Thursdays Daily Stock Report (Unedited report)

Volatility will dominate till 16 February, dollar will create more volatility for markets...

Dear Members,

On Wednesday Asian market closed in green, European market also remained positive but USA market witnessed profit booking and more selling come in tech stocks as predicted. There is no doubt that Tech stocks have achieved top, but still some positivity is pending so we won't recommend going short here.

As predicted major volatility will continue in all major markets till 16 February and after that positive trend will start so remained short term trader in all major markets and any sharp rise could be taken as selling opportunity and any sharp fall could be taken as buying opportunity.

On Thursday Scorpio Moon, which will bring volatility. Stay sideline is our advice in most of markets for Thursday and Friday.

We are recommending buying gold stocks and lithium stocks and metal mining stocks.

Stay away from Asian, European and USA markets

On Wednesday rise in interest rate was key topic in USA which pushed USD higher and Bond sharply lower. Few important things are happening as predicted:

Bond prices are close 143-00 level, since last two months month we kept recommended selling at 155-00. In fact, we have been recommending selling bond from 172-00 level.

Dollar Index held lower side 88.21 level very strongly as predicted and one most currencies reversed from higher predicted level.

Oil tested \$65.68 as predicted on higher sides, and now 61.38 level shall achieve on lower side as predicted, we also predicted that if oil close below \$61.38 then we may see \$57.88 level very quickly. Heating oil and RB Gas are falling as predicted.

Natural gas very close to \$2.63 level on lower predicted, we recommended selling at \$3.15.

ERX traded sharply lower from \$42.88 level as predicted, today it closed below \$30.00 level.

Gold struggling to close above \$1344 and \$1357 level, on lower side we it will hold \$1298 level.

Base metals started trading lower. Palladium prices came down from \$1139 to \$988 level very quickly.

UVXY tested \$34, our recommendations of book profit or closing positions around higher side done well.

Best trade from here: Read our book carefully to understand overall outlook of 2018

INDL traded sharply lower, we never expected this huge fall but this is life time opportunity to buy Indian market and **INDL** WITH TARGET OF \$155 TO \$188 THIS YEAR, it is one of the best longer-term trade exists.

Trade in and out in markets, metals, softs and grains. Stay away from energy stocks and oil. Buying is recommended in precious metals on lower side today and selling is recommended in base metals on higher sides.

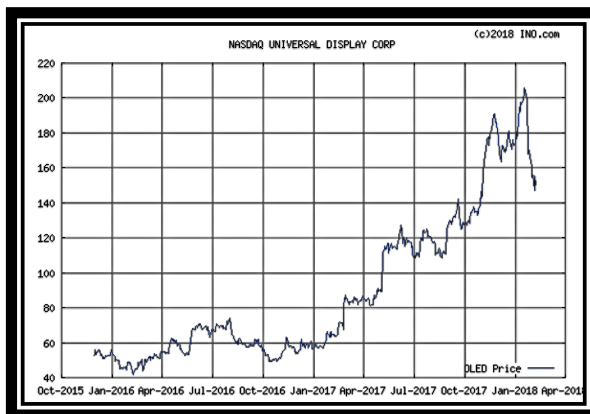

Dollar shall be in your buying on any weakness and one can cover Thirty Year bond around lower sides.

On Monday we stated that holding **BITCOIN** above \$7000 can push all these etfs and crypto related stocks higher and we witnessed in the last two trading sessions.

Holding \$7000 will push Bitcoin bit higher with other crypto related stocks and etf (GBTC, OTIV, DPW, TEUM and LFIN)

Our most favorite is **DPW**, this one is ready to move sharply higher. Keep accumulating this one on any weakness. We are holding positions in we will add more on weakness. This week **DPW** bounced back from \$1.07 to \$1.64 level as soon as bitcoin moved higher from lower level.

Apple and **Facebook**, are in trouble. Since late last years we recommended to stay away from both these stock, surely Apple is holding too much case which may earn them money due to rise in interest rate but growth will slow down.

Apple company are falling hard. They both are OLED screen developer. **OLED** and **COHR**. In the last three years traders have made money on our recommendations in these two stocks but stay away now, if anyone still holding then get out, you may get better time to re-enter. Today earning came okay but stocks fell, it move go toward \$150 level very quickly.

Last year when they launch **iPhone X**, I stated that they think people are fool, because they just make few changes to sell just one product and depend on one product is very danger for this company. Handset device will come become commodity and margin will go away. Two stocks which are most connected with

Now who game is changing, and it will be challenging time for Investors. Today tech stocks underperformed, and only tech dragged this market lower today which may be case in coming time or till 16 of February.

Now only selective tech stocks will move higher, most of 80% tech stocks will struggled like Biotech. In 2015 we recommended getting out from hot biotech sectors and since then they have been falling. In the last two years market went sharply higher but biotech underperformed and this might be the case for tech stocks from here onward.

Investors and hedge fund must be very careful now to choose the sector to enter. At this stage our most favorite sector is **Lithium and precious** metals mining stocks.

Remove your bets from tech, industrial, defense and high growth stocks, now time put that money in mining stocks.

Hold 20% positions in **UVXY**, close 80% long around \$34.00 level.

It looks like that our stock report will be fun from here.

Thursdays astro combination recommendation – Buy positions in most of Indexes around lower side on Thursday.

Thursday's trading ranges: (March 2018 Contracts)

HONG KONG (cash) – 30495 to 30035

6 February 2018, 3.30 PM, Santa Barbara

This is what we predicted on 19 September - *We are still recommending to hold positions in **GTT, MXL, ORBC, BLDR, IPHI and MCHP**, we recommend to hold positions in these stocks. (discloser – we are holding positions in these stocks).*

*Chinese stocks are doing well, **YINN (3X Shanghai Index)** should be in your list of buying, and ADR's **NTES, MOMO, YY, EGRX, and BABA** will keep moving higher, and big rally shall start from middle of October. We recommend **WUBA** many time, if you don't have in your portfolio then must add **WUBA**.*

Recommended on 15 Feb 2016: *Important note - **We are expecting MARCH TO JUNE 2016 a major bull cycle in equity market which may put all major global market on extreme upward trend. USA market shall keep making new higher during this cycle.***

This is what we mentioned 15 April 2015: *As we said, our most favorite stocks just buy and keep it on the side until the bull market is there; and this bull market is still to remain for the next two years. **In 1995/96 I bought Satyam computer at Rs. 15 (sold in early 2000 before tech crash at 5900.00), SSI at Rs. 29 (I sold it at 11230.00) and Mastek Rs. 210 (sold at 5900) & BFL Software at Rs. 55 (sold at Rs. 980).** In 1995/96 I saw a historic bull market coming in tech and internet stocks, I also predicted that there will be a rush to buy these stocks and they could move thousands of percent and that happened by 2000. This was the first fortune I made from nothing.*

Make wave of nature/astronomical cycle an integral part of your trading/Investment strategies!

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
