Fridays Daily Flash news (Unedited report)

Traders are asking what next?

Dear Members,

On Thursday most of global markets traded mix, on higher side there was profit booking was witnessed and why not when USA market rallied almost 8%. Friday will be also profit booking will come.

Dollar Index moved higher on Thursday, after making lower at 95.86 level which is key support point. Today we are recommending selling positions in USD around at higher sides.

Softs and grains traded mix. Time to acquire or add some more positions in our favorites.

Energy prices came down further lower as expected, keep closing shorts and I will recommend closing 90% shorts around today's low.

Thirty Year Bond may remain in the mix trading pattern.

As predicted 2833 level will be crucial for S&P so close long positions. On lower side 2715 level will be key astro support level so watch 2778 level closely in immediate time.

Metals struggled which is not good news for precious and base metal investors.

Watch the important support & resistance levels updated on Monday, the 5th October 2018:

- As predicted gold tested \$1246 level on higher side. Gold may struggle to move above this level for the more than five days and on higher side we may see \$1263 level. Dollar weakness is coming which may support gold prices as well. Silver will follow gold. Platinum will remain mix directions.
- Sell copper between \$284 to \$288 levels, sell palladium at \$1148 level, lower side support at \$1059 and \$978 level in the short term. Stay away from Zinc, Nickel and lead.
- Oil collapsed 14% in the last ten days as predicted from \$73.88 levels, and lower side it tested \$63.38 level which was our target.
- Gas important resistance level is \$3.18, closing above \$3.18 for three days could push prices toward \$3.43 level is selling level, closing below \$3.18 could push toward \$2.98 level.
- ERX tested \$24.55 from \$40.55 level. Now key important astro support level is \$20.55 level.

- Bond tested 137-00. Closing three days below this level could push toward 131-00 level. It will be hard to close above 141-00.
- The major astro resistance will be at 2747 and support at 2692 level for the short term.
- As predicted Dollar Index traded between 96.68 level, closing below 95.38 for the five days could bring dollar sharply lower. Pound will achieve 1.32 and euro 1.1575 in short term.
- Orange Juice came down from \$171 level and may test now \$138 as predicted. Coffee testing \$126.75 and great support at \$112.85. Sugar key astro resistance will be at \$14.70 and support at \$13.11 level. Cotton has support at \$77.55 astro resistance \$82.82. Lumber has support at \$307 and orange Juice \$135.
- Coffee is trading tested \$96.55 and bounce back strongly in the last three weeks and now higher \$126.75 level to watch.
- Cocoa came down as predicted now, important astro support levels are \$2025 and \$1925 these are buying level.
- Soy oil has had a major astro support at \$28.01, Selling is recommended at \$34.88.
- Selling recommended in wheat at \$568, Corn \$523, soy bean \$1088 and Soy meal \$400. Now major support for soy at \$815, corn \$343, Soy meal \$307, and wheat \$453.

Here are the trading strategies and ranges for Friday:

GOLD/SILVER/BASE METALS

On Thursday metals still struggled to move higher which is not good news for metal investors. I strongly recommend selling metals around higher side on Friday and hold your shorts, Now I will be worried if gold closes below \$1209 level. Weakness in gold can pull silver prices lower.

Copper, Palladium, and Nickel shall be in your selling list.

Metal stocks to remain in the negative directions.

These were great selling level recommended in Gold \$1243/1248, silver \$15.11, Copper \$2.79, Palladium around \$1128 to \$1148.

On 11 June this is what we stated: Metals to entered in worst bearish cycle for the medium term and these prices are possible on lower sides, if metal trade below these levels then they may adopt worst cycle till mid-October – Gold has major support at \$1209 to \$1181, Copper tested \$257 astro support, silver at \$14.15 and platinum \$781. Palladium is in a longer-term bear market so no lower side limit or any major support till \$623 and medium-term support at \$842. Selling recommended in gold \$1357, copper at \$332, Zinc 3575, palladium \$1135 and many other metals around higher side.

This is what we stated last week: From 7th May 2018, crucial astro cycle is starting for gold and you need to be remain very alert because trading negative could push gold toward \$1262 level and after that \$1238 and \$1209. Silver and platinum will follow gold.

