8-12 April weekly newsletter

This week will remain mix for currencies, S&P closed above 2881 astro level...

Dear Members,

Last week the markets performed very well, S&P finally achieved our most important astro support level of 2881 and closed above this level. In the current rally the European and emerging markets are also walking along with the US markets.

On the other hand commodities struggled but held value around the lower side. Currencies traded directionless but many of the emerging market currencies acted far better.

Many Wall-street big guys are betting on rates remaining at current levels for more than a year, but I don't expect that as the FED may make comments on the hikes in the third quarter of 2019.

Last week we talked about Jupiter's transit and its impact on our behavior pattern. I love talking about this subject and I always do that, and many of our readers also love the first part of our letter. Let me come back to our behavior pattern because it plays the most powerful role in shaping our life. Astrologically it is very complex to understand the behavior of any individual, but one can come very close to analyzing it if any astro cycle reader watches the Moon, Mercury, Jupiter, and Sun combinations.

There are many different ways of being successful in the financial markets, like short-term trading, many are successful in the medium term, and many in the longer. The path to success is different for everyone. If Mr. X is successful in a certain type of trading, it doesn't mean that Mr. Y will get the same kind of success, even if he walks on the same path of A. Many are successful in commodities, many in currencies, and many in stocks. Everyone's luck is in a different place. Also many people come closer or get associated with you, and they can either bring you good or bad luck, and if you watch your life closely you can analyze this very easily.

Everyone starts trading or investing in the market to make money or become success, but the end results are not the same, in fact for everyone's end results are different. Thirty-three years ago when I started combining my theory with the markets movements it took me a long time to match them, but at the same time I realized that one's individual luck plays the most powerful role in determining how much we gain, what we gain, and when we gain. This is all decided by the current astro cycles in an individuals time cycle.

If you are lucky then the opportunity to create wealth is limitless in this market. I know it is a very complex subject because many of you don't understand the astro cycle, and how to read the luck cycle. Last month when the North-Node changed its house, we stated that the next 18 months will

be the most interesting period for high risk takers and speculators because the North Node represents that.

Last week Jupiter changed for the short term and we stated that spiritual awareness will benefit decision making. In 2005/6 I walked away from one of the most fantastic deals offered by ABN AMRO bank. They want to me manage money for them but at the last minute I decided not to start a hedge fund with ABN AMRO, because they wanted me not to write letters.

Basically, the purpose behind writing today's section is you should remain aware, and remain connected with nature and always watch cycles your own closely, always watch the people around you closely. Ignorance could lead us on a negative path and regretting won't be enough because we have a very short life and important time have already done. **Nature brought us to this planet, and nature is closely watching how we are managing our lives in this one life time. This task has been provided by the nature, and if you respect this most beautiful task then you won't hurt anyone and will keep doing beautiful things.**

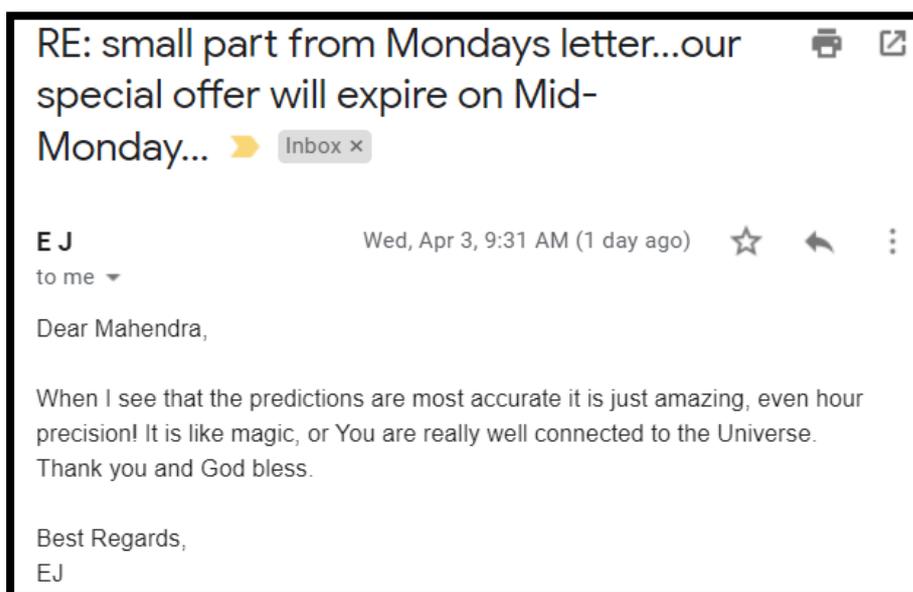

Let me get back to the market because most of you subscribe to our letter to know what is going to happen in the markets, commodities, currencies, and the other financial areas.

