## Wednesday's Flash news:

Dear Members,

On Tuesday market fell as expected and our concern is at same level for today same as yesterday, we are not changing our predictions of weekly newsletter and yesterday's flashnews. This is what we mentioned yesterday: **On Monday USA stocks fell sharply as concern is rising on government shut down and debt issue. Tuesday and Wednesday Scorpio Moon will control trading floor so trade carefully, we highly recommend finishing old pending work rather than trading.**

On Tuesday FNMA, FMCC, and ALTI went up but other stocks went down sharply with market markets. Biotech stocks have been on run since last six month and if you want to hedge positions then you can trade BIS. Buy Zynga, HZNP and MCP also market should bottom out tomorrow so get ready to buy some positions in S&P. Today S&P broke most important support level of 1656, next support is at 1638, and most important level 1632 so either market should rebound strongly back to 1556 or it may retest 1632. Chances are that market will stabilized and rebound strongly on Thursday as **Thursday is very positive astro day for stock market.**

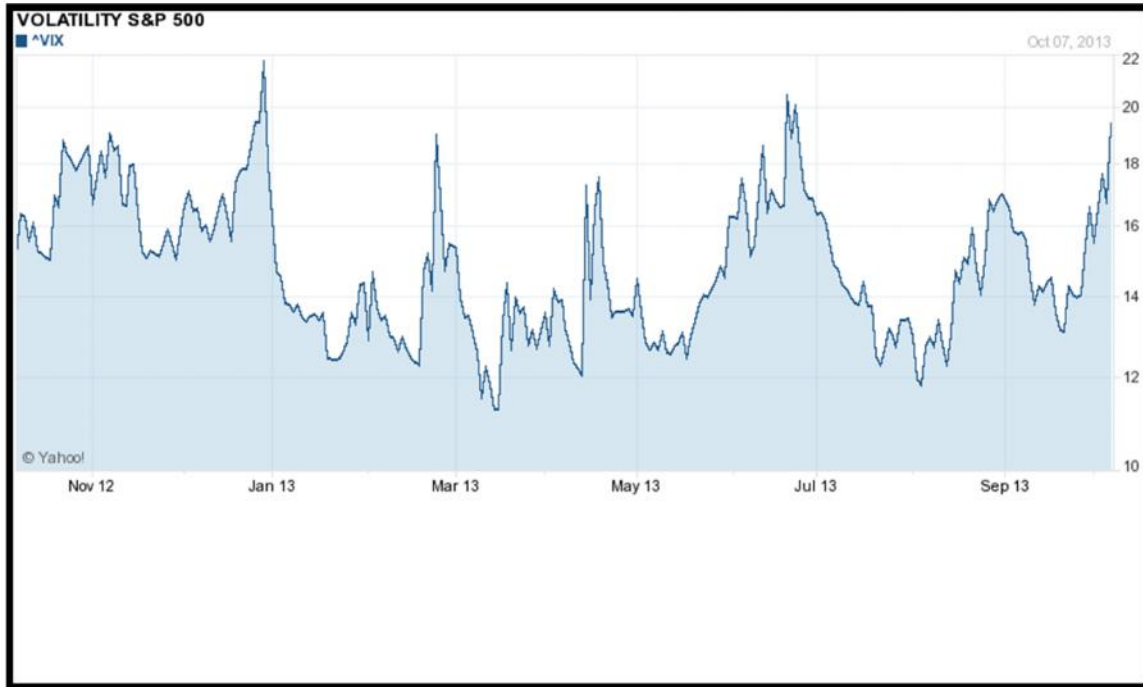

**Biotech stock have been on run since last one year, if you holding sizable positions in biotech and if you like to hold positions in biotech stocks then take some hedging positions by buying ultra-bear etf BIS:**

**Most important indicator:** Watch VIX (Volatile Index closely), it is has bounced back above \$20.00, we don't see VIX going above \$22.80.

Here are the trading ranges and strategies for Wednesday:

## METALS

On Tuesday metals traded mix without any directions. Same kind of trading pattern we see for metals on Wednesday so just trade in and out. **Down side for precious metals will remain limited but during Scorpio Moon we don't want to give any definite predictions.**

Hold same predictions as yesterday: *Anyway avoid any big position in any market on Wednesday, Tuesday we see metals trading both sides so trade in and out. Buying at lower side is recommended. Base metals will remain weaker due to Scorpio Mars so sell around predicted higher range.*

*Don't build any positions for any side, trading in and out is recommended. We are not recommending any shorts in metals at this stage. Our astro indicators don't see gold going above \$1343, but we may see some positivity; please read our weekly newsletter very carefully.*

**Here is Wednesday's range: (Dec 2013 contract):**

**GOLD: \$1328.80 to \$1207.20**

**SILVER: \$22.50 TO \$21.65**

**COPPER: \$330.50 TO \$326.20**

**PALLADIUM: \$716.10 TO \$705.20**

**PLATINUM: \$1407.80 TO \$1390.00**

## INDEXES

Stock tank on Tuesday as expected, we are still not recommending to jump in market on Wednesday morning but surely during closing hours one should take buying positions as from Thursday we see rebound in market or fall will stop in markets. **Don't miss buying opportunity on late Wednesday or Thursday. Scorpio Moon will end on early morning of Thursday in Asia so one can start buying positions on late Wednesday or early Thursday.** We don't see S&P going below 1632, so load up buying positions. Wednesday we may see S&P touching 1639.