Get ready to sell or short aggressive positions in Copper, Zinc, Lead, Palladium, Nickel from 5 June 2018. In the next two and half months 20% or more correction is on the way in the base metals.

This is what we stated in the month of February 2018: On the lower side gold will hold \$1305, \$1298 to \$1262 in 2018, closing below \$1262 would open the door to collapsed toward new multiyear low toward \$1209 to \$1145 or even \$1055. On higher side I am raising my target for gold to \$1509 if gold closes above \$1364 for the three to five days which looks very difficult, so it is getting clear that \$1364 is most crucial level for gold on higher side in 2018 and from this level only gold could start falling so at this stage \$1509 looks very difficult.

Friday's astro combination recommendation – Higher side selling is recommended in precious and base metals.

Friday's trading range: (December 2018 contract):

GOLD: \$1230.00 to \$1218.00 December (Spot ranges \$1229.00 to \$1216.00)

SILVER: \$14.57 TO \$14.28 Dec

COPPER: \$275.95 TO \$268.25 Dec

PALLADIUM: \$1123.00 TO \$1103.00 Dec

PLATINUM: \$877.00 TO \$859.00 Jan 19

INDEXES

On Thursday globally, markets lost some shine as some profit booking came in after strong rally. On Friday we strongly recommend selling positions on higher sides. On Friday both side trend is indicating due to Scorpio moon so be aware, don't buy on weakness as I would like to see whether 2788 level is strong enough for S&P.

Next few days markets will remain in the mix trading pattern, if you are making some nice profit the book some profit in stocks.

Dollar and energy prices will be key factor for emerging markets. Still hold long in YINN and INDL.

Stay sideline in European markets.

*Remember this Feb 2018 statement - Now my eye will be on 2550 level; if S&P closes below this level for the three days, then disaster will take place for stocks and S&P may test 2478. I may recommend closing long in stocks but lets see whether S&P will not closes below 2550 or it bounce back from this level. Yes. April is a very crucial month of investors. I am not worried after April but let's focus on April at this stage. If everything goes smooth, then we may see S&P testing 2900 level or even 3200. **April will be the deciding month for the future.***

This is what we stated two months back when S&P was at 2550 level: Last week we stated that S&P won't go below 2550 level and I still hold this prediction, in fact we don't see S&P remaining below 2650 level for more than five days. Buy most of the markets and hold positions. I am sure you must have closed long in UVXY between \$24.00 to \$34.00 level.

INDL, SPY, QQQ, TMV, TECH, AMZN, GOOGL and MSFT look like good buys on weakness.

Friday's astro combination recommendation: Book profit on higher sides. INDL and YINN is good bet.

Friday's trading ranges: (December 2018 Contracts)

HONG KONG (cash) –26355 to 22915

NIFTY S&P (Spot) – 10565 TO 10463

NIKKEI – 22625 to 22309

CAC – 5137 TO 5082

DAX – 11595 TO 11465

DEX EURO STOXX – 3241 – 3203

FTSE – 7139 TO 7065

DOW e-mini – 25365 TO 25055

S&P e-mini – 2827.00 TO 2690.00

NASDAQ 100 e-mini – 7221 TO 7101

RUSSELL e-mini – 1591.00 TO 1574.00

TREASURY BOND

On Thursday Thirty Year bond traded mix, stay sideline on Friday, don't buy any positions. We are still recommend selling higher side as lower side 131-00 to 127-00 level is easily achievable.

Once again one can buy TTT, TBT and TMV.

January this year we stated: *We started recommending selling in Bond at 172-00 with first most important support at 143-00 which got achieved and next level 137-00.*

Fridays astro combination recommendation – Selling is recommended on higher sides.

Friday's trading range (December 2018 contract):

TREASURY BOND – 137-21 TO 136.28

SOFT COMMODITIES

On Thursday cocoa prices came down, on other hand cotton and coffee traded mix. We are recommending keep accumulating these softs on lower side. Sugar prices are moved both sides. Yesterday we mentioned that deep pocket investors should keep accumulating Coffee, cocoa and cotton on weakness. Coffee will be great buy between 110.75 to \$114.55. Cotton will be great buy around \$75.75 to \$77.72 levels and cocoa \$2125 level and sugar at around \$12.35.

