## Tuesday's Flash news

Dear Members,

On Monday markets traded mix, but energy and metals traded negative, Tuesday also we may see mix trend continuing but some selling pressure can come either late today or from Wednesday.

Grains will remain positive directions and currencies will give up gains after opening of USA market.

We are not changing any of our predictions; we still believe that Japanese Yen will gain 1000 to 1500 points against most of the currencies except US Dollar. We already mentioned last year that the era for USA equity and US Dollar is coming, so stay long in equity and USD.

Tesla, FNMA, FMCC, Starbuck, Visa, Master, Amex and green mountain coffee is doing great, these are our favorite stocks and they traded new multiyear high. We will recommend our new list during next week newsletter.

**This is what we mentioned yesterday: S&P, US dollar, and Uranium mining stocks are our favorite trade for medium and longer terms, but there is one financial instrument that is our favorite; coffee.** It has been gaining sharply and moved up from \$132 to \$146. Watch coffee closely as the frost session is coming closer.

**FMCC and FNMA are doing well.** Lately, uranium stocks are doing well. Three months ago, we recommended **Tesla Motor "TSLA"**, which went up more than 160%. Our recommended price was \$32.00. On Friday, it closed at \$79.40. It went up 40% higher in the last two trading days. In this weeks' newsletter, we recommended buying on Monday around \$53.00 and gave a target of \$200 within a year.

### Here are the trading ranges and strategies for Monday:

#### METALS

Tuesday we may see metals holding on lower side but higher side will also remain tight so follow below mentioned ranges for day trading. Palladium went up sharply on Monday; palladium will outperform all metals in the next two years. We won't surprise if it crosses \$1000 mark during this year.

Platinum and copper will trade weaker on Tuesday so sell around predicted high. Silver will struggle as well on Tuesday.

This is what we mentioned yesterdays: **We recommend selling metals on Mondays' opening or around the predicted higher range. Sell gold, silver, platinum and copper. Palladiums' positive time is starting from the end of May. Monday is a negative day for metals.**

Please remember this: If gold starts trading below \$1440, then \$1392 is possible. We don't see gold going above \$1479, 1488 or \$1495 (we will surprised if gold goes to \$1495).

Here is Tuesday's range: **(June/July 2013 contract):**

**GOLD: \$1445.80 to \$1420.30**

**SILVER: \$23.86 TO \$23.25**

**COPPER: \$337.10 TO \$330.90**

**PALLADIUM: \$720.00 TO \$701.20**

**PLATINUM: \$1495.90 TO \$1472.50**

#### **SOFT COMMODITIES**

Soft commodities traded mix on Monday except coffee went higher. Positive time till is coming for soft commodities from 27 May, when Jupiter will be transiting from last degree. Keep adding positions in coffee on lower side.

**Tuesday trading range: (July 2013 Contract)**

**COFFEE: \$147.90 TO \$143.95**

**COTTON: \$86.99 TO \$85.10**

**COCOA: \$2339 TO \$2293**

**SUGAR: \$17.44 TO \$17.18**

**ORANGE JUICE: \$150.20 TO \$145.55**

#### **INDEXES**

Monday most of stock indexes traded in the tight range but emerging market like India, Hong Kong and Brazil closed in negative. **As in the Sun will be changing house on Tuesday (today) 2.00 PM NY time, so short term market may achieve top today in Asian, European and USA market, maximum higher side is one percent from current levels in all major market.** We still believe that a bull market correction is on the way.

