Thursday's Flash news (unedited copy)

Great time to buy Indexes and call options

Dear Members,

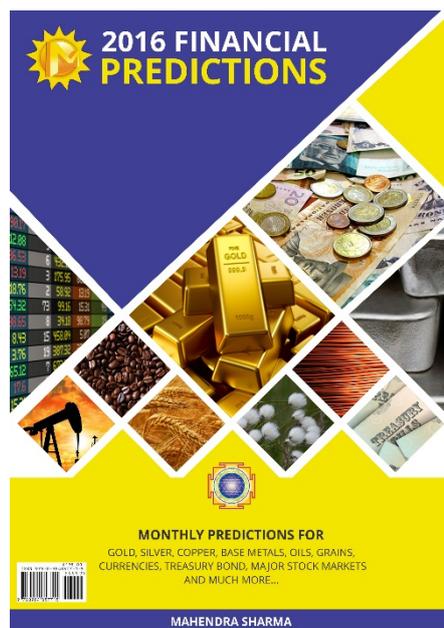

On Wednesday Indian market traded mix to bit negative, Rupee made new low and closed above 68.00 and commodities gained value. Sugar prices traded lower and soy bean moved higher.

Thursday will be final day to accumulate Nifty and bank Nifty so don't miss this buying opportunity. Oil will trade both sides and metals will achieve top and from USA trading sessions it will start giving up gains. Nifty is holding 7400 level which indicating 475-point rally in the month of February and Rupee will make big U turn from here so commodities in Rupee term may start losing drastic value. Gold higher side is achieved on Wednesday and in this week newsletter and yesterday in daily Flashnews we predicted gold to start moving down from \$1128 levels.

After the first two negative cycles the stock markets have entered into a third volatile cycle which will push the market higher but with uncertainty. We clearly stated that if the market moves up 5%, then they will come down 2%. Basically, with every 500-point rally, there is room for the market to move 200 points on the down side, but the overall trend will be positive during the current cycle. Here below two cycles have taken from this year's book "2015 Financial Predictions"

First Cycle:

From the 1st of January to the 11th of January 2016 - The market will trade in an uncertain trading pattern due to the Scorpio Moon and New Moon. The moon will rise on the 10th of January, so we recommend investors to watch this cycle very carefully. Many traders who booked losses or closed trades during the end of the year might start reinstating positions, but we are not recommending any aggressive buying during this period. You can plan what you want to buy and what positions you want to accumulate for the medium and longer term during this cycle. This cycle may bring some uncertainty in the market because we are all aware what the Scorpio moon is capable of.

Second Cycle:

From the 11th of January to 21st of January 2016 - During this time cycle, the market will remain directionless but buying will keep coming on the lower side, and I am right in my reading of the astro cycle then the market may form a great solid bottom. Any sharp correction during this period should be taken as a buying opportunity. The overall sentiments in all the major markets will remain mixed to a bit negative. We do strongly recommend taking aggressive positions during the last 63 hours of this cycle, or before the 20th of January, because on the 20th of January Mercury will rise in the east which is a positive astro move for the market.

Third Cycle, which already started from 22 January and all major markets made bottoms, and it should make major changes in market sentiment either today on 28 or on 29 January.

I am sure you must have bought this year's book "2015 Financial Predictions", and the market traded negatively during the first two astro cycles of the year as predicted, and we have just entered the third astro cycle which could provide amazing returns to investors so read the part about the third cycle once more, and look at the overall market outlook section closely. If I am not making any mistake in my reading of the astro cycle's then this USA market, and the Indian market can move 10% higher aggressively, and before you can even start analyzing what is going on, you may miss the greatest buying opportunity.

Today we would like to give simple note and you should act immediately:

Buy some aggressive positions in market as we see big move in Microsoft coming after earning. Our astro cycle system clearly indicating at least 350 points rally on Friday and there is possibility that S&P may move 50 point from 1874 today's closing. NASDAQ can easily move 150 point from 4125.

Through away any email you receive that stating that market is going lower or crashing because these emails will keep away from greatest buying opportunity of 2016 in market at this stage so remain focus and accumulate positions by going 100% in. We don't see S&P going below 1862. We expected both side move in market on Wednesday, and now get ready for big rally on Friday, Thursday also market may close green. We predicted market either made second low on Wednesday after making bottom on 20 January at 1803. March Future 1862 level will be history for S&P.

Facebook announce great earning which may have positive impact on market but tomorrow Microsoft should provide great earning too which can push Microsoft toward all-time high so don't miss buying opportunity in Microsoft.

This is what we mentioned yesterday: *Monday market and oil traded negative, and on the other hand gold and Thirty Year Bond moved higher on uncertainty. Profit booking was expected to take place in the market as well as oil on Monday. On Tuesday once again the market and oil will make a bottom but won't fall much from Monday's closing. Oil and the market can turn around big time on Wednesday so you should be well placed in your trades. We strongly recommend buying S&P, Nasdaq, DOW as*

well as oil on Tuesday before the market closes, and if I am not mistaken then on Wednesday, Thursday, and Friday all the major markets can rally big. The US market will outperform every market by moving 5% higher on Wednesday, Thursday and Friday. If I am right, then this will be one of the best money making weeks which will start from mid Tuesday and will continue till Friday.