From middle of next week great buying opportunity will come so get ready.

So far during this year we said: *We expect all these three softs (coffee, sugar and cocoa) to bottom around 15 August 2018. Watch important support level in Sugar at \$9.75, if it trades below \$10.71 for the five days but now start accumulating sugar on weakness from middle of this week. Cotton may see \$78.78 level and selling orange Juice at \$171 with target of \$151 to \$141 level.*

Start buying cocoa at \$2098 level, and coffee will not close below \$101.25 level for the five days – December contracts. Lumber selling was recommended at \$645 with target of \$354.

Friday astro combination recommendations – Keep accumulating cocoa, get ready to buy coffee, cotton and sugar.

Friday's trading range: **(Dec 2018 Contract)**

COFFEE: \$118.55 TO \$115.35

COTTON: 80.55 TO 78.25 Dec

SUGAR: \$13.05 TO \$12.70 March19

COCOA: 2291 TO 2215

LUMBER: 357 TO 345 Jan19

ORANGE JUICE: 137.75 TO 135.00 Jan19

GRAINS

On Thursday grains traded both sides, great buying opportunity in wheat and soy on Friday. From 15 November big upward move can start buying wheat from 15 November fearlessly.

ON Friday trade in and out in wheat and soy, accumulate on lower side ranges mentioned here below. Stay away from corn, Soy oil and soy meal. Soy and wheat is ready to move toward \$945 and \$545 by the end of December.

Soy bean will be great buy around \$868 and \$855, and wheat \$4.88 level so don't miss it.

Corn will be only great buy around \$363 to \$353.

Now follow these levels, as they are very crucial and if these grains trade below these levels (all September contract - corn at \$343, wheat \$531, soy at \$815 and meal at \$308 these they breach these prices for the five days, it could bring disastrous news for grains traders but at this stage we don't see that happening.

Friday astro combination recommendations – Buy some positions in wheat and soy only around lower side.

Friday's trading range **(December 2018 contracts):**

CORN: \$376.00 TO \$370.00

WHEAT: \$512.00 TO \$500.00

SOY: \$887.00 TO \$870.00 Jan19

SOY MEAL: \$309.00 TO \$302.90

SOY OIL: \$28.23 TO \$27.70

ENERGY

On Thursday oil, heating oil and RB traded negative as predicted. Natural gas remained in the mix directions. Energy stocks traded negative and avoid any buying.

On Friday still weakness will continue, on 15 November Sun will be changing house which may support oil prices on lower sides. Short term our target \$61.21, and now these two levels \$59.88 to \$59.18 could be achieved today or next week levels. In the worst case scenario, we may see \$57.68 so keep all these level in mind. Avoid any new buying. Oil predictions has been our strength as in the last 20 years we able to predict every major move oil.

Oil prices collapsed by 15% from the recommended short at \$73.88 with price target of \$63.28 level. This was best short-term short recommendations, when Goldman and many big name were predicting higher side price target.

Today we are recommending closing all long in Natural gas as higher price have achieved, great selling at \$3.63 to \$3.68 levels but there are chances that it may test \$3.74 level.

Overall last three years this what we stated: So far, short-term trading has provided great returns in the last 18 months after my selling recommendation at \$97.00 mid-2014. You must remember what we mentioned two weeks ago: In 2001, we recommended buying oil at \$16.78 with the target of \$100 and higher. In August 2008, we recommended selling at \$145 with the target of \$32.00. Once again in 2014 we recommended selling oil at \$100 with target of \$27.71. I couldn't ask more from nature.

Friday astro combination recommendations for oil – Start covering shorts in energy.

Friday's trading range (December 2018 contracts):

OIL: \$62.08 to \$59.89

NATURAL GAS: \$3.59 to \$3.50

HEATING OIL: \$2.1912 TO 2.1353

RB GAS: \$1.6623 TO \$1.6075

CURRENCIES

On Thursday dollar recovered from lower level, 95.78 level held very well. We are strongly recommend to acquire positions in Pound, Swiss Franc and Australian dollar. Euro, Canadian dollar and Japanese Yen will be struggling.

