## Fridays Daily Flash news (Unedited report)

**Strong rally in market on China news, we expected this to happen...**

Dear Members,

On Thursday market went higher after USA and China agrees to meet in October to resolve issue on trade war. Market moving sharply higher put some pressure on precious metals, but base metals gain some value.

Most of currencies gained value against USD, and Thirty-Year Bond prices crashed. INDL and YINN gained value.

I will be back in Santa Barbara on Monday so Daily letters will arrive on right time before Asia opens.

On Friday markets will hold value, but interesting time still is pending for precious metals so get ready to build some long during the next week.

Energy markets will trade mix and base metals will come down.

Emerging market currencies will move hold value, any weakness shall be taken as buying opportunity in Rand, Real and Peso.

We need to watch S&P closing above 2988 level which will be most bullish sign.

**SAIC** announced strong earning, buy it if you wish to as we see this stock doubling from here in the next one-year time.

**Big humble request:** *You trust my work and I trust you the same way, so please don't break this trust by forwarding the letter to anyone, let them subscribe their own services. This is the law of nature so please follow it because the luck factor is a part of the law of nature. Luck will always remain on your side if you are doing the right thing. You must read luck factor chapter on our website and in our book because it plays the most powerful role, and is the master key of success, wealth and happiness.*

**Watch the important support & resistance levels for this week (2-6 September), the 2<sup>nd</sup> September:**

- Gold refused to go below \$1500 level, and now on higher side \$1548 will be crucial resistance. Silver held \$17.55, higher side \$19.71 will be selling level.
- Base metals like Copper, Zinc, Nickel struggled. Palladium went higher, now \$1578 will be selling levels. Now copper will come down to \$248, higher side selling/short recommended in at \$263.
- Platinum is holding \$837 and it will hold this level, higher side \$978 will be crucial.
- S&P failed to move above 2938, and now 2888 and 2863 will be key astro support. Moving above 2943 will push toward 2993 to 3015 level.
- Oil will trade in the trading range of \$50.88 to \$57.81 levels. Gas held 2.10, this is buying level.
- Bond will be good sell 167-00 with target of 163-00 to 161-00 very quick.
- Dollar Index moved above 98.17, no more buying recommended in frontline currencies. Now dollar will hold 98.18 level as Sun started supporting USD. Important astro support for Euro 1.0891, Pound 1.2075, and Australian dollar 0.6395 so watch these levels closely. Yen will hold value.
- Orange Juice has strong astro support at \$91, Coffee \$91.25, Sugar's \$10.87 and Cotton has support at \$55.68, Lumber selling level is \$428 and support at \$312. Cocoa came down as predicted now; important astro support levels are \$2105 and higher side \$2475.

- Now the major astro support for soy is at \$843 corn \$353, Soy meal \$289, and wheat \$453.

**Here are the trading strategies and ranges for Friday:**

**GOLD/SILVER/BASE METALS**

On Thursday precious metals came down sharply on news of USA/China agrees of talk in October. I was looking of opportunity to recommend buying on weakness and soon that one is coming during next week.

Our short term higher side price target in gold and silver was achieved, but wait for next week to buy positions as in coming rally gold may surpass this week high.

Thursday was Scorpio Moon so some volatility was expected in precious metals.

From Monday great selling opportunity is coming in base metals so get ready to see Palladium and copper.

Platinum will be good buy during next week as so wait for our weekly newsletter.

Friday trade in and out, and wait for next week. **JNUG** will good buy around \$66.00 if prices came there.

This is what we stated yesterday: *It looks like that it is moving toward \$19.88 our first important astro resistance level so book profit around this level. Gold can easily test \$1578 level.*

*I strongly recommend goldbugs to remain long in gold, as any price is possible and stay long in platinum. Don't short these precious metals. Gold can move toward \$1871 if start closing above \$1578 level and silver \$26.78 if it closes above \$19.78 for the five days.*

*Platinum is in our longer term buying list so hold long without doing any fancy trading. Mining stocks will move higher.*

**Important:** *On the higher side Gold will struggle to close above \$1559 to \$1578; Silver \$19.88; and Platinum \$988 so watch these levels or book some profit but still higher side we may see \$1071.*

**Friday astro combination recommendation** – On Friday trade in and out in precious and base metals and get ready to buy precious metals next week.

