computer at Rs. 15 (sold in early 2000 before tech crash at 5900.00), SSI at Rs. 29 (I sold it at 11230.00) and Mastek Rs. 210 (sold at 5900) & BFL Software at Rs. 55 (sold at Rs. 980). In 1995/96 I saw a historic bull market coming in tech and internet stocks, I also predicted that there will be a rush to buy these stocks and they could move thousands of percent and that happened by 2000. This was the first fortune I made from nothing.*

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