Emerging market currencies recovered, we are recommending to staying sideways today and next week get ready to build very aggressive long positions in Rupee, Real, Peso and Rand.

On Friday keep building long in Pound and Australian dollar as mega move is coming in these both currencies.

As expected, Pound struggled to close above 1.3180 level, now 1.3025 will be great level to acquire more positions. If Pound moved above 1.3200 level in the next week then expect 1.3425 to 1.3775 level very quickly by the end of this December. Close long in euro at 1.1595 level. Australian dollar may test 0.7295 level.

Dollar Index has major short term astro support at 95.51 and 94.11 level so watch these levels very closely. Higher side top is achieved top in Dollar at 97.11 level.

We stated four months back and keeping the same recommendations - Great selling in euro around 1.2488 to 1.2555, Pound 1.3988 to 1.4375, Canadian 0.8188, and Australian dollar 0.8098. Great time to buy Real 3.88, Rupee \$68.75 and Peso 20.00.

In the worst-case scenario, we may see USD testing 88.61 level so remember this and buy USD on weakness as May 2018 onwards a major bull market is starting in USD. Don't trade with leverage positions in the current time cycle. Dollar won't fall below 88.61 and 88.31 and will have difficult time to cross 91.00 level at this stage, and Pound is ready to move towards 1.3375, Franc 1.0117, and Euro 1.1775.

Friday astro combination recommendation – Buy Australian dollar and Pound on weakness. Keep adding long in Rupee and Rand, buy longer term positions in peso. Stay away from Yen, euro, Franc and Canadian dollar.

Friday's trading range: (December future Contract)

DOLLAR INDEX – 96.75 to 95.81 Dec Future

AUSTRALIAN DOLLAR – 0.7284 to 0.7221 (Spot 0.7287 to 0.7221)

9 November 2018, 5.00 AM, Mumbai

Small part from past Flashnews:

Remember this what we stated on 22 September 2016: **Gold will struggle to move above \$1348 and silver \$20.28**; these are the selling levels in both these precious metals but remain as a day trader for this week.

This is what we mentioned on 11 August 2016: **Higher side in gold can rise maximum \$15 from current level of \$1348 and lower side more than \$300 by end of February 2017. Sell more NUGT around \$178 and JNUG around \$320; these levels were the previous highs last month. Add more buying in DUST.**

From stock market sections:

INDEXES:

This is what we mentioned on Tuesday, the 25th of January 2016: *Tuesday will be a great time to acquire positions in the emerging markets as well as in the European markets. If what we are seeing happens then S&P should move towards 1936 or even higher and down side, it won't go below 1844 or it won't close below 1862 level.*

On last week Thursday and Friday S&P closed higher and finally settled at 1901 levels. Those who have been following our works for decades must know how important our astro support and resistance levels are. Last year also the lower side astro resistance was 1827, and the higher side 2088. Both these levels played a very important role for the market. So far the support level of 1821 played an important role on Wednesday and we are hopeful that S&P won't go below this level in the year 2016 and that the astro support and resistance levels continue playing an important role.

This is what we mentioned the 18th of Jan 2016: *On Friday investors experienced a nightmare. It was day that no investor likes to see because on this kind of day the trading accounts of longer term investors are always deep in the red. In 2000 when the tech stocks crashed we never recommended any buying to investors because the astro cycle was negative for two years and it was clear that the market may remain down for the next two years. In 2008 crash which we predicted, we were also aware that the market would rebound from the 26th of February 2009. We recommended that the market would bottom out on the 6th of March 2009 and that investors should start accumulating stocks keeping in mind that they have to hold them for five years and that they would make a fortune. We strongly recommended, not to focus on the daily volatility and keep busy accumulating quality stocks. This proved to be very accurate advice.*

This is what we mentioned Monday 8 August: Billions of dollars follow our predictions closely so some support always comes around our predicted levels. 12th February 2016, S&P moved more than 360 points rally which no one expected.