**Friday's trading range:** **(December 2019 future contract):**

**GOLD: \$1538.60 to \$1509.50 Dec (Spot ranges \$1529.20 to \$1505.00)**

**SILVER: \$19.15 TO \$18.21 (Spot ranges \$19.19 to \$19.11)**

**COPPER: \$264.05 TO \$257.05**

**PALLADIUM: \$1565.00 TO \$1531.00**

**PLATINUM: \$983.00 TO \$935.00 Oct**

## INDEXES

On Thursday sharp up move came in US market. European markets also went higher. On Friday higher side opening shall be taken as profit booking opportunity.

S&P need to close above 2988 level for the three days to confirm new buying so booking profit at 2988 won't harm you.

Stay long in global markets. Stay long in INDL and YINN.

Friday normally I don't recommend trades and also still Scorpio Moon so stay sideline and get ready for next week newsletter to start taking positions accordingly.

This is what we what stated on Tuesday: *Tuesday globally markets went down sharply lower. On Wednesday we are predicting positive trend as Mercury and Mars will support market trend so buy positions in the most of markets but remember not to do any aggressive trading as tomorrow will be Scorpio Moon.*

*I am expecting positive news on USA/China trade deal because of positive astro combinations, by 15 September*

*Now 2943 is a very important astro resistance level and support will be 2888.*

*European markets will gain sharply today so buy European market.*

*Time to bet on INDL and YINN for the short term.*

UGAZ have been gaining, also JNUG and NUGT also gaining, stay long.

Remember - The European markets look positive, the emerging markets can hold value, and the USA market looks great, especially Tech and Financials. If by the 21<sup>st</sup> of September S&P fails to close at an all-time high, then we may recommend closing longs in the market for some time.

This week Tuesday is also a very important day for all the global markets, so no shorts recommended at this stage.

**Friday's astro combination recommendation:** Trade in and out on Friday.

Friday's trading ranges: **(September 2019 Contracts)**

HONG KONG (cash) –26791 to 26505

NIFTY S&P (Spot) – 10888 TO 10808

RUSSELL e-mini – 1525.00 TO 1498.00

### TREASURY BOND

Thirty Year bond prices collapsed as predicted. We are recommending adding more shorts but remember to close shorts around 163-00 level which shall achieve tomorrow or early next week.

As predicted prices failed to remain above 167-00, so now expect 163-00.

Last year January, we stated: *We started recommending selling in Bond at 172-00 with first most important support levels at 137-00, which was achieved.*

**Fridays astro combination recommendation** – Cover some shorts at 163-00 level.

Friday's trading range **(September 2019 contract):**

TREASURY BOND – 165-15 TO 165-04

### SOFT COMMODITIES

On Friday still softs traded negative, now next date is 15 September for major turn around.

I still recommend holding long in coffee. Avoid rest of soft commodities.

We are still expecting 20% rise in coffee during this month.

Avoid Lumber and Orange Juice.

**Three months ago we stated:** A lifetime buying opportunity is coming in coffee at \$92.25, cotton at \$55.75, sugar at \$10.88, and cocoa \$2025.

**Friday astro combination recommendations** – Still we recommend buying coffee.

Friday's trading range: **December 2019 Contract**

**COFFEE: \$96.55 TO \$94.51**

**COTTON: 60.23 TO 58.75 Dec**

**COCOA: 2279 TO 2225**

**ORANGE JUICE: 106.11 To 102.93**

**LUMBER: 363.11 TO 356.11**

## GRAINS

On Thursday wheat and corn moved higher, soy came down. On Friday we are still recommending buying some more positions in Soy.

Trade in and out in corn and wheat on Friday. Still soy is our favorite.

Grains have entered in positive astro cycle so keep this in mind and add aggressive buying if Soy comes around \$843, wheat \$437, and corn \$343, these are great levels to bet in grains.