Wednesday will be the FED decision, and no one is expecting any rate change. Many metals and Bond traders will be focusing on the rate decisions.

Apple will announce earning tomorrow, we are excited about it, read our daily stock report closely.

Friday most of the global equity markets closed sharply higher. Nikkei was up 1000 points or around 6%. Those who invested in the markets during last week must be happy with their investment decision because if we are not making an error in reading the astro cycles then Friday was the bottom of 2016.

Energy prices moved sharply higher on Friday which also supported the sentiments as huge buying came in. Oil \$27.71 and S&P 1821 should be the lows of 2016. We may not see these prices again this year, and though our view is not that bullish for oil it may hold this level and may move in a sideways direction once this rally is over.

Other commodities like softs, grains and metals traded directionless. Emerging market currencies made a U-turn from mid Thursday and they are well off from their lows. Russian Rubble went from 85.60 to 78.50 within twenty hours and many other emerging market currencies also acted very aggressively so it looks like emerging market currencies have also made a bottom and that this could be very negative news for commodities. It looks like S&P may not trade below 1862 level again for a long time.

I am sure you must have enjoyed reading our book, and we would appreciate it if you add your comments. If you think that this book is something worth having for investors, then please recommend this book to them. Many of you must be wondering why I always push so hard when it comes to selling my book? I always wanted the masses to see that there is a theory which uses hidden indicators and those indicators can guide us very correctly. There may come a stage when I will stop writing the yearly predictions books because it takes months of efforts and calculation to write them. This might be my last book.

On Thursday we recommended buying APPLE in Fridays daily stock report with target of 10 to 20% rise from \$95.00. On Friday Apple moved sharply higher and this rising trend will continue.

Many stocks have moved aggressively, they made substantial gains from Wednesday and those who accumulated on Wednesday must be feeling luck. Emerging markets are in our favorite list, these ETF's are trading at their lows and the higher side is wide open. **FMCC, FMNA and ALK** moved sharply higher, and we recommend to start accumulating positions in FMCC and FNMA.

Here are the trading ranges and strategies for Thursday:

GOLD/SILVER/BASE METALS

Positive cycles in precious metal will end on Thursday. We are strongly recommending selling gold on Thursday as mentioned in this week newsletter. Great time to buy DUST, gold will fall sharply also on Friday. In Asia and European market gold may hold value but in USA market gold will start moving sharply lower. Gold will fail to close above \$1123.90 level for more than three days and it won't be able to move above \$1132.

Book profit in metal stocks, and buy bear etf DUST. Buy also GLL, and sell GDJ.

Silver failed to close above \$14.55 level as mentioned yesterday. Other base metals will hold value but may not be able to hold in terms of emerging market currencies. Great time to sell dollar in Rupee terms as we see 3000 Rupee fall in folds prices in the next three weeks from current level 26800.

Watch emerging market currencies as they are ready to gain value so Gold may lose in Rupee, Real, Peso, Rand and Ruble terms.

This is what we mentioned yesterday: *Base metals will keep moving higher on Wednesday and Thursday so no shorts are recommended. Hold long positions in platinum. One can buy base metals like Lead, Nickel, Aluminum and Zinc.*

Gold won't be able to trade above \$1123.80 for more than three days. Sell Silver as well around \$14.55 level. If there is any sharp rise after the FED decision, one can take short positions as metals will start falling from mid-Thursday.

Important point to remember: After five years, gold's time cycle is changing against most of the emerging market currencies so it will start losing value against Rupee, Real, Peso, Rand, Ruble and many other currencies. Gold may lose 20 to 30% value against these currencies. If you are invested in gold in these currency terms, you should get out. This phenomenon will happen for the first time in many investors' lives so traders in these countries have to be very careful. Sell gold and buy these emerging market currencies. Gold will keep losing value in dollar terms too.

A few important past predictions and levels for Metals from the Daily Flashnews are at end of this letter.

Here is Thursday's range: **(March 2016 contract):**

GOLD: \$1130.90 to \$1115.15, higher-side selling recommended, if \$1115 break then \$1109 level is possible

SILVER: \$14.65 TO \$14.30

COPPER: \$206.90 TO \$203.50

PALLADIUM: \$505.00 TO \$495.00

PLATINUM: \$887.00 TO \$877.00

SOFT COMMODITIES

Coffee and lumber traded positive but sugar and cotton traded negative. We are still not recommending any buying in softs excepts coffee. Stay away from sugar, cotton, cocoa and orange juice. Stay away from sugar if it remains below \$14.00 then chances that it may retest 12.88 level. Buy more coffee and trade in and out other softs.