I will recommend staying invested with some hedging positions. Earnings season is starting from this week and it will be interesting to watch because first the banks will start announcing earnings, and then Tech stocks, and both these sectors play the most important role in guiding the market directions.

On the other hand USA/China trade deal is around the corner, and so many are waiting for the outcome. It looks like we may see a deal happening by the end of April, and if it doesn't happen by the end of April, then the deal will collapse, so shall remain aware about this.

So far investors are enjoying and having fun in Cannabis stocks, as these stocks are moving higher, and they have to as the North node is in full support of this sector.

Most of Cannabis stocks are doing extremely well, stocks like **IIPR, EXDI, EMBI, HLI, BMMJ** and many other performed very well. Cannabis stocks are doing very well, this month's letter will be out soon this week.

Yesterday I received nice note from one of our great followers which really used kind words for our work, I felt very touched and decided to share with you:

Let's talk about this week's weekly newsletter from 8-12 April:

GOLD/SILVER/BASE METALS

Last week precious metals remained in a mixed to narrow range and we expected that. Base metals struggled but Palladium moved on both sides aggressively, it was a good trading opportunity. Platinum outperformed most of the metals and it is our favorite metal at this stage but one can book some profit this week around \$935.

This week looks mixed to a bit negative for base metals from Tuesday so one can get out from long positions around the higher side on Monday and take some shorts in base metals on Tuesday. From Tuesday to Friday sell some positions around the higher side on a daily basis and buy back around the lower side. This should provide you with good profit. Follow our daily flashnews for the daily ranges. This

week from Tuesday copper, Zinc, and nickel will trade negatively. Our recommended hedging trade selling palladium and buying platinum have really done amazingly well, we are still recommending holding positions in both side hedging trade and I am sure you will make tones of money in coming time.

Precious metals will also trade mixed to a bit uncertain, I am not recommending any positions for this week so trade in and out. On Monday the astro combinations are positive and this positivity will continue till Mid-Tuesday.

Friday will be one of the best days to acquire some serious positions in Gold, Silver, and Platinum because from this Friday a strong positive momentum will start in precious metals.

Gold is holding \$1281, and silver \$14.75 which is great news. Platinum may not go below \$873 so watch this closely. On the higher side gold will hold \$1317.

Overall our advice is to avoid base metals. Copper is a good sell at \$295 and palladium \$1388.

Get ready to take some serious positions in precious metal stocks or ETF's on Friday.

Monday's astro combination recommendation – Sell base metals and buy precious metals will remain in positive directions on Monday.

Monday's trading range: **(May 2019 future contract):**

GOLD: \$1301.50 to \$1290.50 June (Spot ranges \$1300.00 to \$1289.00)

SILVER: \$15.21 TO \$14.97 (Spot ranges \$15.20 to \$14.95)

COPPER: \$292.05 TO \$287.90

PALLADIUM: \$1361.00 TO \$1325.00

PLATINUM: \$917.00 TO \$892.00 July 19

INDEXES

Last week we saw a positive trend in the markets. We recommended booking some profit around 2881 as it is a very important level, but we didn't recommend any shorts and we are still not recommending any shorts in the market.

If S&P remains above 2881 for five days than we may see all time new highs in most of the Indexes so keep this in mind. Banks and tech stocks will start announcing earnings and future guidance.

This week the astro combinations are showing mixed to positive combinations. Last week Tuesday was most an important astro day and the market acted mixed which is a great sign. This week Tuesday will be watched closely, as I would love to see the market closing higher on Tuesday.

If S&P closes above 2881 for five to seven days, then we shall expect 3188 before the end of June this year.