JCP (J. C. Penney), finally came to our buying level. This is what we mentioned in our stock monthly report: **JCP:** *JC Penny's current astro chart is very negative but from May 2014 Jupiter is changing house and this will change the future of this company. We highly recommend buying this stock on any fall below \$10.00. In the worst case scenario it may go to \$8.00, but by end of the next year it will go back to \$20.00. One can accumulate on any weakness.*

*JCP is good bet for longer term so keep adding this on weakness in you portfolio.*

Once again we would like to remind you that avoid any aggressive trade on Wednesday. Hold our recommended stocks, add more Zynga, HZNP, FMCC and FNMA.

This is what we mentioned yesterday: *Finally traders are taking cautious steps as no sign of deal happening between Republicans and Democrats. S&P close below 1678 which opens doe for S&P testing 1656 so watch 1656 closely and take some buying positions in market. Though we won't recommend trading aggressively due to Scorpio Moon but call options will be best bet.*

*Next 48 hours looks negative so trade carefully, Thursday and Friday looks very positive so we recommend to buy positions in market on Wednesday on lower sides.*

*Our recommended stocks are doing great. Since last few days Greece bank stocks are rising sharply, one can take small positions in these banks for the short period.*

***In short – Get ready to load up stocks and Indexes on late Wednesday or early Thursday.***

**DOW – 14818 TO 14641**

**ENERGY**

On Tuesday oil traded mix to positive which surprised us, after Tuesday's move we recommend not to short oil at this stage. **Just trade in and out in oil rather than taking any side.** Natural gas will move down so sell on any rise on Wednesday.

For \$102.35 is important level and higher side we don't see it move above \$104.78 so it will trade in this range before it break any side. This is what we mentioned yesterday: *Oil is holding \$102.35 so far, but once it started trading below \$102.35, then we may see prices falling toward \$96.50. Another small support is at \$101.35, and after that there was no astro support for oil.*

*RB Gas and heating oil will trade weaker. Natural gas will also remain weaker. It will be very difficult for oil to trade above \$104.78.*

**Wednesday's trading range (November contracts):**

**OIL: \$103.99 to \$102.42**

**NATURAL GAS: \$3.80 to \$3.63**

**HEATING OIL: \$3.0480 TO \$2.9995**

**RB GAS: \$2.6400 TO \$2.5910**

#### **TREASURY BOND**

The thirty year bond prices will gain on Wednesday, buy on lower side and target 135. Our next target 135.00.

**The maximum higher side can reach 135 to 136 in the next two weeks.**

*Thirty year bonds traded mixed. 128 is a very strong astro support point which we predicted four months ago when we recommended selling at 150.*

**Wednesday's trading range (Dec contract):**

**TREASURY BOND – 133-25 TO 132-28**

#### **SOFT COMMODITIES**

On Tuesday most of soft commodities traded mix. Just trade in and out in soft commodities. We are not changing any predictions for the soft commodities: *We recommend don't block your money in soft commodities as this stage but those who like to take positions for longer term in coffee should keep accumulating call options of September 2014. The down-side is limited in coffee, but the strategy of trading in and out is highly recommend in soft commodities. The maximum down side in coffee will be 5%, or in the worst case scenario, it may reach \$107.55. Now any weaknesses should be taken as buying opportunities.*

**Wednesday trading range: (December 2013 Contract)**

**COFFEE: \$115.80 TO \$114.25**

**COTTON: \$84.09 TO \$83.10**

**COCOA: \$2745 TO \$2690**

**SUGAR: \$18.77 TO \$18.37 March 14**

**GRAINS**

On Tuesday grains prices fell as expected. Sell on any rise or around predicted high on Wednesday. This is what mentioned yesterday: *Monday grains gained value as predicted but from late Tuesday weakness can come so sell soy and soy oil around higher sides.*

This is what we mentioned Monday: *We are not changing any strategies for grains, but on Monday, we see small recoveries in grains coming, so cover or buy grains at a lower level for the short term trade. Trade in and out in the most of the grains. Book partial profits in Soy meal, wheat and Soy.*

**Wednesday's trading range (Nov/December 2013 contracts):**

**CORN: \$446.5 TO \$435.50**

**WHEAT: \$700.50 TO \$685.25**

**SOY: \$1300.25 TO \$1280.25**

**SOY MEAL: \$420.10 TO \$410.50**

**SOY OIL: \$40.75 TO \$40.05**

**CURRENCIES**

On Tuesday currencies traded in the narrow range. We are not changing predictions in currencies of what we mentioned yesterday: *Best trading of Tuesday will be selling Real, Rupee, Peso and Rubble as these currencies will fall sharply from today. Buy dollar against all these currencies and expect three to five percent gain.*

*US Dollar will also again value against Euro, Swiss Franc and Pound from middle of trading sessions.*

*Watch our mentioned trading ranges below here and take positions in favor of USD. Huge upside move in USD is coming. Japanese Yen will remain positive against most of currencies and on Tuesday it will come down after making predicted high.*

This is what we mentioned last week and still hold the same prediction: *In the worst case scenario, USD index will reach 79.50, so get ready to accumulate and add aggressive positions around that level. On Friday, we see Japanese Yen adding more value in it against most of the currencies.*

*Dollar is very close to the bottom, so one can start buying call options in USD. One can start buying puts in Euro as the fall is closer.*

**Reading daily range:** When we predict a **weaker trend** it means prices can break lower side and they can trade below predicted lows. (You can cover short but don't buy extra at lower levels until our indicators give buy signal).

When we predict a **positive trend**, means daily price can break upside and they can trade higher than predicted price (you can book profit but don't short that market).