**Friday astro combination recommendations** – Buy Soybean as it will be big day for bean.

Friday's trading range **December future 2019 contracts**:

**CORN: \$360.00 TO \$354.00**

**WHEAT: \$471.00 TO \$460.00**

**SOY: \$868.00 TO \$853.00 Nov**

**SOY MEAL: \$295.00 TO \$290.00**

**SOY OIL: \$28.80 TO \$28.25**

## ENERGY

On Thursday oil prices held value, but it will be difficult to move higher in coming days. I still don't see oil moving above \$57.88 level so take advantage of selling if prices go there.

On Friday we recommending selling oil, heating oil and RB Gas higher sides.

Natural gas held value, Friday we see gas and UGAZ moving higher so hold long positions. UGAZ and natural gas moved higher as predicted, still prices will move further higher so stay long in GAS and UGAZ, it already gained more than 10% value in gas. Book some profit at \$2.48 level and more at \$2.53 level, close all long if prices move to \$2.61 level.

**Overall, in the last three years, this is what we stated:** So far, short-term trading has provided great returns in the last 18 months after my selling recommendation at \$97.00 mid-2014. You must remember what we mentioned two weeks ago. In 2001, we recommended buying oil at \$16.78 with a target of \$100 and higher. In August 2008, we recommended selling at \$145 with the target of \$32.00. Once again in 2014 we recommended selling oil at \$100 with target of \$27.71. I couldn't ask more from nature.

**Friday astro combination recommendations for oil – Sell some positions in oil on higher side and hold long GAS.**

**Friday's trading range (September 2019 contracts):**

**OIL: \$57.68 to \$55.11 Oct**

**NATURAL GAS: \$2.48 to \$2.37**

**RB GAS: \$1.5756 TO \$1.5112**

**HEATING OIL: \$1.9115 TO 1.8511**

## CURRENCIES

On Thursday emerging market currencies moved higher in Asian trading sessions but then profit booking came in and they close almost flat.

Frontline currencies gained value. Yen lost big value as expected.

On Friday we are still recommending adding some aggressive positions in emerging market currencies.

Buy more Real and Peso. Buy more Rand on weakness. Rupee will act positive but from 15 September onward Rupee will move higher.

Dollar Index came down today, closing below 98.18 for the three days will be bad news for USD so we would like to watch three days.

Trade in and out as mentioned below ranges in the frontline currencies like Euro, pound and Franc. Stay short in Yen.

This is what we stated yesterday: *Short term traders can book profit in USD/Real at 4.00, Peso 19.55 and Rand \$14.55. Rand have really performed amazingly well in the last one week.*

*Trade in and out in frontline currencies on Thursday as it is Scorpio moon day which will bring both side move. Hold shorts in Japanese Yen. Euro will have difficult time to move above 1.1095, Pound 1.2388 and Australian dollar 0.6888.*

*Dollar index must close below 98.18 level for the more than three days to confirm short term top in USD against frontline currencies.*

***This is what we have been stating: Dollar won't go above 4.21 against Real, 20.43 against Peso, 71.98 against Rupee and 15.48 against Rand.***

This is what we stated last week: Now the most important astro support level for Euro will be 1.1075 to 1.1155, Australian dollar 0.6775, and Pound 1.2075. Dollar Index is also struggling to move above 98.15 so watch this level closely.

***Eight months back we stated - Great selling in euro around 1.2488 to 1.2555, Pound 1.3988 to 1.4375, Canadian 0.8188, and Australian dollar 0.8098.***

**Friday astro combination recommendation** – Dollar crossed 98.18 level and closing above this for the three days may change complete outlook for USD. Our view is very bullish for emerging market currencies. Must read this week newsletter.

**Friday's trading range: (September 2019 future Contract)**

**DOLLAR INDEX – 98.55 to 98.01**

**AUSTRALIAN DOLLAR – 0.6855 to 0.6768 (Spot 0.6855 to 0.6771)**

**CANADIAN DOLLAR – 0.7581 to 0.7530 (Spot 0.7581 to 0.7532)**

BRITISH POUND – 1.2383 to 1.2261 (Spot – 1.2383 to 1.2260)

USD/RAND – 14.91 to 14.74 (Spot)

USD/REAL – 4.12 to 4.07 (Spot)

USD/PESO – 19.77 to 19.61 (Spot)

From stock market sections:

#### INDEXES:

*Remember this Feb 2018 statement – Now I will be watching 2550 level; if S&P closes below this level for the three days, then disaster will take place for stocks and S&P may test 2451. I may recommend closing long in stocks but lets see whether S&P will not close below 2550 or it bounce back from this level. I am not worried after April but let's focus on April at this stage. If everything goes smooth, then we may see S&P testing 2900 every soon in 2018.*

*This is what we mentioned on Tuesday, the 25<sup>th</sup> of January 2016: Tuesday will be a great time to acquire positions in the emerging markets as well as in the European markets. If what we are seeing happens then S&P should move towards 1936 or even higher and down side, it won't go below 1844 or it won't close below 1862 level.*

*On last week Thursday and Friday S&P closed higher and finally settled at 1901 levels. Those who have been following our works for decades must know how important our astro support and resistance levels are. Last year also the lower side astro resistance was 1827, and the higher side 2088. Both these levels played a very important role for the market. So far the support level of 1821 played an important role on Wednesday and we are hopeful that S&P won't go below this level in the year 2016 and that the astro support and resistance levels continue playing an important role.*

*This is what we mentioned the 18<sup>th</sup> of Jan 2016: On Friday investors experienced a nightmare. It was day that no investor likes to see because on this kind of day the trading accounts of longer term investors are always deep in the red. In 2000 when the tech stocks crashed we never recommended*

*any buying to investors because the astro cycle was negative for two years and it was clear that the market may remain down for the next two years. In 2008 crash which we predicted, we were also aware that the market would rebound from the 26<sup>th</sup> of February 2009. We recommended that the market would bottom out on the 6<sup>th</sup> of March 2009 and that investors should start accumulating stocks keeping in mind that they have to hold them for five years and that they would make a fortune. We strongly recommended, not to focus on the daily volatility and keep busy accumulating quality stocks. This proved to be very accurate advice.*

This is what we mentioned on Monday, the 8<sup>th</sup> of August: Billions of dollars follow our predictions closely so some support always comes around our predicted levels. 12<sup>th</sup> February 2016, S&P moved more than 360 points rally which no one expected.

This is what we mentioned on the 29<sup>th</sup> of February: At this stage we are expecting that the Indian market will perform, so this is a great time for international investors to put money in the US market as Rupee is at a historic low and the market has already corrected 26% from higher levels. Brazil and China have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies because any turn around in **Brazilian Real can push BRZU toward \$39.00 from 9.30**. S&P closed above 1938 and if it closes above 1938 for more than two days then expect it to move towards 1988 during this week or next week.

Two weeks ago we predicted that 1864 is a great buying level with the first target of 1938 and 1988. The first target got achieved very quickly and the second target will get achieved soon and after that our most important astro resistance level will be 2088, which has played a crucial role in keeping the bull away to move above 2088 for the last 16 months.

### **Thirty Year Bond**

This is what we mentioned on the 10<sup>th</sup> of September: *Tuesday Thirty Year Bond gained value, and same indicating on Wednesday. Fed may leave rate decision sideline which can push bond toward 168/169. Rate hike may bring prices 162 level. Overall trend is negative so get ready to sell on any rise if FED refuse to hike.*

*In the last ten weeks' bond prices came down from 176 to 165 as predicted and our longer-term view is very negative so keep building sell positions on any rise.*

*By the end of this year we may see 162-25 and 157. Stay long in TTT, TBT and TMV.*

### **Energy:**

This is what we stated on Monday, the 17<sup>th</sup> of April: *ERX lost more 5% value and if ERX trade below \$30.00 then there are chances that it will test \$25.50 level which means oil prices will trade negative in coming time.*

*Once again oil will try to test \$54.78 but if this week it fails then we may see \$47.00 level once again. Major astro support point is \$49.88 level. RB Gas and HEATING OIL will follow oil.*

*On Monday oil prices will trade mix to negative but in USA trading one can take small buying, if oil fail to rise on Tuesday then expect major corrections in once again in coming time.*

*On Monday Natural gas will trade mix and prices will move both sides, trading in and out will remain best strategy in gas on Monday. Sell or short around \$3.38 level.*