I strongly recommend booking profit around the higher side, don't short the market but keep adding longs by buying call options. You can take small hedging by buying either small put options or UVXY.

This week the astro combinations will support most of the markets on Monday.

Tuesday will be a mixed day as I am tracking Tuesdays closely for the last two weeks and Mars is not providing a clear guidance.

On Wednesday a mixed trend will continue, but on Thursday and Friday the market will move higher so trade according.

USA, emerging, and European markets will hold value. Emerging markets will underperform compared to the US and European markets.

Next higher side level for S&P will be 2921 and if it closes above this level for five or seven days it will open the door for the bull to enter Wall-street by pushing the market to an all time high.

Monday's astro combination recommendation: Trade in and out, watch 2881 level closely, at this stage S&P has room to move another 30 points higher.

Monday's trading ranges: **(June 2019 Contracts)**

HONG KONG (cash) –30238 to 29932

NIFTY S&P (Spot) – 11711 TO 11639

NIKKEI – 21975 to 21795

CAC – 5368 TO 5335

DAX – 12111 TO 12016

DEX EURO STOXX – 3393 – 3359

FTSE – 7445 TO 7261

DOW e-mini – 26505 TO 26368

S&P e-mini – 2903.00 TO 2890.00

NASDAQ 100 e-mini – 7642 TO 7578

RUSSELL e-mini – 1592.00 TO 1580.00

THIRTY YEAR BOND

Last week Bond prices moved in the mix directions. We are recommending buying bond around 147-00 level with target of 151-00 level.

Monday higher side selling is recommended in Thirty Year bond.

Tuesday Bond market will remain in mix directions.

Wednesday we recommend buying Thirty Year and

hold long on Thursday and Friday.

Bond prices for the medium term will trade in and ax ranges of 145-00 to 153-00 so keep this in mind.

No major trading recommended in bond etfs, and bond. It was life time opportunity of making money is gone when it at above 170-00 level, we recommended selling with target of 143-00 to 137-00 level and both prices got achieved.

Mondays astro combination recommendation – Trade in and out.

Monday's trading range **(June 2019 contract):**

TREASURY BOND – 148-09 TO 147.11

SOFT COMMODITIES

Last week softs traded mix, cotton and cocoa held value. Coffee recovered and lost value again. Sugar remained in the mix directions. Lumber and orange traded negative as predicted.

Last week we stated that it is life time opportunity to buy coffee below \$96.25 and I still believe that though bears will try to push it lower but now it won't work so keep acquiring coffee without fear. Mega bull run is on the

way, you don't need anything else to know. It may not be able to catch it once it starts moving higher because it is human nature not to go 20% higher once they see the lower prices. Last year how many traders bought **Chipotle** at \$250 when I came out with strong recommendations, I recommended again at \$300, but people thought they lost boat, but now in year it went to \$700. Buy coffee without fear, it is going toward \$147.

Cotton is holding as predicted, it will keep moving higher so stay long this week. Book some profit at \$82.81 level and lower side it will hold \$77.71 and \$75.75.

Cocoa moved 15% higher in the last ten days, book some profit at around this level.

Sugar traded mix, buy keep acquire positions below \$12.41 level.

Avoid lumber and orange Juice as they will keep moving lower.

Monday softs will trade mix. Tuesday is important and I see positive trend. Wednesday prices may move higher. Thursday and Friday we see mix trend.

Monday astro combination recommendations – Follow our ranges to trade in and out. Add more coffee and Sugar and hold long in cocoa and cotton.

Monday's trading range: (May 2019 Contract)

COFFEE: \$95.25 TO \$92.55

COTTON: 79.17 TO 77.79

SUGAR: \$12.92 TO \$12.56

COCOA: 2438 TO 2383

LUMBER: 353.04 TO 347.95

ORANGE JUICE: 119.00 TO 115.44

GRAINS

Last week grains still traded mix, this week one should just trade in and out in grains without taking any side major positions because next week Wednesday new astro cycle is starting for grains so just trade in and out in grains this week on daily basis.

Follow our daily ranges closely from daily flashnews to trade in and out.

Avoid soy meal and soy.

This week wheat will act far better than soy and corn.