Remember - Coffee will struggle to close above \$128 and the maximum down side is \$112 or \$109. One can start accumulating coffee if it starts trading above \$118.00. Cotton will struggle to close above \$64.88, and sugar \$15.45. On the down side cotton will hold \$61.28 and sugar \$13.45. At this stage we not recommending any buying in cocoa, orange juice, lumber.

Thursday's trading range: (March 2016 Contract)

COFFEE: \$121.18 TO \$116.75 Buy

COTTON: \$61.15 TO \$60.41 Avoid

SUGAR: \$13.77 TO \$13.36 avoid

GRAINS

Soy, meal and soy oil traded positive as expected, add more positions in soy meal and soy bean. One can also buy some positions in wheat and corn on Thursday around lower sides.

Soy and meal are our favorite so add both on any weakness.

This is what we mentioned yesterday: *On Wednesday one can trade in and out as per the ranges mentioned below, but one should get ready to **buy some aggressive positions on late Thursday as soy, corn and most of the grains can move sharply higher from the lows.***

Buy some aggressive positions in soy tomorrow around the lower sides. Don't put a stop-loss, because we want to hold positions. One can accumulate soy meal and wheat for the short term.

Remember this is what we mentioned on the 14th of January: Members must buy grains because we see big weather related issues coming from the end of January which could bring disasters to many places on this planet, and any crop damage news can push prices higher. We have been watching our grains accuracy level very closely, and at this stage our accuracy levels are very high so take advantage of this. Trade in and out in wheat and corn, but soy products should be in your buying list on Monday. The lower side in Soy, soy oil, corn

and wheat is limited from current levels, not more than 2%; but on the higher side we see that 5-7% positive moves. **We don't see corn going below \$354, wheat \$455, soy \$845, Soy oil \$29.70 and soy meal \$260.**

Thursday's trading range **(March 2016 contracts):**

CORN: \$371.00 TO \$365.00

WHEAT: \$480.00 TO \$470.00

SOY: \$893.00 TO \$877.00 BUY

SOY MEAL: \$275.30 TO \$270.15

SOY OIL: \$31.17 TO \$30.48

ENERGY

On Thursday oil traded positive as predicted. Energy stocks trade very stable. We are strongly recommending to buy more ERX, and hold positions in oil. Oil reached our first target of \$32.88 levels from \$27.71 levels, our maximum higher side target will be 35.07 so one should start booking profit in oil at around 32.70 and keep booking profit on rise. Get out 100% around \$35.00 level.

On Thursday oil prices will trade positive and once again some profit booking will come around at higher levels.

This is what we mentioned yesterday: *Tuesday oil prices moved sharply higher as predicted. We are recommending adding more buying positions around the lower sides without any fear as oil is in the process of bottoming out. Add some positions in heating oil and RB Gas around the lower sides. Natural gas will trade on both sides. Don't buy any major positions in energy stocks.*

The best strategy will be trading and out in oil which will make you good money. However, you should remember that when you buy 10 contracts around the lower ranges then book profit in 8, and hold 2 for the medium term as we don't see oil going below 28.38 and on the higher side we may see \$35.00 levels.

Few past important predictions and levels for energy of daily Flashnews are at end of this letter.

Thursday's trading range **(All March 2016 contracts):**

OIL: \$32.98 to \$30.65

NATURAL GAS: \$2.19 to \$2.09

HEATING OIL: \$1.0609 TO 0.9925

RB GAS: \$1.1018 TO \$1.0245

INDIAN RUPEE

On Wednesday most emerging market and frontline currencies gained value expect Rupee, Pound, and Yen. Thursday still Pound and Yen can trade negative but Rupee will make sharp U turn from 2.30 PM Indian time so add before this time more positions.

We won't surprise if Rupee dollar falls back to 66.23 level which could be huge move so watch Rupee/dollar move closely. Sell some aggressive positions in Dollar.

This is what we mentioned yesterday: *At this stage we would like to talk about the emerging market currencies because historic fall or devaluations in these currencies will stop from here onwards. Those who bought these currencies during last week and those who will accumulate will see these emerging market currencies gain 5% to 20% value in currency convert terms by the end of this year.*

We are strongly recommending to accumulate emerging market currencies, this is not prediction just for Monday, this prediction applies to this whole week. The FED meeting is this week and many must be nervous but there is no need to remain nervous because dollar has a limited upside in emerging market currencies terms. Read our weekly newsletter carefully.

Though Rupee has acted very well in 2015 and every big currency trader is aware of that, many big institutions also watched Rupee's move closely because it acted very strongly against the all odds. This move in Rupee will give great amount of confidence to international investors.

This week Rupee will keep making gains, and any rise in USD should be taken as a selling opportunity. Last week we mentioned that the maximum higher side in Rupee could be 68.18 and we still believe that dollar won't be able to close above this. On the lower side Rupee will soon start trading below 67.01 and will remain in this range for this week. On Monday Rupee will keep gaining value. On Tuesday Rupee will trade on both sides, and Wednesday we see some weakness. On Thursday and Friday Rupee will gain value against most of the currencies.