This is what we mentioned on the 29th of February: At this stage we are expecting that the Indian market will perform, so this is a great time for international investors to put money in the US market as Rupee is at a historic low and the market has already corrected 26% from higher levels. Brazil and China have also performed negatively and it looks like a big turnaround is on the way from this week. It is time to build some aggressive positions in **BRZU at \$9.30, YINN \$10.65, and INDL \$8.40**. We recommended buying these ETF's before at higher levels and we are still recommending holding on to old positions and adding more positions at current levels. Watch emerging market currencies because any turn around in **Brazilian Real can push BRZU toward \$9.30 from 9.30**. S&P closed above 1938 and if it closes above 1938 for more than two days then expect it to move towards 1988 during this week or next week.

Two weeks ago we predicted that 1864 is a great buying level with the first target of 1938 and 1988. The first target got achieved very quickly and the second target will get achieved soon and after that our most important astro resistance level will be 2088, which has played a crucial role in keeping the bull away to move above 2088 for the last 16 months.

Thirty Year Bond

This is what we mentioned 10 September: *Tuesday Thirty Year Bond gained value, and same indicating on Wednesday. Fed may leave rate decision sideline which can push bond toward 168/169. Rate hike may bring prices 162 level. Overall trend is negative so get ready to sell on any rise if FED refuse to hike.*

In the last ten weeks' bond prices came down from 176 to 165 as predicted and our longer-term view is very negative so keep building sell positions on any rise.

By the end of this year we may see 162-25 and 157. Stay long in TTT, TBT and TMV.

Energy:

This is what we stated 17 April, Monday: *ERX lost more 5% value and if ERX trade below \$30.00 then there are chances that it will test \$25.50 level which means oil prices will trade negative in coming time.*

Once again oil will try to test \$54.78 but if this week it fails then we may see \$47.00 level once again. Major astro support point is \$49.88 level. RB Gas and HEATING OIL will follow oil.

On Monday oil prices will trade mix to negative but in USA trading one can take small buying, if oil fail to rise on Tuesday then expect major corrections in once again in coming time.

On Monday Natural gas will trade mix and prices will move both sides, trading in and out will remain best strategy in gas on Monday. Sell or short around \$3.38 level.

This is what we mentioned on 8 January - *Natural gas went down sharply as predicted and tested \$3.16 from \$3.83, and the volatile trend will continue in GAS so trade carefully. Oil will only be able to move higher if it closes above \$54.78 for three days which we don't see happening.*

Energy stocks traded mixed. ERX is unable to move above \$43.00 and oil above \$54.78 which is not a good sign for the energy market.

We are not changing any of the predictions we mentioned on the 3rd of June: Same kind of positive, RB GAS and heating oil also moved higher. Natural gas traded mix. ERX have been hanging around \$29.00 level and it must close above \$33.00 level to give bullish signal in energy stocks which we don't see at this stage moment.

Oil has been failing to close above \$48.88 level but same time it is not closing below 48.88 level as well. If oil closes above \$48.88 for three days, then the next price level of \$52.55 may get achieved. At this stage some selling is recommended around \$48.88 level and on the down side the important level to buy is at \$44,55. Oil prices have gained almost 70% from \$27.71 which we called the perfect bottom for oil.

This is what we mentioned on the 2nd of February: Many are predicting oil remaining in the teen's, but we do not see oil going below \$27.71, so I hope those who are targeting \$21 are doing their research well. Higher side it will struggle to move above \$35.18 levels, and if it does than \$44.55 is next target with \$48.88 selling level.

Natural gas lost a lot of value from our recommended selling price of \$2.44. today it closed around \$2.03. One can start acquiring very small positions in natural gas around \$1.72 and below.

This is what we mentioned in our book "2016 financial Predictions" in oil sections:

IMPORTANT NOTE: *As most of you are aware our view for energy has been very negative since June 2014. The overall trend in energy prices will remain negative so we do not recommend adopting long term positions. This means that do not take any trades earlier in the year and continue holding them for the rest of the year, because the higher side in oil will remain limited. There will be better opportunities to make money by trading in and out. Heating oil and RB gas will follow oils trend, so during this year we may see oil moving towards \$48.50 or \$52.95, and on the down side it may hold \$34.55. If it closes below \$35.55 for three days then there are chances that oil prices could fall towards \$29.65. Traders should take advantage of buying short term call options before any of the above-mentioned cycles start, and also book profit quickly before the positive cycles end.*

Energy stocks will trade mixed without any major movement, so longer term investors should not be putting any money in energy stocks. Any sharp rise should be taken as a profit booking opportunity if you are holding any energy stocks.