Still remember Buy Wheat at \$443, Soy \$883, and Corn \$353; as we don't see prices going below this level. The higher side for Soy is \$975, Wheat \$557, and Corn \$398 by the end of April or mid May.

This week from 11 April we see grains recovery, Monday to Wednesday mix trend. Thursday and Friday some actions will come back in grains due to some positive news.

Monday astro combination recommendations – Trade in and out during this week.

Monday's trading range (May future 2019 contracts):

CORN: \$365.00 TO \$360.00

WHEAT: \$470.00 TO \$462.00

SOY: \$905.00 TO \$894.00

SOY MEAL: \$310.80 TO \$305.30

SOY OIL: \$29.39 TO \$28.80

ENERGY

Last week energy prices remained in the mix to positive trading pattern. We may see \$65.38 to \$65.88 level in the next two weeks, but still you have to remember that higher side looks very limited for market in the medium and longer term.

Energy stocks are in mix trading pattern.

Sun will be changing house on 15 April which may play major role for Natural gas, but major upside cycle will be in July in natural gas because prices may rise 50% so wait. Yes, short term traders can keep taking long around \$2.62 level.

On Monday oil prices will move higher. Tuesday once again will remain very crucial day for oil, if prices moves higher then oil may remain in short term upward trend.

On Wednesday Higher side we are strong recommend selling oil on higher side for the day trading propose.

On Thursday and Friday oil market may gain value.

Note: Oil have been trading above \$60.68 level for the more than five trading days so don't any new positions in oil, on weakness or loser side one must cover positions and only sell around \$65.68 level.

Avoid buying energy stocks.

Monday astro combination recommendations for oil – Buying natural gas, trade in and out in oil but don't short new positions.

Monday's trading range (May 2019 contracts):

OIL: \$63.88 to \$62.03

NATURAL GAS: \$2.70 to \$2.62

HEATING OIL: \$2.0661 TO 2.0135

RB GAS: \$1.9905 TO \$1.9405

CURRENCIES

Last week dollar acted well, without losing value. Now dollar Index is trading around 97.18 level, it is most important level for currency traders as currency market traders must watch closely. We still strongly believe that dollar will have very tough time to remain above 97.18 level but it remain above this level for the five days then surely some volatility can occur in currency market but at this stage we don't see.

Emerging market currencies performed very well, expect Rupee struggled to put performance due to RBI cutting Repo rate by 25 basis points. Real, peso and Rand performed well. On other hand Pound lost value and rest of currencies also lost some value but Australian dollar performed well.

On Monday we are still recommend to stay with Australian dollar, emerging market currencies will trade and frontline currencies like Euro, Pound and Yen will struggle.

On Tuesday we may see dollar still holding value, trading in and out in the most of currencies.

On Wednesday we see dollar start losing value from the middle of trading sessions so great time buying Australian dollar, Euro and Franc. Avoid Pound, Yen and emerging market currencies.

On Thursday we see may dollar losing more value but in the last hour of trading in USA once again dollar will gain some value from the lower sides.

On Friday dollar will gain small value in Asian and European markets but in the USA market it will value sharply from the mid-day.

Important note: If I am reading planetary movement correctly then we may see dollar toping out this week and may start trading lower from next week so keep this in mind.

Many currencies are close to bottom, Pound, euro and Australian dollar maximum 1% lower from current value and higher side 3% is pending and that will start from next week.

Emerging market currencies trend will remain mix this week but from next week positive time will start.

Monday astro combination recommendation – Trade in and out in most of currencies during this week because I want Sun to change house before you place any aggressive trades.

Monday's trading range: (June 2019 future Contract)

DOLLAR INDEX – 97.23 to 96.65 March Future

AUSTRALIAN DOLLAR – 0.7143 to 0.7089 (Spot 0.7129 to 0.7080)

CANADIAN DOLLAR – 0.7502 to 0.7457 (Spot 0.7490 to 0.7445)

BRITISH POUND – 1.3137 to 1.3031 (Spot – 1.3096 to 1.2987)

EURO – 1.1311 to 1.1241 (Spot – 1.1241 to 1.1171)

JAPANESE YEN – 0.9013 to 0.8973 (Spot 0.8963 to 0.8930)

SWISS FRANC – 1.0100 to 1.0045 (Spot 1.0030 to 0.9977)