Thursday trading range: (Spot price)

RUPEE/DOLLAR – 68.29 to 67.81

INDIAN MARKETS

Other Favorite, **Divi, Sun Pharma and Sun Pharma Adace** went higher too and many pharma stocks started acting positive with PSU banking stocks.

Today should be final day to acquire positions in market

because in the month of February before expiry we see Nifty and Bank Nifty moving at least 5% higher from current level or our target is 7875 level in Nifty and Bank Nifty can also gain 1200 points so great time to make money have arrived for Indian investors. Buy Indexes, rather than stocks. Hold positions **BOB, PNB, BOI and Laxshmi Vilas, and in private banks HDFC, ICICI and Axis looks great for medium term.** We strongly recommended buying in Bank Nifty at 15000 and Nifty at 7323 level, one can these both indexes at even current level of 7400 and 15500.

Book 100% profit in GM Brew as this one moved almost 700% since we recommended but don't take any short positions.

We normally don't recommend any aggressive trades but today we decided to do that due to very powerful astro combinations are developing. Buy Indexes and call options in Indexes on Thursday.

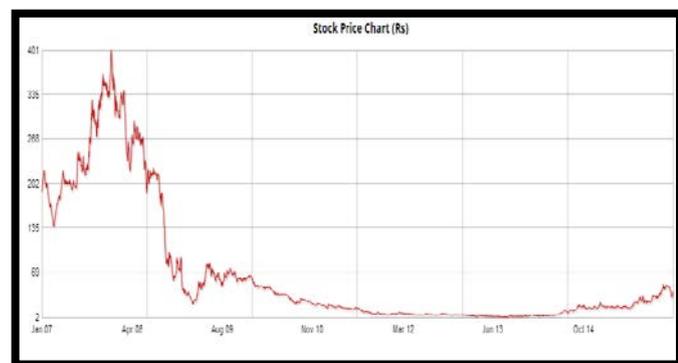

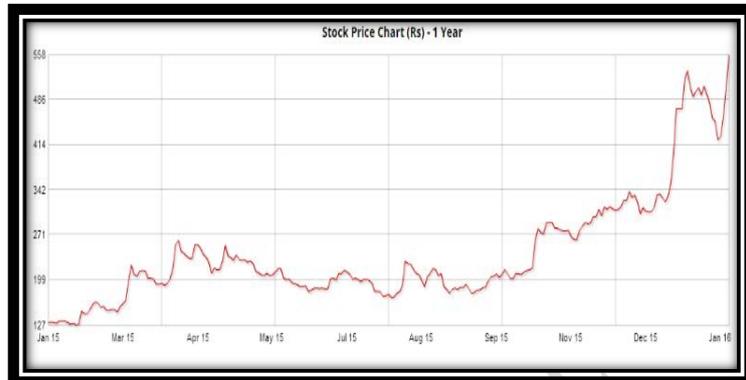

Tomorrow we will release detail daily newsletter with stock list of short, medium and longer term buying.

This is what we mentioned yesterday and holding same recommendations: *Wednesday astro indicators are mix so markets will trade both sides. Wednesday and Thursday are accumulations day in market so don't miss opportunity of buying.*

Finally after gap for four months, first time PSU banks are coming in our buying list except SBI. We recommend traders to take short term buying positions in. These banks will move sharply higher in the next three weeks; we are expecting at least 18% move.

*Our favorite stocks in "B" group moved up nicely on Monday and we are still strongly recommending to add positions in **Tanla, Mindtree, Mindtek, PTL, Axiscade and Moldteck.** Tanla should be keep accumulated as this stock should move at least 5 fold in the year 2016. First time we recommended at 32.00, we are still recommending at 37.00 with target of Rs. 155.*

On Wednesday most of B group stocks traded sharply higher. **Guffic Bio, Moldtek, MoldtekPac** went limit high, and other favorite like **Tanla, PTL and Axiscade** remain remained in green.

We don't see Nifty remaining below 7400 levels from more than three days, we are recommending to keep accumulating positions in market on weakness. Monthly expiry may play some volatile role for market but remember that month of February will be very strong month for market so buy some call options in market for Feb and March. Don't forget that India is on our top list of buying among most of international markets.

*This is what we mentioned on Monday: On Monday the Indian market will gain value, auto and banking stocks will keep performing well and these both sectors will make nice gains. The Banking sector will outperform most of the sectors any weakness in Nifty won't be able to bring Bank Nifty lower so we don't see bank Nifty touching last week's lows. Don't trade with high leverage but surely one should start accumulating Indian Banking stocks. There is no doubt that FI has more interest in private banks like **AXIS, ICICI, HDFC** and small bank like **Lakshmi Vilas bank** so one can start accruing positions in these stocks. Lakshmi Vilas bank can make 100% gains this year and this is one of favorite pick of 2016.*

*Who don't recommend many stocks at this stage but surely some stocks we like for the short term and are: **Sanofi, DIVI, Dishman and Indoco**. On the other hand, **energy stocks** still look great and **Indraprastha Gas**. From the Tech sector we like **Infosys, Wipro, Mind Tree, Tata Elxsi and Tanla Sol**.*

*We are not changing any of our outlook, **keep adding Tanla Sol**, this stock shall provide returns in multifold. I have positions in this stock and we highly recommend to get into this one.*

Final note: It is clear now that the market has formed a bottom of 2016. We don't see Nifty going below last week's low of 7241 and Bank Nifty 14755. Nifty has to close above 7442 level for at least five days, and on higher side will may see astro resistance at 7538 and 7669. This rally can take this market to these levels but at this stage watch 7442 is a level to watch closely and we will keep guiding you very carefully and will try to make sure that no error takes place from our side in the future.