*This is what we mentioned on the 8<sup>th</sup> of January - Natural gas went down sharply as predicted and tested \$3.16 from \$3.83, and the volatile trend will continue in GAS so trade carefully. Oil will only be able to move higher if it closes above \$54.78 for three days which we don't see happening.*

*Energy stocks traded mixed. ERX is unable to move above \$43.00 and oil above \$54.78 which is not a good sign for the energy market.*

We are not changing any of the predictions we mentioned on the 3<sup>rd</sup> of June: Same kind of positive, RB GAS and heating oil also moved higher. Natural gas traded mix. ERX have been hanging around \$29.00 level and it must close above \$33.00 level to give bullish signal in energy stocks which we don't see at this stage moment.

Oil has been failing to close above \$48.88 level but same time it is not closing below 48.88 level as well. If oil closes above \$48.88 for three days, then the next price level of \$52.55 may get achieved. At this stage some selling is recommended around \$48.88 level and on the down side the important level to buy is at \$44.55. Oil prices have gained almost 70% from \$27.71 which we called the perfect bottom for oil.

This is what we mentioned on the 2<sup>nd</sup> of February: Many are predicting oil remaining in the teen's, but we do not see oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will struggle to move above \$35.18 levels, and if it does than \$44.55 is next target with \$48.88 selling level.

Natural gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural gas around \$1.72 and below.

*This is what we mentioned in our book "2016 Financial Predictions" in oil's section:*

**IMPORTANT NOTE:** *As most of you are aware our view for energy has been very negative since June 2014. The overall trend in energy prices will remain negative so we do not recommend adopting long term positions. This means that do not take any trades earlier in the year and continue holding them for the rest of the year, because the higher side in oil will remain limited. There will be better opportunities to make money by trading in and out. Heating oil and RB gas will follow oils trend, so during this year we may see oil moving towards \$48.50 or \$52.95, and on the down side it may hold \$34.55. If it closes below \$35.55 for three days then there are chances that oil prices could fall towards \$29.65. Traders should take advantage of buying short term call options before any of the above-mentioned cycles start, and also book profit quickly before the positive cycles end.*

*Energy stocks will trade mixed without any major movement, so longer term investors should not be putting any money in energy stocks. Any sharp rise should be taken as a profit booking opportunity if you are holding any energy stocks.*

*Natural Gas' trend will remain positive during 2016, so one can stay long in Natural Gas in the year 2016. However, it is very important to remember to keep booking profit before any of the above mentioned negative cycles start. Overall, Natural Gas will outperform oil in the year 2016.*

*For short term strategies and price targets please follow our weekly and daily newsletters.*

### **Ninth Cycle:**

*From the 26th of November to 31st of December 2016 - During this cycle, we see positive momentum coming back in the energy markets; oil prices will form a bottom, and oil stocks will also act positively. Even though this is a positive cycle, the higher side will remain limited. Natural gas and RB gas will move sharply higher during this period.*

### **Energy trading ranges for 2016:**

**Crude Oil: \$52.95 to \$29.78** *(As predicted last year, oil may hold the \$30.00 level, and if it trades below that for five days, then there's a possibility that it could test 2002's low of the \$27.78 level)*

**Natural Gas: \$2.88 to \$1.82 (higher side \$3.57 if it cross \$2.88)**

Look at accuracy levels about oil that we predicted in the book.

*This is what we stated Monday, the 31<sup>st</sup> of Oct 2016: Friday oil, heating oil and RB Gas traded negative as predicted. Energy stocks also went down but gas traded mixed. On Monday, oil will trade negative; stay sidelined or those who are holding shorts can continue holding and cover some around \$47.50. If oil starts trading below this, then expect \$46.75 to \$44.88 level, cover all shorts at \$44.55 level. Heating oil and RB Gas will trade negative or will follow oil. On the higher side, oil will struggle to remain above \$49.88 level which is the most important astro resistance level.*

*Natural gas will trade on both sides without any clear directions so avoid trading but on the lower side one can buy GAS for Tuesday. Don't touch energy stocks as they will keep struggling.*

