## Wednesday's Flash news: Commodity crash is coming

Dear Members,

On Tuesday all major stock market fell sharply, India and Indonesia crashed hard. Indonesian market is down more than 25% in this month. Indian market also traded horribly, major culprit was Rupee. It is just coincidence that all major emerging market currencies are in influence of Saturn's "Sadasaati" because most of them start with letter "R and P" (Rand, Real, Rupee, Rupiah, Rubble, Peso).

USA market fell sharply on concern of Tapering, changing Fed Chairman and debt ceiling. Commodities moved higher but positive astro indicators are ending soon so they are nearer to collapse.

Emerging market currencies fell sharply, Rupee fell more than 5%, and rest of emerging market currencies fell as well. Dollar remained sideways or bit weaker against Euro and Pound. Rest of commodity currencies also traded negative.

Tesla and recommended other stocks also did well. Keep adding PLUG, CPST, HYGs and time is coming to load up FNMA and FMCC. We don't see Apple going below \$455, so load up if it comes around this price, in fact one should start buying up from \$462.

Grains and soft commodities traded mixed to bit negative and Treasury bond received as predicted.

All major stock market traded negative in the last two trading sessions as predicted in this week newsletter, another two negative days are pending. Also we recommended buying oil and metals during the first two days of this week, Wednesday should be final day for commodities to get support from astro cycle. One can take small sell positions around predicted high in commodities.

### Here are the trading ranges and strategies for Wednesday:

#### METALS

This is what we mentioned in this week newsletter: Monday to Thursday of this week will be positive so buy on any sharp rise, and we won't be surprised if gold reaches to \$1432 or silver \$24.88. **We strongly recommend selling metals around these prices as we won't be surprised if metals closes sharply lower.**

On Tuesday precious metals remained positive but base metals traded negative as predicted. Wednesday will be good day to take sell positions in metals around predicted higher range. This is what we mentioned yesterday: *Base metals trading negative, and they will struggle on Tuesday as well. Higher side in precious metals will also remain limited, so trade carefully. According to us this is final week in which precious metals could hold value but still overall trend looks bit shaky.*

This is what we mentioned on Monday: *On Monday, metals should remain positive. We strongly recommend staying away from any shorts in metals for the next few days. Trade in and out, buy around the lower levels and book profit around the higher side.*

We are sure you must be following this advice as recommended three weeks ago: **Don't adopt any medium term buying or selling strategies at this stage or until the 14<sup>th</sup> of September. The best strategy will be trading in and out at this stage.**

**Here is Wednesday's range: (Gold/platinum Oct 2013 and rest December contract):**

**GOLD: \$1427.50 to \$1401.90**

**SILVER: \$24.95 TO \$24.00**

**COPPER: \$335.00 TO \$329.10**

**PALLADIUM: \$753.10 TO \$712.90**

**PLATINUM: \$1545.80 TO \$1514.50**

## INDEXES

Another most uncertain two days are pending for all major markets. Stay away from any buying on Wednesday but surely Thursday get ready to buy stocks and Indexes across the world including emerging markets (**Don't go high leverage, best trade will be buying calls rather than futures**). There will be panic in all major market on Wednesday, wait for Thursday flashnews.

One can start buying S&P around 1620 and now next astro resistance will remain 1647. This is what we mentioned yesterday: We see S&P getting support at 1643, 1631 and 1623, so keep adding positions around these levels, on higher side we may see astro resistance at 1670.

This is what we mentioned yesterday: *On Monday, all major markets traded negatively, so stay away from any buying positions for the next 48 hours. Yesterday we mentioned that S&P may touch 1639 and in the worst case scenario 1623. Watch these levels very closely and don't miss a buying opportunity.*

## **ENERGY**

Time to book profit in energy on late Wednesday as positive time is ending on Wednesday for energy. Those who don't want to take major risk in shorting oil, but surely one can start taking some put options positions in oil. Also RB Gas and heating oil looks very negative, but stay away from any aggressive position on Wednesday but one can take small sell positions on higher side on Wednesday.

Tuesday also we see both sides move in oil, heating oil and RB Gas. This is what we mentioned on Monday and oil traded exactly as predicted: *On Monday, we see oil, heating oil, and RB Gas moving up from the lower range, **so buy on any weakness or around the predicted lower sides.***

***Another 48 hours are positive for energy.*** *Read this week's newsletter carefully, because soon energy futures will start falling down. Natural gas will remain sideways or weaker so avoid any buying in it.*

*Since the last three weeks, we have predicted the overall trading range of oil to be from \$109.78 to \$102.39. Avoid trading natural gas.*

### **Wednesday's trading range (September contracts):**

**OIL: \$109.98 to \$107.30 Oct contract**

**NATURAL GAS: \$3.60 to \$3.48 Oct contract**

**HEATING OIL: \$3.1775 TO \$3.1125**

**RB GAS: \$3.0690 TO \$2.9910**

## TREASURY BOND

Tuesday Thirty year bond rebounded strongly as predicted, we highly recommend staying for in thirty bond for few more day. This is what we mentioned yesterday: *On Monday, Now one should start covering short positions in Treasury bond, and those who have covered can just trade in and out now.*

Thirty year bonds traded mixed. 128 is a very strong astro support point which we predicted four months ago when we recommended selling at 150.