Wednesday's trading range: (Spot price):

NIFTY: 7471 to 7401 (Spot) (recommended strong buy at 6065) Buy

BANK NIFTY: 15709 to 15448 (recommended strong buy at 10350) Buy

AXIS BANK: 422 TO 410 (recommended strong buy at 205)

ICICI Bank: 241 to 235

SBI: 188 TO 182

HPCL: 803 TO 786

BPCL: 876 TO 861

IOC: 403 TO 390

Recommended on 12 Oct 2015

This is what we mentioned on 2 January: *Airline stocks remained very hot, in the Second week of November we recommended buying most of the Airline stocks and so far they performed very well. We are still recommending holding positions in **Jet Airways, SpiceJet and Indigo**. Also last week one of our favorite stocks of 2015 "GM Brew" did amazingly. In May 2015 it was trading at Rs. 118 and last week it closed at Rs. 932. **Britannia, Vadilal, GM Brew, 3M India, Sequent Scientific and Guffic Bio** performed very well in the 2015.*

*Last week **Reliance** and other **frontline oil stocks (BPCL, HPCL, IOC, ESSAR OIL)** held value very well, **ACC** moved higher and other stocks like **Mastek, Mphasis Ltd, Tata Elxsi, Mindtek, Moldtech, Khoday India, Heritage** performed well, and we are still recommend holding positions in these stocks during this week.*

This is what we recommended on Monday 26 December: *We are strongly recommend buying indexes and keep adding recommended stocks. Reliance have been moving higher and we are still recommending add more **Reliance** as our target is 1047 for this week. Our buying recommendation in Reliance around Rs. 826.*

*Indian market is our most favorite at this stage among most of global markets. We are sure you must have been adding positions in Nifty, bank Nifty and stocks. **Moldtech** moved higher and keep adding mindtek, Tanla and food stocks will perform far better stocks like, **Hind Unilever, Khoday India, Heritage, VST, Britannia, Vadilal, and Kwaliti**. Hold positions in last week recommended stocks like **Hind Unilever, Indoco, ITC, and Reliance, HPCL, BPCL, and IOC**. Last week Steel stocks performed well, and the SBI also held 224 level which is a great sign; but let's see whether the SBI holds 224 this week or not. If it does, then the SBI will move in one direction and that is UP.*

his is what we mentioned on last week 11 December: *We still recommend holding positions in last week recommended stock, if you don't have any positions in these stocks then start buying today: Hold positions in **Hind Unilever, IOC, VOLTAS, Essar Oil, and Auto stocks**, also one can add some positions in SBI around 224. Add **Tanla Sol, Mindtek, Moldtech, and Axiscade** on any weakness.*

*Last week the Indian market traded mixed but the undertone of the market still remained very stable. **Indian Rupee** has been performing very well which is giving clear indications that something will unfold very soon. The Indian economic data will be very robust in 2016, and why not, when oil has provided a bonanza to the Indian economy. I don't know how many traders in India are giving*

importance to Rupee and Oil's trend, but surely Rupee and Oil will bring a huge positive impact on the Indian equity market and banking stocks so get ready for the most interesting time.

Take some more call options on January 2016, buy 8000 call options. The next big trend will be in energy stocks and banking stocks as the SBI is holding 224 level and the rest of the energy stocks are trading in a tight range which is clearly giving us a great sign. **Banking stocks are trading negatively. Watch the SBI level of 224 as we don't see the SBI going below this level. If the SBI falls below this level, then it may take the whole banking sector lower. A positive time will start in banking stocks from 16 January 2016.**

This is what we recommended 25 November: **On Tuesday buy recommended Mastek went 12% higher, Tanla, Guffic Bio and energy stocks also moved higher. We are still recommend holding positions in most recommended energy stocks like IOC, Reliance, HPCL, BPCL, ABAN as well as mastek, Tanla and Guffic. In the last six months Guffic Bio moved from our recommended price 23.00 to 56.00 and we are still recommending holding positions.**

Buy hospital stocks for the longer term like Apollo Hospital, Forties Hospital, PTL, Wockhardt, and Kovai med for longer term.

In our longer term buying list we are still holding our old recommendations since last two years: Tata Elxsi, Lupin, Cadila, Gufic, Kaveri Seeds, Excel Crop, Heritage Food, Britannia, Jubilant Food, Tata Coffee, IPCA, Torrent Pharma, Nacto, Indoco Remm, Suven Bio, United Spirits, Bharat Immu, PNB, BOB, SBI, AXIS, HDFC, ICICI, IFCI, Dishman, Divi, Aurbindo, Vadilal, Sequent Sci, Welspum, Jet Airway and GM Brew.