Natural Gas' trend will remain positive during 2016, so one can stay long in Natural Gas in the year 2016. However, it is very important to remember to keep booking profit before any of the above mentioned negative cycles start. Overall, Natural Gas will outperform oil in the year 2016.

For short term strategies and price targets please follow our weekly and daily newsletters.

Ninth Cycle:

*From the **26th of November to 31st of December 2016** - During this cycle we see positive momentum coming back in the energy market and oil prices will form a bottom, and oil stocks will also act positively. Even though this is a positive cycle, the higher side will remain limited. Natural gas and RB gas will move sharply higher during this period.*

Energy trading ranges for 2016:

Crude Oil: \$52.95 to \$29.78 (As predicted last year that oil may hold \$30.00 level and if its trade below for five days then possibility that could test 2002 low of \$27.78 level)

Natural Gas: \$2.88 to \$1.82 (higher side \$3.57 if it cross \$2.88)

Look at accuracy level about oil what we predicted in the book.

This is what we stated Monday, 31 Oct 2016: *Friday oil, heating oil and RB Gas traded negative as predicted. Energy stocks also went down but gas traded mixed. On Monday, oil will trade negative; stay sidelined or those who are holding shorts can continue holding and cover some around \$47.50. If oil starts trading below this, then expect \$46.75 to \$44.88 level, cover all shorts at \$44.55 level. Heating oil and RB Gas will trade negative or will follow oil. On the higher side, oil will struggle to remain above \$49.88 level which is the most important astro resistance level.*

Natural gas will trade on both sides without any clear directions so avoid trading but on the lower side one can buy GAS for Tuesday. Don't touch energy stocks as they will keep struggling.

This is what we mentioned on for Friday 2 Sep 2016: *On Thursday oil, heating oil and RB Gas prices went down sharply lower and weakness will continue Friday. One can cover 50 to 70% shorts around \$42.61 level in oil and 100% around \$41.78, so one can cover positions in heating oil and RB Gas on Friday.*

This is what we mentioned Monday, the 21st of December 2015: *Last week energy traders remained very nervous as they felt like abandoned by the bigger financial institutions and other large energy investors, but the truth is that every energy trader or investor is badly stuck energy trades.*

In 2008 we predicted a crash in oil from \$145 and in 2009 we predicted that it had bottomed out at \$33.00 level. That prediction provided great returns those who invested in oil and energy stocks. Now once again after the prediction of oil falling in 2014, since the last two weeks we have been predicting that oil would form a bottom around \$34.55 level so watch this prediction closely. I am not saying that oil won't fall below \$34.55 level but surely those who will buy around this level may be rewarded handsomely.

Maximum fearful days: According to the current astro cycle we see another 12 volatile or fearful trading days are pending but the down side is limited.

This is what we mentioned on the 27th of August 2015: *If oil trades below \$47.00 for two days then there are chances it could retest our magic support figure of \$44.55. If it starts trading below \$44.55 then next level \$38.50 so avoid buying positions.*

We are not recommending any buying in heating oil and RB gas, also one should avoid buying any energy stocks.

This is what we mentioned on the 27th of April 2015: *Adopt trading in and out strategy in energy, **but don't take any shorts in oil, heating oil or RB Gas. Sell some energy stocks.** Energy stocks will trade mixed without any major move so one can get ready to sell energy stocks. Higher side it is possibility that oil may see \$63.80 level, if its hold \$57.00 level. Keep adding positions in Natural gas around \$2.55.*

This is what we mentioned on the 5th of March 2015: *Oil shouldn't break \$47.00 level this time, if it does then surely scary time is coming ahead for energy investors. On Down side oil will hold \$47 and on the higher it will have a difficult time crossing above \$55.78 so watch these levels closely.*

Watch our higher side target \$55.78 to short and \$44.55 to aggressive buy. Stay away from energy stocks. Small support for oil is \$47.00. ERX won't be able to move above \$70.00 level, so selling is recommended in energy stocks when ERX reaches to \$70.00.