USD/Japanese Yen - (Spot – 111.99 to 111.41)

USD/Franc - (Spot) – 1.0019 to 0.9975

New Zealand Dollar (Spot) – 0.6761 to 0.6702

USD/RUPEE – 69.41 to 68.91 (Spot)

USD/RAND – 14.14 to 14.01 (Spot)

USD/REAL – 3.88 to 3.85 (Spot)

USD/PESO – 19.23 to 19.09 (Spot)

Thanks & God Bless

Mahendra Sharma

7th March 2019, 03:00 PM,

This is what we stated: *From the 7th of May 2018, fall predicted from \$1355, we targeted price \$1209 to \$1182. October 2018, we called bottom out for the short term.*

In the months of Jan to March 2018 Short recommended in Copper at \$330, Zinc 3355, Lead and Nickel. We predicted 20% to 30% or more correction in these base metals.

Small part from past Flashnews:

Remember this what we stated on the 22nd of September 2016: ***Gold will struggle to move above \$1348 and silver \$20.28; these are the selling levels in both these precious metals but remain as a day trader for this week.***

This is what we mentioned on the 11th of August 2016: ***Higher side in gold can rise maximum \$15 from current level of \$1348 and lower side more than \$300 by end of February 2017. Sell more NUGT around \$178 and JNUG around \$320; these levels were the previous highs last month. Add more buying in DUST.***

From stock market sections:

INDEXES:

This is what we mentioned on Tuesday, the 25th of January 2016: *Tuesday will be a great time to acquire positions in the emerging markets as well as in the European markets. If what we are seeing happens then S&P should move towards 1936 or even higher and down side, it won't go below 1844 or it won't close below 1862 level.*

On last week Thursday and Friday S&P closed higher and finally settled at 1901 levels. Those who have been following our works for decades must know how important our astro support and resistance levels are. Last year also the lower side astro resistance was 1827, and the higher side 2088. Both these levels played a very important role for the market. So far the support level of 1821 played an important role on Wednesday and we are hopeful that S&P won't go below this level in the year 2016 and that the astro support and resistance levels continue playing an important role.

This is what we mentioned the 18th of Jan 2016: *On Friday investors experienced a nightmare. It was day that no investor likes to see because on this kind of day the trading accounts of longer term investors are always deep in the red. In 2000 when the tech stocks crashed we never recommended any buying to investors because the astro cycle was negative for two years and it was clear that the market may remain down for the next two years. In 2008 crash which we predicted, we were also aware that the market would rebound from the 26th of February 2009. We recommended that the market would bottom out on the 6th of March 2009 and that investors should start accumulating stocks keeping in mind that they have to hold them for five years and that they would make a fortune. We strongly recommended, not to focus on the daily volatility and keep busy accumulating quality stocks. This proved to be very accurate advice.*

This is what we mentioned on Monday, the 8th of August: Billions of dollars follow our predictions closely so some support always comes around our predicted levels. 12th February 2016, S&P moved more than 360 points rally which no one expected.

This is what we mentioned on the 29th of February: At this stage we are expecting that the Indian market will perform, so this is a great time for international investors to put money in the US market as Rupee is at a historic low and the market has already corrected 26% from higher levels. Brazil and China have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies because any turn around in **Brazilian Real can push BRZU toward \$39.00 from 9.30**. S&P closed above 1938 and if it closes above 1938 for more than two days then expect it to move towards 1988 during this week or next week.

Two weeks ago we predicted that 1864 is a great buying level with the first target of 1938 and 1988. The first target got achieved very quickly and the second target will get achieved soon and after that our most important astro resistance level will be 2088, which has played a crucial role in keeping the bull away to move above 2088 for the last 16 months.

Thirty Year Bond

This is what we mentioned on the 10th of September: *Tuesday Thirty Year Bond gained value, and same indicating on Wednesday. Fed may leave rate decision sideline which can push bond toward 168/169. Rate hike may bring prices 162 level. Overall trend is negative so get ready to sell on any rise if FED refuse to hike.*

In the last ten weeks' bond prices came down from 176 to 165 as predicted and our longer-term view is very negative so keep building sell positions on any rise.

