Friday's Flash news:

Dear Members,

On Thursday world equity market remained in positive directions. Rest of commodities also traded in green as predicted. Dollar and major currencies traded mix except Australian dollar and Rand went down sharply. FNMA and FMCC went up nicely but FCEL came down after market on news of issuing more shares. Biotech companies remained in demand.

This week Tesla, Apple, Microsoft, LinkedIn came up sharply from lows. Apple made big gain in the two trading days. Rest of world market traded positive. Metals traded negative as predicted, very few positive days are pending for metals. Oil moved up sharply higher as predicted.

On Friday we see stocks, commodities and Indexes will trade in sideways directions. Trading in and out should be strategy rather than holding commodities and Indexes. At this stage markets may take few weeks before they adopt one side directions trend.

Base metals traded sideways and US Dollar gained against most of currencies. Biotech and banking stocks traded positive.

Friday looks positive for emerging markets, our views on India is very positive even though there is lot of uncertainty on political front is there.

One should start buying FNMA, FMCC and RAD.

Hold positions in stocks and Indexes as we are in most unique bull era of all time. Keep adding stocks, USA and Indexes on lower side of day range. Keep buying put options in grains and metals.

Our recommended stocks ACHC, VRX, SCMP, FMCC, FNMA and Goldman went up sharply as predicted. One must have these stocks in their portfolio. AKS also went up almost 50% since our recommendations. Keep adding HZNP, FCEL, BLDP, PLUG, UQM, OPK and DXCM on any weakness.

Here are the trading ranges and strategies for Friday:

METALS

On Thursday metals traded positive as predicted and same kind of trend will remain there on Friday. We recommend trading in and out as mentioned below ranges here. Next will be most interesting for metals so read our weekly newsletter carefully.

This is what we mentioned on Tuesday: ***On Monday gold traded positive or above \$1247 which is positive sign for gold but if its trade above for the next two days then gold and silver remain in positive directions for this week. If gold fail to rise for the next two days then corrections will come sharply after this week.***

HUI gold bug index traded positive and closed around 210, watch 221 level closely as HUI will have difficult time to cross 221. We recommend trading in and out as Tuesday will remain mix to weaker day or we may see some selling coming back in metals.

This is what we mentioned last Friday: *Copper traded positively on Thursday, but gold traded mixed. Friday is also a positive day, but gold may not be able to take full advantage. A sell on rise is indicated in precious metals. If gold breaks \$1236, then expect \$1247 to \$1263.*

Here is Friday's range: **(March 2014 contract):**

GOLD: \$1248.00 to \$1232.90

SILVER: \$20.28 TO \$19.88

COPPER: \$336.90 TO \$332.20

PALLADIUM: \$746.10 TO \$739.00

PLATINUM: \$1437.00 TO \$1419.70

INDEXES

Market traded mix on Thursday and same kind of trend will continue on Friday. Focus on stock specific rather than Indexes as this stage. S&P is trading 1834, not closing up convincingly, also not able to close above 1854 which making me confuse. At this stage I recommend holding stocks and avoid new buying positions in Indexes. Don't short market but surely you trade in and out on daily basis as our daily trading ranges are working very well.

This is what we mentioned on Wednesday: *Hold positions in all major world markets and stocks. Once again S&P may try to test 1854. Yesterday our predicted astro support point of 1811 proven very accurate.*

This is what we mentioned on Tuesday: *We are still recommending holding positions in our recommended stocks. At this stage we strongly recommend buying some positions around 1800 levels and same time buy stocks as well as Nasdaq. We strongly see emerging market like India and Brazil start moving higher to one should buy these markets.*

Buy stocks in USA rather than Indexes during this week. FNMA, FCEL, CPST and JBLU.

Apple and Microsoft are very close our buying price so one can start buying both these stocks from Tuesday. This is what we mentioned on Friday and we are not changing any predictions from it: *Our astro indicators are still not showing any negative major signs, so market will trade in both sides, any sharp fall should be taken buying opportunity and any sharp rise also should be taken selling opportunity. Higher side S&P can reach 1854 and lower side 1811. Mars and Venus may bring volatility but still both these planets are showing rising trend for market.*

The first major astro support for S&P is at 1811 at any weakness, so watch S&P trend closely and higher side resistance will be 1854 as mentioned last month.