This is what we mentioned on the 3rd of January 2015: **On our predicted lower side target of \$44.55 is coming closer so one can cover 100% short positions and may be buy very small trade but I won't be buying as I would like dust to settle. RB Gas, heating oil and natural gas lost value as well on Monday. Don't buy RB Gas and heating oil but surely natural gas can be bought around \$2.71.**

This is what we mentioned on the 23rd of December 2014: **Oil can only get lower if it close below \$54.40 for three days, if it does then it will hit \$45.20 but chances of happening this is very less.**

This is what we mentioned on the 11th of December 2014: **Wednesday our fear proven very true, we strongly recommend to stay away from oil. When oil broke \$92.88 we recommended sell oil and get out from all energy product, when it broke \$88.88 we predicted it is reaching toward \$64.20. Two weeks back we mentioned that if oil falls below \$64.20 then chances are that it may move toward \$57.80 level. Most important level will be \$54.40.**

This is what we mentioned on the 5th of December 2014: **Oil and other energy products lost more value on Friday as predicted. We are not recommending any buying in energy stocks, oil, RB gas and heating oil. Natural gain gained value from the lower levels on Friday as predicted.**

On Monday the higher side will remain limited, and if oil closes below or trades below \$64.00 for more than seven hours then expect \$57.90 levels in the short term. Selling is recommended in energy and energy stocks on Monday. It looks like oil is getting ready to break \$60.00 so stay short or add selling on any fall.

Currencies:

This is what we stated 4 January 2017: **We don't see dollar index going above 103.78 level so watch closely and closing below 102.55 will push dollar toward 101.55 level. Most of currencies gained nice value on Wednesday, emerging market currencies had best day.**

On Thursday, most of currencies will trade both sides, buying is recommended on lower sides in most of currencies so don't miss opportunity.

Buy Pound, Yen, Australian dollar and Canadian dollar. Also buy Franc and Euro without fear.

Astro cycle changed late today on 3rd January so safe buying in all major currencies against USD.

Dollar closing below 102.75 will confirm that it would test the 101.55 level this week.

We are not changing any predictions in currencies of what we mentioned on Monday, 31 October 2016: **Once again tested 99.00 level but then sharply came down from the middle of the trading sessions. We are still recommending to keep building positions in USD around 99.00 level. On Monday, we still recommend buying Euro and other currencies around the lower side, or selling USD around the higher side level. On the down side USD may hold 96.71 level so watch this level closely. Euro can move up to 1.1111 level in this week, so book profit if it goes there.**

On late Monday, the Scorpio Moon will bring both sides volatility. On Wednesday, the FED will announce decisions and due to the Scorpio Moon traders will get confused. Trade light or just trade in and out in currencies but medium term traders can hold selling positions in USD.

Stay short in Yen but one can cover Japanese Yen as it may move towards 0.9525 to 0.9250 level at this stage.

This is what we mentioned Monday on 29 August 2016: We see Euro holding 1.1055 level and Pound 1.2925 level. We don't see it falling below 0.9410 level and on the higher side it will have a difficult time to move above 1.0198 level. For USD index 97.00 to 97.50 level will play the role of a Wall for dollar which dollar may not be able to breach at this stage, or maybe even for the next six weeks, and on the down side USD may test 92.50 level.

This is what we mentioned last week on Monday, 25 July 2016: This is what we mentioned on Wednesday, the 13th of July: Any rise shall be taken as selling opportunity in Yen, in the next two months we can 900 pips in Yen or it will easily come down to 0.9200 level very soon. We don't see Yen moving above 0.9878 level and in the worst case scenario 1.0000 will be maximum side.