By the end of this year we may see 162-25 and 157. Stay long in TTT, TBT and TMV.

Energy:

This is what we stated on Monday, the 17th of April: *ERX lost more 5% value and if ERX trade below \$30.00 then there are chances that it will test \$25.50 level which means oil prices will trade negative in coming time.*

Once again oil will try to test \$54.78 but if this week it fails then we may see \$47.00 level once again. Major astro support point is \$49.88 level. RB Gas and HEATING OIL will follow oil.

On Monday oil prices will trade mix to negative but in USA trading one can take small buying, if oil fail to rise on Tuesday then expect major corrections in once again in coming time.

On Monday Natural gas will trade mix and prices will move both sides, trading in and out will remain best strategy in gas on Monday. Sell or short around \$3.38 level.

This is what we mentioned on the 8th of January - Natural gas went down sharply as predicted and tested \$3.16 from \$3.83, and the volatile trend will continue in GAS so trade carefully. Oil will only be able to move higher if it closes above \$54.78 for three days which we don't see happening.

Energy stocks traded mixed. ERX is unable to move above \$43.00 and oil above \$54.78 which is not a good sign for the energy market.

We are not changing any of the predictions we mentioned on the 3rd of June: Same kind of positive, RB GAS and heating oil also moved higher. Natural gas traded mix. ERX have been hanging around \$29.00 level and it must close above \$33.00 level to give bullish signal in energy stocks which we don't see at this stage moment.

Oil has been failing to close above \$48.88 level but same time it is not closing below 48.88 level as well. If oil closes above \$48.88 for three days, then the next price level of \$52.55 may get achieved. At this stage some selling is recommended around \$48.88 level and on the down side the important level to buy is at \$44.55. Oil prices have gained almost 70% from \$27.71 which we called the perfect bottom for oil.

This is what we mentioned on the 2nd of February: Many are predicting oil remaining in the teen's, but we do not see oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will struggle to move above \$35.18 levels, and if it does than \$44.55 is next target with \$48.88 selling level.

Natural gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural gas around \$1.72 and below.

This is what we mentioned in our book "2016 Financial Predictions" in oil's section:

IMPORTANT NOTE: *As most of you are aware our view for energy has been very negative since June 2014. The overall trend in energy prices will remain negative so we do not recommend adopting long term positions. This means that do not take any trades earlier in*

the year and continue holding them for the rest of the year, because the higher side in oil will remain limited. There will be better opportunities to make money by trading in and out. Heating oil and RB gas will follow oils trend, so during this year we may see oil moving towards \$48.50 or \$52.95, and on the down side it may hold \$34.55. If it closes below \$35.55 for three days then there are chances that oil prices could fall towards \$29.65. Traders should take advantage of buying short term call options before any of the above-mentioned cycles start, and also book profit quickly before the positive cycles end.

Energy stocks will trade mixed without any major movement, so longer term investors should not be putting any money in energy stocks. Any sharp rise should be taken as a profit booking opportunity if you are holding any energy stocks.

Natural Gas' trend will remain positive during 2016, so one can stay long in Natural Gas in the year 2016. However, it is very important to remember to keep booking profit before any of the above mentioned negative cycles start. Overall, Natural Gas will outperform oil in the year 2016.

For short term strategies and price targets please follow our weekly and daily newsletters.

Ninth Cycle:

From the **26th of November to 31st of December 2016** - During this cycle, we see positive momentum coming back in the energy markets; oil prices will form a bottom, and oil stocks will also act positively. Even though this is a positive cycle, the higher side will remain limited. Natural gas and RB gas will move sharply higher during this period.

Energy trading ranges for 2016:

Crude Oil: \$52.95 to \$29.78 (As predicted last year, oil may hold the \$30.00 level, and if it trades below that for five days, then there's a possibility that it could test 2002's low of the \$27.78 level)

Natural Gas: \$2.88 to \$1.82 (higher side \$3.57 if it cross \$2.88)

Look at accuracy levels about oil that we predicted in the book.