This is what we mentioned last 6 June 2015: **On other hand we see fall in gold which may affect adversely a large number of India gold lover as well as investors. Many may lose lifesaving in gold so stay away, hold some cash and if you own gold and silver then get out today and cash in money which can be issue later in buy back or you can invest somewhere else. There are chances that Gold may go toward Rs. 18000 or even lower in 2016.**

This is what we mentioned 27 May 2015: **Today we are adding three hospital stocks in our buying list for first time. These are all three stocks only bought for medium and longer term: Apollo Hospital, Regency Hospital and Kovai med. Cadila, Indoco, Lupin, Aurbindo, DIVI Lab, Sequent, Suven and Ajanta should be in your buying list on Monday, most of these stocks performed very well during last week. In banking you can add BOB, AXIS, SBI and UNION Bank. Hold investment in recommended food stocks.**

Last Monday's (25th of May) recommendations: **Reliance Ind, ONGC, McLeod Russell, M&M, Max India, HCL, Cipla, INDOCO Remm, Kopran, Torrent Pharma, Pfizer, Aurbindo Pharma and in banking sector one can buy SBI, Axis, Union Bank, Vijya Bank, and Citi Union**

Add more Britannia, Vadilal, GSK and other food stocks. Last year we recommended LT Food, KRBL and Lakshmi Energy in food sector. Add these stocks in your portfolio. On Tuesday we strongly recommend buying in: Britannia, ONGC, Maharashtra Seamless, Monsanto, JBF IND, AXIS and SBI.

Fall in Gold prices and rise in Rupee will add positivity in Indian market. Investors should hold positions in market and recommended stocks. Our target of 8578 should fulfill soon.

This is what we mentioned on the 27th of March 2015: *Hold positions in Pharma stocks Thursday Indian Equity market gained value. Once again Pharma stocks performed extremely well. In the last two years Pharma stocks made many new millionaires in India. We were fortunate to find out move in this sector well in advance and we are still being bullish on this sector.*

*One can add more **Indoco Remm, JB Chemical, Natco, Ranbaxy, and Torrent Pharma.** On other hand **Britannia and Vadilal** should be added. Those who are holding positions in **Lupin, Cadila, Torrent, Indoco, Suven, Dr Reddy, SUN Pharma, Stride, Sequent science, Ajanta and Ranbaxy.***

This is what we mentioned on the 5th of March 2015 (Thursday): *We confirm here that banking stocks are bottoming out here so don't miss to buy opportunity. Pharma and tech stocks bull trend is intact so hold positions in add more positions in our favorite stocks. **Indoco Remm, Suven and IPCA** is great buy now. **Britannia, Vadilal, Jubilant food, Tata global, Tata coffee and hind lever** should be added more today without fear in longer term portfolio. **Cipla, Cadila and Lupin** are our most favorite.*

This is what we mentioned on the 20th of January: *Yesterday **3M, United Spirit, SBI, MAX Indian, and AXIS Bank** performed well as predicted.*

This is what we mentioned 17th of January: *From our recommend **Siyaram, Raymond and MAX Ind** traded mix but rest of them went higher. On Tuesday we are still recommending add more same stocks in portfolio. **MAX India, Raymond, Cipla, Sun pharma and 3M** will keep moving higher. **Today we recommending to add Lupin in your portfolio.***

Reliance closed below 881, it has to trade above 881 as recommended yesterday for giving new life to reliance otherwise it will start moving down.

This is what we stated on the 15th of December 2014: *Yesterday our most of recommended stocks moved up nicely, **United Spirit, DR. Reddy, Lupin, Max India, Wockhardt** did well and will keep outperforming. **Keep adding Max India aggressively as 10% move is coming.** At this stage one should hold positions in Pharma, banking and recommended stocks. **MAX India, IPCA, Pfizer, United Spirit, Wockhardt, and CADILA** look like great buys so don't miss the opportunity of buying on Monday around lower side. All these stocks should move higher during this week.*

Good news of Rate cut from RBI is on the way in the next two weeks.

*Last Thursday we recommend buying in a few stocks and we are still recommend holding positions in these stocks: **Cadila, Indoco Remmi, Sanofi, Torrent Pharma, Pfizer, Glaxosmith, IPCA, and Maruti** look like great buys for the short term*

This is what we mentioned on the 27th of Nov: *We still recommend holding positions in **Vadilal, Britannia, Nestle, JBF IND (performed very well)**.*

*On Monday we see the Indian stock market positivity outperforming most of the other emerging markets. The Indian market has been going through a positive astro cycle for the last one year which is getting a lot of attention from international investors. Our buying call on Nifty at 5750 and Bank Nifty 8700 did amazingly well for investors. We still see that money will keep flowing out from gold and silver as these both will perform very negatively. We are not recommending anyone to buy gold and silver at any level as a lost is still pending on the down side. Don't trade or speculate in metals, energy, and in the commodity market with limited funds as chances are that you will lose everything. **If anyone holding gold etfs should get out from positions, and take some buying Banking and Pharma stocks.***