Friday's trading range **(March contract):**

AUSTRALIAN (Cash) – 5335 to 5290

NIKKEI (Sep) – 15870 TO 15580

NIFTY S&P (Spot) – 6350 to 6305 **Buy around lower levels**

SINGAPORE (cash) – 3150 TO 3130

HONG KONG (cash) – 23051 to 228014

CAC – 4337 TO 4290

DAX – 9765 TO 9660

DEX EURO STOXX – 2945 - 2905

FTSE – 6800 TO 6730

FTSE/JSE – 42185 to 41755

S&P – 1845.25 TO 1830.25

NASDAQ – 3610.00 TO 3577.25

RUSSELL – 1172.00 TO 1160.50

DOW – 16428 TO 16250

TREASURY BOND

As predicted Thirty year bond traded mix and same kind of trend will continue on Friday. This is what we mentioned: *On Monday, the Treasury bond gained value as predicted but Tuesday we recommend booking profit on higher sides. Our buying recommendations at 128 was proven a great point. It will be difficult for Thirty year to close above 132 level.*

The thirty year bonds traded mixed. 128 is a very strong astro support point which we predicted six months ago when we recommended selling at 150.

Friday's trading range **(March contract):**

TREASURY BOND – 131-16 TO 130-15

SOFT COMMODITIES

Cotton prices zoomed on Thursday, sugar started bottoming out so one must take small buying positions in it. Sell cocoa and avoid rest of soft commodities. Here what we mentioned yesterday:

Keep adding buying positions in cotton as prices will rise up to 87.00. Sugar buying time is coming so buy on any weakness below \$15.50. Cotton will have strong support at \$83.00 level and Cocoa will have strong resistance around \$2820.

Coffee has to break \$124 and cotton \$84.88 for positive indications. As predicted, sugar is coming closer to \$15.50, so get ready to take small positions in sugar.

Friday trading range: (March 2013 Contract)

COFFEE: \$120.30 TO \$117.05

COTTON: \$87.35 TO \$85.40 Buy lower side

COCOA: \$2782 TO \$2729

SUGAR: \$15.63 TO \$15.27

GRAINS

Grains traded mix on Thursday, don't trade with any aggressive positions in grains because we don't see any one side trend so trade in and out on daily or short term basis. Friday grain prices will trade mix or in narrow range. Next week trend looks very negative.

Trade in and out in the predicted ranges in grains. Stay away from any aggressive holding positions in grains on any sides at this stage. Trading in and out in grains remains the best strategy in the last 18 months.

Friday's trading range (March 2013 contracts):

CORN: \$431.75 TO \$423.50

WHEAT: \$579.50 TO \$565.50

SOY: \$1321.00 TO \$1308.75

SOY MEAL: \$436.90 TO \$428.00

SOY OIL: \$38.40 TO \$37.80

ENERGY

Trade in and out Oil, heating oil and RB gas on Friday as mentioned in the below ranges. We will come out with clear strategy once we see Friday's trend so wait for next week newsletter. This is what we mentioned yesterday: *Wednesday oil traded positive as predicted. Oil will trade sideways to positive*

from Thursday so Wednesday you should cover any shorts if you are holding. Aggressive sell is only recommended if oil close weaker on Thursday and Friday.

We still don't see GAS moving higher above \$4.64, at this stage trading in and out should be your strategy.

Remember this: *If oil breaks \$91.28 and below this price for two days then we may see oil going toward 83.98. Heating oil and RB Gas will follow oil.*

Friday's trading range (February 2014 contracts):

OIL: \$95.15 to \$93.05

NATURAL GAS: \$4.48 to \$4.29

HEATING OIL: \$3.0105 TO \$2.9595

RB GAS: \$2.6120 TO \$2.5730

CURRENCIES

Buying is recommended in emerging market currencies like Rupee, Rand, Real and Peso from Friday against Euro and Pound. Also we see Dollar gaining value against Euro, Australian dollar, Pound, Franc and other currencies. **At this is stage buying dollar is the best trade on this planet.**

Yen down side is limited so buy Yen against Euro, Pound, Franc and Australian dollar. Plan to build call and put option positions.

One should start buying USD around 80.75 levels, don't miss this buying opportunity.

This is what we mentioned ten days ago: *Keep adding USD on any weakness on Tuesday or around 79.80. Sell Euro around 1.3888, Pound around 1.6620, and Swiss Franc at 1.1370. Emerging market currencies will trade a bit weaker or sideways from Tuesday. We strongly recommend taking some buying positions in USD. The best time for USD will start from the 15th of January, 2014 against Euro and pound.*

Friday's trading range: (March contract)

DOLLAR INDEX – 81.29 to 80.81

Reading daily range: When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