We still believe that it will be difficult for USA indexes to break last week higher predicted ranges, this is what we mentioned in the last week newsletter: *In last weeks' newsletter, we predicted the higher side for NASDAQ around 2988 to 3012, and S&P around 1648. These levels should be watched carefully. We are not recommending any new strategies; adopt last week and this week's newsletter strategies for stock market trading. Don't put 100% focus and money in short term trading. We always recommend putting 20%-30% allocations to short term trading and the rest 70%-80% for longer term.*

*Nikkei won't be able to trade above 15,000 in the current rally.*

This is what we mentioned last week: *S&P will only get weaker below 1607, just trade in and out. Today represents a negative day for the USA equity market from the middle of trading sessions. Asian and European markets may trade positively, but we recommend selling at higher levels with stop-loss. If the Stock market doesn't fall from late today and tomorrow, then load up call options of 1700 in S&P, but we still see some sudden uncertainty that may arrive in markets from late today in USA sessions.*

*This is what we mentioned yesterday: don't short S&P until it doesn't trade below 1607. Hold buying position in S&P until it remains above 1607. In this week's newsletter, we clearly mentioned about the strategies of 2013, so read it carefully.*

*At this stage, we will just recommend trading in and out or buying on weakness around the predicted lows and booking profits on higher levels.*

**Tuesday's trading range (June 2013 Contract):**

**AUSTRALIAN (Cash) – 5225 to 5178**

**NIKKEI – 14932 TO 14775**

**NIFTY S&P (Spot) – 6012 to 5929**

**SINGAPORE (cash) – 3435 TO 3425**

**HONG KONG (cash) – 23130 to 22942**

**CAC – 3935 TO 3870**

**DAX – 8318 TO 8223**

**DEX EURO STOXX – 2775.75 - 2741**

**FTSE – 6612 TO 6563**

**S&P – 1636.25 TO 1622.75**

**NASDAQ – 2992.75 TO 2765.75**

**RUSSELL – 976.90 TO 966.50**

**DOW – 15109 TO 14088**

## **GRAINS**

Grains traded positive on Monday on negative day which give clear indications that grains prices will move up sharply in coming next three days. Buy grains around predicted lows for intraday trading.

**Tuesday's trading range (July 2013 contracts):**

**CORN: \$665.25 TO \$645.50**

**WHEAT: \$719.50 TO \$699.25**

**SOY: \$1435.75 TO \$1405.75**

**SOY MEAL: \$421.80 TO \$410.70**

**SOY OIL: \$50.10 TO \$49.11**

**RICE: \$15.55 TO 15.32**

**ENERGY**

On Monday oil struggled to move higher as predicted so those who are already in short positions can hold their trades in oil, RB gas and Heating oil, and those who like to take trade can sell around predicted higher range of today here below.

This is what we mentioned yesterday: *Heating oil and RB Gas will trade weaker compared to oil, so we recommend selling RB gas and heating oil on Monday around the predicted high. The higher side will remain limited; oil will struggle to move higher above \$95.69.*

*Natural gas won't fall below \$3.84, so start buying gas.*

**Tuesday's trading range (all June contracts):**

**OIL: \$95.65 to \$94.12**

**NATURAL GAS: \$3.98 to \$3.86**

**HEATING OIL: \$2.9150 TO \$2.8610**

**RB GAS: \$2.8510 TO \$2.7820**

**TREASURY BOND**

On Monday, the Treasury bond will trade mixed to the weaker sides as predicted. On Tuesday it should make short term bottom so one can take small buying positions in it.

**Tuesday's trading range (June contract):**

**TREASURY BOND – 145-02 TO 144-00**

## CURRENCIES

Emerging markets currencies traded mix, but these currencies are ready to make new lows so sell on any rise. Yen traded mix on Monday, we may see rising trend coming in Yen from Tuesday as mentioned in this week newsletter.

Euro, Pound and Australian dollar may trade bit higher on Tuesday but negativity is knocking door in these currencies against Yen and USD. Either these currencies will fall after USA market open or from Wednesday. Stay long in USD.

Watch this prediction: *The Japanese Yen rising trend will come from this week by the end of the month, Yen may gain 500 to 700 points against Euro, Australian dollar and Swiss Franc.*

**Tuesday's trading range: (June contract)**

**DOLLAR INDEX – 83.50 to 83.00**

**AUSTRALIAN DOLLAR – 0.9969 to 0.9861**

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