*This is what we mentioned on Friday, the 2<sup>nd</sup> of Sept 2016: On Thursday oil, heating oil and RB Gas prices went down sharply lower and weakness will continue Friday. One can cover 50 to 70% shorts around \$42.61 level in oil and 100% around \$41.78, so one can cover positions in heating oil and RB Gas on Friday.*

*This is what we mentioned Monday, the 21<sup>st</sup> of December 2015: Last week energy traders remained very nervous as they felt like abandoned by the bigger financial institutions and other large energy investors, but the truth is that every energy trader or investor is badly stuck energy trades.*

*In 2008 we predicted a crash in oil from \$145 and in 2009 we predicted that it had bottomed out at \$33.00 level. That prediction provided great returns those who invested in oil and energy stocks. Now once again after the prediction of oil falling in 2014, since the last two weeks we have been predicting that oil would form a bottom around \$34.55 level so watch this prediction closely. I am not saying that oil won't fall below \$34.55 level but surely those who will buy around this level may be rewarded handsomely.*

*Maximum fearful days: According to the current astro cycle we see another 12 volatile or fearful trading days are pending but the down side is limited.*

This is what we mentioned on the 27<sup>th</sup> of August 2015: *If oil trades below \$47.00 for two days then there are chances it could retest our magic support figure of \$44.55. If it starts trading below \$44.55 then next level \$38.50 so avoid buying positions.*

*We are not recommending any buying in heating oil and RB gas, also one should avoid buying any energy stocks.*

This is what we mentioned on the 27<sup>th</sup> of April 2015: *Adopt trading in and out strategy in energy, **but don't take any shorts in oil, heating oil or RB Gas. Sell some energy stocks.** Energy stocks will trade mixed without any major move so one can get ready to sell energy stocks. Higher side it is possibility that oil may see \$63.80 level, if its hold \$57.00 level. Keep adding positions in Natural gas around \$2.55.*

This is what we mentioned on the 5<sup>th</sup> of March 2015: *Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors. On Down side oil will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.*

*Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for oil is \$47.00. ERX won't be able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.*

This is what we mentioned on the 3<sup>rd</sup> of January 2015: ***On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating oil and natural gas lost value as well on Monday. Don't buy RB Gas and heating oil but surely natural gas can be bought around \$2.71.***

This is what we mentioned on the 23<sup>rd</sup> of December 2014: ***Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.***

This is what we mentioned on the 11<sup>th</sup> of December 2014: *Wednesday our fear proven very true, we strongly recommend to stay away from oil. When oil broke \$92.88 we recommended sell oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.*

This is what we mentioned on the 5<sup>th</sup> of December 2014: ***Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, oil, RB gas and heating oil. Natural gain gained value from the lower levels on Friday as predicted.***

***On Monday the higher side will remain limited, and if oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like oil is getting ready to break \$60.00 so stay short or add selling on any fall.***

Currencies:

This is what we stated on the 4<sup>th</sup> of January, 2017: We don't see dollar index going above 103.78 level so watch closely and closing below 102.55 will push dollar toward 101.55 level. Most of currencies gained nice value on Wednesday, emerging market currencies had best day. On Thursday, most of currencies will trade both sides, buying is recommended on lower sides in most of currencies so don't miss opportunity.

**Buy Pound, Yen, Australian dollar and Canadian dollar. Also buy Franc and Euro without fear.**

Astro cycle changed late today on 3<sup>rd</sup> January so safe buying in all major currencies against USD.

**Dollar closing below 102.75 will confirm that it would test the 101.55 level this week.**

We are not changing any predictions in currencies of what we mentioned on Monday, the 31<sup>st</sup> of October 2016: Once again tested 99.00 level but then sharply came down from the middle of the trading sessions. We are still recommending to keep building positions in USD around 99.00 level. On Monday, we still recommend buying Euro and other currencies around the lower side, or selling USD around the higher side level. On the down side USD may hold 96.71 level so watch this level closely. Euro can move up to 1.1111 level in this week, so book profit if it goes there.

On late Monday, the Scorpio Moon will bring both sides volatility. On Wednesday, the FED will announce decisions and due to the Scorpio Moon traders will get confused. Trade light or just trade in and out in currencies but medium term traders can hold selling positions in USD.