*Friday USD tested 97.50 level and this is an important level. Dollar may keep testing this level during this week. **We don't see Euro going below 1.0923 and Pound 1.2988 level.** Pound should be in you aggressive buying list until it holds this level.*

On Monday, the 11th of April 2016 we stated: Last week USD traded negative, and lost value against most of currencies. There are still chances that USD may test 92.50 level so watch USD trend closely, and start taking positions at 92.50 level.

Emerging market currencies have done very well and it's time to close positions if you are short or medium term traders. Rupee won't fall much so don't short Rupee but surely Rand, Real, Peso and Rubble will lose some value from middle of Monday.

Australian won't hold above \$0.7725, Canadian dollar 0.7900, Euro 1.1475, Franc 1.0555, and Yen 0.9288 level.

This is what we mentioned last Thursday: Pound is ready for 1.4123 mark. Sell Pound and add more Swiss Franc sell.

We are not recommending any new short in Euro, surely one can acquire some positions in Euro for the short period of time.

Emerging market currencies are getting ready to for bottoms expect few won't be trust like Rand and Rubble. Wednesday we see many currencies gaining some value but stay away from Pound, Canadian and Franc as they can keep making new lows so hold positions with 3% more corrections.

This is what we mentioned on the 22nd of December: Euro will struggle to move above 1.1075 and may hold value 1.0725 so watch these both levels closely.

*This is what we mentioned on the 23rd of April 2015: **The Medium and longer term trend is still very positive for USD but for the short term a mix to bit weaker trend indicated. USD Index have achieved our target of 100 and now down side 95.00 or at worst case 90.00 level will be great buying.***

Dollar is our longer term buying trade so we won't recommend shorting dollar, we recommend buying USD on any weakness. Euro higher side 300 pips and lower side more than 3000 pips. We don't see USD index going below 95.00 levels.

Remember this what we mentioned on the 5th of March 2015: *Currency war has nothing to do with USD Friday USD gained value as predicted. Medium and longer term outlook is very positive. As stated dollar will have some difficulty crossing above 95.50 level for the short term but if dollar will break 95.50 then it may move towards 102.70 later this year. On the other hand euro will move towards 1.0730 to 1.0388. At this stage one should start covering all shorts in currency.*

Sell Euro around 1.1730 to 1.1788 and Franc 1.0988.

This is what we mentioned on the 15th of Jan 2015, Monday: *Most fund managers and market advisors are still analyzing the after effects of a rocking Swiss Franc on Swiss National Bank. I just finished one interview from Switzerland and they are too excited about Swiss Franc's move. Our view was very simple, we recommended that it will not be able to hold above 1.2270 level so if Franc moves to 1.2270 then it will be time to sell as it will going to go back to par levels.*

This is we mentioned on the 2nd of October: *On Thursday USD will trade mixed so we strongly recommend booking 100% profit in all short positions in euro, Pound, Franc, Yen and Australian dollar. Euro has moved down more than 1000 pips, Franc moved 750 pips, and Yen 4000 Pips. We will wait for few days before we put out a new strategy so wait for our weekly newsletter.*

Remember, this is what we mentioned in the month of July: *At this stage USD is trading in a positive direction without any break since the last three weeks. Finally, it is reaching a most crucial level because once it breaks 81.78 then the nonstop upside journey will start in USD. Also euro falling below 1.3355 level will bring huge corrections. I am waiting for USD to close above 81.78 because then USD will move like wild fire toward 87.88.*

This is what we mentioned in the month of May (2014): Keep adding USD on any weaknesses on Tuesday or around 79.50. Sell Euro around 1.3988, and Swiss Franc around 1.1470. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD around 79.50.

In this year book "2015 financial predictions" we predicted "final bear cycle in market from 27 July to 15 August 2015", yes Sun can bring some uncertainty but take this uncertainty as buying opportunity in same time in 2015 in the month of August.

Watch 2088 level for S&P, as it is most tough astro resistance of 2015. In April when markets were falling, we predicted S&P won't go below 1825, and by the 15th of June, S&P would achieve 1932 to 1955 and 1988.

In our 2015 book we mentioned that commodities will have worst year of 2015, and so far precious metals, base metals, grains and softs have been struggling and they will keep moving down in the second half. Dollar will perform amazingly well in 2015 so hold positions and money in USD.

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