This is what we stated Monday, the 31st of Oct 2016: *Friday oil, heating oil and RB Gas traded negative as predicted. Energy stocks also went down but gas traded mixed. On Monday, oil will trade negative; stay sidelined or those who are holding shorts can continue holding and cover some around \$47.50. If oil starts trading below this, then expect \$46.75 to \$44.88 level, cover all shorts at \$44.55 level. Heating oil and RB Gas will trade negative or will follow oil.*

On the higher side, oil will struggle to remain above \$49.88 level which is the most important astro resistance level.

Natural gas will trade on both sides without any clear directions so avoid trading but on the lower side one can buy GAS for Tuesday. Don't touch energy stocks as they will keep struggling.

This is what we mentioned on Friday, the 2nd of Sept 2016: On Thursday oil, heating oil and RB Gas prices went down sharply lower and weakness will continue Friday. One can cover 50 to 70% shorts around \$42.61 level in oil and 100% around \$41.78, so one can cover positions in heating oil and RB Gas on Friday.

This is what we mentioned Monday, the 21st of December 2015: Last week energy traders remained very nervous as they felt like abandoned by the bigger financial institutions and other large energy investors, but the truth is that every energy trader or investor is badly stuck energy trades.

In 2008 we predicted a crash in oil from \$145 and in 2009 we predicted that it had bottomed out at \$33.00 level. That prediction provided great returns those who invested in oil and energy stocks. Now once again after the prediction of oil falling in 2014, since the last two weeks we have been predicting that oil would form a bottom around \$34.55 level so watch this prediction closely. I am not saying that oil won't fall below \$34.55 level but surely those who will buy around this level may be rewarded handsomely.

Maximum fearful days: According to the current astro cycle we see another 12 volatile or fearful trading days are pending but the down side is limited.

This is what we mentioned on the 27th of August 2015: If oil trades below \$47.00 for two days then there are chances it could retest our magic support figure of \$44.55. If it starts trading below \$44.55 then next level \$38.50 so avoid buying positions.

We are not recommending any buying in heating oil and RB gas, also one should avoid buying any energy stocks.

*This is what we mentioned on the 27th of April 2015: Adopt trading in and out strategy in energy, **but don't take any shorts in oil, heating oil or RB Gas. Sell some energy stocks.** Energy stocks will trade mixed without any major move so one can get ready to sell energy stocks. Higher side it is possibility that oil may see \$63.80 level, if its hold \$57.00 level. Keep adding positions in Natural gas around \$2.55.*

This is what we mentioned on the 5th of March 2015: Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors. On Down side oil

will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.

Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for oil is \$47.00. ERX won't be able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.

This is what we mentioned on the 3rd of January 2015: ***On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating oil and natural gas lost value as well on Monday. Don't buy RB Gas and heating oil but surely natural gas can be bought around \$2.71.***

This is what we mentioned on the 23rd of December 2014: ***Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.***

This is what we mentioned on the 11th of December 2014: ***Wednesday our fear proven very true, we strongly recommend to stay away from oil. When oil broke \$92.88 we recommended sell oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.***

This is what we mentioned on the 5th of December 2014: ***Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, oil, RB gas and heating oil. Natural gas gained value from the lower levels on Friday as predicted.***

On Monday the higher side will remain limited, and if oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like oil is getting ready to break \$60.00 so stay short or add selling on any fall.

Currencies:

This is what we stated on the 4th of January, 2017: We don't see dollar index going above 103.78 level so watch closely and closing below 102.55 will push dollar toward 101.55 level. Most of currencies gained nice value on Wednesday, emerging market currencies had best day. On Thursday, most of currencies will trade both sides, buying is recommended on lower

sides in most of currencies so don't miss opportunity.

Buy Pound, Yen, Australian dollar and Canadian dollar. Also buy Franc and Euro without fear.

Astro cycle changed late today on 3rd January so safe buying in all major currencies against USD.

Dollar closing below 102.75 will confirm that it would test the 101.55 level this week.

We are not changing any predictions in currencies of what we mentioned on Monday, the 31st of October 2016: Once again tested 99.00 level but then sharply came down from the middle of the trading sessions. We are still recommending to keep building positions in USD around 99.00 level. On Monday, we still recommend buying Euro and other currencies around the lower side, or selling USD around the higher side level. On the down side USD may hold 96.71 level so watch this level closely. Euro can move up to 1.1111 level in this week, so book profit if it goes there.