Stay short in Yen but one can cover Japanese Yen as it may move towards 0.9525 to 0.9250 level at this stage.

This is what we mentioned on Monday, the 29<sup>th</sup> of August 2016: We see Euro holding 1.1055 level and Pound 1.2925 level. We don't see it falling below 0.9410 level and on the higher side it will have a difficult time to move above 1.0198 level. For USD index 97.00 to 97.50 level will play the role of a Wall for dollar which dollar may not be able to breach at this stage, or maybe even for the next six weeks, and on the down side USD may test 92.50 level.

This is what we mentioned last Monday, the 25<sup>th</sup> of July 2016: This is what we mentioned on Wednesday, the 13<sup>th</sup> of July: Any rise shall be taken as selling opportunity in Yen, in the next two months we can 900 pips in Yen or it will easily come down to 0.9200 level very soon. We don't see Yen moving above 0.9878 level and in the worst case scenario 1.0000 will be maximum side.

Friday USD tested 97.50 level and this is an important level. Dollar may keep testing this level during this week. **We don't see Euro going below 1.0923 and Pound 1.2988 level.** Pound should be in your aggressive buying list until it holds this level.

On Monday, the 11<sup>th</sup> of April 2016 we stated: Last week USD traded negative, and lost value against most of currencies. There are still chances that USD may test 92.50 level so watch USD trend closely, and start taking positions at 92.50 level.

*Emerging market currencies have done very well and it's time to close positions if you are short or medium term traders. Rupee won't fall much so don't short Rupee but surely Rand, Real, Peso and Rubble will lose some value from middle of Monday.*

*Australian won't hold above \$0.7725, Canadian dollar 0.7900, Euro 1.1475, Franc 1.0555, and Yen 0.9288 level.*

*This is what we mentioned last Thursday: Pound is ready for 1.4123 mark. Sell Pound and add more Swiss Franc sell.*

*We are not recommending any new short in Euro, surely one can acquire some positions in Euro for the short period of time.*

*Emerging market currencies are getting ready to for bottoms expect few won't be trust like Rand and Rubble. Wednesday we see many currencies gaining some value but stay away from Pound, Canadian and Franc as they can keep making new lows so hold positions with 3% more corrections.*

*This is what we mentioned on the 22<sup>nd</sup> of December: Euro will struggle to move above 1.1075 and may hold value 1.0725 so watch these both levels closely.*

*This is what we mentioned on the 23<sup>rd</sup> of April 2015: The Medium and longer term trend is still very positive for USD but for the short term a mix to bit weaker trend indicated. USD Index have achieved our target of 100 and now down side 95.00 or at worst case 90.00 level will be great buying.*

***Dollar is our longer-term buying trade so we won't recommend shorting dollar, we recommend buying USD on any weakness. Euro higher side 300 pips and lower side more than 3000 pips. We don't see USD index going below 95.00 levels.***

*Remember this what we mentioned on the 5<sup>th</sup> of March 2015: Currency war has nothing to do with USD Friday USD gained value as predicted. Medium- and longer-term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.*

*Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.*

*This is what we mentioned on Monday, the 15<sup>th</sup> of Jan 2015: Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just finished one interview from Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell as it will going to go back to par levels.*

*This is we mentioned on the 2<sup>nd</sup> of October: On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.*

*Remember, this is what we mentioned in the month of July: At this stage USD is trading in a positive direction without any break since the last three weeks. Finally, it is reaching a most crucial level because once it breaks 81.78 then the nonstop upside journey will start in USD. Also euro falling below*

1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.

**This is what we mentioned in the month of May (2014): Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.**

*In this year's book "2015 financial predictions" we predicted the "final bear cycle in the market from the 27<sup>th</sup> of July to the 15<sup>th</sup> of August 2015". Yes, the Sun can bring some uncertainty, but take this uncertainty as a buying opportunity at the same time in 2015 in the month of August.*

Watch the 2088 level for S&P, as it is most tough astro resistance of 2015. In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

In our 2015 book we mentioned that commodities will have worst year of 2015, and so far precious metals, base metals, grains and softs have been struggling and they will keep moving down in the second half. Dollar will perform amazingly well in 2015 so hold positions and money in USD.

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