We are not changing our recommendations of what we mentioned 21 November: *Three weeks back we recommended buying **Honeywell** at Rs. 5100, and last week it closed around Rs. 7000; **ING Vysya** Rs. 610 to Rs. 850. **Vadilal Ind** went also higher from Rs. 180 to Rs. 223 and we still recommend holding these three stocks as we are expecting huge move on the way.*

*Last week **Ajanta Pharma, Honeywell and Vadilal** remained hot, and we strongly recommended buying **Vadilal**. Last year we recommended buying it around Rs. 124 and we are still recommend buying it at Rs. 270 with the target of 650 in the next 18 months.*

This is what we mentioned last Monday (8th of September): *On Monday our favorite stocks like **Cipla, Lupin, Cadila, Pfizer, Great Eastern Shipping, SBI, HPCL, BPCL, JBF Ind, Raymond, Zensar tech, Mastek and Testiy Bits**. Among all these **Mastek, Cipla, Zensar and Testy Bits** performed amazing well under pressure. We are sure many of you must have taken positions in these stocks. Here are few recommended stocks charts of last five days.*

This is what recommended on last Thursday: *On Wednesday few small cap Pharma stocks performed very well, stocks like **Suven** (we recommended around Rs.47 and yesterday it closed at Rs. 158) and **Venus Remm** (we recommended around Rs.180 and yesterday it closed at Rs. 295) and **Bharat Immu** (we recommended around Rs.09 and yesterday it closed at Rs.40 performed well. Hold positions in all these three stocks for medium and longer term. Yesterday we recommended **Indoco Remm**, keep adding position on any weakness.*

*Yesterday **Cadila, Lupin, Suven** and other pharma performed very well, and we still see these stocks moving higher.*

This is what we mentioned last 19 August, 2015 Tuesday: ***S&P 1905 and NASDAQ 3842/3789 level should be watched closely as we don't see USA market falling much from here. We still hold our prediction of S&P moving towards 2150 by end of this year and NASDAQ 4500. Few other markets will follow but many other international markets will struggle to move higher.***

This is what we mentioned on Monday (the 18th of August): *Negative or uncertain cycle for equity market ended last week as predicted. Sun changing house will give new directions to stocks but commodity will struggle badly. Last week ACC, Reliance, Cipla, CCL, Britannia and TATA motor performed extremely well. One of our stock 3M India achieved predicted target and now our next target for is 6000.* Important note: At this stage we strongly recommend buying cash rich companies (we will put out this list soon), also our most favorite stocks (Nestle, Britannia, Vadilal, SUVEN life, Sequent, Bharat Immu, Venus, coal India, Jubilant, Tata coffee, Lupin, Dr. Reddy, TCS and Tata Global).

If Nifty breaks 7578 level and trade below for two days can bring volatility in Indian market. Nifty is safe zone until it holds 7578 level. Next astro support level at this stage is at 7421 and in the worst case scenario 7288. On higher side still Nifty will struggle to cross 7775 level.

Medium and longer positions: *Our target for Reliance is 1350 from Rs. 838, which may have huge impact on index.*

This is small part from Indexes sections from second week newsletter of August: *As per astro chart we see both sides move continuing in all major markets for the next two weeks until Sun remains in Cancer with Jupiter. On 15 August Sun will be transiting into Leo, which is its own house and this will be a great time to add money in market on weakens. We have experienced in the last 25 years that whoever invested in between 15 August to 15 September's Sun cycle always made a fortune. Please take advantage of this period to accumulate positions in quality stocks.*

In Indexes trading in and out will remain best strategy. In big name TCS, Reliance, Britannia, LUPIN, Wyeth, SUN Pharma, GlaxoSmith, Hindustan Lever and Dr. Reddy still are our favorite. (Nifty shouldn't close below 7421 other will market may fall more three percent from current level).

This is what I mentioned in June 2014: *Just focus on Pharma and Tata Group at this stage. It looks like that Pharma stocks are ready to create history in Indian market. What Indian software companies done from 1997 to 1999, same era can be repeated in Pharma stocks. I was invested in software Indian stocks, in fact I invested in February 1996 \$17200 and that portfolio went more than 1.5 Million dollar. Only reason portfolio went so much higher because I was held my positions. We strongly recommend holding positions in our recommended stocks rather than doing speculations. We always recommend taking minimum risk in day trading and speculations, put 90% money in quality investment and 10% in short term trading in whenever opportunity knocking door.*

This is what we mentioned 18 June 2014: *So far Nifty held value of 7425 and levels so now Nifty will have another astro support at 7475 and 7532, watch these levels closely. Astro resistance will be at 7775, so this level should be taken as profit booking.*

This is what we mentioned in the first week of June: *Mercury changing directions will surely bring some uncertainty, so book 80% profit in our recommended stocks, still hold positions in our favorite stocks (Pfizer, Torrent Pharma, Gelllette, and CCL Product, add these four stocks in your portfolio. Rest or recommended stocks have been doing great and still you can hold positions in stocks like: Agrotech, Excel Crop, Kaveeri seeds, Tata Global, Tata Coffee, Tasty bits, Mount Eve, KGNENT, Hatsun, Rasoy PR, GM Brew, Radico Kh, Jagatjit Ind, EDL, Tilaknagar Ind, Mount Shiv, Nestle, Vadilal Ind and Britania and Aurbindo.*

Food stocks are doing great so watch our recommended food stocks list mentioned below at end of newsletter. Here we are putting list of stocks which we recommended in the early 2013: **Tasty bits, Mount Eve, KGNENT, Hatsun, Rasoy PR, GM Brew, Radico Kh, Jagatjit Ind, EDL, Tilaknagar Ind, Mount Shiv, Nestle, Vadilal Ind, Britannia, Suven, Sequent Scien.**

We don't want to say much today, we will talk more on Monday, here is what we mentioned yesterday: *Everyone who invests in India will be watching the elections results very closely; if NDA fails to get 282, then surely the market can correct five to ten percent. As predicted three weeks ago, the NDA getting closer to the majority, and BJP will get 245. It is always interesting to watch astro indicators, reading the astro cycle is an amazing study, but unfortunately, most of the financial astrologers don't have any past track records, but they start websites and try to fool people by copying other work and make investors fools (as few financial astrologer caught red handed by copying work). We hate to criticize them, but this is the truth.*

*In short we are not recommending shorting positions in India market, except small hedging positions. Also watch 7275 level closely on higher sides. Book profit in Pharma and tech stocks. **Add more Bharat Immu as this stock can fly sharply higher. After election result we will release new stock list.***

*Our predictions on Indian market have done amazingly well and at this stage don't focus do much on elections as money is always made in market with medium and longer term view. **Like six months our view was Nifty reaching 6775 when it was around 5950 and last same we predicted when it was at 5550. I still remember when Bank Nifty broke 8800, we stated that it won't go below 8200 and 2014 target 13500 to 15900.***

This is what we mentioned two months back: *Indian market traded sideways, we still recommend staying away from any aggressive positions in emerging market as well as in India. **Ajanta Pharma, Torrent Pharma, Bharat Immu, Suven, Sequent, Cadila** done very well on Tuesday in weaker market and will perform well on Wednesday as well. Our recommended food stocks like **Hatsun, Radico, Jagatjit, Jubliant food, Vadilal** and many other stocks have also done well.*

By end of May Nifty may reach 7225 and then we will decide what to do next.

*Watch **Bharat Immu** it trading around **Rs. 9.00**, I have been recommending this one since last two years, but stock never moved, please do research before you buy this one. We own this stock and we still see this can be takeover target.*

Buy aggressively Lupin, and one can hold positions in Torrent, Aurbindo Pharma, Ajanata Pharma, IPCA, Cadilla and Dr. Reddy. After our recommendations these stocks have done well and still we see at least 300% more gain so don't miss opportunity of buying. Any weakness in Pharma stocks should be taken selling opportunity.

Bharat immu is doing well, also food stocks are doing well, add more Vadilal and our most favorite **Excel Crop (already move 300% and our target of 1000% shall achieve).** **Kaveeri seed** done well by achieving over 2000% return and now we recommend 90% booking profit in Kaveeri seeds.

Also Yesterday **Venus Remm** moved up sharply, hold positions in it and those who don't have any positions should take some buying positions in Venus. **Buying recommendations in Nifty proven one of the best call after S&P as in the last two six weeks nifty move from 6030 to 6750. Nifty has to cross above 6775 for the two day to give clear bullish indications and Nifty may touch 7250 in the next eight weeks. We would like to add SIX stocks during this week this we recommended on 10**

March: NTPC, IDBI, Wockhardts, TATA COFFEE and TATA GLOBAL and Aurionpro Sol. Hold our recommended stocks, add more Tata Global and TATA Coffee, Emami, Dabur, Federal Bank, Honeywell Auto, and Reliance Comm.

These stocks also done well and we still recommend holding these list which we recommended on 20 Feb: 3M India Ltd around 3700, our target is 4400 in the next one months. Buy BHEL around 173, and target 250 in the next three months.

These recommendations made last quarter of 2013: **Buy Sequent Scientific, Suven Life and Fresenius Kabi for medium and longer terms.** Keep adding our favorite Tasty bit, Venus Rem, Jubilant Food. Excel crop and Kaveeri Seeds done very well, hold these both stocks as they are also our favorite.

Hold our favorite recommended these of stocks of 2013. Tata Global, Venus Remm, Hatsun Food, Tastybit and Jubilant Food, Vadilal ind 110, Excel Crop 180, Kaveri Seed, Agrotech 460, Britannia 710.

Reading daily range: When we predict a weaker trend it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a positive trend, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