On late Monday, the Scorpio Moon will bring both sides volatility. On Wednesday, the FED will announce decisions and due to the Scorpio Moon traders will get confused. Trade light or just trade in and out in currencies but medium term traders can hold selling positions in USD.

Stay short in Yen but one can cover Japanese Yen as it may move towards 0.9525 to 0.9250 level at this stage.

This is what we mentioned on Monday, the 29th of August 2016: We see Euro holding 1.1055 level and Pound 1.2925 level. We don't see it falling below 0.9410 level and on the higher side it will have a difficult time to move above 1.0198 level. For USD index 97.00 to 97.50 level will play the role of a Wall for dollar which dollar may not be able to breach at this stage, or maybe even for the next six weeks, and on the down side USD may test 92.50 level.

This is what we mentioned last Monday, the 25th of July 2016: This is what we mentioned on Wednesday, the 13th of July: *Any rise shall be taken as selling opportunity in Yen, in the next two months we can 900 pips in Yen or it will easily come down to 0.9200 level very soon. We don't see Yen moving above 0.9878 level and in the worst case scenario 1.0000 will be maximum side.*

*Friday USD tested 97.50 level and this is an important level. Dollar may keep testing this level during this week. **We don't see Euro going below 1.0923 and Pound 1.2988 level.** Pound should be in you aggressive buying list until it holds this level.*

On Monday, the 11th of April 2016 we stated: *Last week USD traded negative, and lost value against most of currencies. There are still chances that USD may test 92.50 level so watch USD trend closely, and start taking positions at 92.50 level.*

Emerging market currencies have done very well and it's time to close positions if you are short or medium term traders. Rupee won't fall much so don't short Rupee but surely Rand, Real, Peso and Rubble will lose some value from middle of Monday.

Australian won't hold above \$0.7725, Canadian dollar 0.7900, Euro 1.1475, Franc 1.0555, and Yen 0.9288 level.

This is what we mentioned last Thursday: *Pound is ready for 1.4123 mark. Sell Pound and add more Swiss Franc sell.*

We are not recommending any new short in Euro, surely one can acquire some positions in Euro for the short period of time.

Emerging market currencies are getting ready to for bottoms expect few won't be trust like Rand and Rubble. Wednesday we see many currencies gaining some value but stay away from Pound, Canadian and Franc as they can keep making new lows so hold positions with 3% more corrections.

This is what we mentioned on the 22nd of December: *Euro will struggle to move above 1.1075 and may hold value 1.0725 so watch these both levels closely.*

This is what we mentioned on the 23rd of April 2015: *The Medium and longer term trend is still very positive for USD but for the short term a mix to bit weaker trend indicated. USD Index have achieved our target of 100 and now down side 95.00 or at worst case 90.00 level will be great buying.*

Dollar is our longer-term buying trade so we won't recommend shorting dollar, we recommend buying USD on any weakness. Euro higher side 300 pips and lower side more than 3000 pips. We don't see USD index going below 95.00 levels.

Remember this what we mentioned on the 5th of March 2015: *Currency war has nothing to do with USD Friday USD gained value as predicted. Medium- and longer-term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.*

Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.

This is what we mentioned on Monday, the 15th of Jan 2015: *Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just finished one interview from Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell as it will going to go back to par levels.*

This is we mentioned on the 2nd of October: *On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.*

Remember, this is what we mentioned in the month of July: *At this stage USD is trading in a positive direction without any break since the last three weeks. Finally, it is reaching a most crucial level because once it breaks 81.78 then the nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.*

This is what we mentioned in the month of May (2014): Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.

In this year's book "2015 financial predictions" we predicted the "final bear cycle in the market from the 27th of July to the 15th of August 2015". Yes, the Sun can bring some

uncertainty, but take this uncertainty as a buying opportunity at the same time in 2015 in the month of August.

Watch the 2088 level for S&P, as it is most tough astro resistance of 2015. In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

In our 2015 book we mentioned that commodities will have worst year of 2015, and so far precious metals, base metals, grains and softs have been struggling and they will keep moving down in the second half. Dollar will perform amazingly well in 2015 so hold positions and money in USD.

**Make wave of nature/astronomical cycle an integral part of your
trading/Investment strategies!**

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
