

# URANIUM NEWSLETTER SERVICES

Dear Members,

We have recently started one more newsletter service known as the “Uranium newsletter”. This is an early service with monthly newsletter. In 1996 we were highly focused on technology stocks, in 2001 metal stocks/oil stocks and investing in just these two areas in the last fifteen years would have made fortune. Now since last five months we have been recommending Uranium stocks but hardly anyone took this sector seriously. So I decided to create a monthly newsletter which will provide a detailed insight into the Uranium stocks and industry. I have done enough research and keeping close eye on this sector since last one year.

I am sure our recommendation will provide you with great information on the Uranium industry and also, we will place ourselves well in advance before this market enters into bull and bubble era. As we already mentioned that Uranium bubble will be biggest bubble to ever occur in Wall Street so why not get the best out of this joyride?

Here are few Uranium stocks charts, these stocks have moved up nicely in the last three months:

**URZ: Stock moved from 0.90 to \$2.55**

**URRE: This one moved from 0.30 to 1.63.**

**URG – Marching ahead with strong outlook of future**

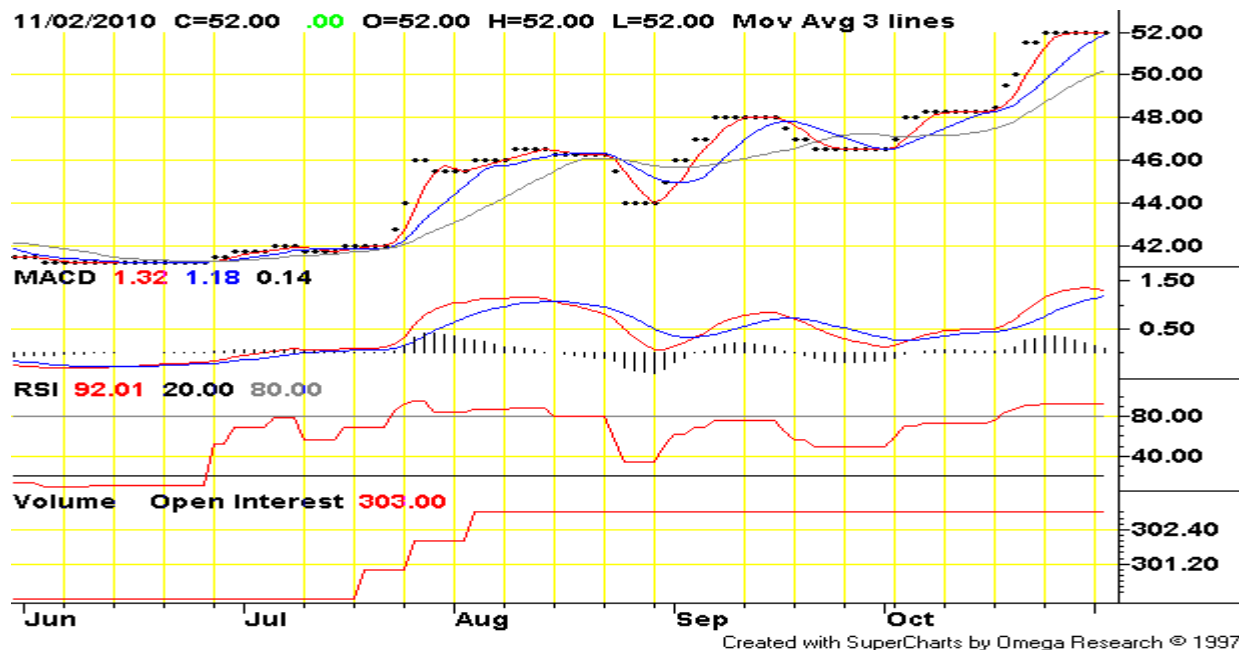

**DNN – Gaining ground**

In the last three months we recommended selling metals stocks and buying uranium stocks. There are plus points: many uranium mining companies hold metals and base metals deposit.

Nuclear plants are multiplying in many developing countries, (to run they require uranium), demands will multiply.

Technically Uranium prices have broken out from lows. Higher prices will attract many mine developers to developed mines.

Most important reasons, Mars and Saturn are positioning right to give birth to Uranium.

We will try to create awareness about the happenings in the industries and trends of Uranium stocks (globally). We will also further explore into how one could take full advantage of future coming bull market. Also we will include some of alternative energy stocks but our focus will remain on Uranium.

I myself am truly excited about this newsletter and I am sure you will be able to put additional strength to your portfolio.

First newsletter will be out soon in middle of next week.

To Subscribe for the Uranium newsletter services, visit the link mentioned below:
