7 January 2021

It looks like money is pouring on investors if they are holding the right stocks... Nature has provided us with the most beautiful recommendations and finally our target of S&P hitting 3800 was achieved... Thank you Wave of Nature and thank you Astro cycle's...

Dear Members,

This is the first time I have seen money is pouring on investors like rain if they are holding our recommended stocks in the working from home and clean energy sectors. I haven't seen something like this before in my predicting career of over thirty-five years. Yes, I was part of the journey during the Internet stock bubble in 1999, but 2020 remained remarkable because every investor made money if they believed in our predictions. Look at TSLA, PLUG, and many other clean energy stocks; and all the working from home stocks, which provided mind-boggling returns in 2020.

S&P finally achieved our target of 3800, and I don't think anyone on Wall-street predicted that S&P would go to this level in March 2020 when it was trading at 2200. I surely think that I deserve a small "Thank you" note from you (I am just kidding). It is my job to give you accurate guidance as you pay for our service, and I am not doing you any favor. Thank you all for your support over the two decades, and for trusting our work over three decades.

Also, one more of our most awaited prediction of DOW going towards 32000 is ready to get fulfilled. On the 26th of Feb 2009, when Dow was at 6725, we predicted a turnaround from 5 March 2009, and that the bullish trend would take Dow to 32000. This was during an amazing interview with Jack on CNBC, it is on the homepage of our website, so if

you haven't listened to it yet, then just click the play button.

Now I avoid giving interviews, and I like to remain isolated. Surely, I have a few friends who I like spending time with, and I enjoy spending time in nature and with myself.

In 2020, a few predictions were wrong, and they were the fall in Palladium, and the rise in Coffee. Yes, the vaccine came as predicted, but we are still in a lockdown situation.

Also one more most awaited prediction of DOW going toward 32000 is ready to fulfill. On 26 Feb 2009, when Dow was at 6725, we predicted to turn around from 5 March 2009, and bull trend journey would take this down to 32000. This was amazingly interview with Jack of CNBC, it is on our website home page, if you haven't listened yet then just click play button.

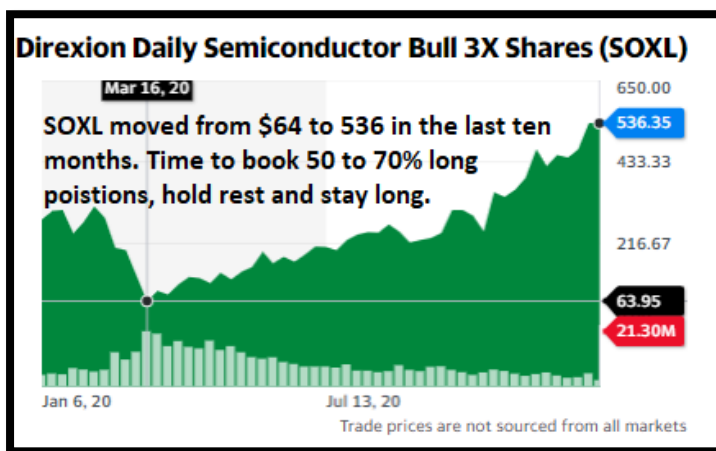

Now I avoid giving interviews, I like to remain isolated, surely I have few friends and I enjoy spending time with nature and within me. I humbly bow to nature and astro cycle to helping us to guide you.

In 2020, few predictions came wrong and they were, fall in Palladium and rise in coffee. We predicted world will able to spend time with their love once but

it didn't happened, yes Vaccine came as predicted but we are still in lockdown situations.

Oil prices are close to our higher side level, dollar index is so far holding our predicted level 89.25, every currency expert in Wall-street to long to Japan are negative about USD, but we are not from this current level so lets watch this predictions. In 2020 we predicted top in USD index around 103.00 level and we recommended closing all long, that proven great advice.

Our favorite recommended etfs like **SOXL, LABU, FAS, ARKK, TECH, TAN,** and list goes on are on fire, time to close at least book 50 to 70% profit in your long positions in

these etfs.

This year so far **TSLA, PLUG, LVGO, FCEL, BLDP** and many other recommended stocks performed amazingly well. Since our recommendations TESLA gained 3000% and PLUG 1200%. The day I recommended

buying PLUG at \$4.00, I stated in letter that I told my children to buy PLUG at \$4.00.

Lithium, cobalt, graphite and Nickel stocks started acting very well, they are on fire and journey just started, they will move higher, great time to bet. Stay long in our recommended stocks of clean energy stocks. **SPWR, SOL, PLUG, CPST, BLDP, FCEL, DQ**, and many stocks in clean energy are moving aggressively higher.

8th January 2021, 03.00 AM, PST

This is what we mentioned 15 April 2015: *As we said, our most favorite stocks just buy and keep it on the side until the bull market is there; and this bull market is still to remain for the next two years. In 1995/96 when I was Africa, I invested in Satyam computer at Rs. 15 (sold in early 2000 before tech crash at 5900.00), SSI at Rs. 29 (I sold it at 11230.00) and Mastek Rs. 210 (sold at 5900) & BFL Software at Rs. 55 (sold at Rs. 980). In 1995/96 I saw a historic bull market coming in tech and internet stocks, I also predicted that there will be a rush to buy these stocks and they could move thousands of percent and that happened by 2000. This was the first fortune I made from nothing.*

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