### Wednesday's trading range (Sep contract):

**TREASURY BOND – 133-26 TO 132-15**

**SUGAR: \$16.60 TO \$16.30 Oct**

**ORANGE JUICE: \$138.00 TO \$133.30**

## GRAINS

Tuesday grains fell from higher range as predicted. We strongly recommend selling Soy, Soy Meal and corn around prices on Wednesday but one can take buying positions in wheat.

One can start selling grains, this is what we mentioned yesterday: *As predicted grains traded very positive on Monday on weather concern. Tuesday also we see positive trend continuing in most of grains but soon selling opportunity is coming so get ready to sell.*

### Wednesday's trading range (Nov/December 2013 contracts):

**SOY OIL: \$45.10 TO \$44.05**

**RICE: \$15.87 TO 15.55**

## **CURRENCIES**

On Tuesday there was blood bath in emerging market currencies, Indian Rupee and Rupiah lead the crash. We strongly recommend staying away from any trading positions on Wednesday but get ready to take some buying positions on Thursday in emerging market currencies.

Rupee lost 5%, but soon volatility is getting our and by the end of the year Rupee will gain. Anyway next week's weekly newsletter will be interesting which I started writing from today, it is detail outlook on stock market and currency market.

This is what we mentioned on last week Wednesday: *Worst time for Rupee is getting over on 4 September (My birthday), so first time we are advising one should start taking small positions in Rupee during the next ten days. One can buy call options next month, we won't surprise at all if Rupee come back to 60.00 level in the next three weeks. As the time I am writing this newsflash, Rupee is already trading above 64.00 levels. Our important level of 63.39 is taken away so now next most important level is 65.21/73, we don't see Rupee closing above these levels otherwise Rupee can fall toward 71.54 (1% chances as we still see 65.73 will be top in dollar against Rupee).*

Rest of currencies traded mix on Tuesday, buy dollar on lower side as we see positive trend in USD start from late Wednesday. Australian dollar, New Zealand dollar and Pound will trade weaker. Swiss Franc and Euro will try to hold gain but today will be proven final day for both of these currencies.

Stay long in USD index, this is what we mentioned on Monday: *We still don't see euro going above 1.3488. Sell Euro around these level without any fear.*

*This week will be the final week of volatile trends in the emerging market currencies, so trade in and out on any sharp rises and falls. The best strategy will be intraday trading rather than positional trading.*

*The next most important level for USD is 80.60, but our astro indicators don't see dollar going below 80.73.*

**Wednesday's trading range: (September)**

**DOLLAR INDEX – 81.55 to 81.05**

**AUSTRALIAN DOLLAR – 0.9015 to 0.8910**

**CANADIAN DOLLAR – 0.9553 to 0.9499**

**BRITISH POUND – 1.5591 to 1.5482**

**EURO – 1.3451 to 1.3325**

**JAPANESE YEN – 1.0350 to 1.0227**

**NEW ZEALAND DOLLAR: 0.7850 to 0.7748**

**SWISS FRANC – 1.0928 to 1.0830**

**MEXICAN PESO – 076170 to 074840**

**RUPPEE – 68.56 to 65.18 (Spot)**

**RAND – 10.55 to 10.27 (Spot)**

### **INDIAN MARKETS**

This is what we mentioned on Tuesday for Indian market in Indian daily flashnews: Monday most of breweries stocks did well (GM Breweries, EDL, Tilaknagar, Radic0 Khaitan, Jagatjit). Hold investment in Food and brewers sector.

Banking stocks may bottom out but before they bottom out they may feel heat of expiry. From next week these stocks will start moving up.

Monday Indian market traded both sides, we may see some volatile trend on Tuesday and Wednesday as mentioned in this week newsletter.

This is what we mentioned last week Tuesday: *In the worst can scenario Nifty may see 5190 or 5000, by end of this year but we strongly believe that Nifty will move toward 7000.*

**Best trade:**

**Get ready to sell metals big way as huge corrections is on the way from September**

**Oil may trade positive but also ready to tank big,**

**Grains will trade weaker**

**Get ready to load up stocks and Indexes from late Thursday**

**Final 48 negative hours for emerging market and emerging market currencies**

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
