## 6-10 May weekly newsletter

### Creating wealth require longer term planning...

Dear Members,

Today after mediating I decided to write this piece, and I strongly recommend after reading this first section of this weekly letter, you must mediate and plan how to take maximum advantage of our astro/wave of nature theory.

I have been advising for over three decades and have helped in creating wealth for many small-time investors and big boys globally. I always remain very silent about who my members and clients are because nature of my work.

If I review my own work, then I can say that on a short term basis I have been wrong a few times but our medium- and longer-term advice has created a great amount of wealth for those who follow our work seriously with 100% trust. During the last three decades I also received message from few people saying that they have lost money following my short-term advice. When I asked them how they lost? Most people answered that they went all in on a particular commodity or stock with aggressive bets which created loses and they were not able to hold positions because of leveraged trades.

I hope that none of you are betting on one commodity or stock because that is really dangerous if I am wrong on a short term basis. Today, I am writing a very important note about how you should plan to create wealth because our theory is so unique that no advisor or expert can come close to what we do. Nature really helped me provide insight and a vague picture of the future, and those vague pictures I portray always came very true in the longer term.

I have to be honest and I always try to be because honesty is a great tools to overcome from errors that I make in the short term. I never hide my errors and mistakes and that's the reason I have my track record over the last 30 years on website, I don't see anyone putting or keeping all the past records on their website or in documents.

Let's talk about how to create wealth from here onwards, as I already said that the next 20 years will be the most interesting ones for me and my theory. From 2020 the most amazing time cycle will start for our work, and some positivity has already started from the 8<sup>th</sup> of March 2019. My astro cycle has to been good because if I am going through a negative astro cycle then how can I advise you accurately!

I still remember **Michael** words of 2004, he said that 'Mahendra how did you call the market and technology to bottom out when everything looked very negative?' My answer was simple but, in my terms, because he didn't have knowledge of the astro-cycle/wave of nature theory. We used to walk every single day for the one and half hours after the market closed and used to talk about many things. We came close in 2002 once he saw that I was predicting a very bullish trend in gold and silver and eventually we both moved to Santa Barbara in 2004. I used to tell him that he should invest in other areas like technology, but he only

believed in gold, so he invested only in gold. In 2004 Apple become my favorite company when it was trading around **\$4.00**. and many other tech stocks become favorite. I saw a great crash

coming in the equity market 2007/8 and we recommended withdrawing every penny from the market and holding cash. Those who followed our advice got saved, but the important thing was that I recommended putting every penny back in the market in March 2009 as I saw a great era stating for stocks, and predicted S&P going towards 3200.

Simply if anyone followed that advice without trying to do fancy things, they must be sitting with an amount of unbelievable profit now. Wealth got created in multifold's. Many try to read too much into economic, fundamentals, and technicals because they don't have a vision, so they remain poor or under performer without creating great wealth over the longer period of time.

Let's see what great trades will come from here and for the next ten years which may create wealth for us:

Many great companies will create a great amount of wealth regardless of the short-term market behavior. I still recommend **Apple, AMZN, Google, NFLX, and TSLA**. Many new companies will take birth and will give shape to new world in which peoples lives will completely dependent on technology. How Apple changed people's lives by introducing a phone with apps and now world's news to banking, bookings, even trading, and any service can be obtained by an App on your phone. Before a phone was used only for calling and texting. I had a vision of this automated system in the world in the 1980's.

Electric car, autonomous, and artificial intelligence will be the key for the future and for all these we need super fast internet which will be the backbone of all future innovations. Each corner of this world has to have internet. Saturn and Mars are the most important planets to keep pushing technology to next level every day.

Now Saturn is moving though the house of Jupiter which is clearly supporting financials and technology companies. Next year Saturn will move into the house of Capricorn, which is its own house and this could give birth to new technology, great innovations in biotech will take the frontline, robot technology will play the most crucial role in the medical world.

Venus is not supporting social media stocks in the coming time. The era of social media ended so avoid investing in companies like Facebook. Twitter is adopting and is focusing more on news releasing platform rather than social like family and friend. Don't invest a single penny in FACEBOOK. After eight years a new social media platform will take birth which will be different from Facebook and Twitter.

Technology area is growing day by day, and valuations are increasing which will surely support Nasdaq and the USA market.

Banking and financials don't have a great future, only big names will survive in future. A tough time will start for financials from 2021. Either consolidation will take place or many companies will start to merge.

S&P tested higher side level of 2948 and lower side in the worst case scenario we may see 2848 level. The current astro cycles are positive for the market until mid-June so watch our lower side predicted level closely. Watch Thursday and Fridays trend closely as great buying opportunity will come. Overall Nasdaq has to move towards 10000 or above in the next one year and S&P will keep trading higher. The bull will rule the street as a lot of changes are coming the world and they are coming fast because of technology so bet on technology. In the next ten years many of these stocks can still rise 10 folds.

We will continue talking about the next ten years in the next weeks letter. Lets see what this week indicates from 6-10 May 2019:

### GOLD/SILVER/BASE METALS

Predictions”....

Last week metals performed negatively. On Friday, we saw a bounce back in precious metals. Metal stocks clearly struggled. We already mentioned that we don't see any major rally in either precious nor in base metals in 2019. April was a negative month and metals traded as predicted in this years book “2019 Financial

### INDEXES

Last week the markets gained value, NASDAQ closed at an all-time high and S&P went very close to an all-time high as well.

Energy stocks will trade negatively so sell ERX or buy bear ETF's like ERY....

### THIRTY YEAR BOND

I am not recommending any major trade in Thirty Year for the medium and longer term. No trading is recommended for the short term. If you are interested in day trading then you must subscribe to the daily flashnews.

For the medium term the trading range will be 137-00 to 151-00 for the next three months. Higher side selling is recommend in Bond, and start covering from 143-00.

This week...

## SOFT COMMODITIES

In the last four months most of softs traded negatively. We have been recommending buying some aggressively in...

## GRAINS

Last week grains prices stabilized on the lower side but grains are still in a bear market....

## ENERGY

Last week oil prices came down from the higher side as predicted. Heating oil and RB Gas also traded negatively. Energy stocks traded negatively and Natural remained in a mixed direction but held value on the lower side.

This week is a negative week for oil but Thursday cover some shorts in...

## CURRENCIES

Last week once again the wave of nature proved very accurate as dollar failed to hold value on the higher side as predicted. Dollar is hanging around the most crucial level of 97.18.

The next few weeks are crucial....

Thanks & God Bless

Mahendra Sharma

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
